How to Activate the Roller Ball

Step One
Unscrew black cap from tube.

Step Two
Remove and discard orange insert.

Step Three
Screw black cap on tube and shake pen vigorously for proper color match.

Step Four
Activate Roller Ball by pressing down on tip while moving pen. Practice technique before doing repair.

Motorcraft® Exterior Lacquer Touch-Up Paints

2-in-1 Brush-in-Tube/Pen Tip

ONLY MOTORCRAFT® HAS THE FULL LINE OF QUALITY, FORD-APPROVED, EXACT-MATCH, MAJOR-USE EXTERIOR TOUCH-UP PAINTS FOR USE ON FORD, LINCOLN AND MERCURY VEHICLES.

The air-dry, lacquer-based touch-up paint is ideal for retouching nicks, chips and scratches during new car prep and customer use. The built-in, full-width agitator thoroughly mixes paint for exact color match. The label color on each tube of paint approximates the paint color. Each paint tube's packaging also includes two user-friendly, unique applicators that make the product easy to use and control.

- A pen tip for precise retouching of fine chips and scratches. The smooth, controlled tip can be used at various angles.
- A tapered-tip brush for pinpoint or broad-stroke use. Can be used at any angle. The reinforced shaft of the brush is durable and narrow, allowing the paint to flow down the shaft to the brush with minimal dripping during application.

Due to their increased complexity, certain tri-coat colors require a two-step (separate basecoat and topcoat application) process in order to achieve an exact color match. As such, certain MY 2011 and forward tri-coat colors are packaged in Tricoat Kits (PMP-19K507-XXXXA parts, where XXXX is the color code). Each kit contains (1) 0.5-fluid-oz. tube of pearlescent topcoat, (1) 0.5-fluid-oz. tube of basecoat, and application instructions.

Motorcraft® Lacquer Touch-up Paint – Primer, PMP-19500-1000: Use to prime bare metal prior to color coat application.

Motorcraft® Lacquer Touch-up Paint – Clear Topcoat, PMP-19500-6000: Use to repair scratches, nicks, etc., which are only in the clear coat (i.e., not down to the color coat or metal).

Motorcraft® Lacquer Touch-up Paint – Charcoal, PMP-19500-6388G: Use to repair scratches, nicks, etc., in certain exterior trim. Check your vehicle for specific trim usage – it may be major or minor and it may be in more than one location. Examples of trim are as follows: fascia/cladding, bumpers, running boards, lower valence panels, spoilers, mirror housing, cowls, minor trim, handles.

All products meet Ford specification ESR-M2P100-C. For specific vehicle usage, reference the applicable model years in this brochure and/or the Paint Charts available via the "Quick Reference Charts" link at www.fcsdchemicalsandlubricants.com.

Your 2014 Paint Package Consists of the Following:

2014 Ford Exterior Assortment Kit PM-19K507-AK Dealer Price $109.95*
