Splicing Procedures

NOTE:

Refer to applicable wiring diagrams for circuit information.

NOTE:

This procedure contains multiple splicing techniques.

NOTE:

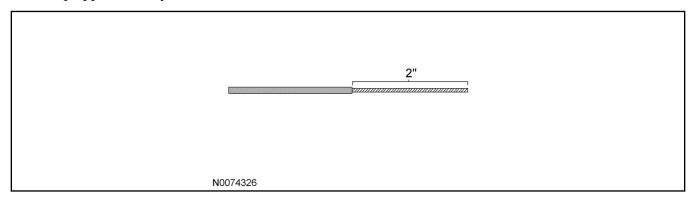

Review splicing procedures prior to performing any cutting/soldering/splicing.

2-Wire Solder "Center Splice" With No Wire Cutting

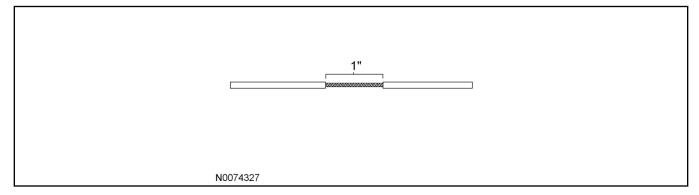

NOTE:

Follow this procedure when a wire can be spliced without cutting the wire in half.

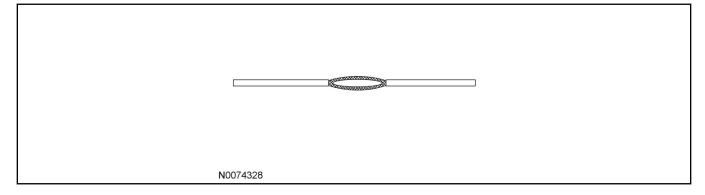

1. Strip approximately two inches of insulation from the wire to be installed in the vehicle.

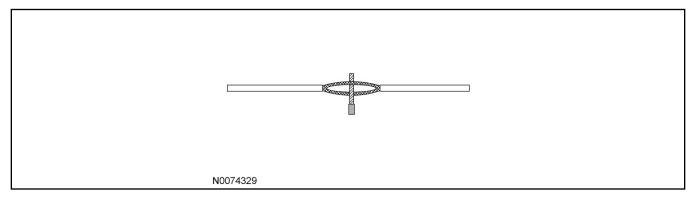

2. On the vehicle wire to be spliced into, strip one inch of insulation from the wire.

3. On the vehicle wire to be spliced into, separate the strands to allow the new wire to be placed.

4. Insert the new wire between the parted strands. If more than one wire is being spliced, wrap them in opposite directions.

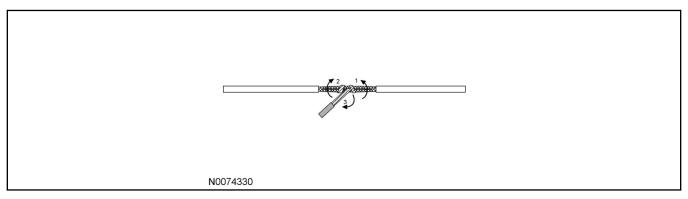

NOTE:

Use Rosin Core Mildly-Activated (RMA) Solder. Do not use Acid Core Solder.

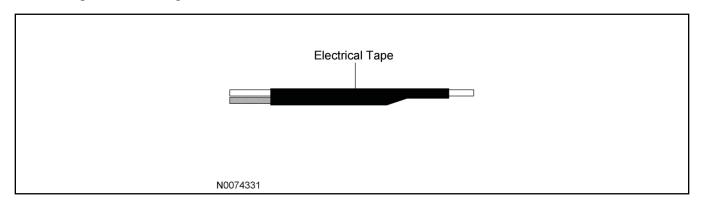

NOTE:

Wait for solder to cool before moving wires.

- 5. Wrap the new wire around one side of the split strands, then wrap it around the other side.
 - Solder the connection.

- 6. Wrap the connection with electrical tape so the tape covers the wires approximately two inches on either side of the connection.
 - Tape the wires together as shown in the illustration.

2-Wire Solder Splice/Ratcheting Crimp Tool Splice Procedure

NOTE:

For 10-14 AWG Use The following "Ratcheting Crimp Tool Splice Procedure".

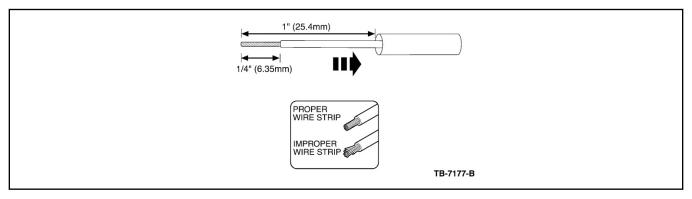

NOTE:

For Splicing Procedure Use Wire Splice Tool Kit (164-R5903).

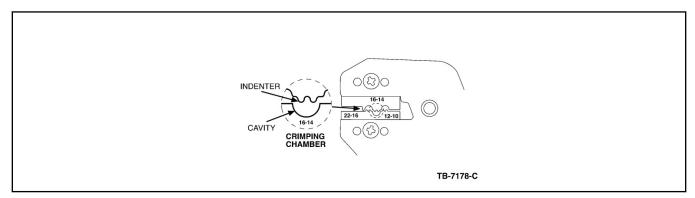

7. **NOTE:**

The strip length will vary depending on the butt splice and wire in harness. Longer strip lengths are required when the wire needs to be folded to mate with the butt splice. Refer to chart for strip lengths and folding techniques.

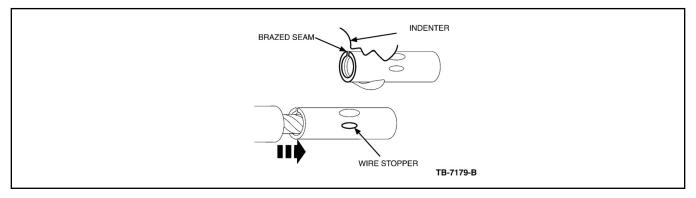

Strip 1/4" (6.35 mm) of insulation from pigtail wire end once the wire lengths are sized so repairs can be staggered. Take care not to nick or cut wire strands. Pull wire straight from stripper. If wire is pulled at an angle, wire strands may be cut off. If more than one (1) strand is cut off during stripping, cut off the end and re-strip. Slide heat shrink tubing onto one (1) of the wire ends to be crimped, must be at least 1" (25.4mm) away from the stripped end.

8. Identify the appropriate crimping chamber of the Rotunda 164-R5901 Pro-Crimper (or equivalent) by matching the wire size on the dies with the wire size stamped on the butt splice. Hold the crimping tool so the identified wire sizes are facing you. Squeeze tool handles together until the ratchet releases, then allow the jaws of the tool to open fully.

9. Center one (1) end of the butt splice on the appropriate crimping chamber. If visible, be sure to place the brazed seam of the butt splice toward the indenter. Hold the butt splice in place and squeeze the tool handles together until the ratchet engages sufficiently to hold the butt splice in position (typically one (1) or two (2) clicks). DO NOT deform the butt splice. Insert stripped wire into the butt splice, making sure the insulation on wire does not enter the butt splice.

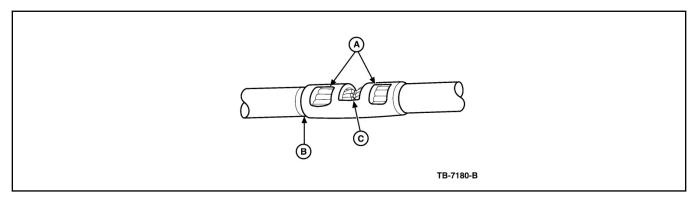

10. Holding the wire in place, squeeze tool handles together until ratchet releases. Allow tool handles to open, then remove crimped butt splice.

To crimp the other half of the splice, reposition the un-crimped wire barrel in the same crimping chamber, and repeat the crimping procedure. If splice cannot be turned for crimping the other half, turn the tool around.

Check for acceptable crimp.

- Crimp should be centered on each end of the butt splice. It is acceptable for crimp to be slightly off center, but not off the end of the butt splice (A).
- Wire insulation does not enter butt splice. Wire is flush with or extends slightly beyond end of butt splice (B).
- Wire is visible through inspection hole of splices (C).

Overlap heat shrink tubing on both wires.

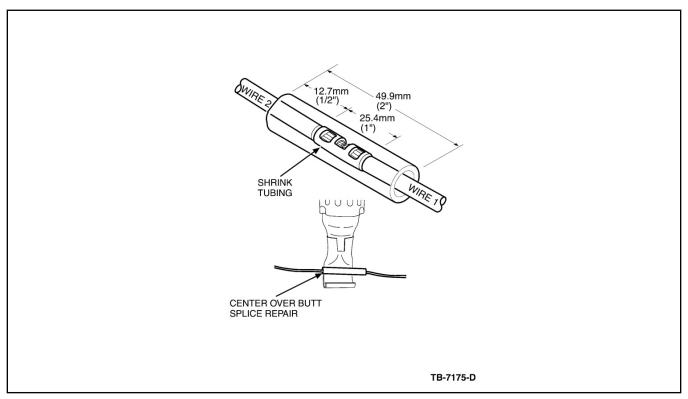

NOTE:

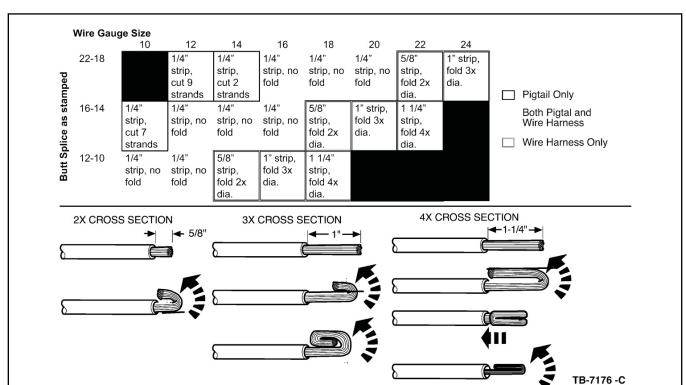

The hot melt forms an adhesive seal between the wire insulation and the heat shrink tubing, which prevents air and moisture from entering the solder point.

NOTE:

Durability of a heat shrink tubing splice is dependent on the hot melt that will appear from both ends of the tube.

Evenly position heat shrink tubing over wire repair. Use a shielded heat gun to heat the entire length of the heat shrink tubing until the hot melt appears from both ends of the tubing.

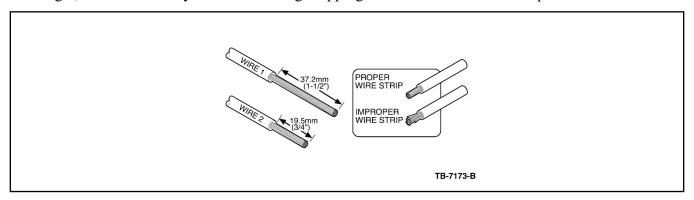

Wire Stripping Lengths and Application Techniques.

For 16-22 AWG wire use either the above "Ratcheting Crimp Procedure" or the following "2 Wire Solder Splice Procedure".

12. Strip 1 1/2" (37.2 mm) of insulation from Wire #1 and 3/4" (19.5mm) of insulation from Wire #2, taking care not to nick or cut wire strands. Pull wire straight from stripper. If wire is pulled at an angle, wire strands may be cut off during stripping. Cut off the end and re-strip.

Use rosin core mildly activated (RMS) solder. do not use acid core solder for wire repair.

NOTE:

Overlap tubing on both wires and wait for solder to cool before moving the wires.

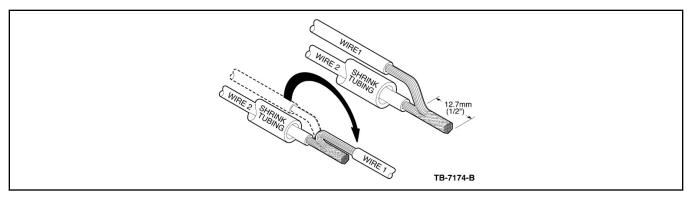

NOTE:

Durability of a heat shrink tubing splice is dependent on the hot melt that will appear from both ends of the tube.

NOTE:

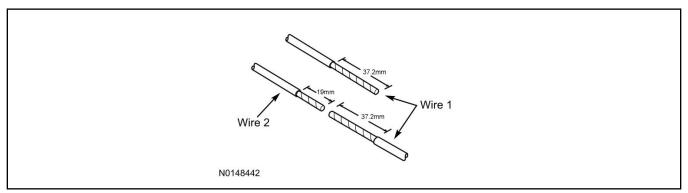

The hot melt forms an adhesive seal between the wire insulation and the heat shrink tubing, which prevents air and moisture from entering the solder point.

Install heat shrink tubing at least 1" (26 mm) away from one of the stripped ends being spliced. Twist the wires together. Solder wires together. Bend Wire #1 back in a straight line for sealing. Inspect solder joint bond. Evenly position heat shrink tubing over wire repair. Use a shielded heat gun to heat the entire length of the heat shrink tubing until the hot melt appears from both ends of the tubing.

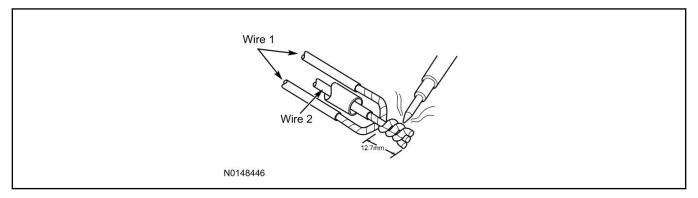

3-Wire Solder Splice Procedure

14. Strip 1 1/2" (37.2 mm) of insulation from both sides of Wire #1 and 3/4" (19 mm) of insulation from Wire #2, taking care not to nick or cut wire strands. Pull wire straight from stripper. If wire is pulled at an angle, wire strands may be cut off during stripping. Cut off the end and re-strip.

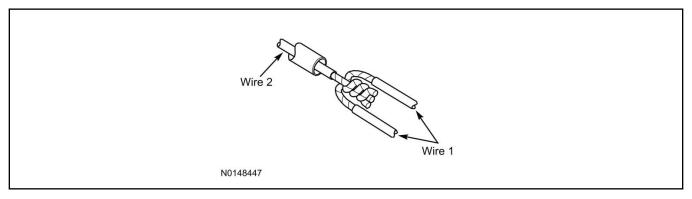

Wait for solder to cool before moving wires.

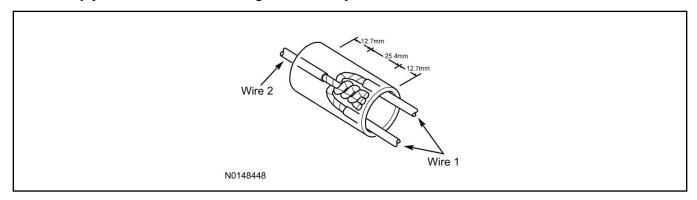

Apply heat shrink tubing to Wire #2. Twist both ends of Wire #1 around Wire #2. Solder wires together.

16. Bend Wire #1 back over the twisted wires for sealing. Inspect solder joint bond.

17. Evenly position heat shrink tubing over wire repair.

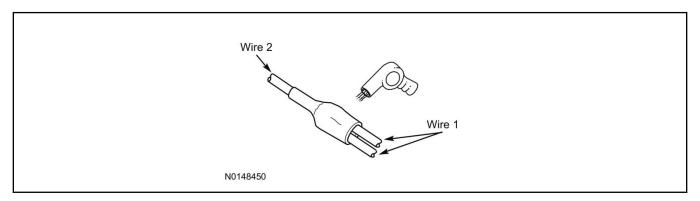

Durability of a heat shrink tubing splice is dependent on the hot melt that will appear from both ends of the tube.

NOTE:

The hot melt forms an adhesive seal between the wire insulation and the heat shrink tubing, which prevents air and moisture from entering the solder point.

Use a shielded heat gun to heat the entire length of the heat shrink tubing until the hot melt appears from both ends of the tubing.

QUANTITY	DESCRIPTION
1	Security Indicator LED

I. VSS System Installation

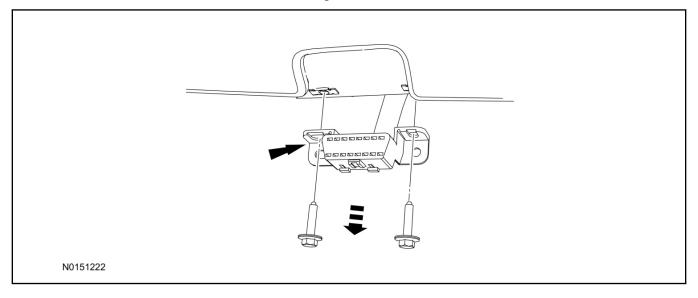

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

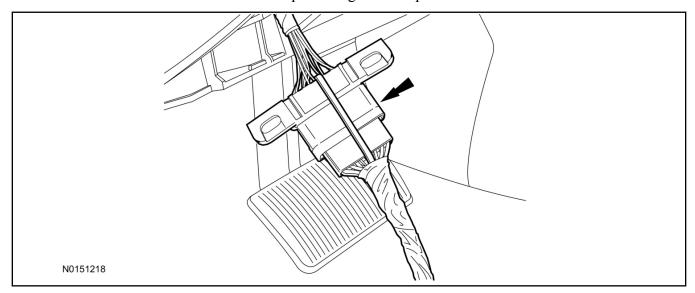

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

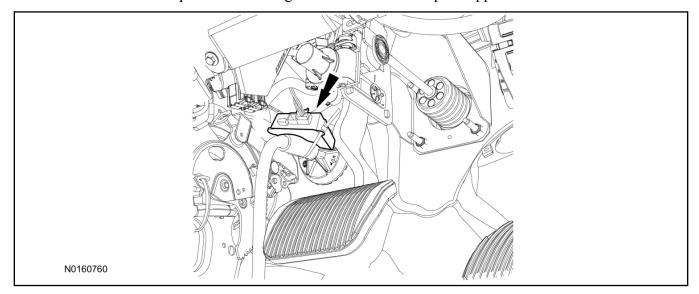

4. Remove the 2 bolts and remove the OBD II port from the IP frame.

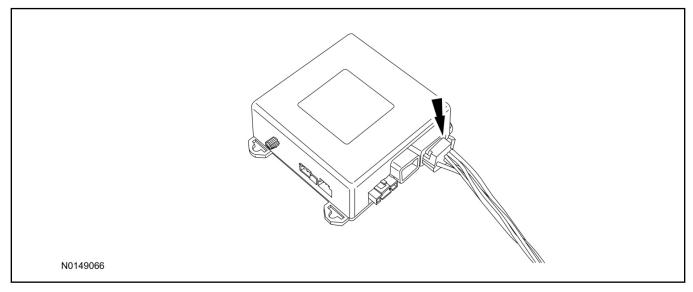

- 5. Connect the VSS T-harness to the OBD II port.
 - Secure the T-harness to the OBD II port using a tie-strap.

- 6. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.
- 7. Install the new VSS harness OBD II port to the IP frame and install the bolts.
 - Do not over tighten.
- 8. Position the VSS module on top of the main driver side bulkhead wire harness and secure it to the wire harness with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 9. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

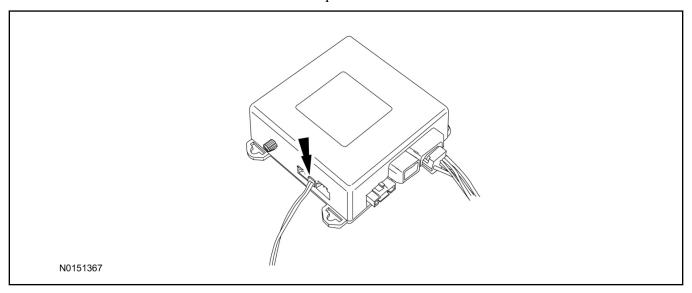

Optional Security Indicator LED Mounting

⚠ CAUTION:

Carefully route and secure the LED and harness so that it doesn't interfere with moving parts or linkages.

- 10. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 11. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 12. Route the LED wire harness to the VSS module.

- 13. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

Learn VSS to Vehicle (Key Start Vehicles Only)

NOTE:

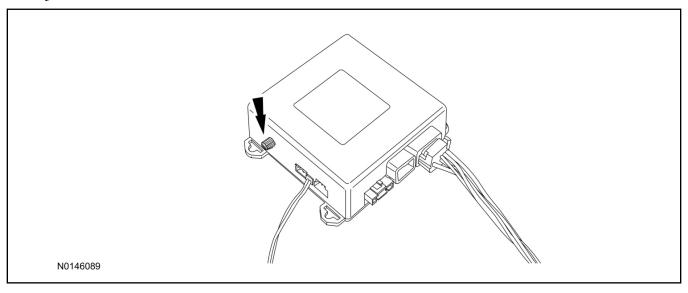

Make sure the brake pedal is not depressed during this sequence.

- 14. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 15. Put the key in the ignition.
- 16. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.
- 17. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 18. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 19. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. If equipped, the LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 20. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 21. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 22. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

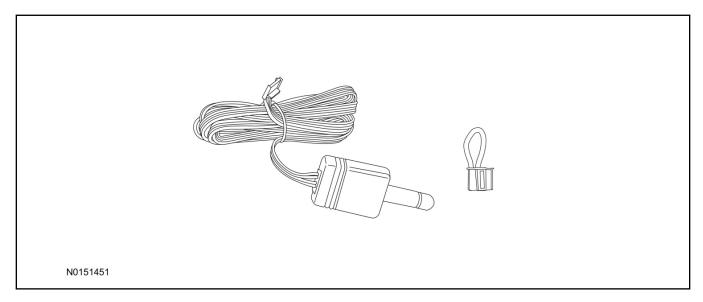

If installed, observe the LED while performing these tests.

23. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.

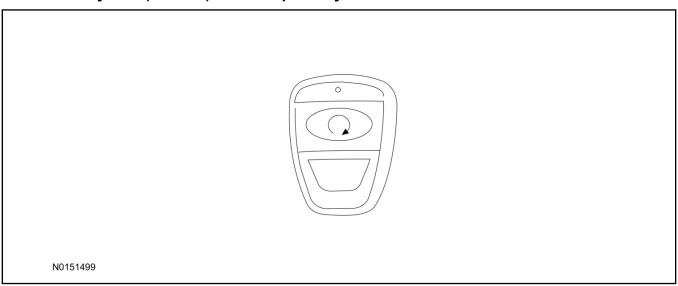

- 24. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 25. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 26. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 27. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

CAUTION:

Carefully route and secure the antenna and harness so that they do not interfere with moving parts or linkages.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

28. Review the RMST Upgrade components.

QUANTITY	DESCRIPTION
1	Standard Key Fob (15K601)

Bi-directional Key Fob (15K601) "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Key Fob (15K601)

29. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

30. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

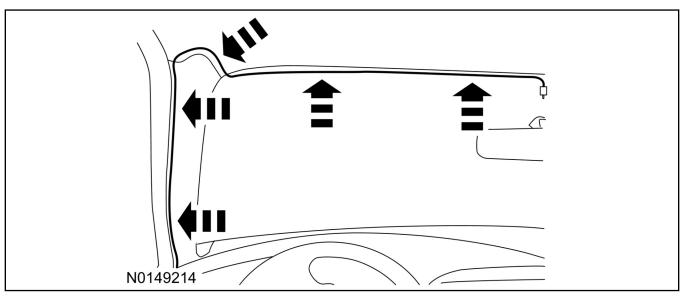

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

31. Position the LH A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

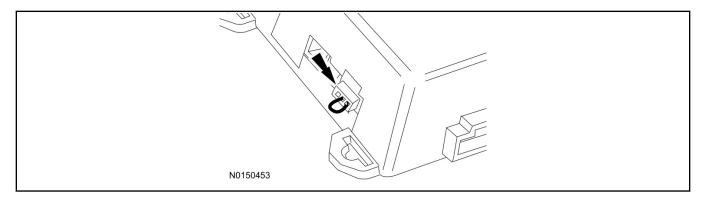

- 32. Route the antenna cable along the headliner and down the LH A-pillar towards the floor. Continue routing the wire Into the IP towards the VSS module.
 - Secure with tie-straps.

- 33. Connect the antenna connector to the VSS module.
- 34. Reposition the A-pillar trim panel back.

VSS Module - Optional Vehicle Security Features

- 35. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

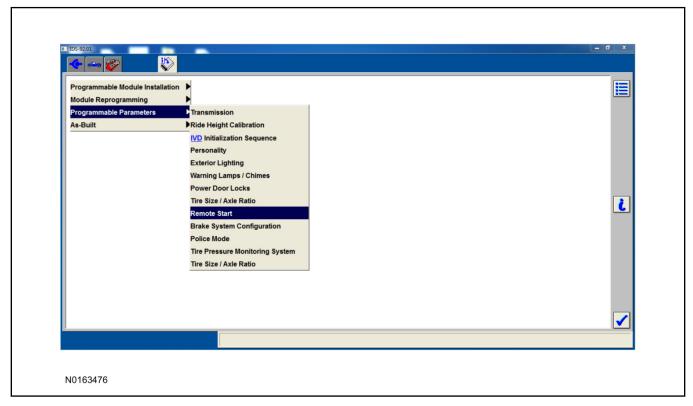

RMST Activation - Key Start Only

NOTE:

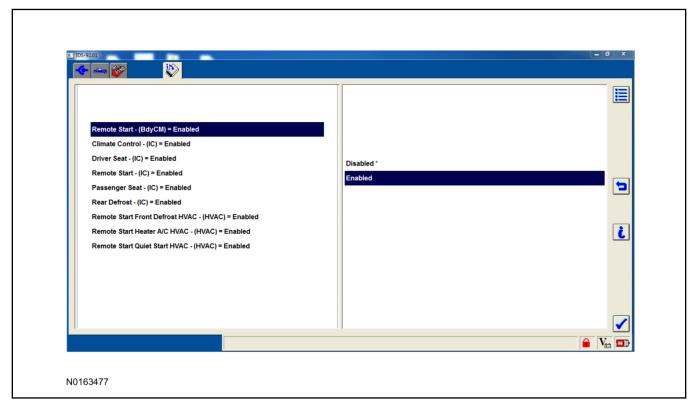

For vehicles that have remote start enabled, proceed to Step 42 for push button start and Step 43 for key start vehicles within the "Programming Key Fobs" section of this manual.

- 36. Verify that the IDS is updated to the most current version.
- 37. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Verify VIN.
- 38. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Programmable Parameters.
 - Select Remote Start.

- 39. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM)
 - Climate Control (IC)

- Driver Seat (IC)
- Remote Start (IC)
- Passenger Seat (IC)
- Rear Defrost (IC)
- Remote Start Front Defrost (HVAC)
- Remote Start Heater A/C HVAC (HVAC)
- Remote Start Quiet Start HVAC (HVAC)
- Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

40. **NOTE:**

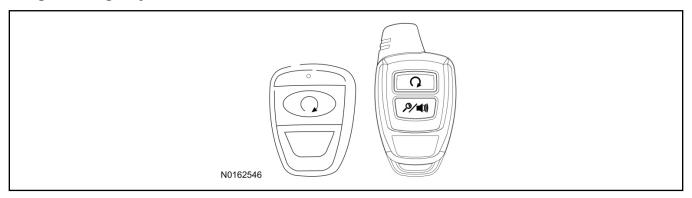

For Expedition vehicles that have the single display instrument cluster the remote start menus will not be available.

For vehicles equipped with standard message center, verify that the remote start option now appears.

- Using the Select and Arrow buttons on the steering wheel, select Settings.
- · Select Convenience.
- · Select Remote Start.
- · Select System.
- Verify that the remote start system is checked.

- 41. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Programming Key Fobs

42. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 NOTE:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

43. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times, ending in ignition off, engine off.
- 6 Release the brake pedal.
- 7 Press the vehicle start/stop button twice to turn ignition on.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 8 Press the remote start button on each fob you wish to program (horn will honk indicating successful programming).
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

- 44. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 45 Close the hood
- 46. Close all of the vehicle doors.
- 47. Start the vehicle by pressing the remote start button twice within three seconds on the remote start key fob.
- 48. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 49. Open the hood.

50. **NOTE:**

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not remote start with the hood open.

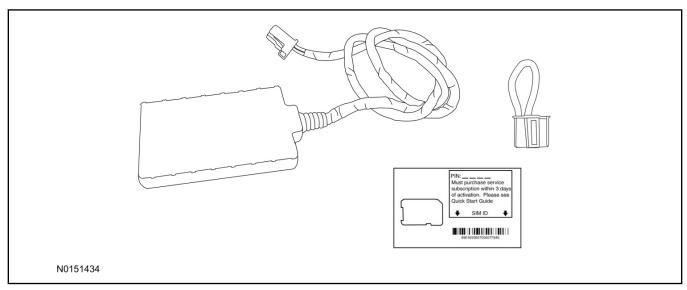

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

51. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

NOTE:

When installing remote access on key start equipped vehicles, you must learn the VSS to the vehicle.

52. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps (not shown)

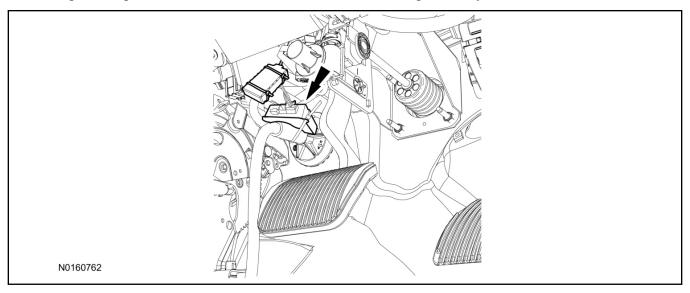

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

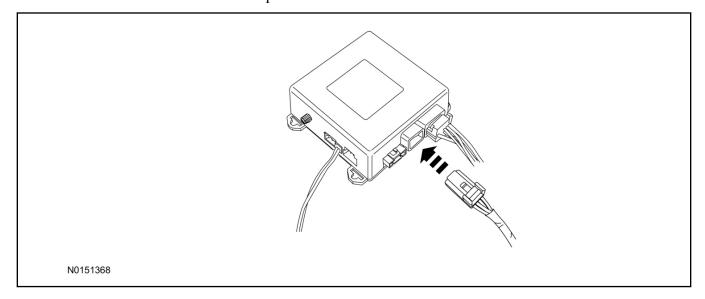

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

53. Using tie-straps secure the RMU to the IP harness near the previously installed VSS module.

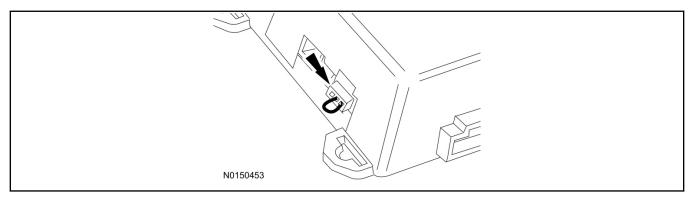

- 54. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 55. Enable/Disable Vehicle Security Features:

 Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

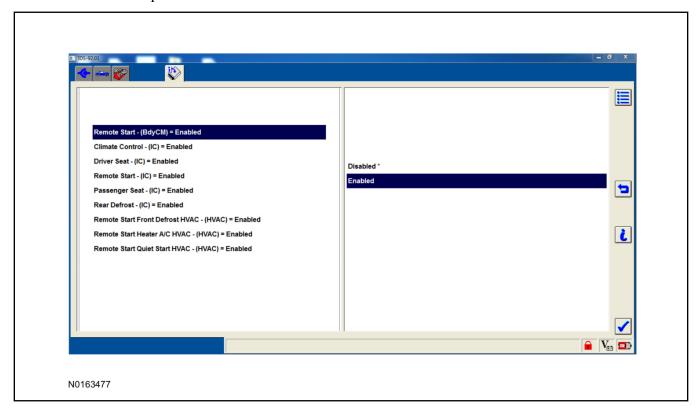

RMST Activation - Key Start Only

- 56. Verify that the IDS is updated to the most current version.
- 57. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - · Verify VIN.

- 58. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Programmable Parameters.
 - Select Remote Start.

- 59. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM)
 - Climate Control (IC)
 - Driver Seat (IC)
 - Remote Start (IC)
 - Passenger Seat (IC)
 - Rear Defrost (IC)
 - Remote Start Front Defrost (HVAC)
 - Remote Start Heater A/C HVAC (HVAC)
 - Remote Start Quiet Start HVAC (HVAC)
 - Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

60. **NOTE:**

For Expedition vehicles that have the single display instrument cluster the remote start menus will not be available.

For vehicles equipped with standard message center, verify that the remote start option now appears.

- Using the Select and Arrow buttons on the steering wheel, select Settings.
- Select Convenience.
- Select Remote Start
- Select System.
- Verify that the remote start system is checked.
- 61. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

RMU Activation

NOTE:

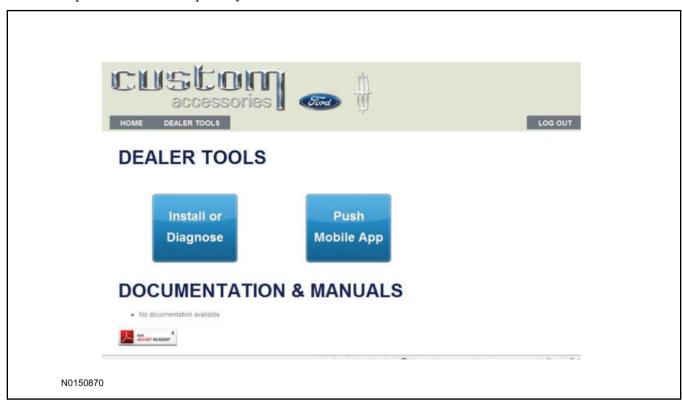

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

- 62. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company

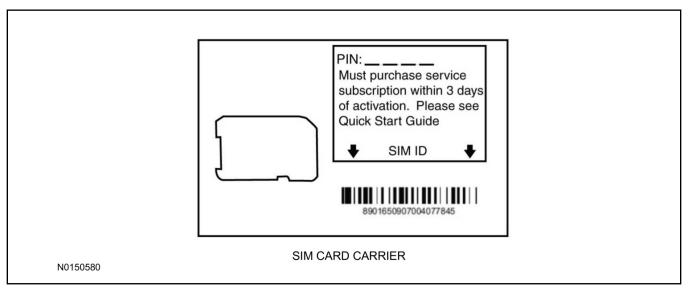

- 63. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

64. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

65. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

NOTE:

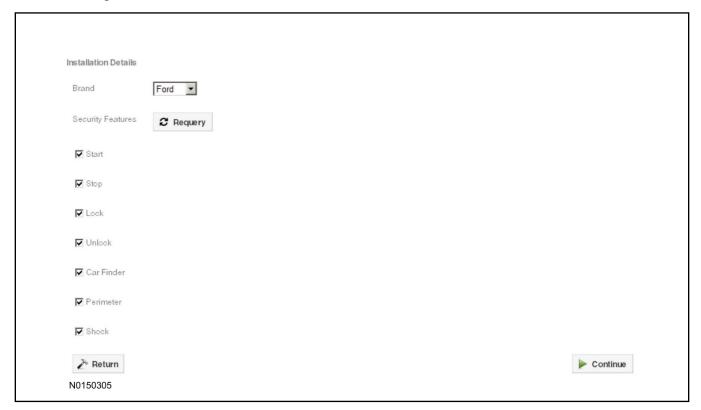

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

NOTE:

On screen Step 3 shown below.

66. **NOTE:**

On screen Step 4 shown below.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- · Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, retest or move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 67. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 68. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

I. VSS System Installation

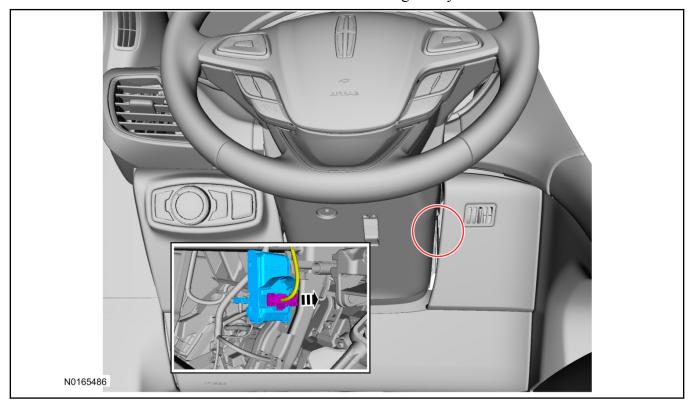

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

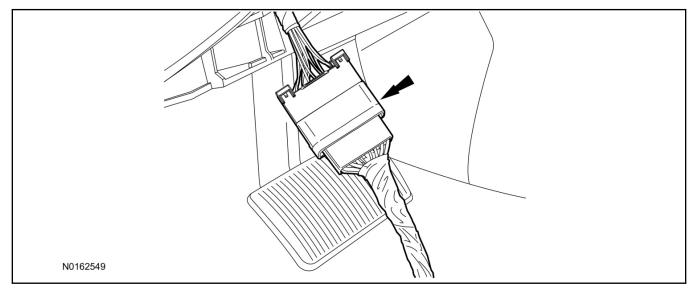

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

- 4. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 5. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
- 6. Remove the LH lower Instrument Panel (IP) insulator.

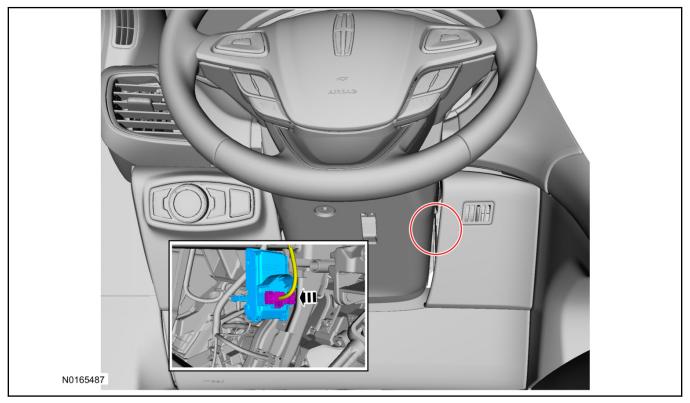

7. Disconnect the electrical connector from the back of the gateway module.

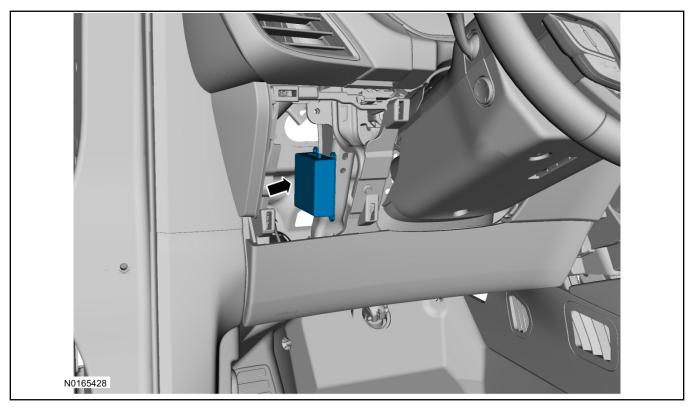

8. Connect the T-harness to the gateway module electrical connector.

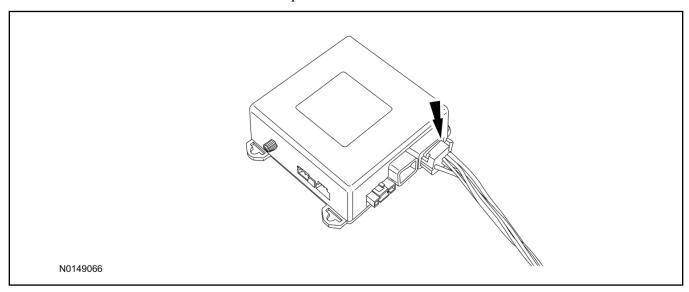

9. Connect T-harness to the back of the gateway module.

- 10. Position the T-harness inside the IP being careful to avoid sharp edges and moving parts.
 - Secure with zip-ties.
- 11. Using tie-straps, secure the VSS module to the IP frame.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 12. Connect the T-harness to the VSS module.
 - Secure the VSS harness with tie-straps.

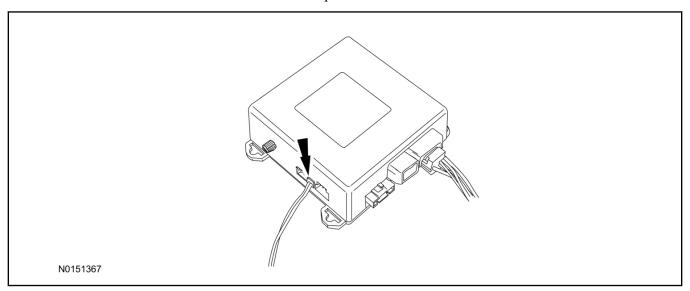

13. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

Optional Security Indicator LED Mounting

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 14. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 15. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 16. Route the LED wire harness to the VSS module.
- 17. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

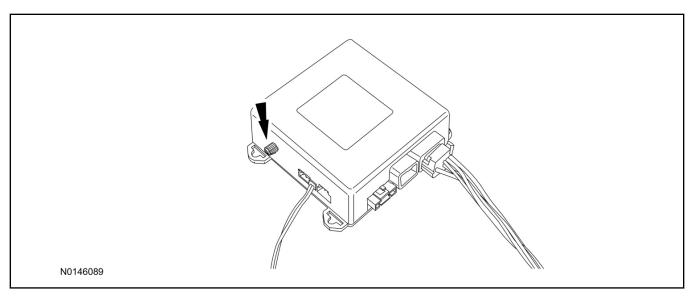

- 18. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 19. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 20. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 21. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 22. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 23. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

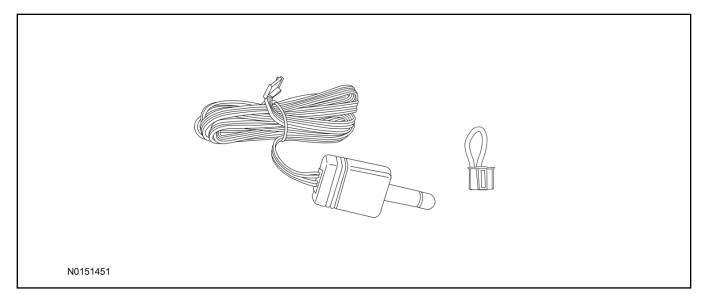

- 24. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 25. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 26. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 27. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 28. If the VSS kit will not be upgraded to RMST/RMU functions at this time, install the LH lower IP insulator.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

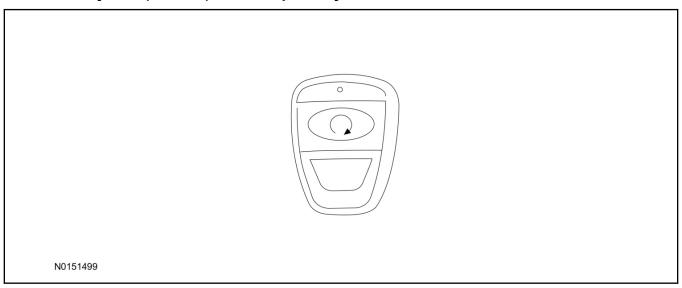

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

^CAUTION:

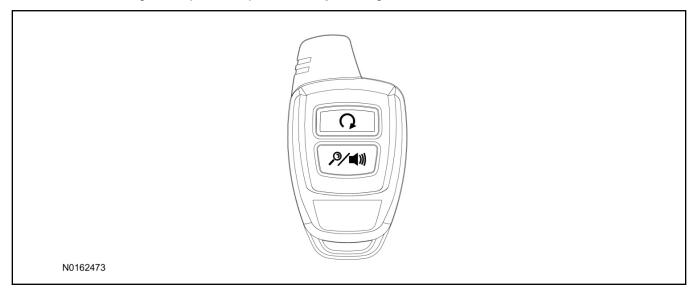

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

29. Review the RMST Upgrade components.

Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Antenna (15603)
1	Security Jumper (15603)

Standard Key Fob (15K601) "Sold Separately"

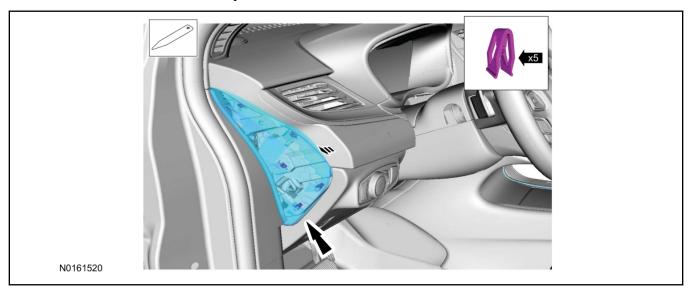

QUANTITY	DESCRIPTION

Bi-directional Key Fob (15K601) "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Key Fob (15K601)

RMST Kit Antenna Installation

- 30. If previously installed, remove the LH lower IP insulator.
- 31. Position the top portion of the LH kick panel aside to allow for removal of the IP side finish panel.
- 32. Remove the LH IP side finish panel.

33. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

34. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

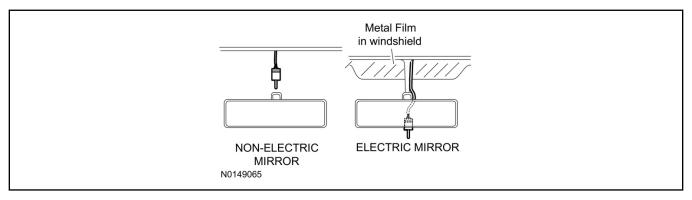

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

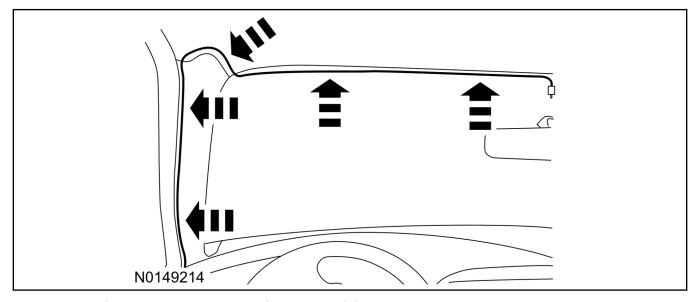

35. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

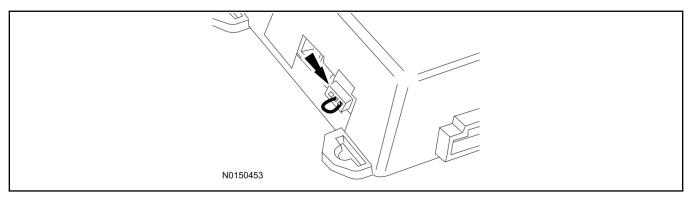

- 36. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

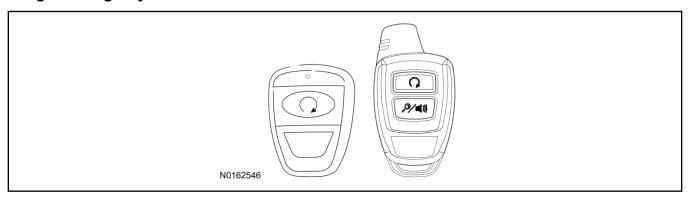

- 37. Connect the antenna connector to the VSS module.
- 38. Reposition the A-pillar trim panel back, if necessary.
- 39. Install the LH IP side finish panel. Position the weatherstrip and LH kick panel back.

VSS Module - Optional Vehicle Security Features

- 40. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

Programming Key Fobs

41. **NOTE:**

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The driver's door must remain open during the entire key fob programming process.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal through the horn honks in step 6.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times.
- 6 Press the start/stop button.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the start/stop button on each fob you wish to program.
- 8 Cycle ignition to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

42. If the RMST kit will not be upgraded to RMU functions at this time, install the LH lower IP insulator.

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 43. Make sure the vehicle is in PARK and the ignition is OFF. Remove all keys from the vehicle.
- 44. Close the hood.
- 45. Close all of the vehicle doors.
- 46. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 47. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 48. Open the hood.
- 49. **NOTE:**

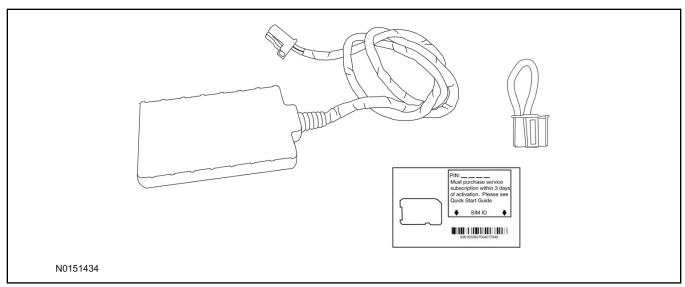

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

50. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

51. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"(Continued)		
1	Security Jumper	

52. If previously installed, remove the LH lower IP insulator.

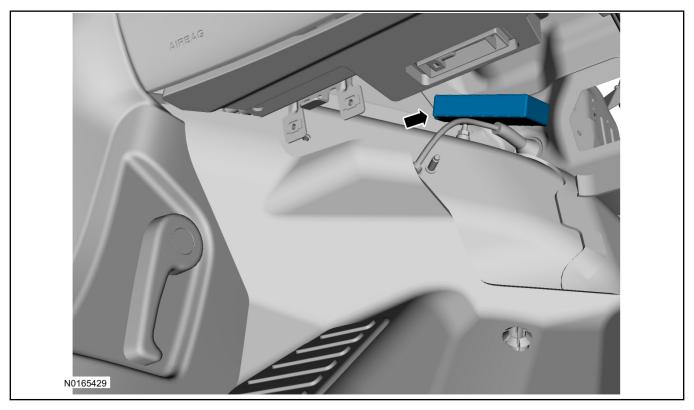

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

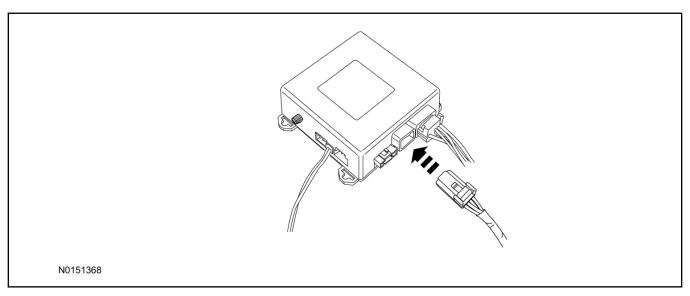

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

53. Using a tie-strap, secure the RMU to the hood latch release cable near the driver side of the vehicle bulkhead.

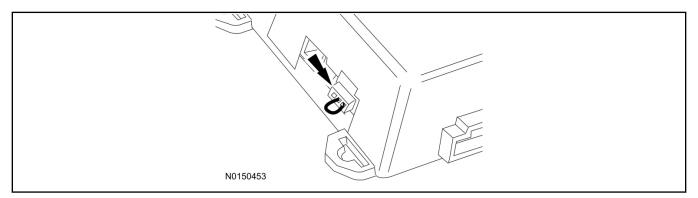

- 54. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 55. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

56. Install the LH lower IP insulator.

RMU Activation

NOTE:

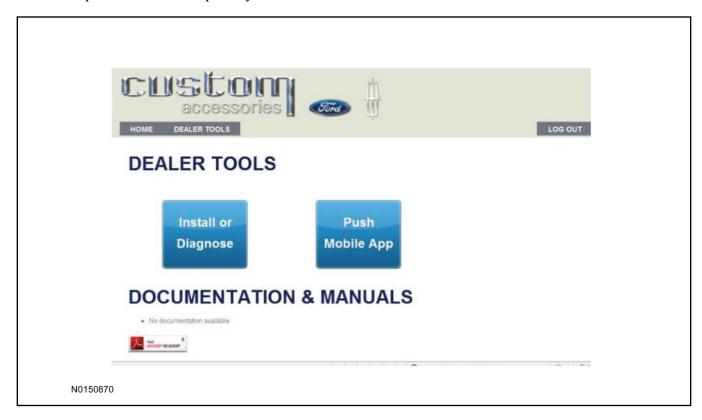

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

- 57. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company

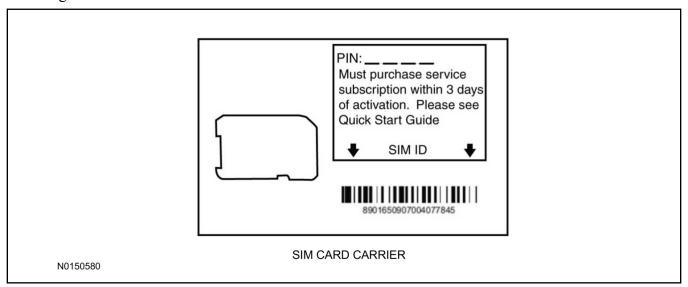

- 58. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

59. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

60. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

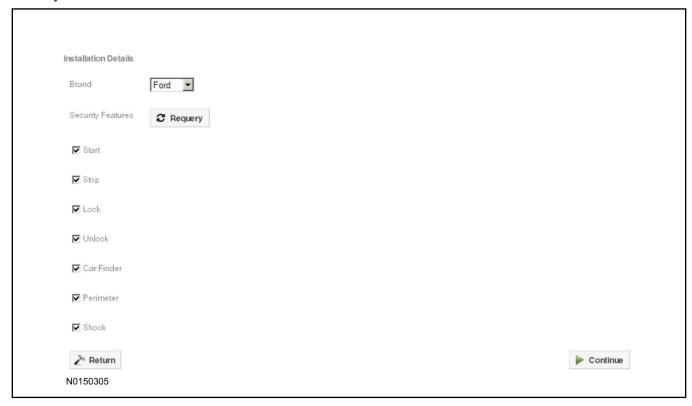

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 61. Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

- 62. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 63. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

Security Indicator LED Kit

QUANTITY	DESCRIPTION
1	Security Indicator LED

I. VSS System Installation

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

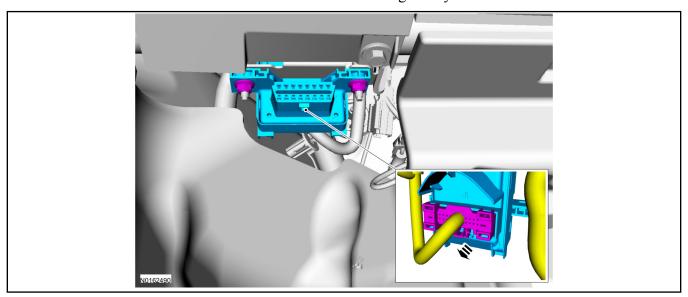

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

NOTE:

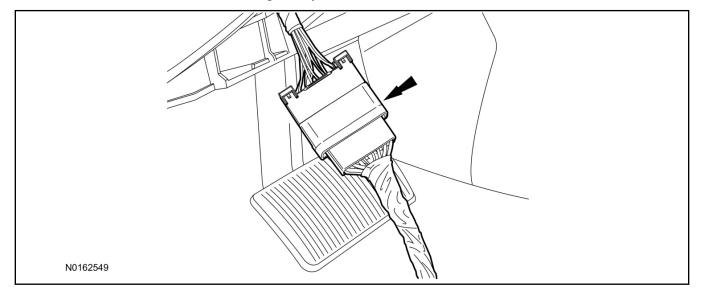

If the hood switch is not installed, complete the Hood Switch Kit installation.

- 4. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 5. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
- 6. Remove the LH lower IP insulator.

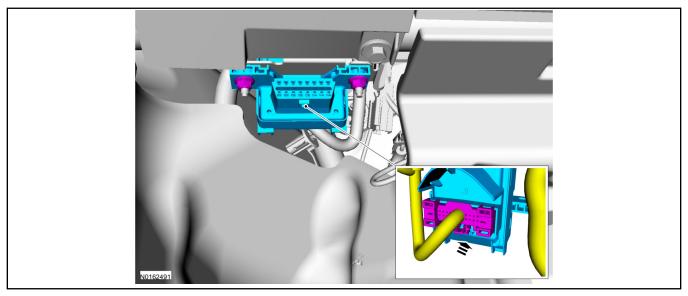

7. Disconnect the electrical connector from the back of the gateway module.

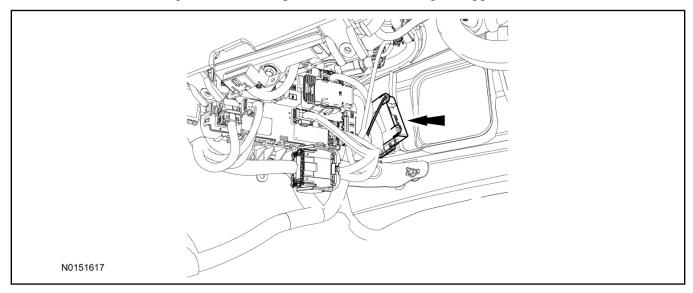

8. Connect the VSS T-harness to the gateway module electrical connector.

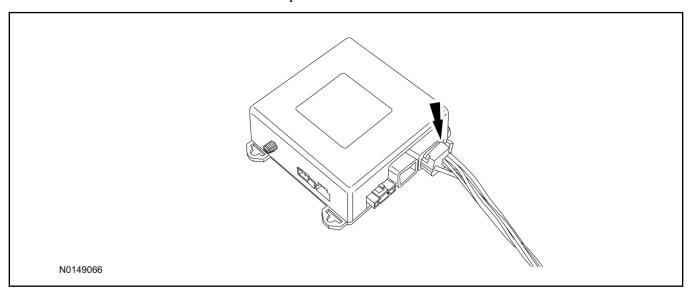

9. Connect the VSS T-harness to the back of the gateway module.

- 10. Position the T-harness inside the IP being careful to avoid sharp edges and moving parts.
 - Secure with zip-ties.
- 11. Position the VSS module behind the BCM (Body Control Module) and secure it to a wire harness with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 12. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

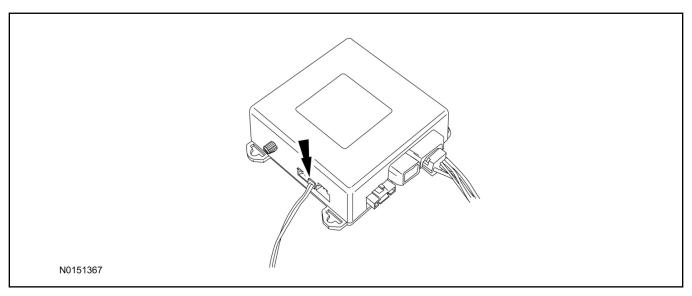

13. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

Optional Security Indicator LED Mounting

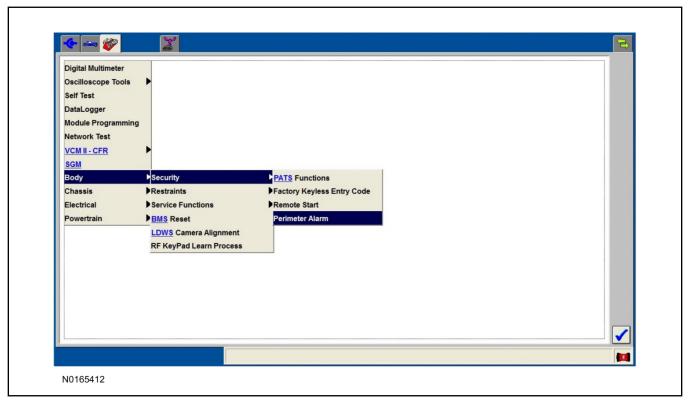

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 14. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 15. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 16. Route the LED wire harness to the VSS module.
- 17. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

Perimeter Alarm Activation - Vehicles Without Factory Installed Perimeter Alarm

- 18. Verify that the IDS is updated to the most current version.
- 19. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 20. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - · Select Body.
 - · Select Security.
 - Select Perimeter Alarm.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.
 - Select Yes. This will enable the perimeter alarm function on the vehicle.

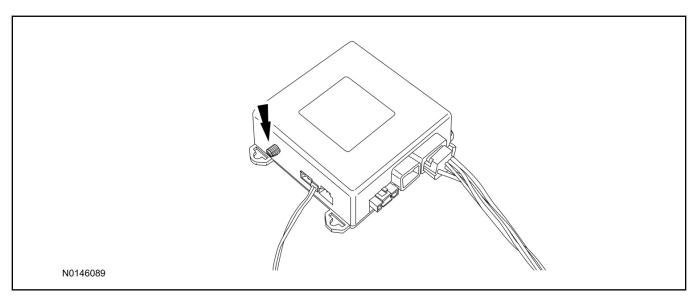

Learn VSS to Vehicle (Key Start Vehicles Only)

- 21. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 22. Use IDS to clear continuous DTCs.
- 23. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 24. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 25. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 26. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 27. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 28. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

Cycle ignition OFF, ON, OFF before testing.

- 29. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 30. Reach inside the window and use the inside driver's door handle to open the door. The LED should continue to flash, indicating that the vehicle is still armed. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.

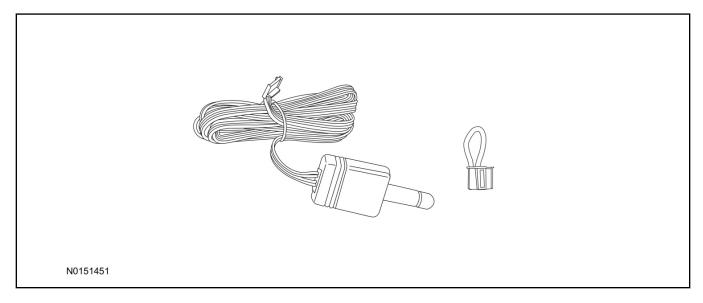

- For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 31. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 32. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 33. If the VSS kit will not be upgraded to RMST/RMU functions at this time, install the LH lower IP insulator. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

CAUTION:

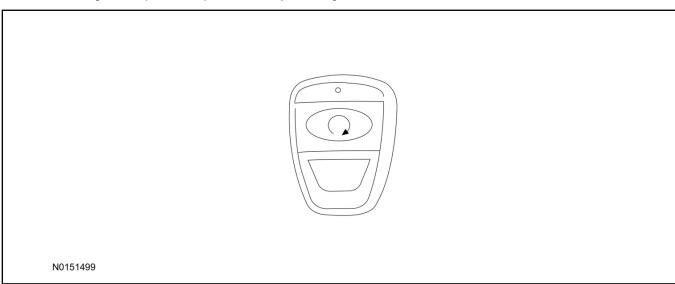

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

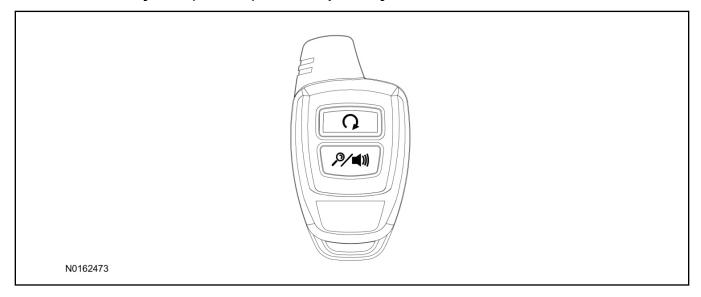

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Switch Kit - Sold Separately".

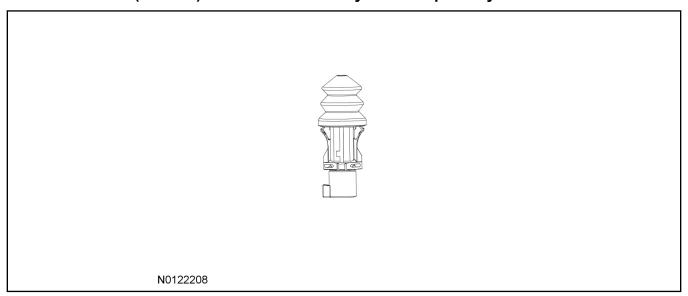

Standard Key Fob (15K601) "Sold Separately"

Hood Switch Wire Harness Kit "Sold Separately"

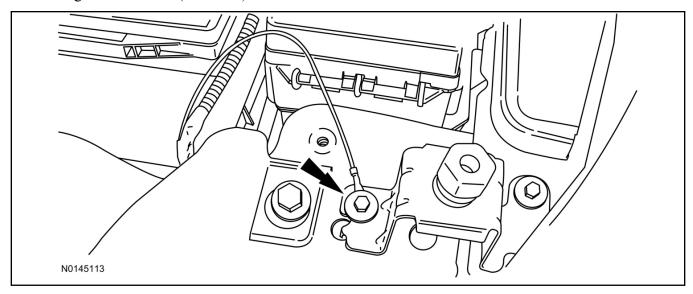

QUANTITY	DESCRIPTION
3	Body Control Module (BCM) Terminal Wire
1	Hood Switch Wire Harness

Hood Switch Kit - "Sold Separately"

NOTE:

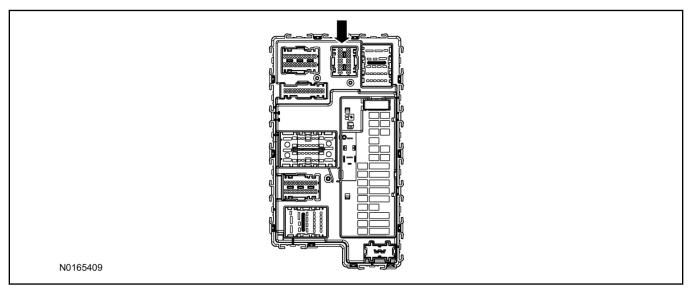

Hood switch installation is required for VSS/RMST/RMU installation if the vehicle is not currently equipped with a hood switch.

- 37. If previously installed, remove the LH lower IP insulator.
- 38. Remove the fender bolt and install the hood switch ground wire, using the previously removed bolt.
 - Tighten to 12 Nm (106 lb-in).

- 39. Route the hood switch wire harness into the vehicle through the bulkhead grommet.
 - Secure the hood switch wire harness with zip-ties.

40. Disconnect Body Control Module (BCM) connector C2280F.

- 41. If equipped, remove the pin plug from BCM connector C2280F Pin 14.
 - If the vehicle is not equipped with a hood switch wire harness from the factory C2280F will not have a wire at the Pin 14 location.

42. *NOTICE*:

Check that the all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

NOTE:

Use terminal wire labeled #3 (Orange).

Insert the BCM terminal wire from the hood switch wire harness kit into BCM connector C2280F Pin 14.

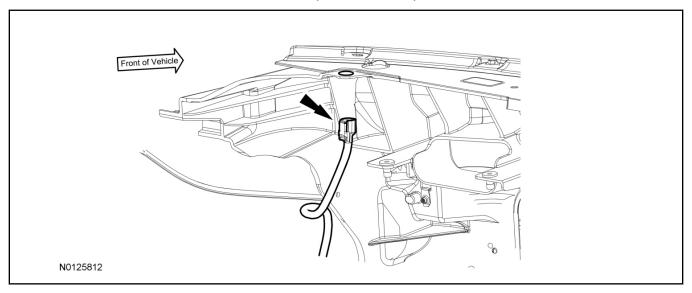

- Some disassembly of BCM connector C2280F may be required to perform this step.
- 43. Connect BCM connector C2280F.

NOTICE:

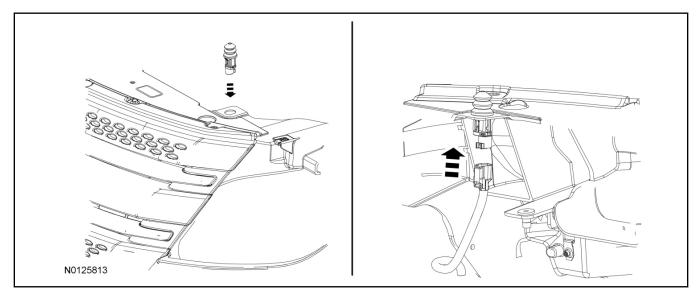

Refer to "Proper Wire Splicing Techniques" before proceeding.

- 44. Connect the hood switch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with zip-ties.

- 45. Locate the vehicle's existing "OE" hood switch wire harness, located on the LH side of the vehicle below the radiator core support.
 - If required remove the vehicle's air cleaner assembly, to access the vehicles "OE" hood switch wire harness. For additional information, refer to WSM, Section 303-12.

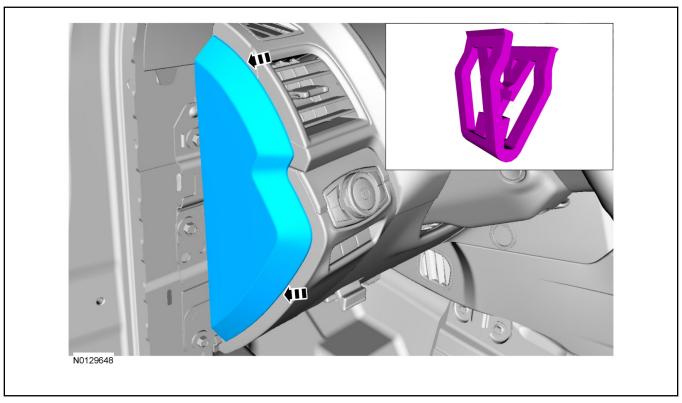

- 46. Install the OE hood switch assembly to the existing hood switch mounting location, on the LH side of the upper radiator core support as shown.
 - If equipped, remove the dummy plug from the upper radiator core support.
 - Position the flat spot on the hood switch to the flat spot on the radiator core support.
 - Connect the electrical connector to the hood switch.

RMST Kit Antenna Installation

47. Remove the LH IP side finish panel.

48. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

49. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

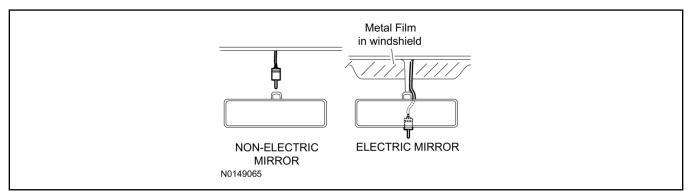

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

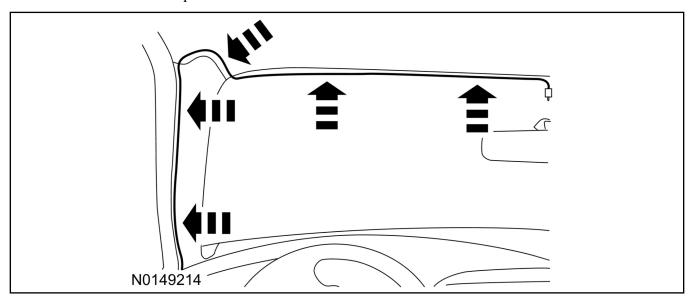

50. If necessary, position the LH A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

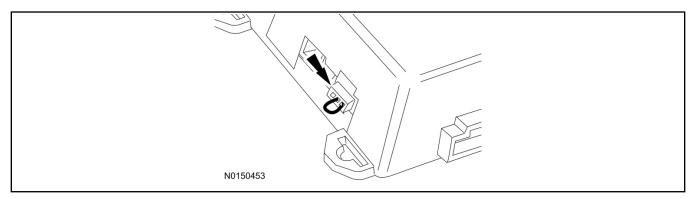

- 51. Route the antenna cable along the headliner and down the LH A-pillar towards the floor. Continue routing the wire Into the IP towards the VSS module.
 - Secure with tie-straps.

- 52. Connect the antenna connector to the VSS module.
- 53. Reposition the A-pillar trim panel back, if necessary.
- 54. Install the LH IP side finish panel.

VSS Module - Optional Vehicle Security Features

- 55. Enable/Disable Vehicle Shock Sensor: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the shock sensor is to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the shock sensor feature **enabled**.

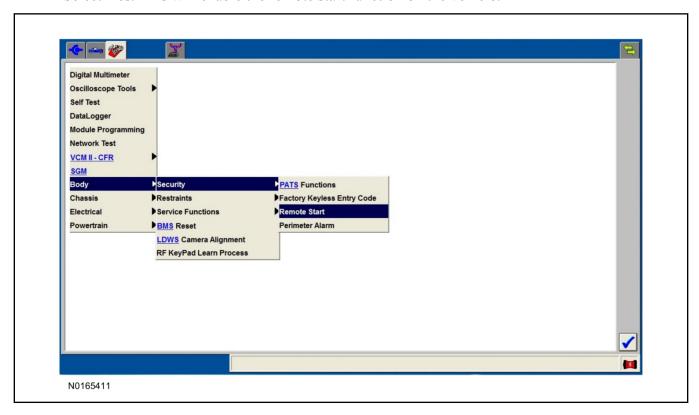

RMST Activation - Key Start Only

NOTE:

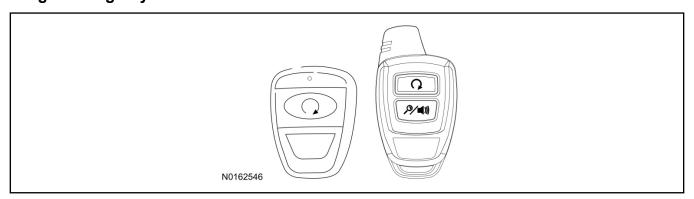

For vehicles equipped with push button start, proceed to Step 62 within the "Programming Key Fobs" section of this manual.

- 56. Verify that the IDS is updated to the most current version.
- 57. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 58. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - · Select Body.
 - · Select Security.
 - · Select Remote Start.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.
 - Select Yes. This will enable the remote start function on the vehicle.

- 59. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - · Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 60. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Programming Key Fobs

61. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.

- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 NOTE:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

62. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Open door and press unlock.
- 2 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 3 Depress and hold brake pedal.
- 4 Press the start/stop button.
- 5 After the vehicle starts, press the start/stop button to shut down.
- 6 Repeat steps 4 and 5 an additional five times, ending in ignition ON, engine ON.
- 7 Release the brake pedal, the horn should honk 3 times.
- 8 Press the start stop/button on each fob you wish to program. The horn should honk each time the button is pressed to indicate the transmitter has been programmed.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 63. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 64 Close the hood
- 65. Close all of the vehicle doors.
- 66. Start the vehicle by pressing the remote start button twice on the remote start key fob.

- 67. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 68. Open the hood.
- 69. Confirm the engine shuts off.
- 70. **NOTE:**

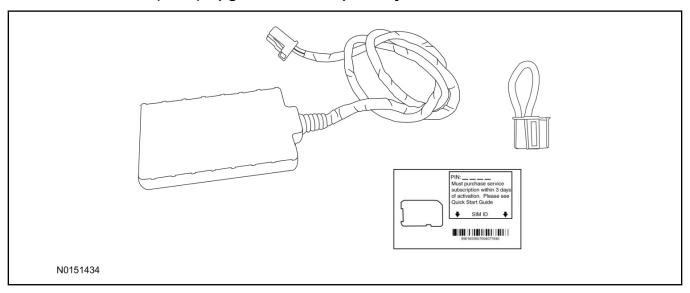

Vehicle doors should be closed while performing this step.

Attempt to remote start with the hood open. Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

71. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

72. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper

73. If previously installed, remove the LH lower IP insulator.

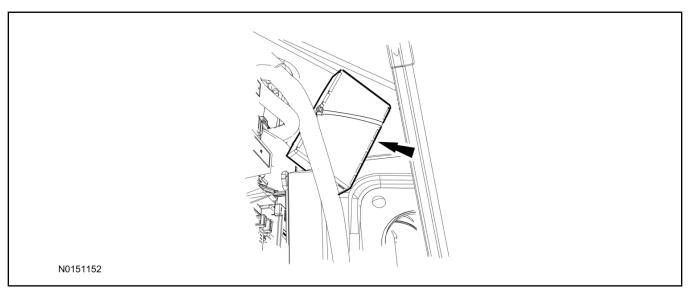

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

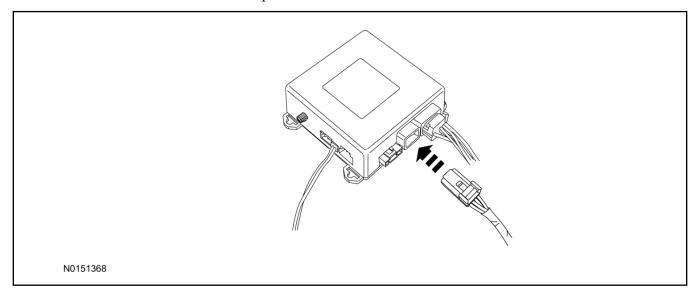

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

74. Using tie-straps secure the RMU to the IP harness near the previously installed VSS module.

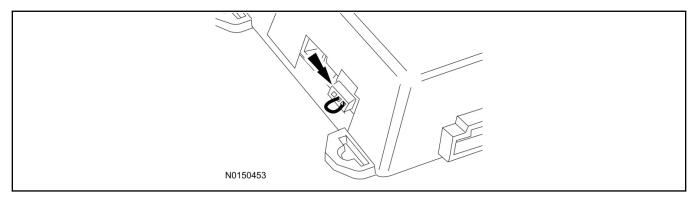

- 75. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

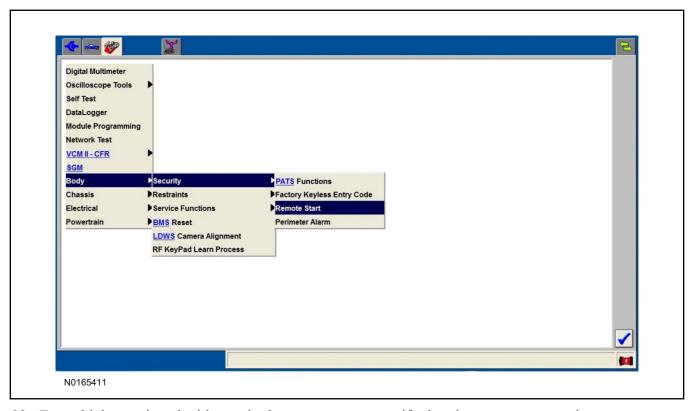

- 76. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

77. Install the LH lower IP insulator.

Remote Start Activation - Key Start Vehicles (Without Factory Remote Start)

- 78. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 79. Verify that the IDS is updated to the most current version.
- 80. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 81. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - · Select Body.
 - Select Security.
 - Select Remote Start.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.
 - Select Yes. This will enable the remote start function on the vehicle.

- 82. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - · Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 83. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

RMU Activation

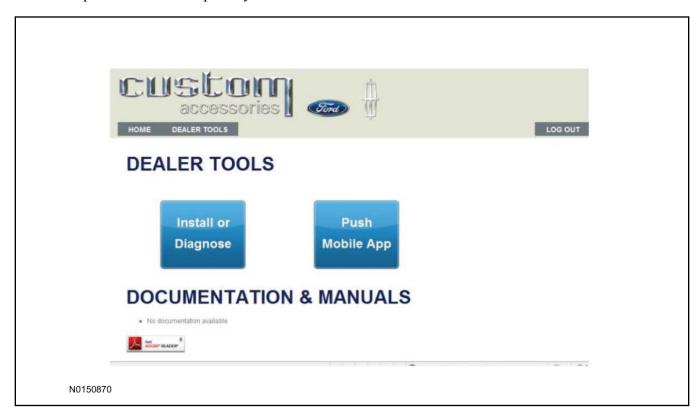

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

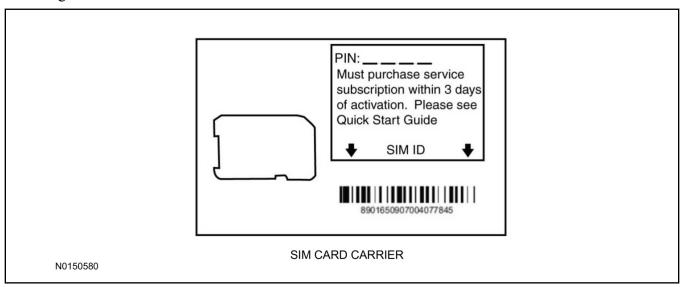

- 84. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 85. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

86. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

87. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

NOTE:

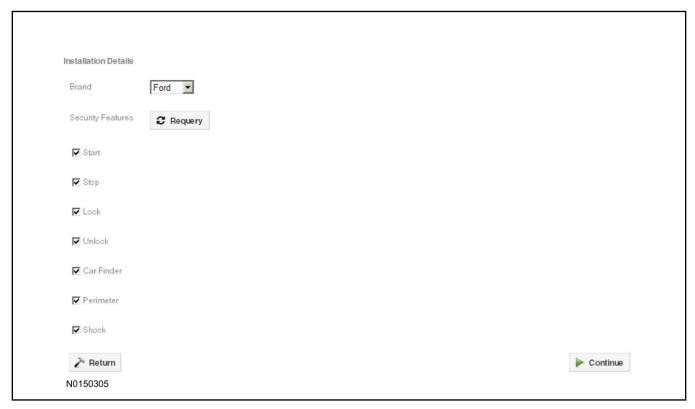

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

NOTE:

On screen Step 3 shown below.

88. **NOTE:**

On screen Step 4 shown below.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 89. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 90. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

Security Indicator LED Kit

QUANTITY	DESCRIPTION
1	Security Indicator LED

I. VSS System Installation

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

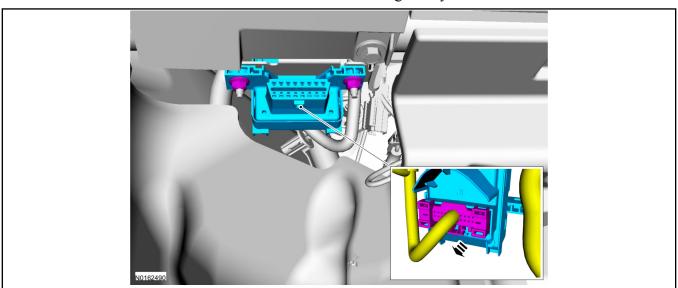

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

NOTE:

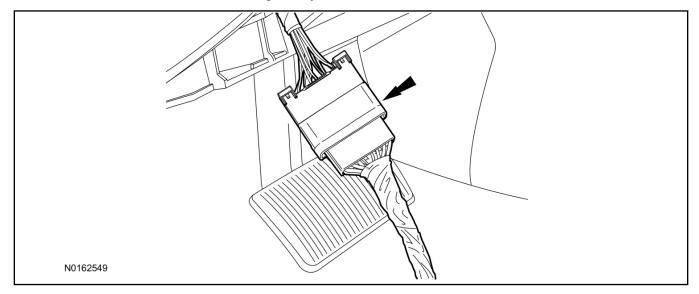

If the hood switch is not installed, complete the Hood Switch Kit installation.

- 4. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 5. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
- 6. Remove the LH lower IP insulator.

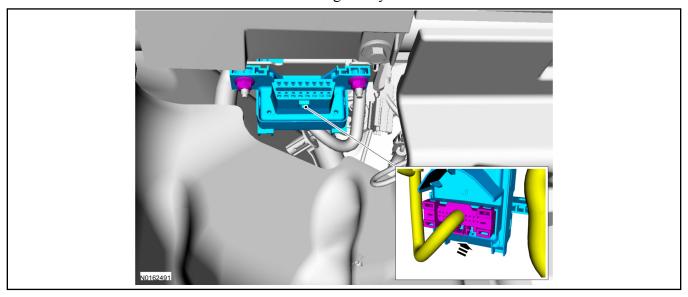

7. Disconnect the electrical connector from the back of the gateway module.

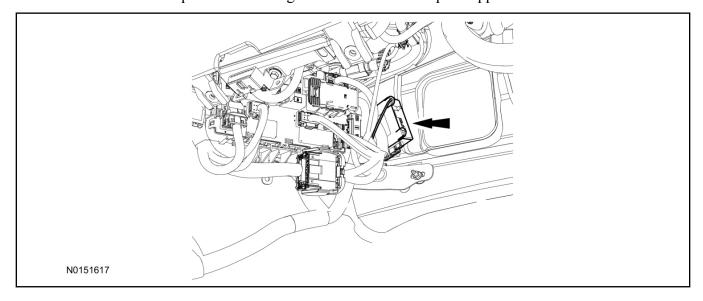

8. Connect the VSS T-harness to the gateway module electrical connector.

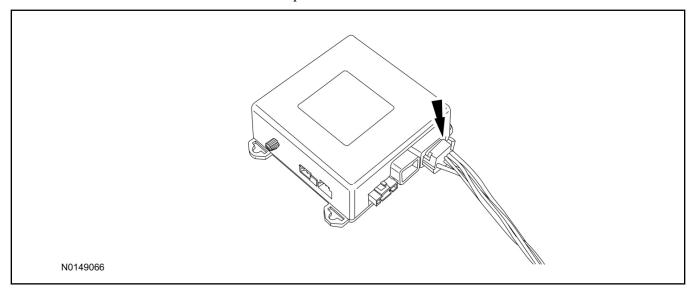

9. Connect the VSS T-harness to the back of the gateway module.

- 10. Position the T-harness inside the IP being careful to avoid sharp edges and moving parts.
 - Secure with zip-ties.
- 11. Position the VSS module behind the BCM (Body Control Module) and secure it to a wire harness with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 12. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

13. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

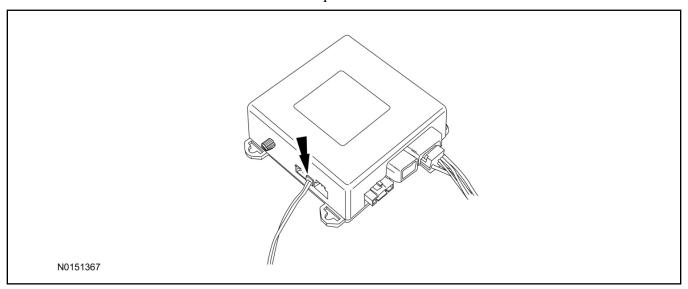

Optional Security Indicator LED Mounting

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 14. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 15. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 16. Route the LED wire harness to the VSS module.

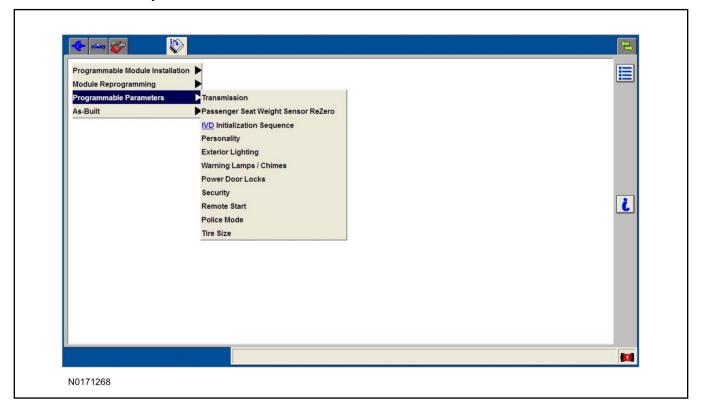

- 17. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

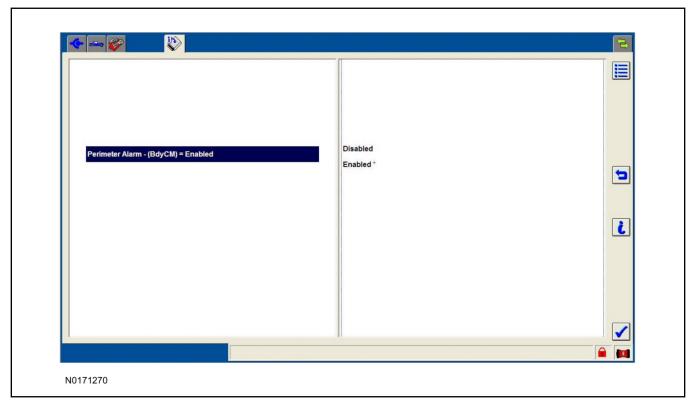

Perimeter Alarm Activation - Vehicles Without Factory Installed Perimeter Alarm

- 18. Verify that the IDS is updated to the most current version.
- 19. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

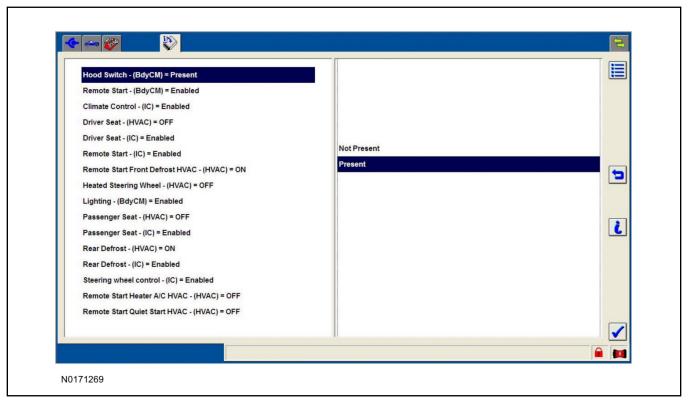

- 20. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Security.

- 21. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Enabled" text to the right of "Perimeter Alarm (BdyCM)".
 - Once "Enabled" has been selected, select the Tick button to direct IDS to enable the perimeter alarm option on the vehicle.

- 22. If hood switch installation was required, return to the programmable parameters menu and select Remote Start.
- 23. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Present" text to the right of "Hood Switch (BdyCM)".
 - Once "Present" has been selected, select the Tick button to direct IDS to enable hood switch monitoring on the vehicle.

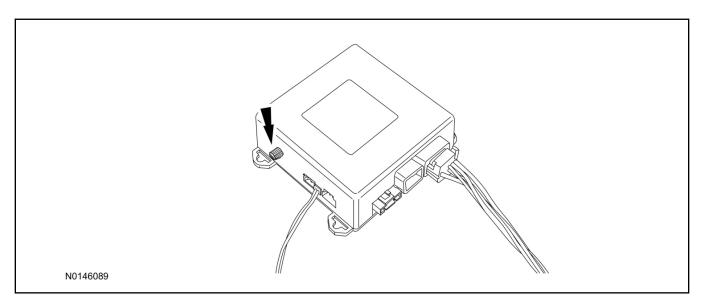

Learn VSS to Vehicle (Key Start Vehicles Only)

- 24. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 25. Use IDS to clear continuous DTCs.
- 26. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to WSM Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 27. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 28. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 29. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 30. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 31. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

Cycle ignition OFF, ON, OFF before testing.

- 32. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 33. Reach inside the window and use the inside driver's door handle to open the door. The LED should continue to flash, indicating that the vehicle is still armed. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.

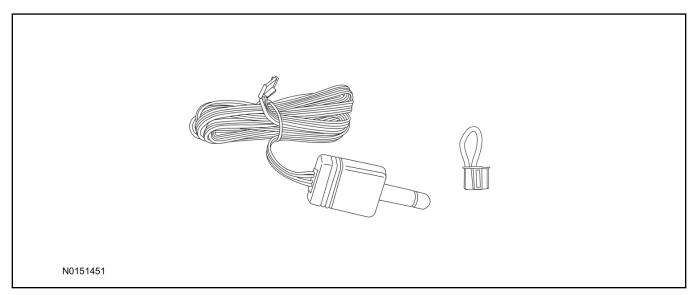

- For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 34. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 35. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 36. If the VSS kit will not be upgraded to RMST/RMU functions at this time, install the LH lower IP insulator. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

\triangle CAUTION:

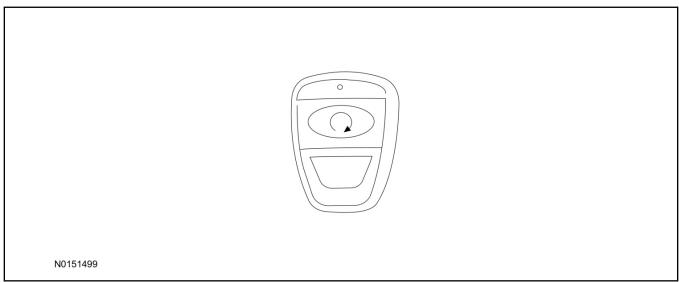

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Switch Kit - Sold Separately".

1	Hood Switch Wire Harness

Hood Switch Kit - "Sold Separately"

NOTE:

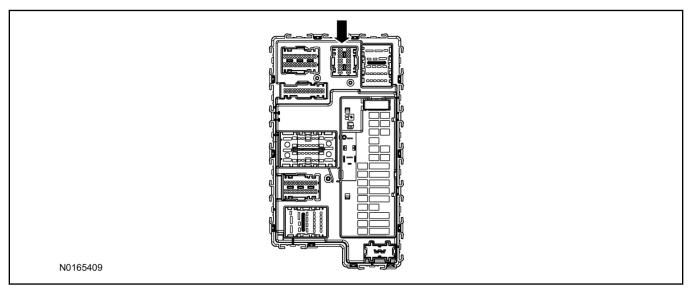

Hood switch installation is required for VSS/RMST/RMU installation if the vehicle is not currently equipped with a hood switch.

- 40. If previously installed, remove the LH lower IP insulator.
- 41. Remove the fender bolt and install the hood switch ground wire, using the previously removed bolt.
 - Tighten to 12 Nm (106 lb-in).

- 42. Route the hood switch wire harness into the vehicle through the bulkhead grommet.
 - Secure the hood switch wire harness with zip-ties.

43. Disconnect Body Control Module (BCM) connector C2280F.

- 44. If equipped, remove the pin plug from BCM connector C2280F Pin 14.
 - If the vehicle is not equipped with a hood switch wire harness from the factory C2280F will not have a wire at the Pin 14 location.

45. *NOTICE*:

Check that the all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

NOTE:

Use terminal wire labeled #3 (Orange).

Insert the BCM terminal wire from the hood switch wire harness kit into BCM connector C2280F Pin 14.

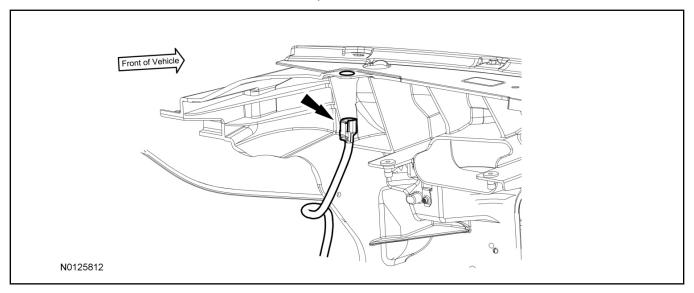

- Some disassembly of BCM connector C2280F may be required to perform this step.
- 46. Connect BCM connector C2280F.

NOTICE:

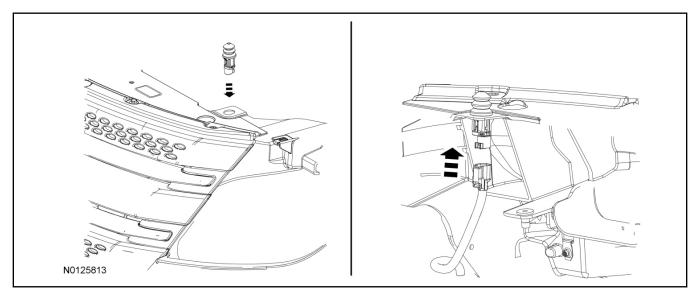

Refer to "Proper Wire Splicing Techniques" before proceeding.

- 47. Connect the hood switch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with zip-ties.

- 48. Locate the vehicle's existing "OE" hood switch wire harness, located on the LH side of the vehicle below the radiator core support.
 - If required remove the vehicle's air cleaner assembly, to access the vehicles "OE" hood switch wire harness. For additional information, refer to WSM Section 303-12.

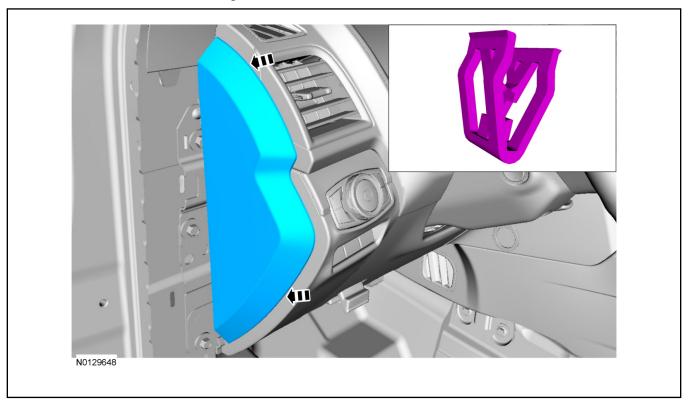

- 49. Install the OE hood switch assembly to the existing hood switch mounting location, on the LH side of the upper radiator core support as shown.
 - If equipped, remove the dummy plug from the upper radiator core support.
 - Position the flat spot on the hood switch to the flat spot on the radiator core support.
 - Connect the electrical connector to the hood switch.

RMST Kit Antenna Installation

50. Remove the LH IP side finish panel.

51. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

52. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

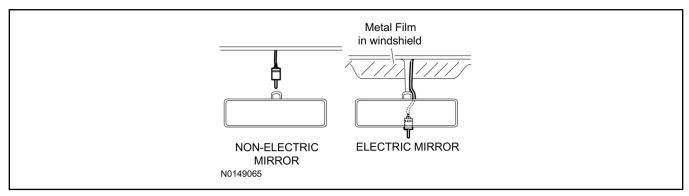

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

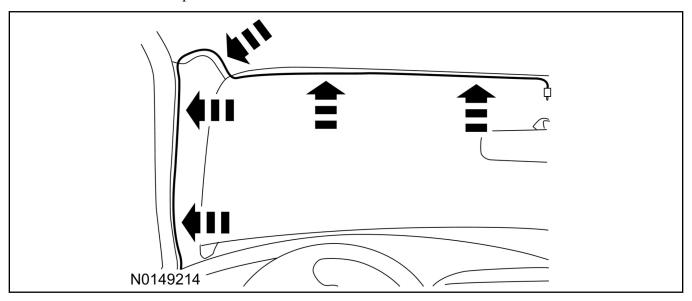

53. If necessary, position the LH A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

- 54. Route the antenna cable along the headliner and down the LH A-pillar towards the floor. Continue routing the wire Into the IP towards the VSS module.
 - Secure with tie-straps.

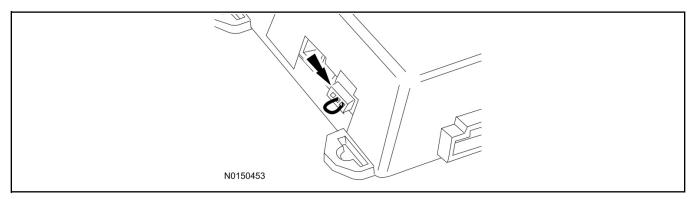

- 55. Connect the antenna connector to the VSS module.
- 56. Reposition the A-pillar trim panel back, if necessary.
- 57. Install the LH IP side finish panel.

VSS Module - Optional Vehicle Security Features

58. Enable/Disable Vehicle Shock Sensor:

Locate the security jumper supplied in the kit.

- Install the jumper to the VSS module if the shock sensor is to be **disabled**.
- Not installing and/or removing the jumper from the VSS module will keep the shock sensor feature **enabled**.

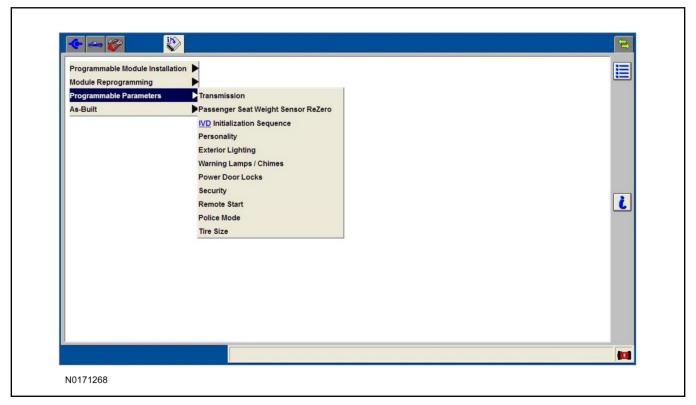

RMST Activation - Key Start Only

NOTE:

For vehicles equipped with push button start, proceed to Step 66 within the "Programming Key Fobs" section of this manual.

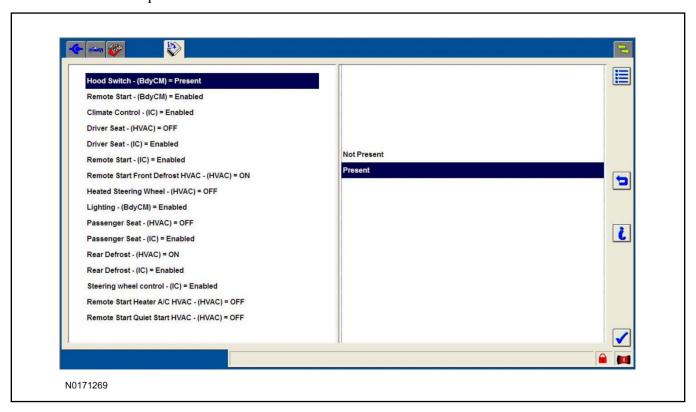

- 59. Verify that the IDS is updated to the most current version.
- 60. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN

- 61. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

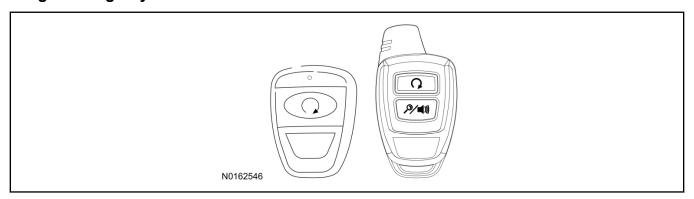

- 62. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM).
 - Hood Switch (BdyCM) (set to PRESENT).
 - Lighting (BdyCM).
 - Climate Control (IC).

- Remote Start (IC).
- Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC).
 - Passenger Seat (IC).
 - Rear Defrost (IC).
 - Steering Wheel Control (IC).
- If this vehicle has a Manual Climate Control System, also set these HVAC parameters to ON:
 - Remote Start Front Defrost HVAC (HVAC).
 - Remote Start Heater A/C HVAC (HVAC).
 - Remote Start Quiet Start HVAC (HVAC).
 - Remote Start Heater A/C HVAC (HVAC).
- If the vehicle includes these HVAC features, set them to ON:
 - Driver Seat (HVAC).
 - Heated Steering Wheel (HVAC).
 - Passenger Seat (HVAC).
 - Rear Defrost (HVAC).
- Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 63. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 64. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Programming Key Fobs

65. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.

- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 NOTE:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

66. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Open door and press unlock.
- 2 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 3 Depress and hold brake pedal.
- 4 Press the start/stop button.
- 5 After the vehicle starts, press the start/stop button to shut down.
- 6 Repeat steps 4 and 5 an additional five times, ending in ignition ON, engine ON.
- 7 Release the brake pedal, the horn should honk 3 times.
- 8 Press the start stop/button on each fob you wish to program. The horn should honk each time the button is pressed to indicate the transmitter has been programmed.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 67. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 68. Close the hood.
- 69. Close all of the vehicle doors.
- 70. Start the vehicle by pressing the remote start button twice on the remote start key fob.

- 71. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 72. Open the hood.
- 73. Confirm the engine shuts off.

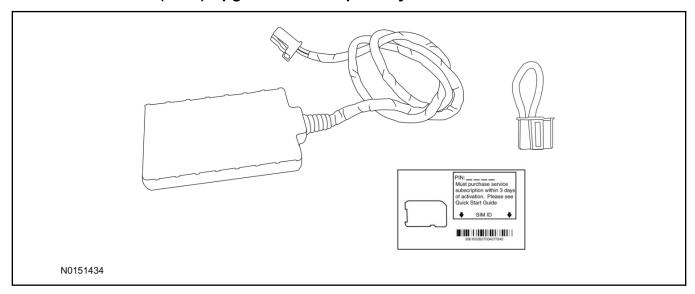

74. **NOTE:**

Vehicle doors should be closed while performing this step.

Attempt to remote start with the hood open. Confirm that the vehicle will not start with the hood open. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

75. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

76. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper

77. If previously installed, remove the LH lower IP insulator.

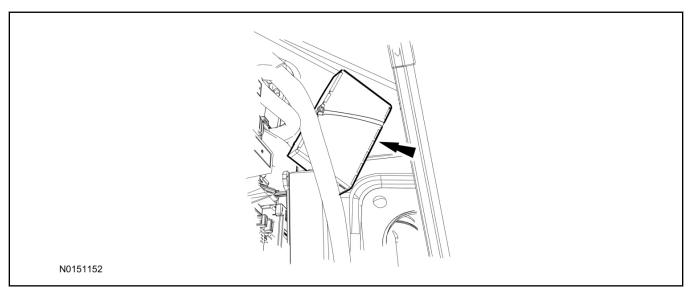

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

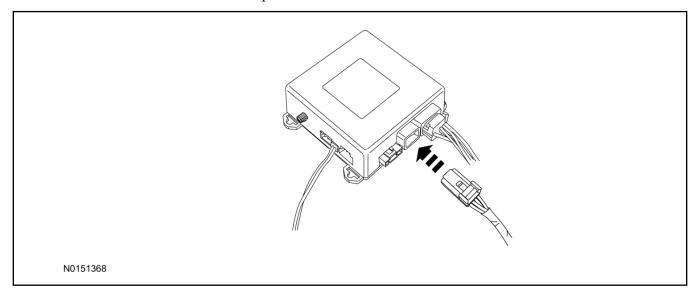

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

78. Using tie-straps secure the RMU to the IP harness near the previously installed VSS module.

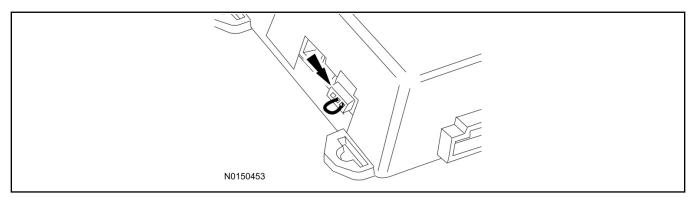

- 79. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

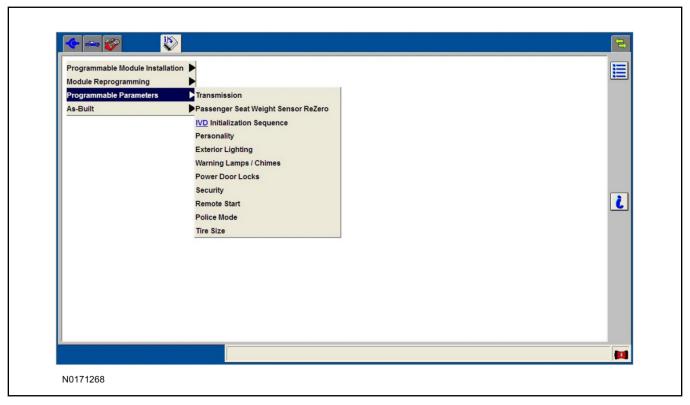

- 80. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

81. Install the LH lower IP insulator.

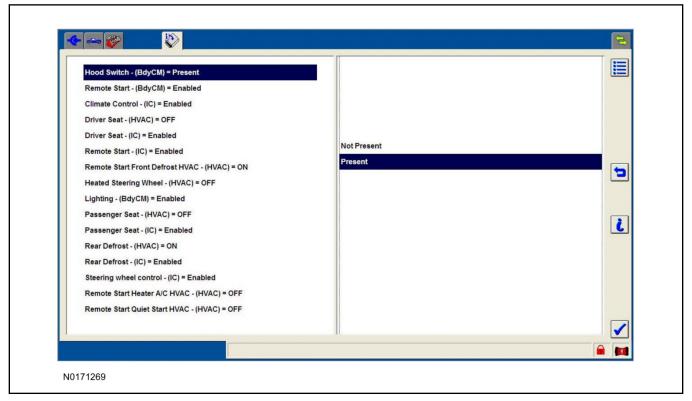

Remote Start Activation - Key Start Vehicles (Without Factory Remote Start)

- 82. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 83. Verify that the IDS is updated to the most current version.
- 84. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 85. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

- 86. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM).
 - Hood Switch (BdyCM) (set to PRESENT).
 - Lighting (BdyCM).
 - Climate Control (IC).
 - Remote Start (IC).
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC).
 - Passenger Seat (IC).
 - Rear Defrost (IC).
 - Steering Wheel Control (IC).
 - If this vehicle has a Manual Climate Control System, also set these HVAC parameters to ON:
 - Remote Start Front Defrost HVAC (HVAC).
 - Remote Start Heater A/C HVAC (HVAC).
 - Remote Start Quiet Start HVAC (HVAC).

- Remote Start Heater A/C HVAC (HVAC).
- If the vehicle includes these HVAC features, set them to ON:
 - Driver Seat (HVAC).
 - Heated Steering Wheel (HVAC).
 - Passenger Seat (HVAC).
 - Rear Defrost (HVAC).
- Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 87. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - Select Remote Start.
 - · Select System.
 - Verify that the remote start system is checked.
- 88. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.

- · Select Vehicle.
- Select Remote Start System.
- Verify that the remote start system is enabled.

RMU Activation

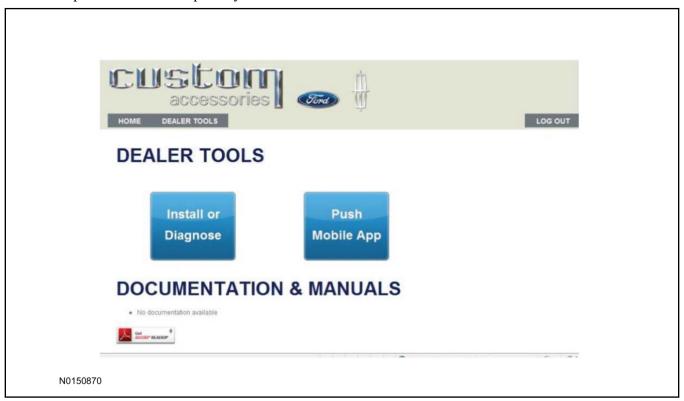

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

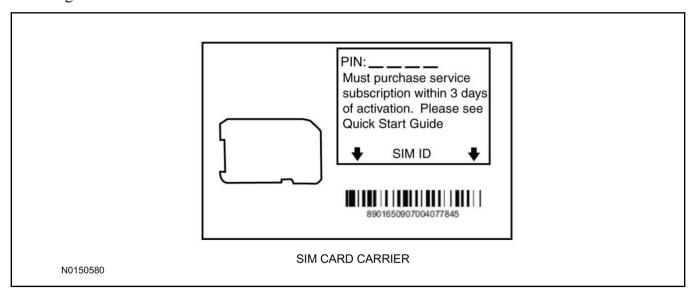

- 89. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 90. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

91. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

92. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

NOTE:

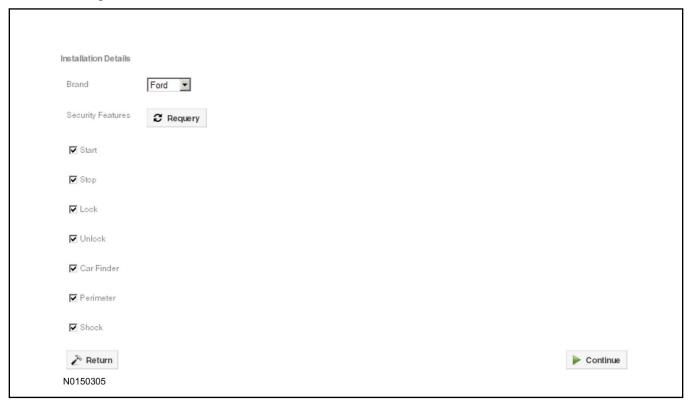

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

NOTE:

On screen Step 3 shown below.

93. **NOTE:**

On screen Step 4 shown below.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- · Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 94. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 95. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

QUANTITY	DESCRIPTION
1	Security Indicator LED

I. VSS System Installation

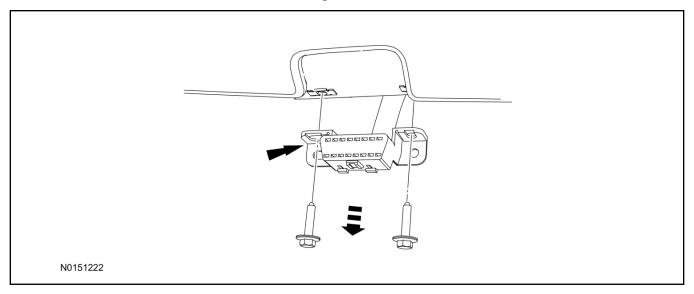

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

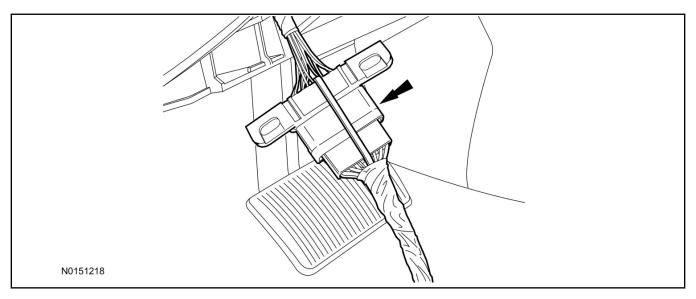

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

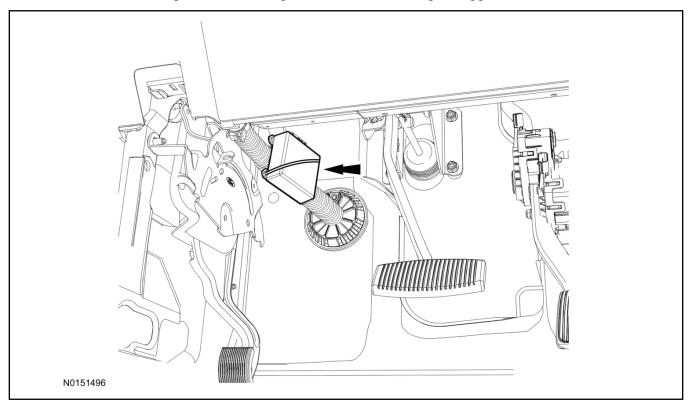

4. Remove the 2 bolts and remove the OBD II port from the IP frame.

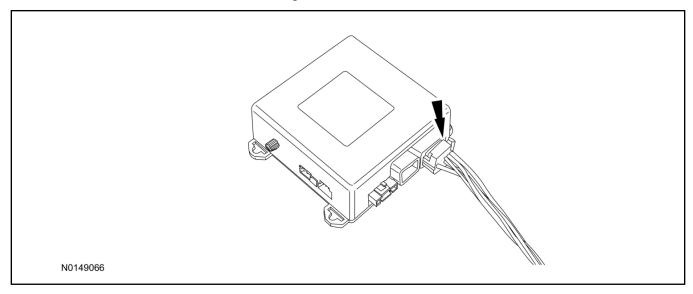

- 5. Connect the VSS T-harness to the OBD II port.
 - Secure the T-harness to the OBD II port using a tie-strap.

- 6. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.
- 7. Install the new VSS harness OBD II port to the IP frame and install the bolts.
 - Do not over tighten.
- 8. Position the VSS module on top of the Body Control Module (BCM) and secure to wire harness with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 9. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

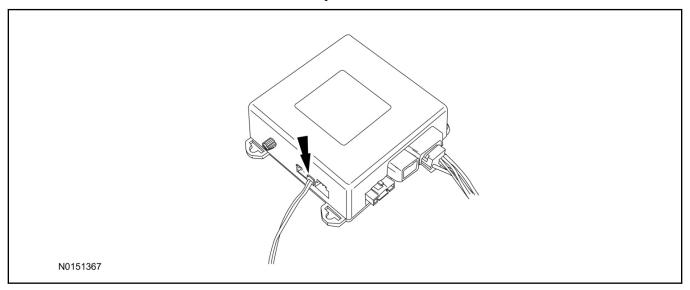

Optional Security Indicator LED Mounting

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 10. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 11. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 12. Route the LED wire harness to the VSS module.

- 13. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

Learn VSS to Vehicle

NOTE:

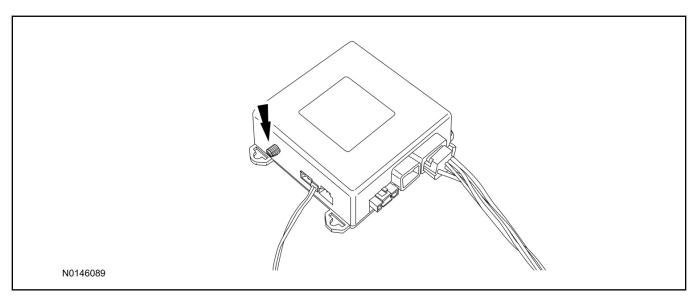

Make sure the brake pedal is not depressed during this sequence.

- 14. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 15. Put the key in the ignition.
- 16. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.
- 17. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.
- 18. If equipped with additional accessories (i.e. RF keypad), verify that they maintain all functionality post installation.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 19. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 20. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 21. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 22. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 23. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

- 24. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 25. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
- 26. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's

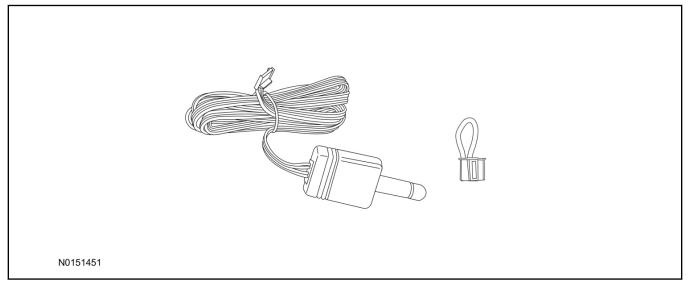

- door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
- 27. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 28. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

\triangle CAUTION:

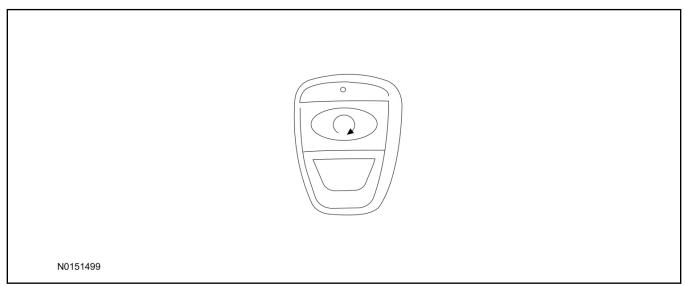

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

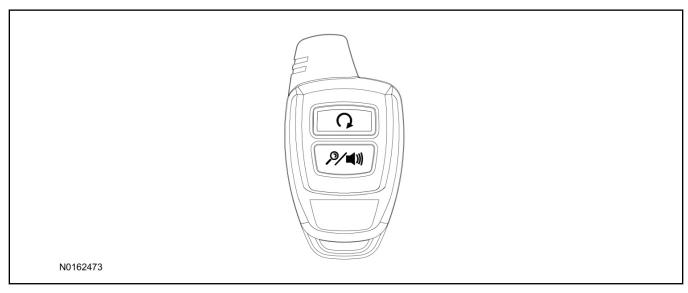

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Switch Kit - Sold Separately".

31. Review the TPM antenna kit contents.

TPM Antenna Kit

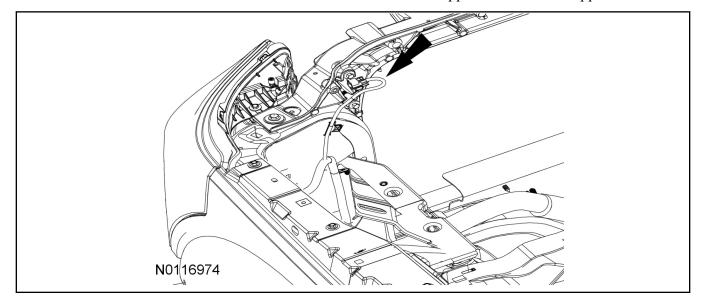

QUANTITY	DESCRIPTION
1	Antenna Module
1	Antenna Jumper Wire
1	2-sided Tape (not shown)

Hood Switch Kit - (if required) "Sold Separately"

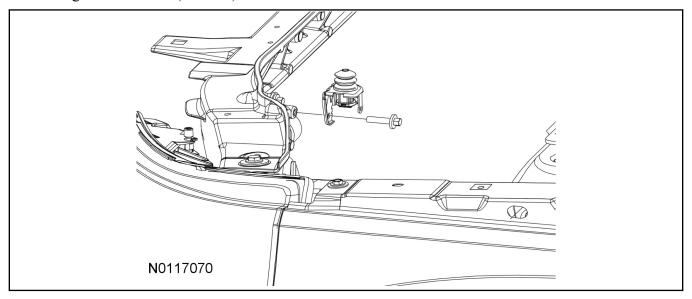

NOTE:

Hood switch installation is optional for VSS installation and required if the vehicle is being upgraded to RMST/RMU and is not currently equipped with a hood switch.

32. Locate the hood switch harness located on the LH side of the upper radiator core support.

- 33. Install the Hood switch assembly to the existing hood switch mounting on the upper radiator core support as shown.
 - Install the bolt.
 - Tighten to 10 Nm (89 lb-in).

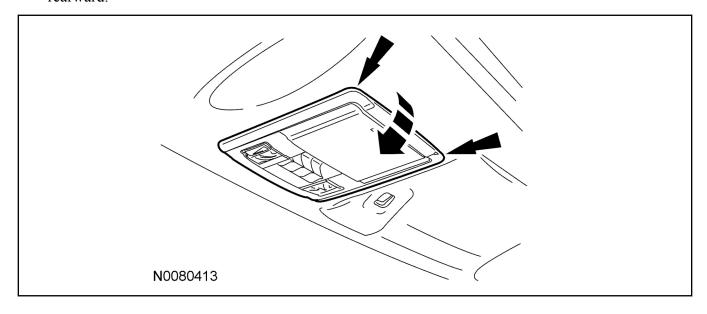

- 34. Connect the electrical connector to the hood switch.
- 35. Install the hood switch wire harness push pin retainer to the hood switch bracket.

TPM Antenna Kit Installation

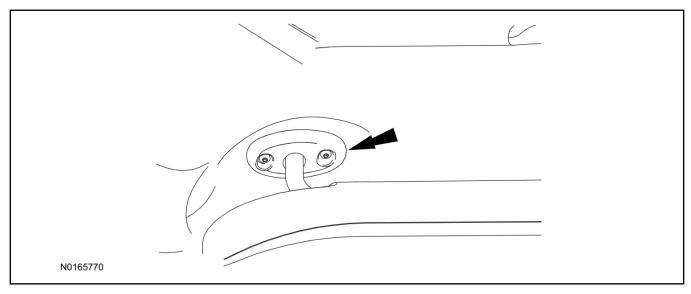

NOTE:

The TPM Antenna Kit is only required if the vehicle is not equipped with factory remote start.

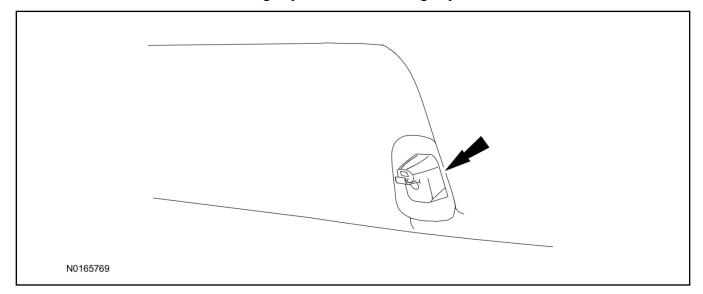

36. Pull the rear edge of the overhead console downward, at the locations shown, and then pull rearward.

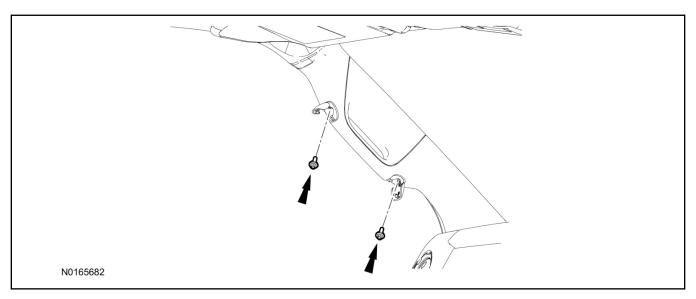

- 37. Disconnect the electrical connectors.
- 38. Remove the overhead console.
- 39. Remove the LH sun visor screws and the sun visor.
 - If equipped, disconnect the electrical connector.

40. Remove the LH sun visor retaining clip screw and retaining clip.

- 41. Open the LH A-pillar trim panel bolt covers.
- 42. Loosen the LH A-pillar trim panel bolts.

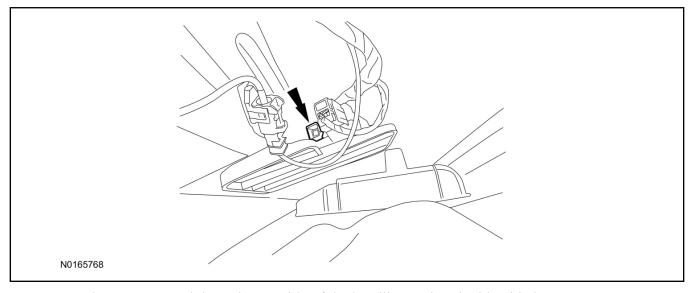

43. **NOTE:**

Carefully rotate the A-pillar trim panel during this step.

Remove the LH A-pillar trim panel.

- 44. Position the LH side of the headliner down far enough to access the Tire Pressure Monitor (TPM) module.
 - Connect the antenna jumper wire to the TPM module.

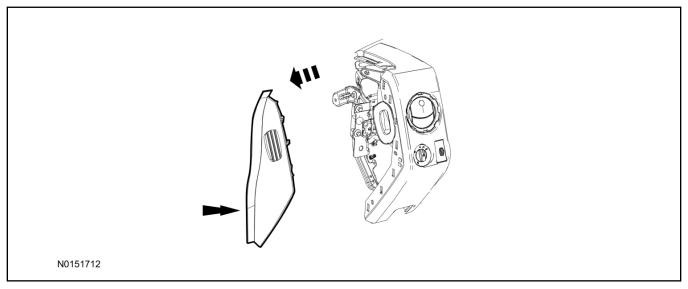

- 45. Secure the antenna module to the top side of the headliner using double-sided tape.
- 46. Connect the antenna jumper wire connector to the antenna module.
- 47. Install the LH A-pillar trim panel.
- 48. Tighten the LH A-pillar trim panel bolts.
 - Tighten bolts to 8 Nm (71 lb-in) and close the bolt covers.
- 49. Install the LH sun visor retaining clip and retaining clip screw.

- 50. Install the LH sun visor and sun visor screws.
 - If equipped, connect the electrical connector.
- 51. Connect the overhead console electrical connectors and install the overhead console.

RMST Kit Antenna Installation

52. Remove the LH IP side finish panel.

53. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

54. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

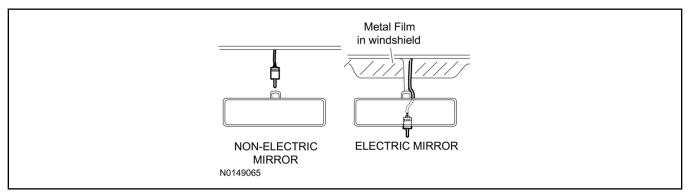

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

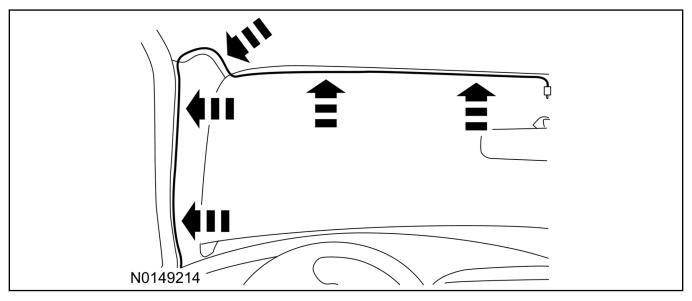

55. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire. For additional information, refer to Workshop Manual (WSM) Section 501-05.

NOTE:

Do not route the antenna wire over the top of air bags.

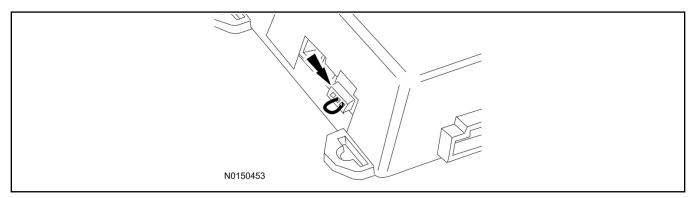

- 56. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

- 57. Connect the antenna connector to the VSS module.
- 58. Reposition the A-pillar trim panel back, if necessary. For additional information, refer to WSM Section 501-05.
- 59. If the RMST kit will not be upgraded to RMU functions at this time, install the LH IP side finish panel.

VSS Module - Optional Vehicle Security Features

- 60. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features enabled.

RMST Activation

- 61. Verify that the IDS is updated to the most current version.
- 62. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 63. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Body.
 - Select Security.
 - Select Remote Start.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.

Vehicle Security/Remote Start/Remote Access

- Select Yes. This will enable the remote start function on the vehicle.
- 64. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 65. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Learn Remote Start to Vehicle

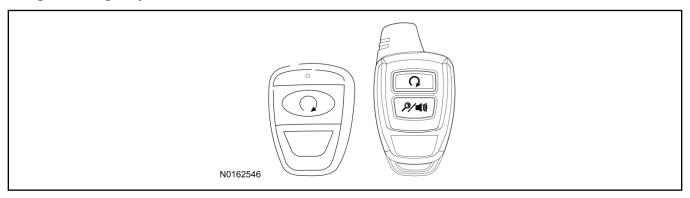

NOTE:

Make sure the brake pedal is not depressed during this sequence.

- 66. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 67. Put the key in the ignition.
- 68. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.

- 69. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.
- 70. If equipped with additional accessories (i.e. RF keypad), verify that they maintain all functionality post installation.

Programming Key Fobs

71. **NOTE:**

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

72. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.

- 73. Close the hood.
- 74. Close all of the vehicle doors.
- 75. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 76. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 77. Open the hood.
- 78. **NOTE:**

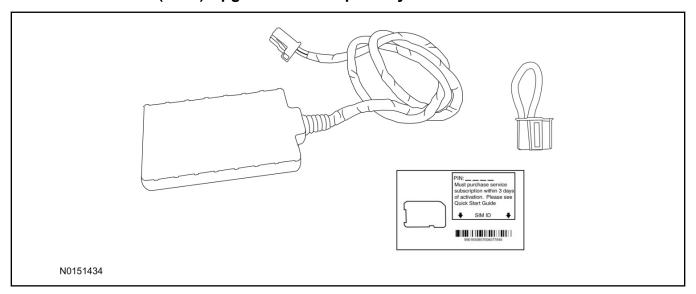

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

79. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

80. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper

81. If previously installed, remove the LH IP side finish panel.

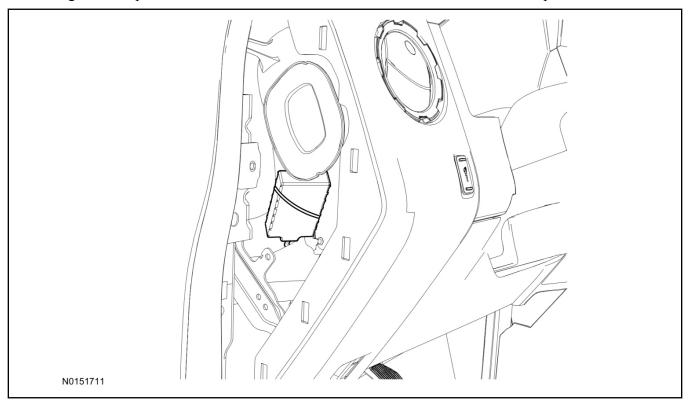

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

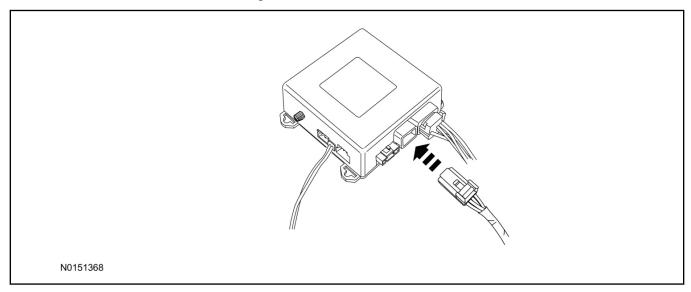

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

82. Using a tie-strap secure the RMU to the A/C duct behind the LH IP side finish panel.

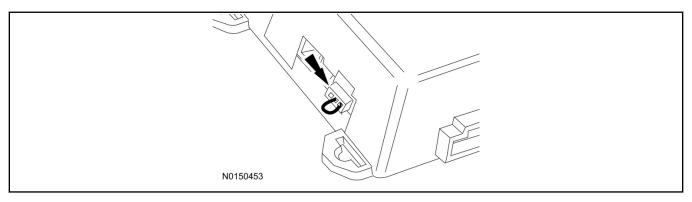

- 83. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 84. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

85. Install the LH IP side finish panel.

Remote Start Activation - (Vehicles Without Factory Remote Start)

- 86. Verify that the IDS is updated to the most current version.
- 87. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 88. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - · Select Body.
 - Select Security.
 - Select Remote Start.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.
 - Select Yes. This will enable the remote start function on the vehicle.
- 89. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - · Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 90. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Learn Remote Start to Vehicle

NOTE:

Make sure the brake pedal is not depressed during this sequence.

- 91. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 92. Put the key in the ignition.
- 93. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.
- 94. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.
- 95. If equipped with additional accessories (i.e. RF keypad), verify that they maintain all functionality post installation.

RMU Activation

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

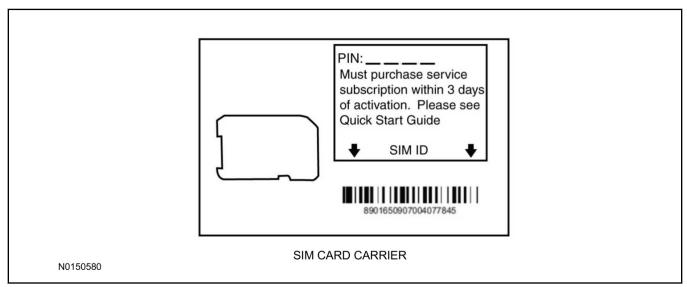

- 96. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 97. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

98. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

99. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

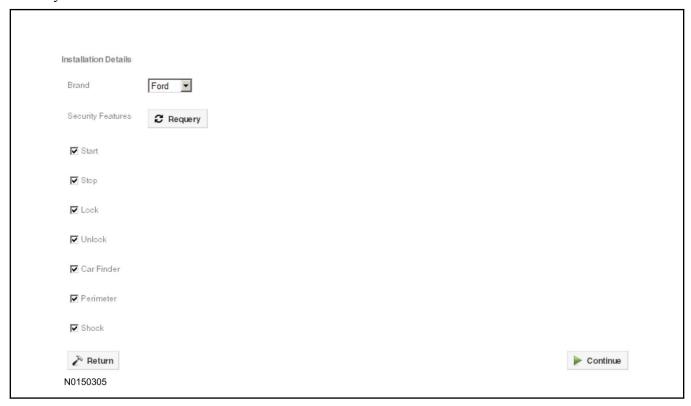

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

100. Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn Remote Start System to Vehicle" section in this manual.

- 101.Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 102. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

4. Review the Hood Latch Kit contents.

Hood Latch Kit "Sold Separately"

QUANTITY	DESCRIPTION
1	Hood Latch Assembly

Hood Latch Kit - (if required) "Sold Separately"

NOTE:

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

5. Install a new hood latch equipped with a switch. For additional information, refer to Workshop Manual (WSM) Section 501-14.

I. VSS System Installation

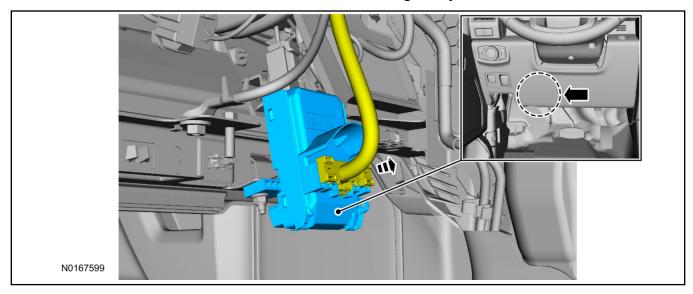

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

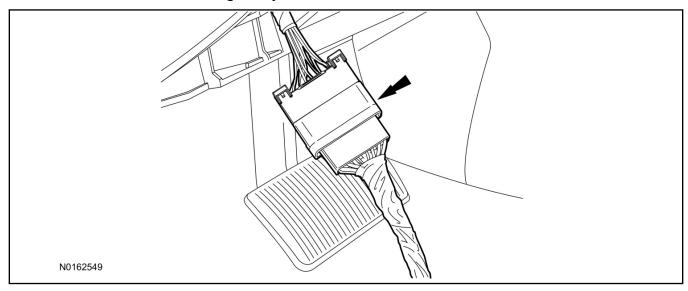

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

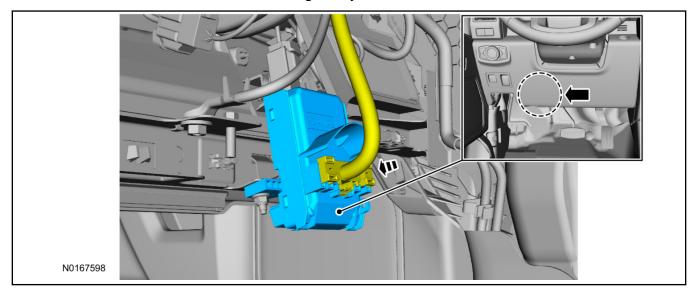

- 6. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 7. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
- 8. Disconnect the electrical connector from the back of the gateway module.

9. Connect the T-harness to the gateway module electrical connector.

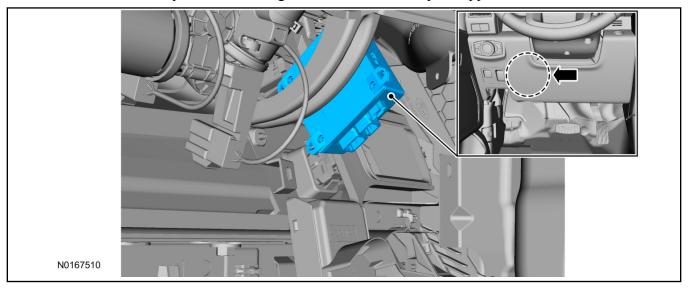

10. Connect the T-harness to the back of the gateway module.

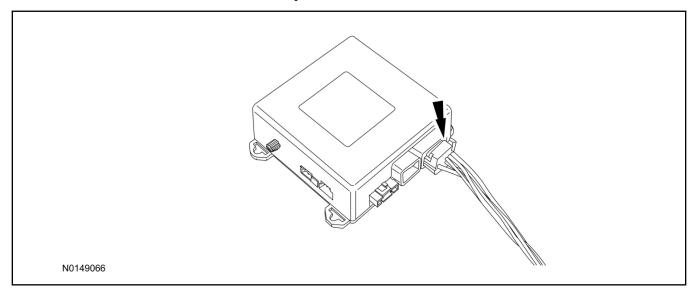

11. Position the T-harness inside the Instrument Panel (IP) being careful to avoid sharp edges and moving parts.

- 12. Position the VSS module onto the IP frame above the gateway module. Secure the VSS module to the IP frame with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 13. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

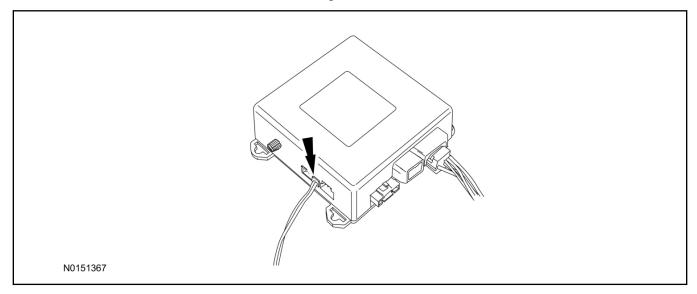

14. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

Optional Security Indicator LED Mounting

CAUTION:

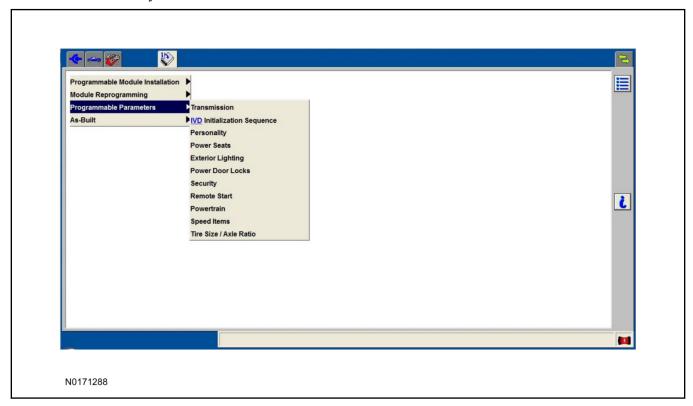

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 15. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 16. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 17. Route the LED wire harness to the VSS module.
- 18. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

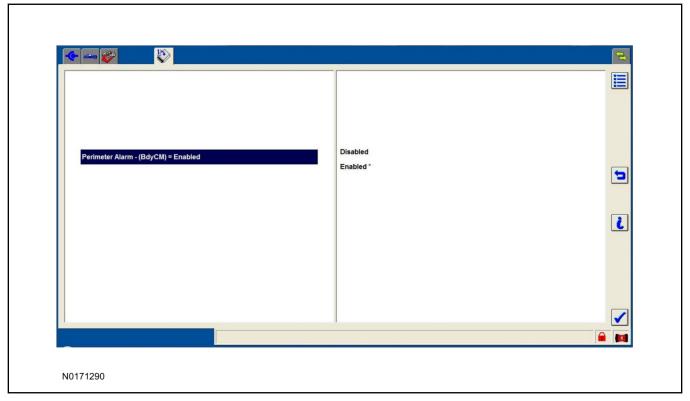

Perimeter Alarm Activation - Vehicles Without Factory Installed Perimeter Alarm

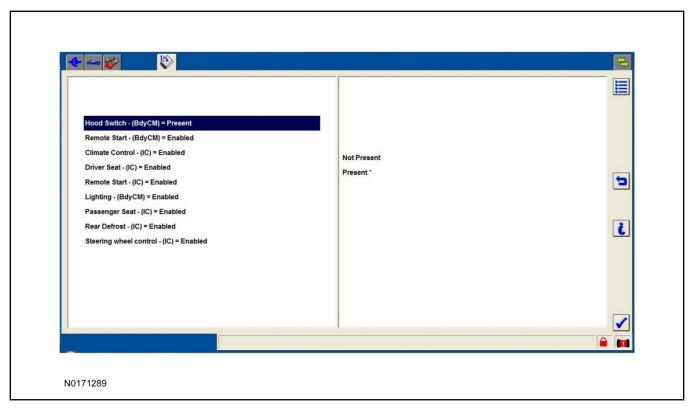

- 19. Verify that the IDS is updated to the most current version.
- 20. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 21. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Security.

- 22. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Enabled" text to the right of "Perimeter Alarm (BdyCM)".
 - Once "Enabled" has been selected, select the Tick button to direct IDS to enable the perimeter alarm option on the vehicle.

- 23. If hood switch installation was required, return to the programmable parameters menu and select Remote Start.
- 24. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Present" text to the right of "Hood Switch (BdyCM)".
 - Once "Present" has been selected, select the Tick button to direct IDS to enable hood switch monitoring on the vehicle.

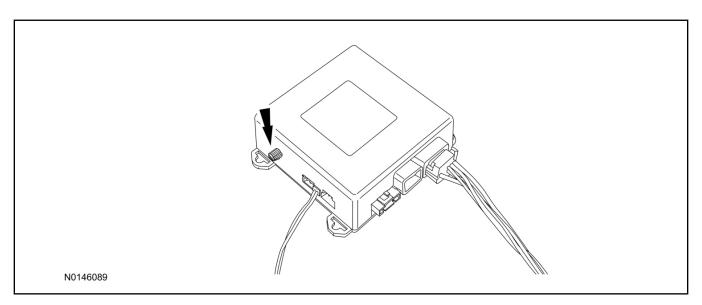

Learn VSS to Vehicle

- 25. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 26. Use IDS to clear continuous DTCs.
- 27. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 28. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 29. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 30. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 31. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 32. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

- 33. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 34. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
- 35. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.

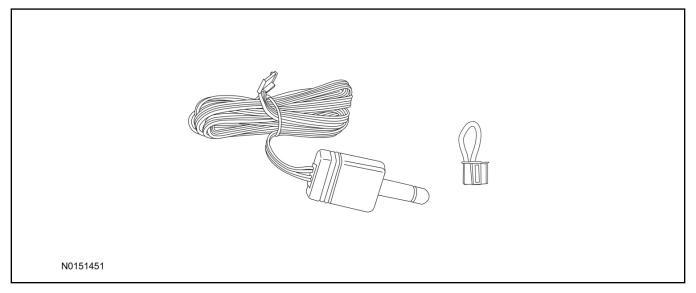

- 36. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 37. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

^CAUTION:

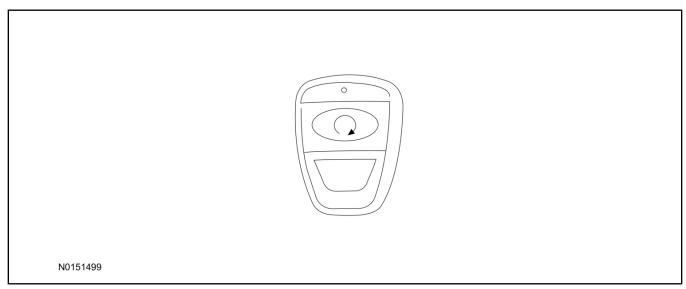

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to **Hood Latch Kit - (if required) "Sold Separately"**.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

1	Bi-directional Key Fob (15K601)

RMST Kit Antenna Installation

- 39. Remove the LH IP side finish panel.
- 40. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

41. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

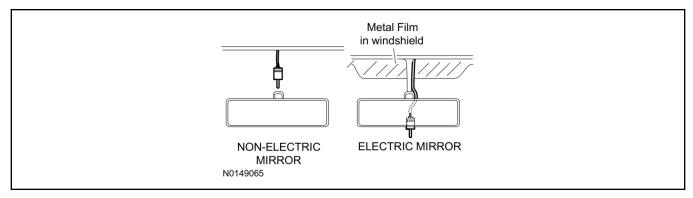

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

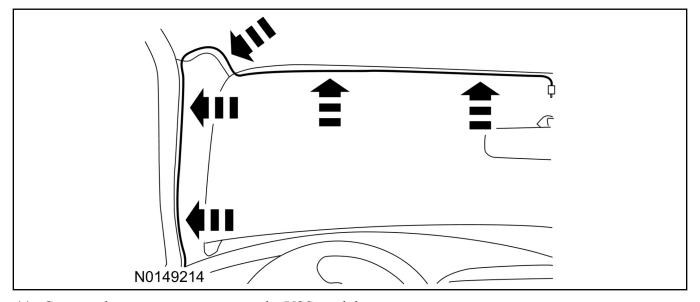

42. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire. For additional information, refer to WSM Section 501-05.

NOTE:

Do not route the antenna wire over the top of air bags.

- 43. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

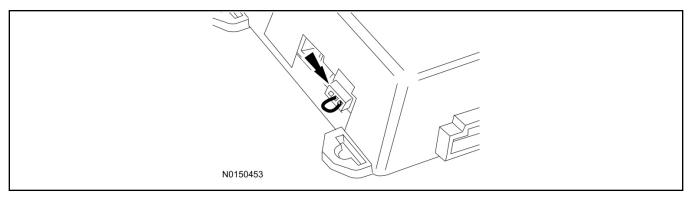

- 44. Connect the antenna connector to the VSS module.
- 45. Reposition the A-pillar trim panel back, if necessary. For additional information, refer to WSM Section 501-05.
- 46. Install the LH IP side finish panel.

VSS Module - Optional Vehicle Security Features

- 47. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.

• Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

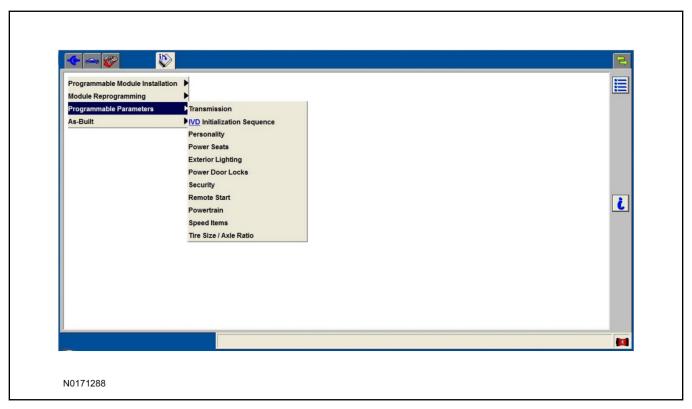

RMST Activation - Vehicles Without Factory Remote Start Only

NOTE:

For vehicles equipped with push button start, proceed to "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

- 48. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 49. Verify that the IDS is updated to the most current version.
- 50. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 51. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - · Select Remote Start.

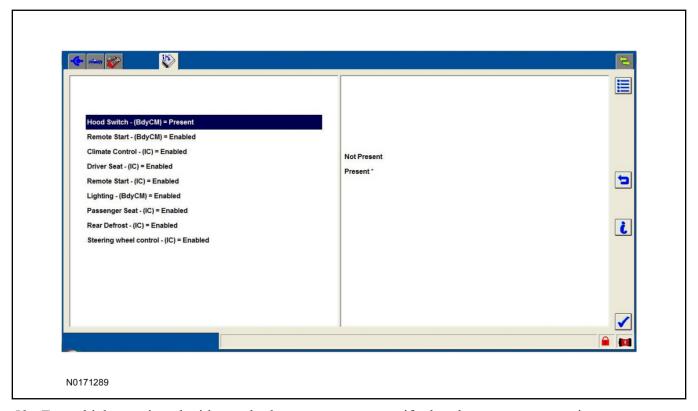

- 52. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Hood Switch (BdyCM) (Set to PRESENT).
 - Remote Start (BdyCM).
 - Climate Control (IC).
 - Remote Start (IC).
 - Lighting (BdyCM).
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC).
 - Passenger Seat (IC).
 - Rear Defrost (IC).
 - Steering Wheel Control (IC).

NOTE:

The Steering Wheel Control item refers to the heated steering wheel feature.

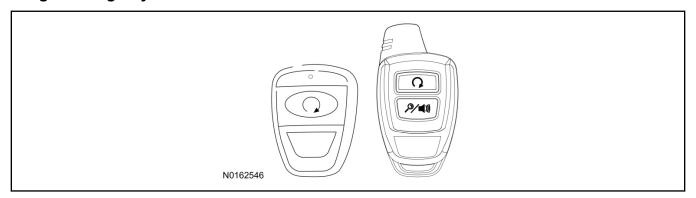

The Driver Seat and Passenger Seat items refer to climate controlled seating.

• Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 53. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Advanced Settings.
 - · Select Vehicle.
 - Select Remote Start
 - Verify that the Remote Start system is checked.
- 54. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Programming Key Fobs

55. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

56. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Open door and press unlock.
- 2 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.

- 3 Depress and hold brake pedal.
- 4 Press the start/stop button.
- 5 After the vehicle starts, press the start/stop button to shut down.
- 6 Repeat steps 3 and 4 an additional five times, ending in ignition ON, engine ON.
- 7 Release the brake pedal, the horn should honk 3 times.
- 8 Press the start stop/button on each fob you wish to program. The horn should honk each time the button is pressed to indicate the transmitter has been programmed.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 57. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 58. Close the hood.
- 59. Close all of the vehicle doors.
- 60. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 61. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 62. Open the hood.
- 63. Confirm the engine shuts off.

64. **NOTE:**

Vehicle doors should be closed while performing this step.

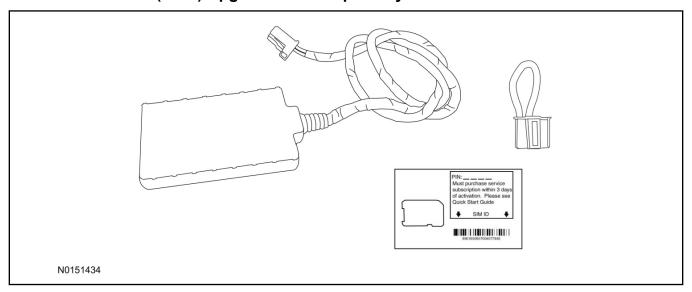

Attempt to remote start with the hood open. Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

65. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

18

III. Remote Access (RMU) Upgrade "Sold Separately"

66. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps (not shown)

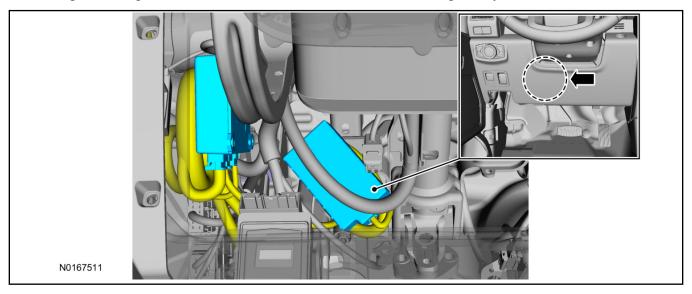

\triangle CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

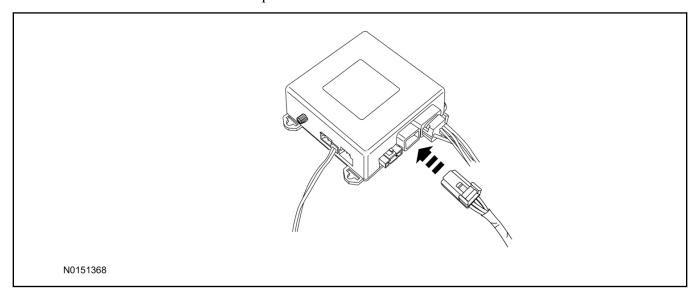

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

67. Using a tie-strap secure the RMU to the wire harness above the gateway module.

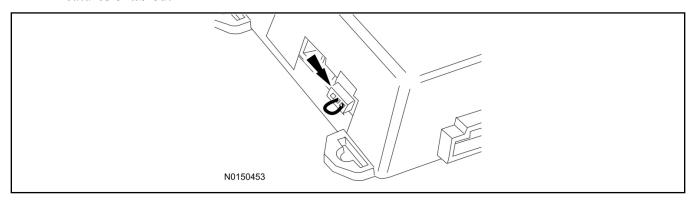

- 68. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 69. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

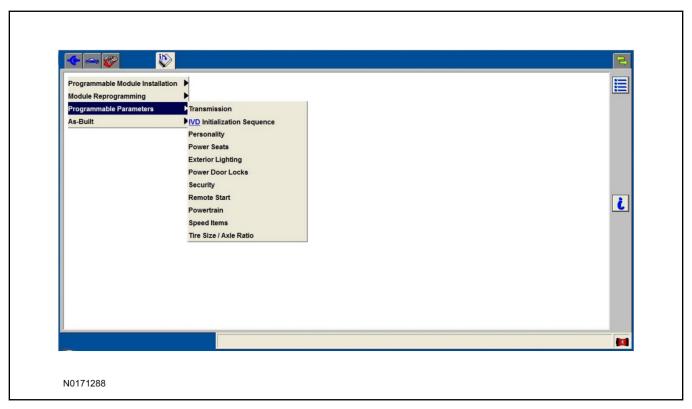

RMST Activation - Vehicles Without Factory Remote Start Only

NOTE:

For vehicles equipped with push button start, proceed to "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

- 70. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 71. Verify that the IDS is updated to the most current version.
- 72. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 73. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

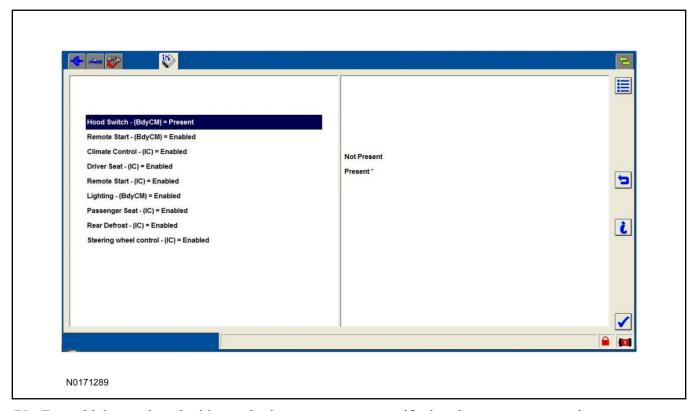

- 74. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Hood Switch (BdyCM) (Set to PRESENT).
 - Remote Start (BdyCM).
 - Climate Control (IC).
 - Remote Start (IC).
 - Lighting (BdyCM).
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC).
 - Passenger Seat (IC).
 - Rear Defrost (IC).
 - Steering Wheel Control (IC).

NOTE:

The Steering Wheel Control item refers to the heated steering wheel feature.

The Driver Seat and Passenger Seat items refer to climate controlled seating.

• Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 75. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Advanced Settings.
 - · Select Vehicle.
 - Select Remote Start
 - Verify that the Remote Start system is checked.
- 76. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

RMU Activation

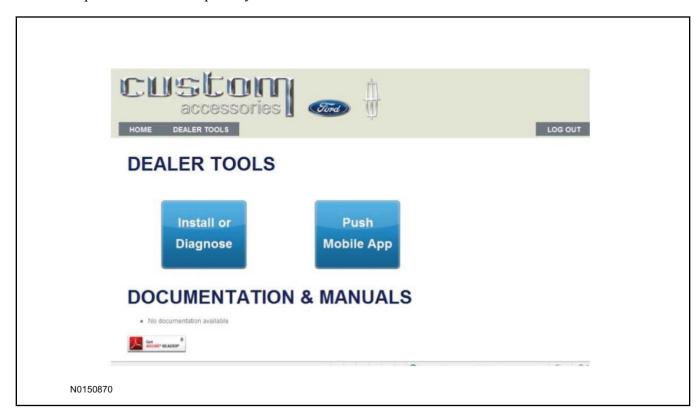

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

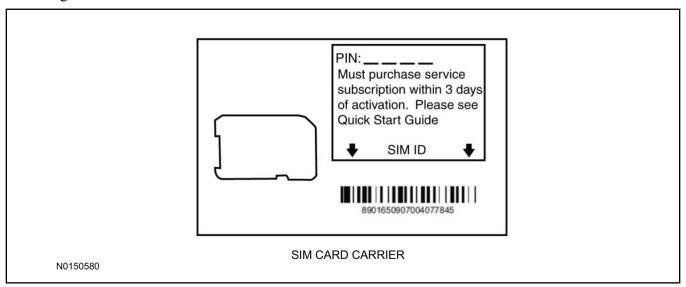

- 77. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 78. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

79. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

80. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

NOTE:

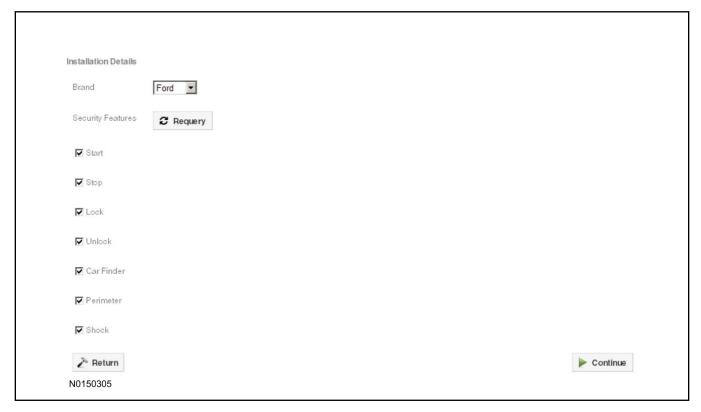

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

NOTE:

On screen Step 3 shown below.

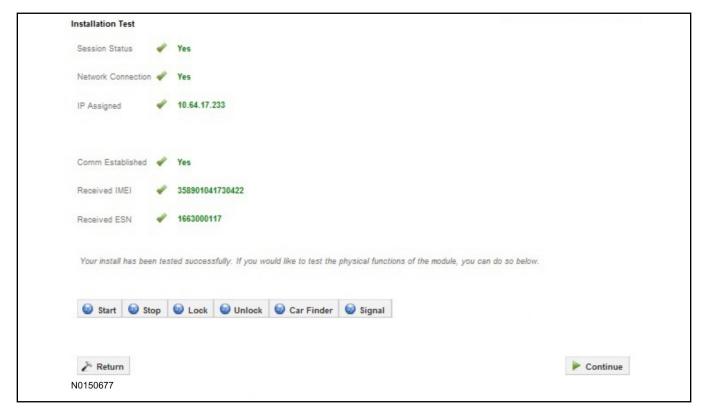

81. **NOTE:**

On screen Step 4 shown below.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 82. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 83. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

1	Security Indicator LED

Hood Latch Kit Contents (if required) "Sold Separately"

4. Review the Hood Latch kit contents.

Hood Latch Kit "Sold Separately"

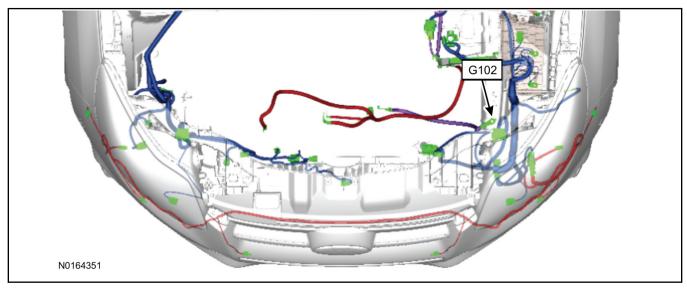

QUANTITY	DESCRIPTION
1	Hood Latch Assembly
Hood Latch Kit "Sold Separately"	
1	Body Control Module (BCM) Terminal Wire
1	Hood Latch Wire Harness
10	Tie Wraps (Not Pictured)

Hood Latch Kit - "Sold Separately"

NOTE:

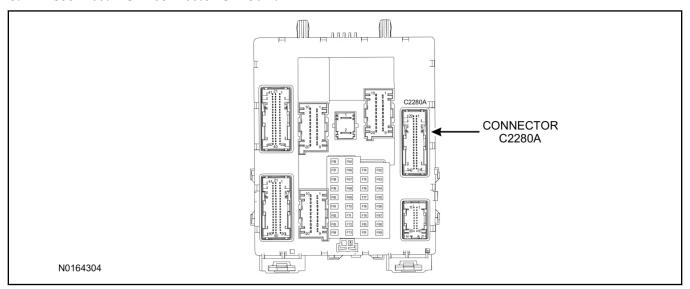

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

- 5. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 6. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

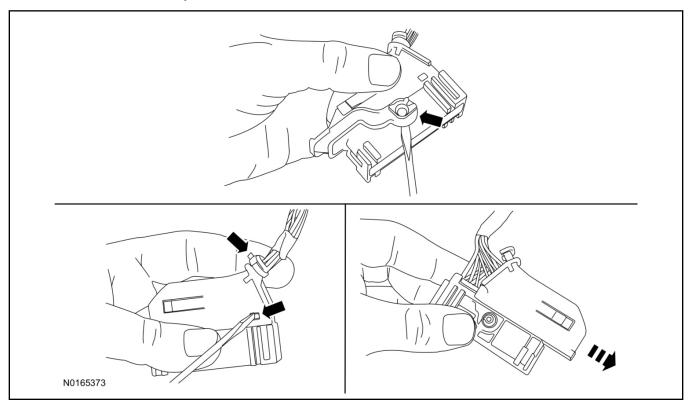

- 7. Route the hood latch wire harness into the vehicle through the bulkhead grommet on the passenger side.
 - Secure the hood latch wire harness with tie-straps.

8. Disconnect BCM connector C2280A.

- 9. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

- 10. If equipped, remove the pin plug from BCM connector C2280A Pin 15.
 - If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

11. *NOTICE*:

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 12. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 13. Connect BCM connector C2280A.

NOTICE:

Refer to "Proper Wire Splicing Techniques" before proceeding.

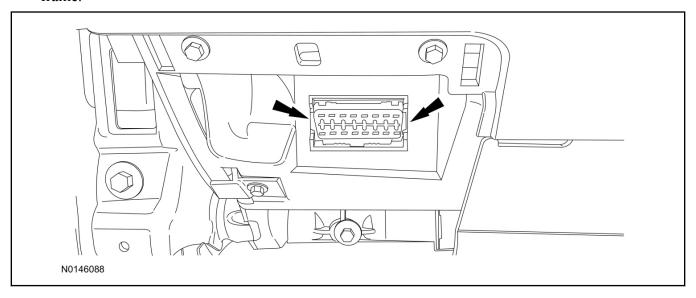

- 14. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

I. VSS System Installation

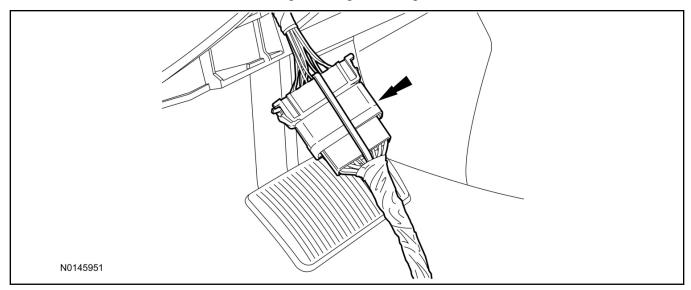

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

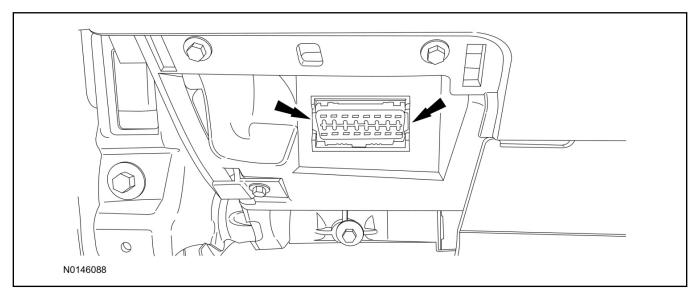

15. Press inward on the clips and detach the vehicle's OBD II port from the Instrument Panel (IP) frame

- 16. Connect the VSS T-harness to the gateway module electrical connector.
 - Secure the T-harness to the OBD II port using a tie-strap.

17. Connect the VSS T-harness to the IP frame.

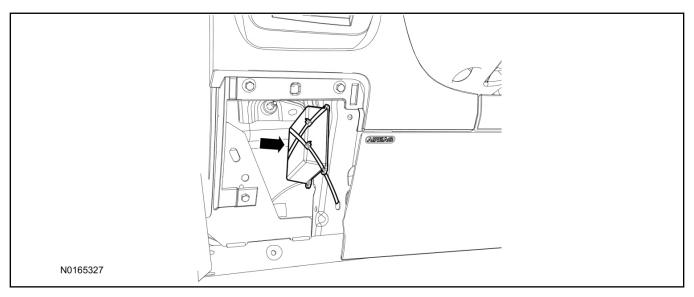

18. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.

19. **NOTE:**

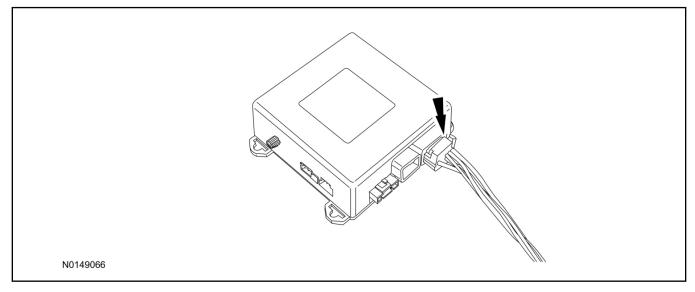

Data Link Connector (DLC) access panel removed for clarity.

Using tie-straps, secure the VSS module to the IP frame.

- Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
- Tie-strap the VSS module loops at opposite corners.

- 20. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

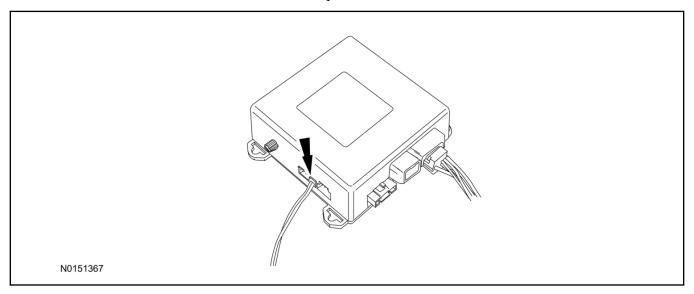

Optional Security Indicator LED Mounting

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 21. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.

- 22. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 23. Route the LED wire harness to the VSS module.
- 24. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

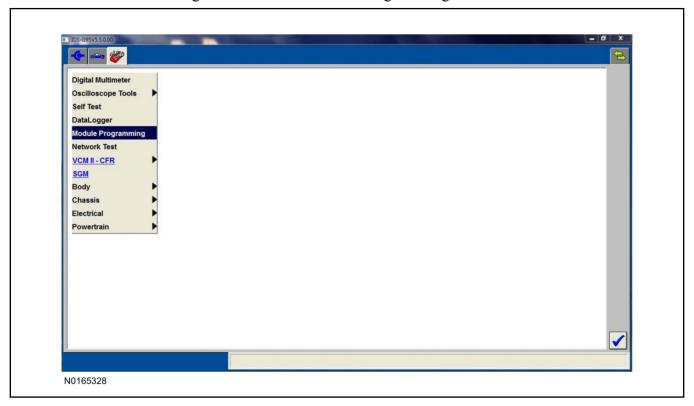

Perimeter Alarm Activation - Key Start Only

NOTE:

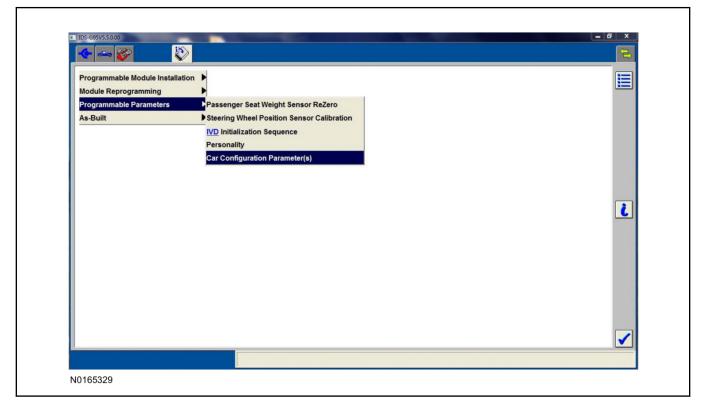

IDS must be connected to the internet during perimeter alarm activation.

- 25. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 26. Verify that the IDS is updated to the most current version.
- 27. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

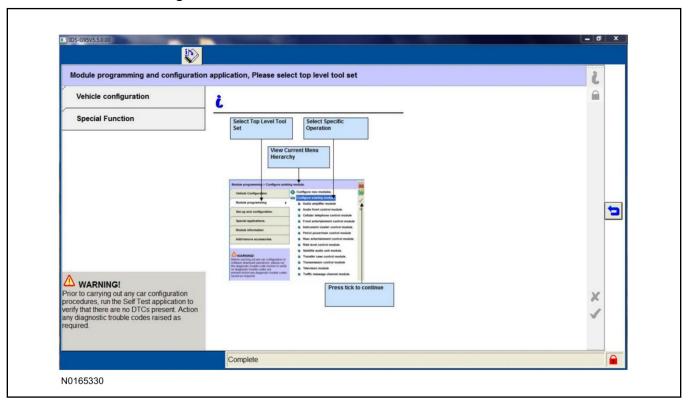

28. Start a new session using IDS and select "Module Programming".

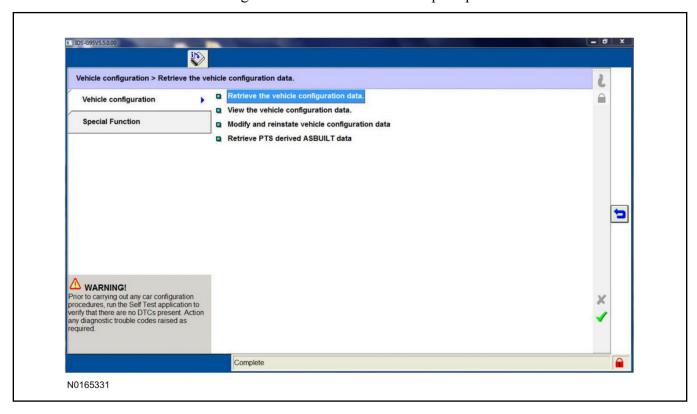

29. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

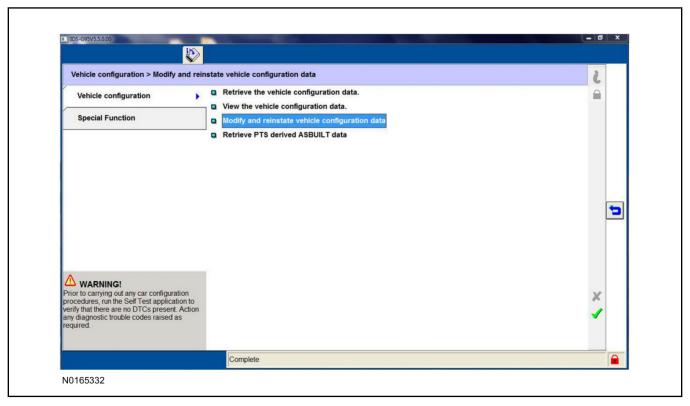

30. Select "Vehicle Configuration".

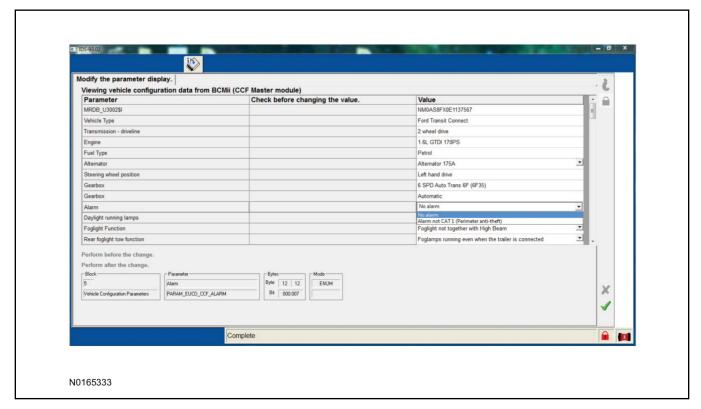

31. Select "Retrieve Vehicle Configuration data" and follow the prompts.

32. Select "Modify and reinstate vehicle configuration data".

33. Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

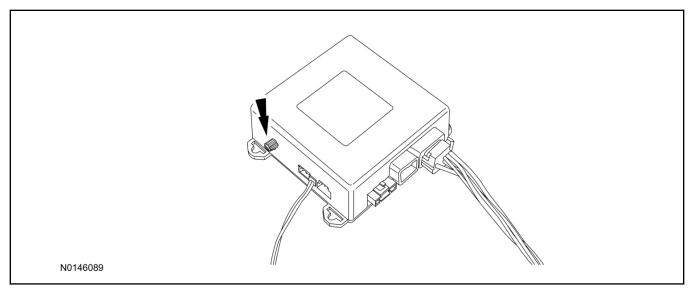

34. Select the Tick mark and download the data back into the vehicle.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 35. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 36. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 10-15 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 37. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 38. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 39. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.
- 40. Install the steering column shrouds. For additional information, refer to WSM Section 501-05.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

Cycle ignition OFF, ON, OFF before testing.

- 41. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 15 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 42. Reach inside the window and press the door unlock trim switch (door will not unlock). The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, the alarm will trigger instantly upon door opening.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 43. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 44. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 45. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

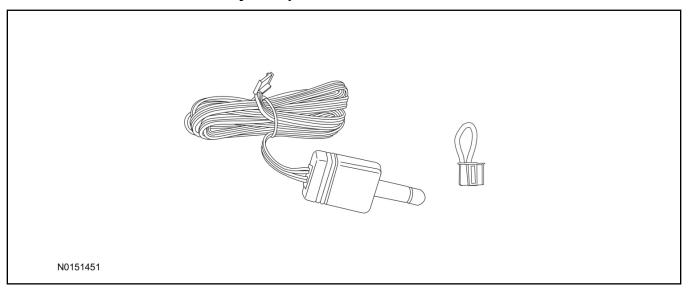

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

CAUTION:

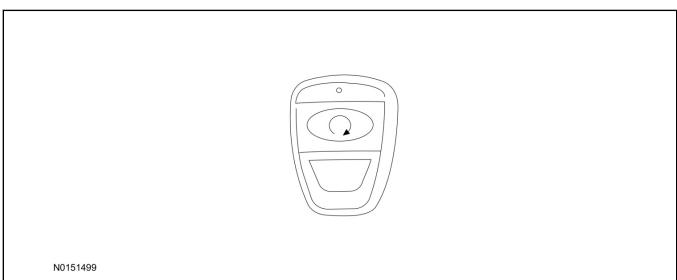

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Latch Kit - Sold Separately".

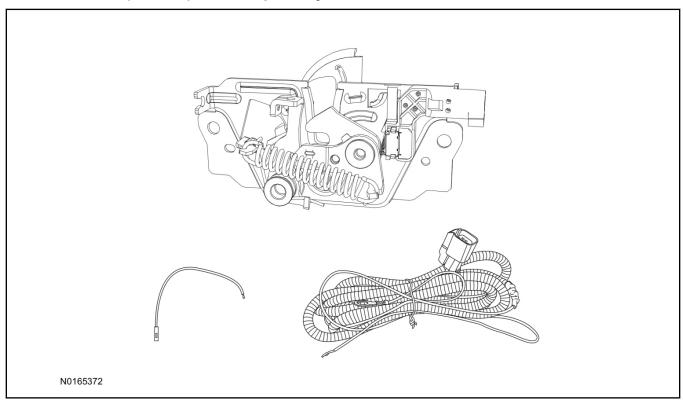

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Hood Latch Kit (19G366) "Sold Separately" - Vehicles Without Perimeter Alarm

47. Review the Hood Latch kit contents.

Hood Latch Kit "Sold Separately"

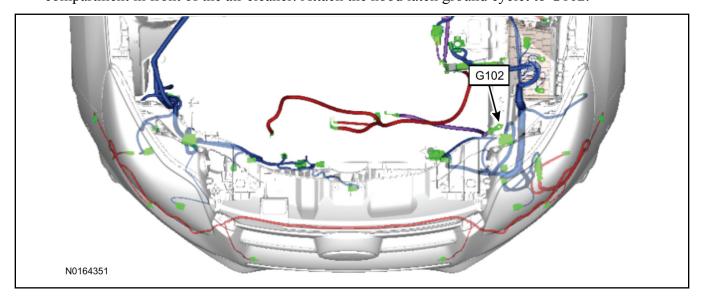

QUANTITY	DESCRIPTION
1	Hood Latch Assembly
Hood Latch Kit "Sold Separately"	
1	Body Control Module (BCM) Terminal Wire
1	Hood Latch Wire Harness
10	Tie Wraps (Not Pictured)

Hood Latch Kit - "Sold Separately"

NOTE:

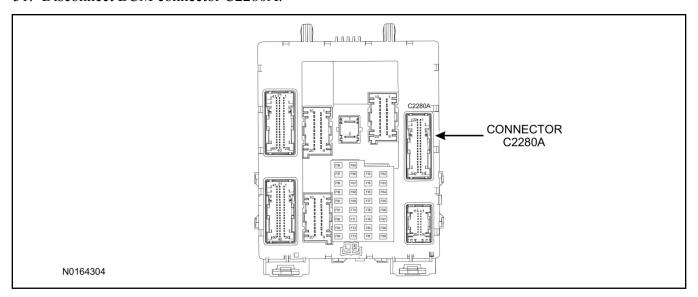

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

- 48. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 49. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

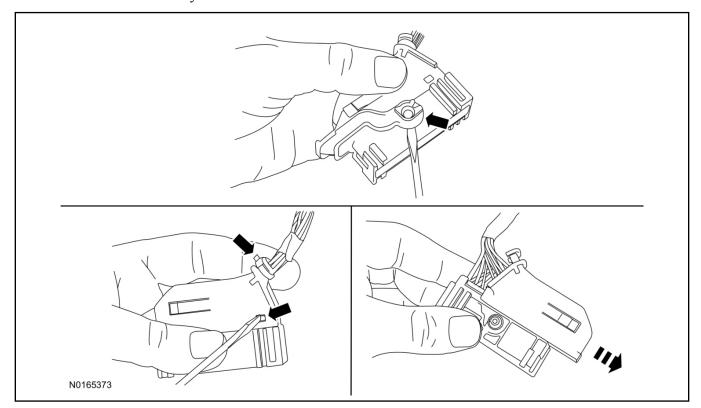

50. Route the hood latch wire harness into the vehicle through the bulkhead grommet on the passenger side.

- Secure the hood latch wire harness with tie-straps.
- 51. Disconnect BCM connector C2280A.

- 52. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

53. If equipped, remove the pin plug from BCM connector C2280A Pin 15.

• If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

54. *NOTICE*:

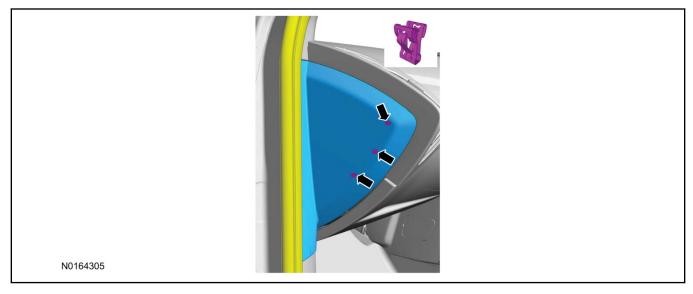

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 55. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 56. Connect BCM connector C2280A.
- 57. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

RMST Kit Antenna Installation

58. Position the weather strip aside and remove the LH IP side finish panel.

59. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

60. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

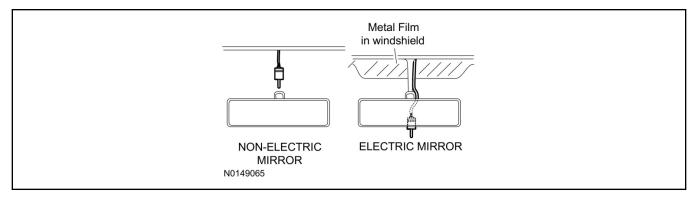

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

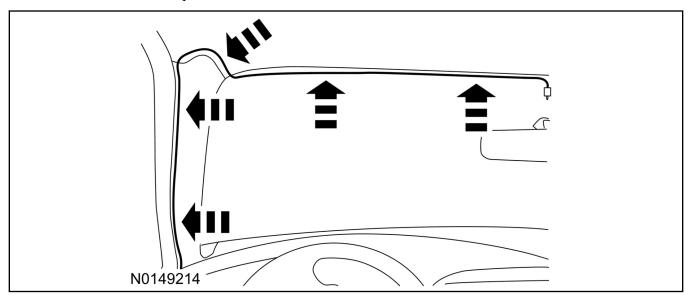

61. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

- 62. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

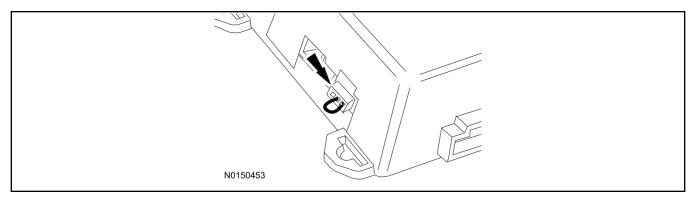

- 63. Connect the antenna connector to the VSS module.
- 64. Reposition the A-pillar trim panel back, if necessary.
- 65. Install the LH IP side finish panel and reposition the weatherstrip.

VSS Module - Optional Vehicle Security Features

- 66. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.

• Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST and Perimeter Alarm Activation

NOTE:

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

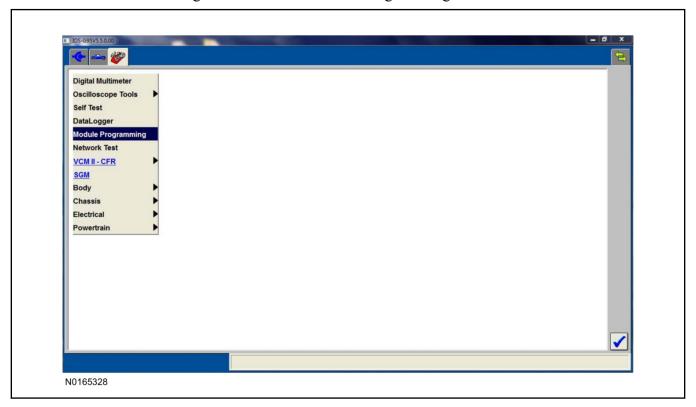

IDS must be connected to the internet during remote start and perimeter alarm activation.

NOTE:

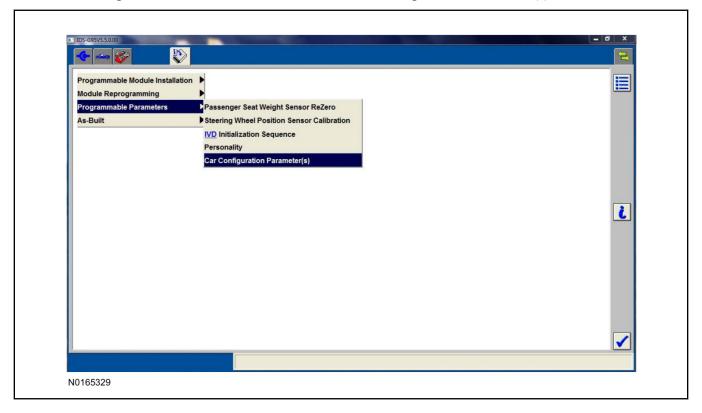

For vehicles equipped with push button start, proceed to step 78 to enable remote start. After remote start has been enabled, proceed to the "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

- 67. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 68. Verify that the IDS is updated to the most current version.
- 69. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

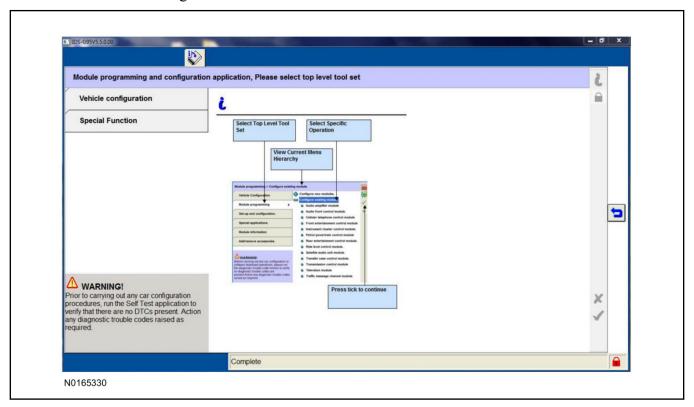

70. Start a new session using IDS and select "Module Programming".

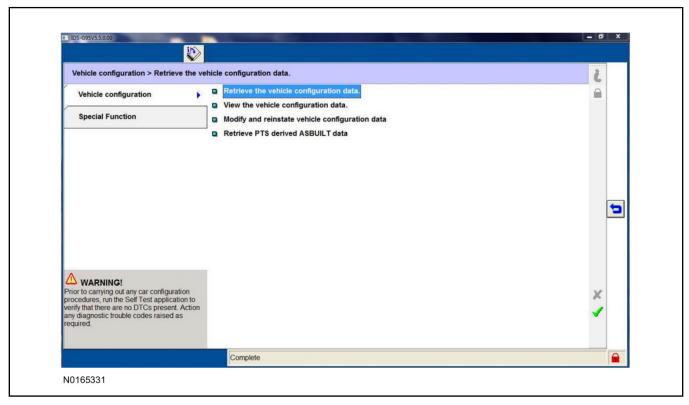

71. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

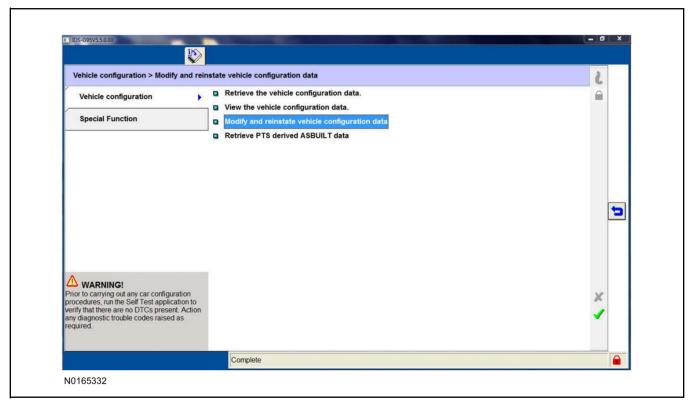

72. Select "Vehicle Configuration".

73. Select "Retrieve Vehicle Configuration data" and follow the prompts.

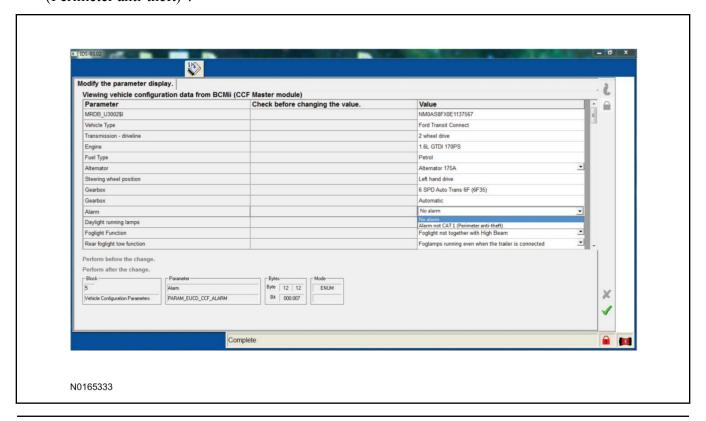

74. Select "Modify and reinstate vehicle configuration data".

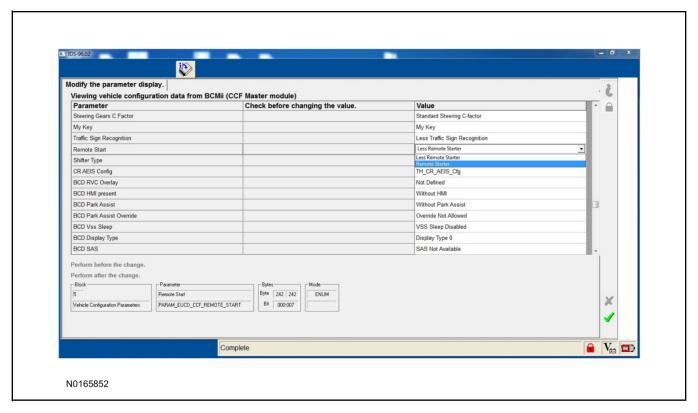

75. **NOTE:**

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

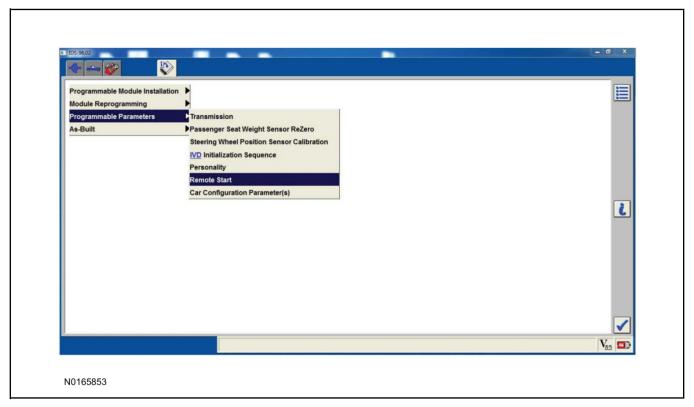

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

76. Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 77. Select the Tick mark and download the data back into the vehicle.
- 78. Return to "Programmable Parameters" and then select "Remote Start".

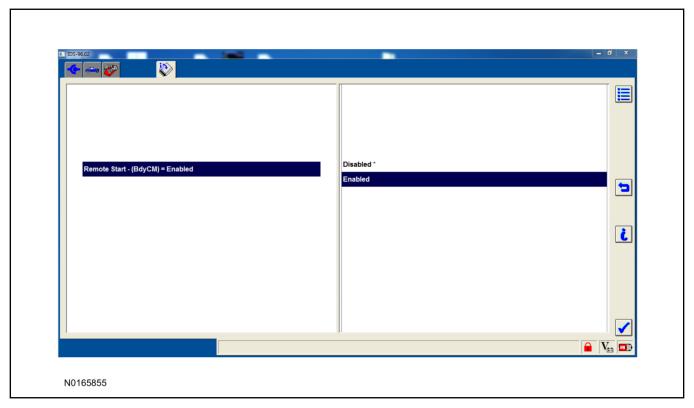

79. **NOTE:**

Enable all available equipment features during the remote start enable process.

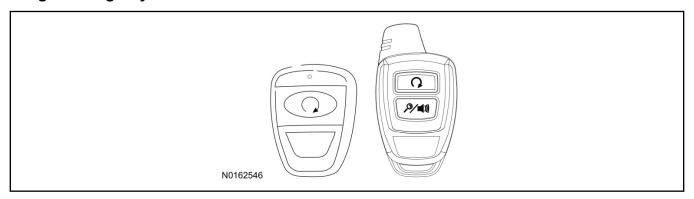

NOTE:

The remote start feature must be enabled in the body control module and the instrument cluster.

Select "Remote Start" and then select "Enabled" to activate remote start.

Programming Key Fobs

80. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

81. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times, ending in ignition on, engine off.
- 6 Release the brake pedal.
- 7 Press the vehicle start/stop button twice to turn ignition on.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 8 Press the start stop button on each fob you wish to program.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 82. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 83. Close the hood.
- 84. Close all of the vehicle doors.
- 85. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 86. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 87. Open the hood.
- 88. **NOTE:**

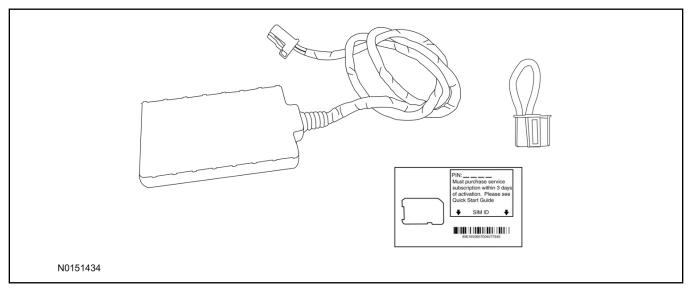

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

89. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

90. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps

\triangle CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

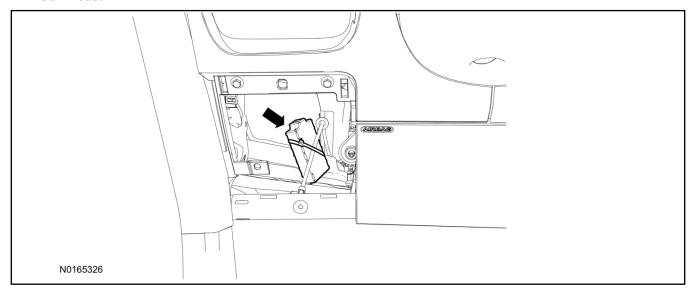

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

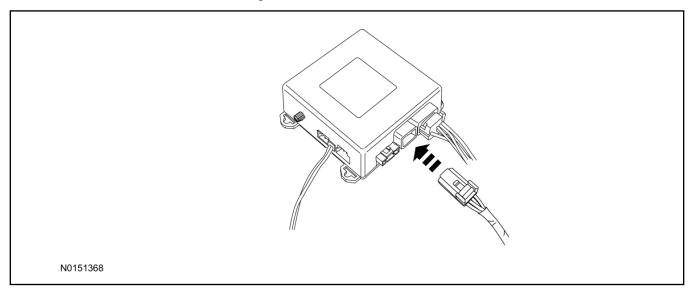

91. **NOTE:**

DLC access panel removed for clarity.

Using a tie-strap, secure the RMU to the hood latch release cable near the driver side of the vehicle bulkhead.

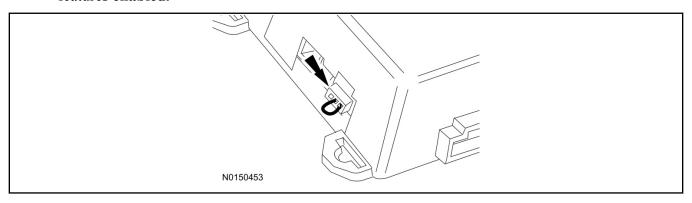

- 92. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 93. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST and Perimeter Alarm Activation - (Vehicles Without Factory Remote Start)

NOTE:

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

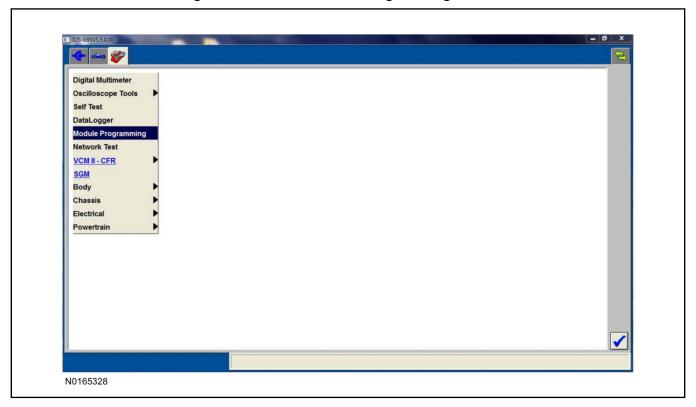

IDS must be connected to the internet during remote start and perimeter alarm activation.

NOTE:

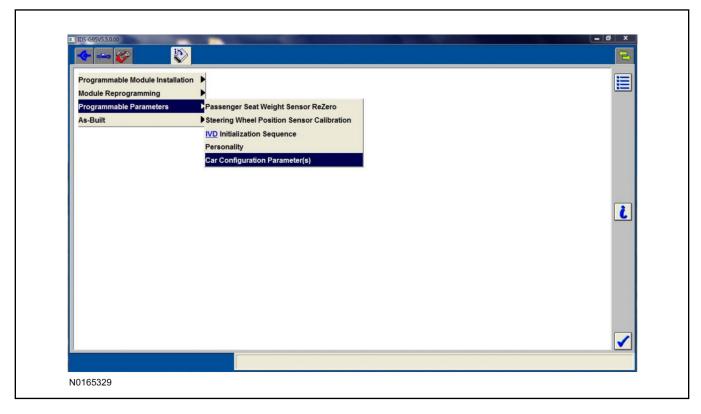

For vehicles equipped with push button start, proceed to step 104 to enable remote start.

- 94. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 95. Verify that the IDS is updated to the most current version.
- 96. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

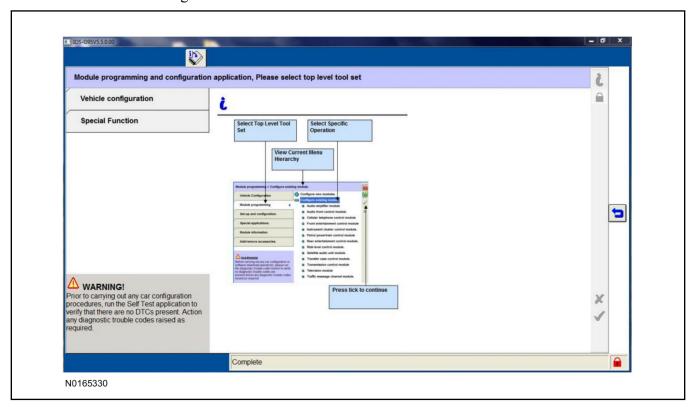

97. Start a new session using IDS and select "Module Programming".

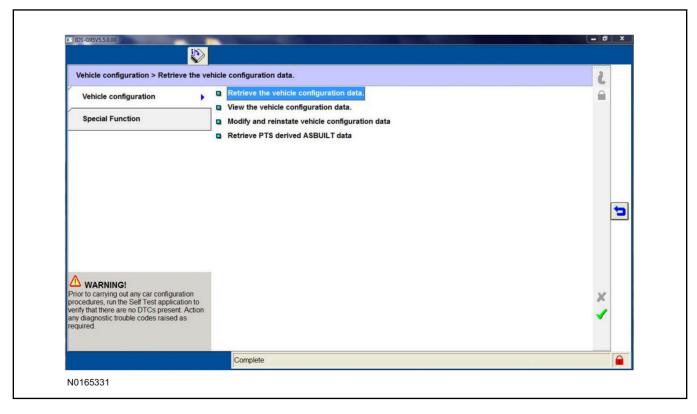

98. Select "Programmable Parameters" and then select "Car Configuration Parameter(s)".

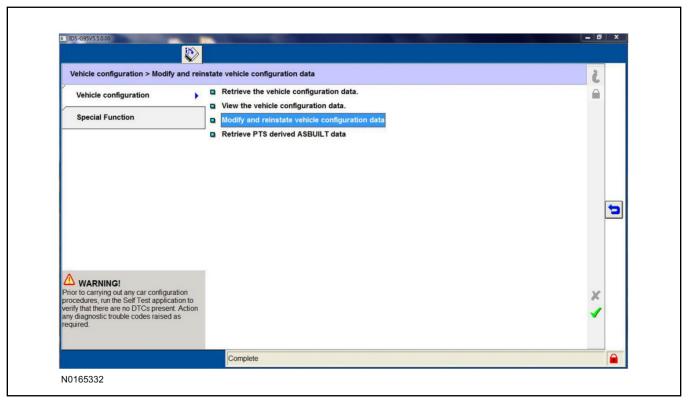

99. Select "Vehicle Configuration".

100.Select "Retrieve Vehicle Configuration data" and follow the prompts.

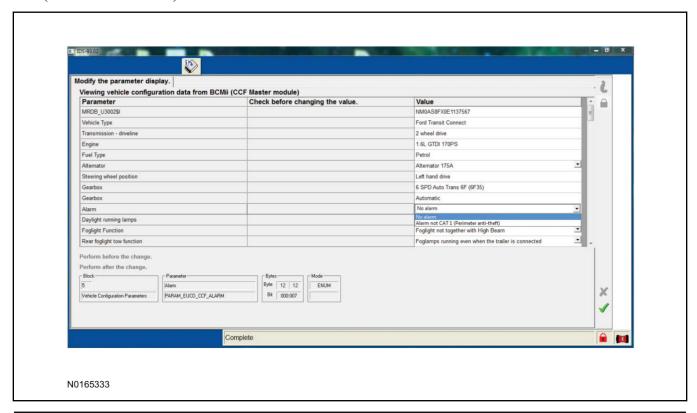

101. Select "Modify and reinstate vehicle configuration data".

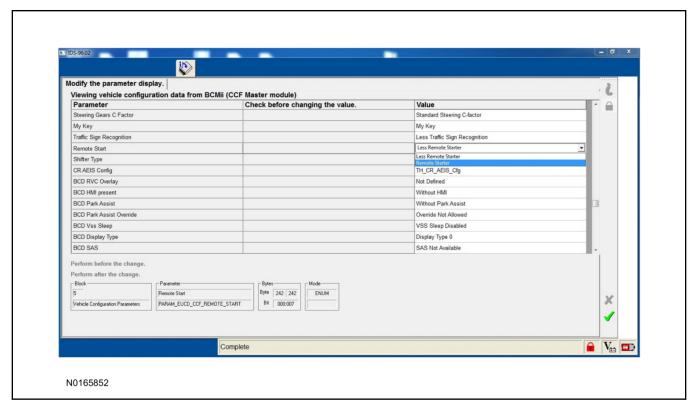

102.**NOTE**:

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

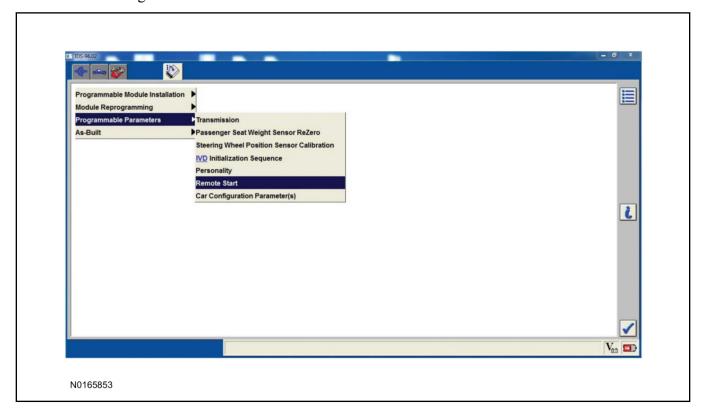

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

103.Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 104. Select the Tick mark and download the data back into the vehicle.
- 105.Return to "Programmable Parameters" and then select "Remote Start".

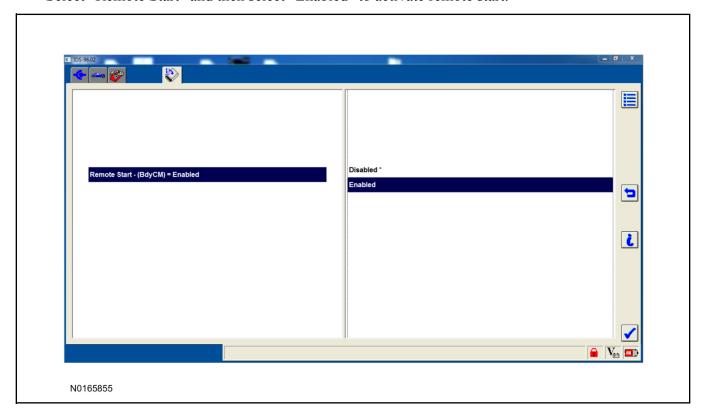

106.**NOTE**:

Enable all available equipment features during the remote start enable process.

NOTE:

The remote start feature must be enabled in the body control module and the instrument cluster.

Select "Remote Start" and then select "Enabled" to activate remote start.

RMU Activation

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

107. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:

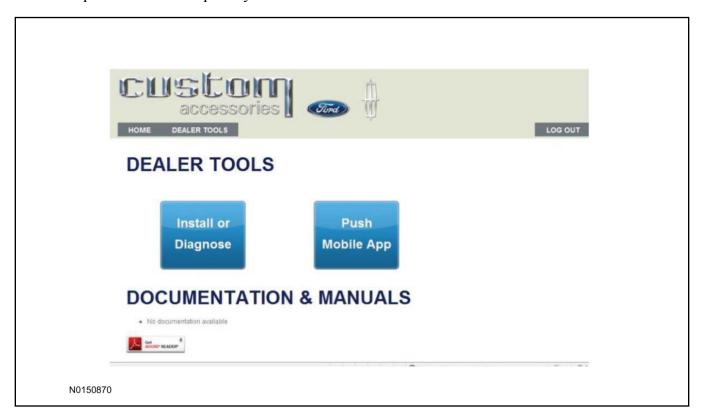

- 1 Email Address
- 2 Cell Phone Number
- 3 Cell Phone Carrier Company

108.Log on to your Professional Technician Society (PTS) account and enter the vehicle information.

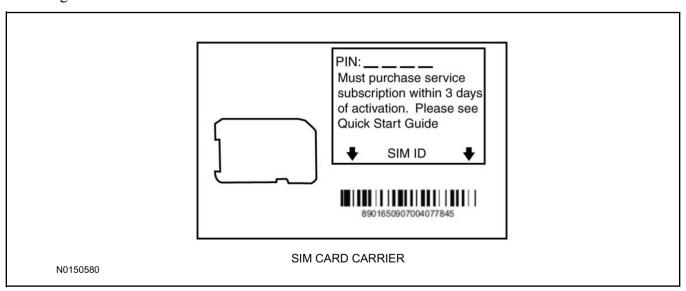

- 1 Select "Vehicle Id".
- 2 Select "By Year & Model"
- 3 Choose the year & model of the vehicle and then select "GO".
- 4 Hover over the "Workshop" tab.
- 5 Select the "Accessory Installation" menu item.
- 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
- 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

109.Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

110.Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

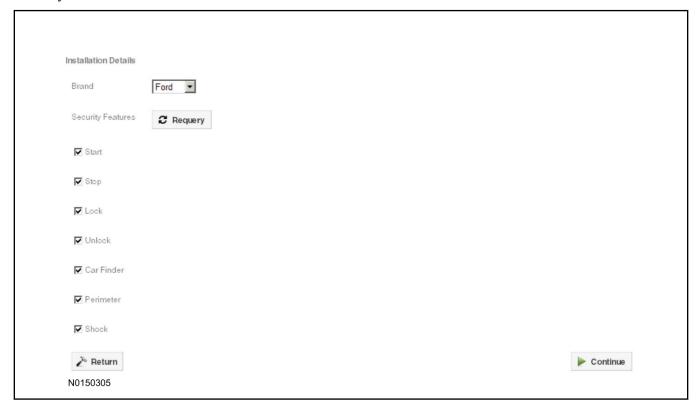

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 111.Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 112.Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 113.If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

Vehicle Security / Remote Start / Remote Access System Installation

CONTENTS

INSTALLATION

Hood Latch Kit Installation
VSS Module Installation
Security Indicator LED Mounting
RMST Kit Antenna Installation
RMU Module Installation

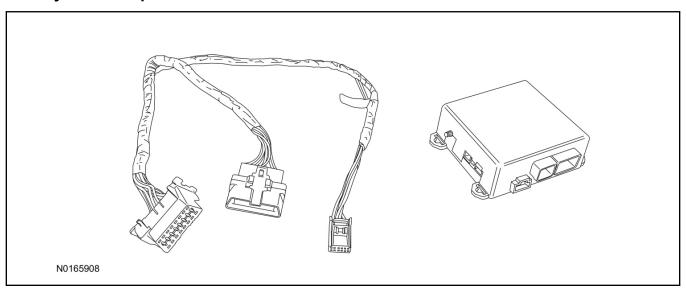

GENERAL PROCEDURES

Perimeter Alarm Activation

INSTALLATION

Vehicle Security / Remote Start / Remote Access - Escape - Vehicles With Automatic Temperature Control

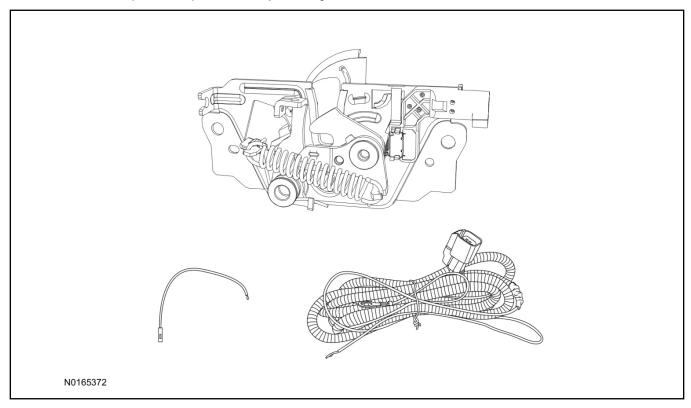

VSS System Components

Security Indicator LED (19D596) "Optional"

Hood Latch Kit (19G366) "Sold Separately" - Vehicles Without Perimeter Alarm

Escape

1. Verify correct kit number.

Review VSS Kit Contents

NOTE:

Kits are vehicle specific and are not interchangeable.

2. Review the VSS kit contents.

Vehicle Security System (VSS) Kit

QUANTITY	DESCRIPTION
1	VSS Module
1	T-harness
6	Tie-straps
1	Owner's Manual

Security Indicator LED Kit Contents "Optional"

3. Review the Security Indicator LED kit contents.

Security Indicator LED Kit

QUANTITY	DESCRIPTION
1	Security Indicator LED

Hood Latch Kit Contents (if required) "Sold Separately"

4. Review the Hood Latch kit contents.

Hood Latch Kit "Sold Separately"

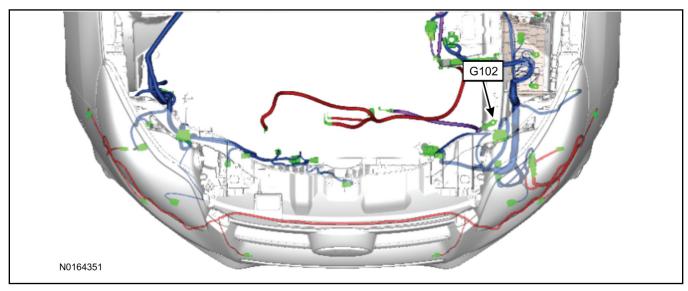

QUANTITY	DESCRIPTION
1	Hood Latch Assembly
Hood Latch Kit "Sold Separately"	
1	Body Control Module (BCM) Terminal Wire
1	Hood Latch Wire Harness
10	Tie Wraps (Not Pictured)

Hood Latch Kit - "Sold Separately"

NOTE:

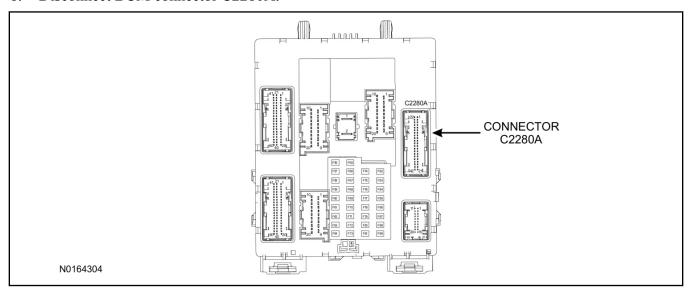

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

- 5. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 6. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

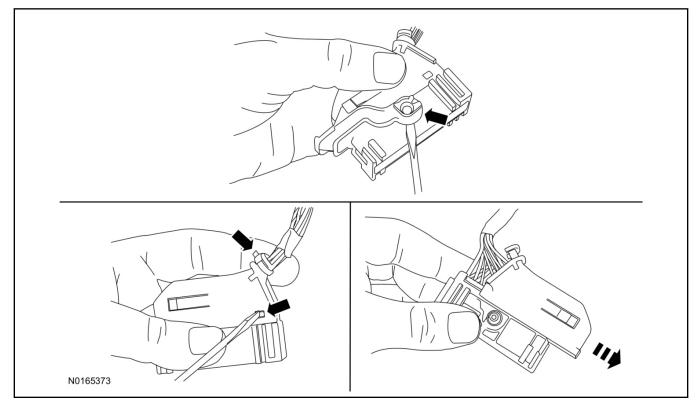

- 7. Route the hood latch wire harness into the vehicle through the bulkhead grommet on the passenger side.
 - Secure the hood latch wire harness with tie-straps.

8. Disconnect BCM connector C2280A.

- 9. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

- 10. If equipped, remove the pin plug from BCM connector C2280A Pin 15.
 - If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

11. *NOTICE*:

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

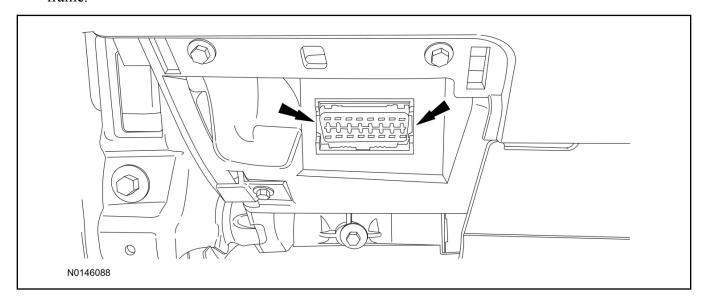

- 12. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 13. Connect BCM connector C2280A.
- 14. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

I. VSS System Installation

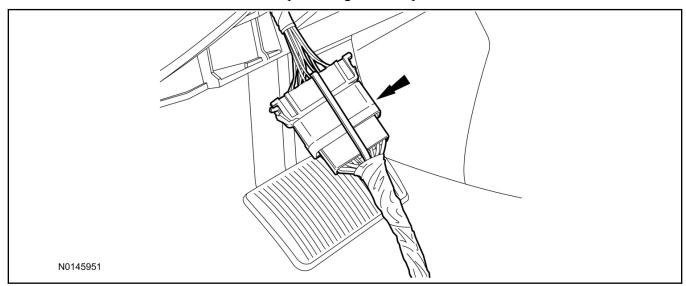

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

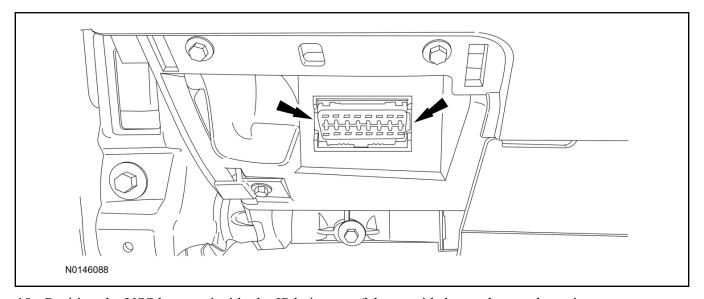

15. Press inward on the clips and detach the vehicle's OBD II port from the Instrument Panel (IP) frame.

- 16. Connect the VSS T-harness to the gateway module electrical connector.
 - Secure the T-harness to the OBD II port using a tie-strap.

17. Connect the VSS T-harness to the IP frame.

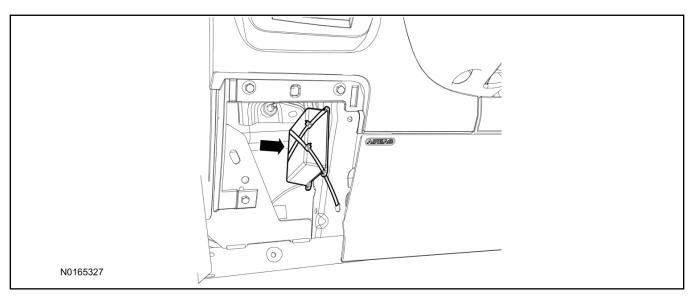

18. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.

19. **NOTE:**

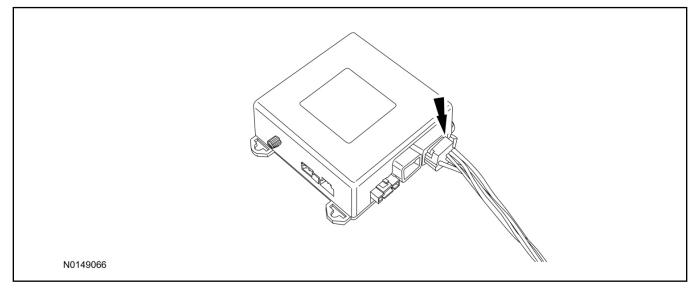

Data Link Connector (DLC) access panel removed for clarity.

Using tie-straps, secure the VSS module to the IP frame.

- Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
- Tie-strap the VSS module loops at opposite corners.

- 20. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

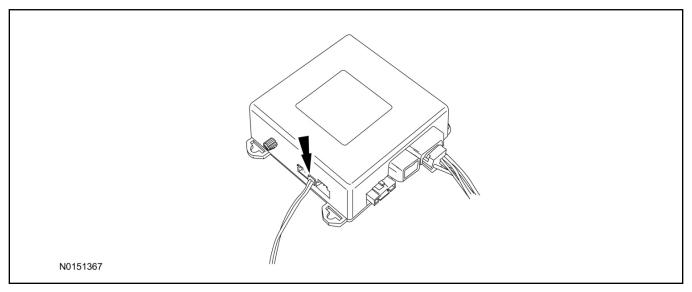

Optional Security Indicator LED Mounting

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 21. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.

- 22. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 23. Route the LED wire harness to the VSS module.
- 24. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

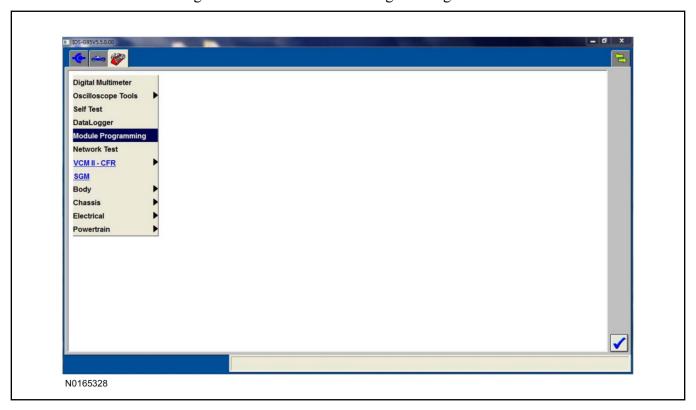

Perimeter Alarm Activation - Key Start Only

NOTE:

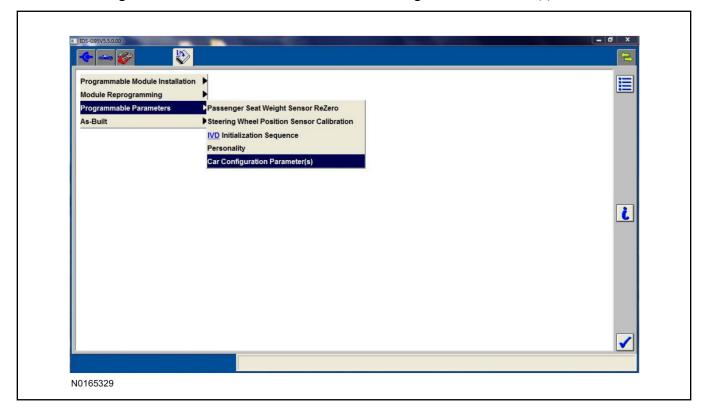

IDS must be connected to the internet during perimeter alarm activation.

- 25. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 26. Verify that the IDS is updated to the most current version.
- 27. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

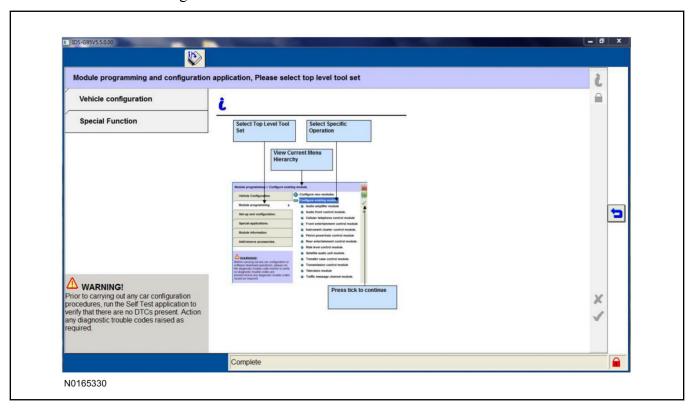

28. Start a new session using IDS and select "Module Programming".

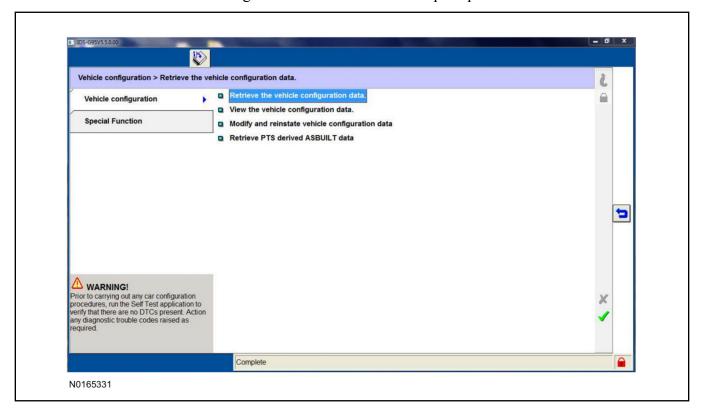

29. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

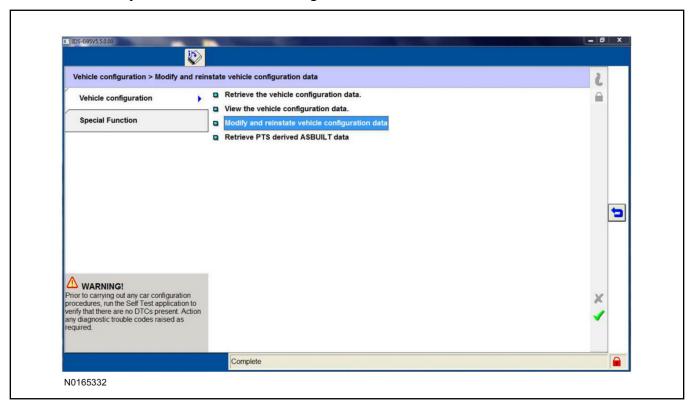

30. Select "Vehicle Configuration".

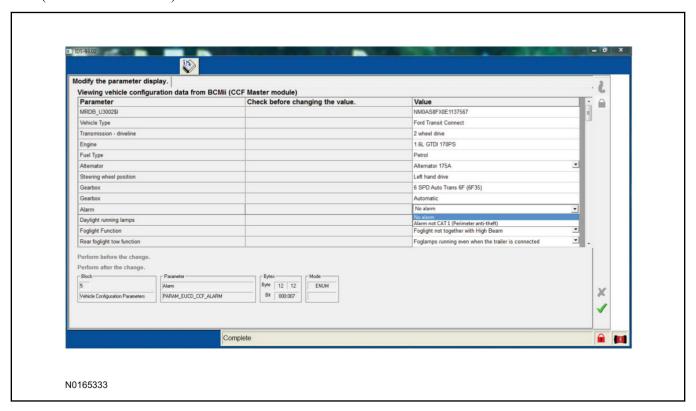

31. Select "Retrieve Vehicle Configuration data" and follow the prompts.

32. Select "Modify and reinstate vehicle configuration data".

33. Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

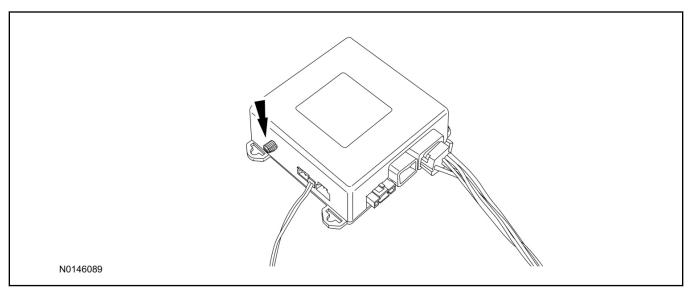

34. Select the Tick mark and download the data back into the vehicle.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 35. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 36. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 10-15 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 37. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 38. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 39. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.
- 40. Install the steering column shrouds. For additional information, refer to WSM Section 501-05.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

Cycle ignition OFF, ON, OFF before testing.

- 41. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 15 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 42. Reach inside the window and press the door unlock trim switch (door will not unlock). The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, the alarm will trigger instantly upon door opening.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 43. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 44. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 45. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

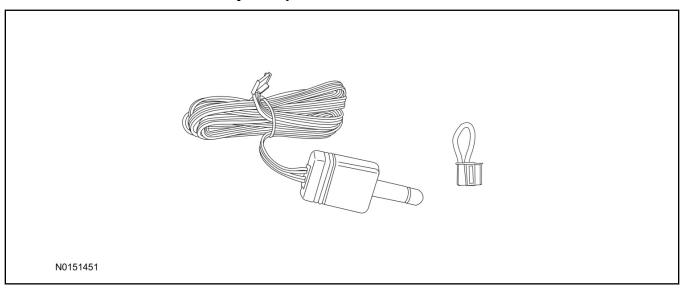

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

⚠ CAUTION:

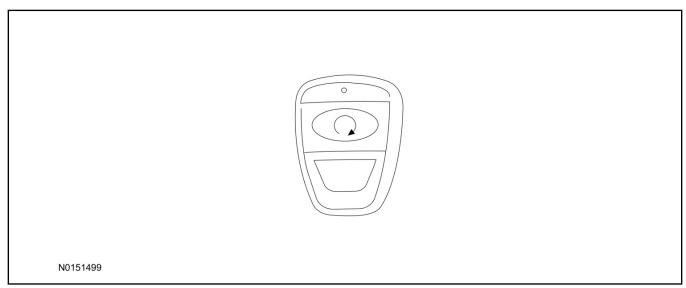

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

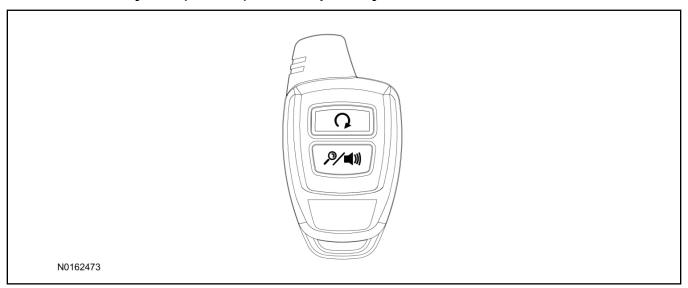

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Latch Kit - Sold Separately".

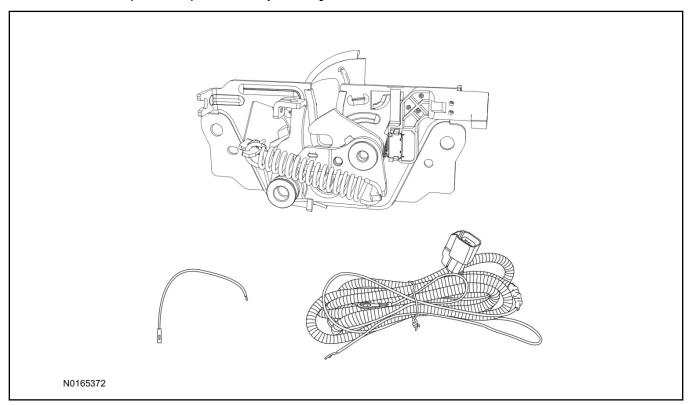

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Hood Latch Kit (19G366) "Sold Separately" - Vehicles Without Perimeter Alarm

Optional RMST Upgrade Components "Sold Separately"

46. Review the RMST Upgrade components.

Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

QUANTITY	DESCRIPTION

Hood Latch Kit Contents (if required) "Sold Separately"

47. Review the Hood Latch kit contents.

Hood Latch Kit "Sold Separately"

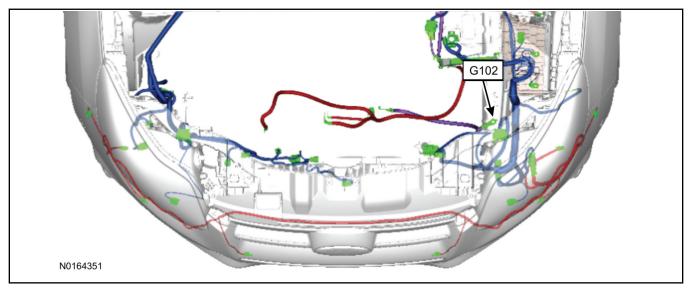

QUANTITY	DESCRIPTION	
1	Hood Latch Assembly	
Hood Latch Kit "Sold Separately"		
1	Body Control Module (BCM) Terminal Wire	
1	Hood Latch Wire Harness	
10	Tie Wraps (Not Pictured)	

Hood Latch Kit - "Sold Separately"

NOTE:

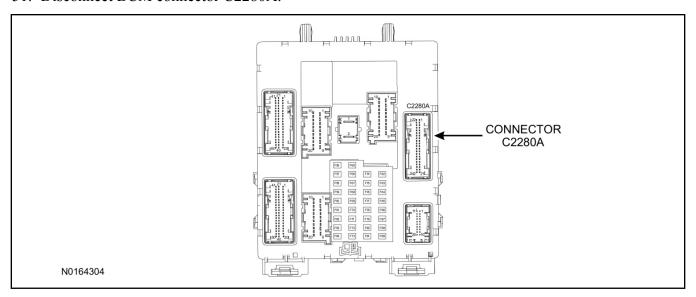

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

- 48. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 49. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

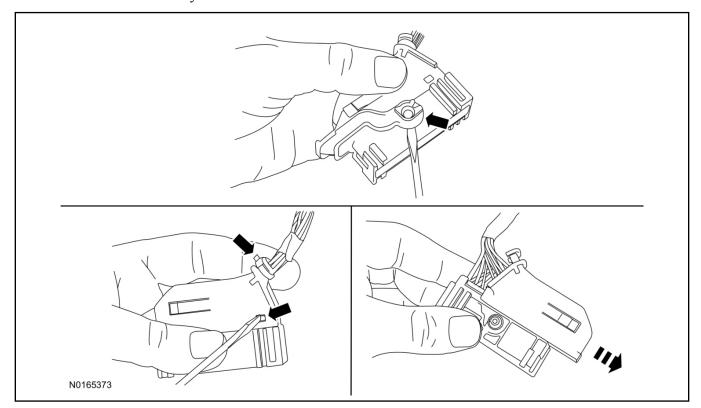

50. Route the hood latch wire harness into the vehicle through the bulkhead grommet.

- Secure the hood latch wire harness with tie-straps.
- 51. Disconnect BCM connector C2280A.

- 52. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

53. If equipped, remove the pin plug from BCM connector C2280A Pin 15.

• If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

54. *NOTICE*:

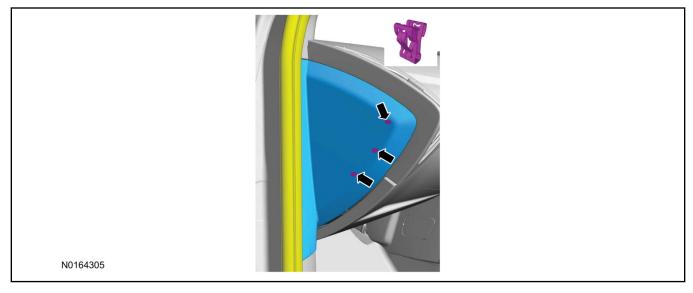

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 55. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 56. Connect BCM connector C2280A.
- 57. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

RMST Kit Antenna Installation

58. Position the weather strip aside and remove the LH IP side finish panel.

59. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

60. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

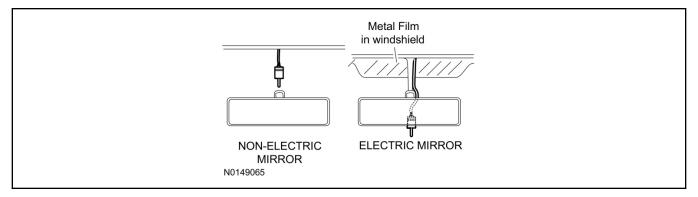

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

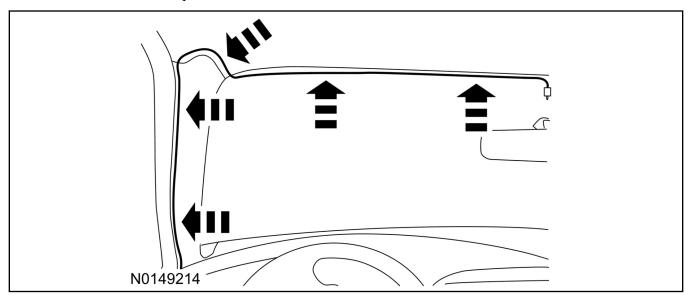

61. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

- 62. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

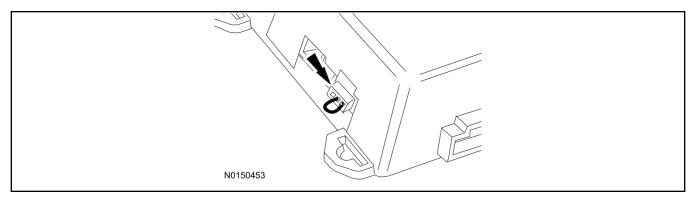

- 63. Connect the antenna connector to the VSS module.
- 64. Reposition the A-pillar trim panel back, if necessary.
- 65. Install the LH IP side finish panel and reposition the weatherstrip.

VSS Module - Optional Vehicle Security Features

- 66. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.

• Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST and Perimeter Alarm Activation

NOTE:

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

IDS must be connected to the internet during remote start and perimeter alarm activation.

NOTE:

For vehicles equipped with push button start, proceed to step 80 to enable remote start. After remote start has been enabled, proceed to the "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

NOTE:

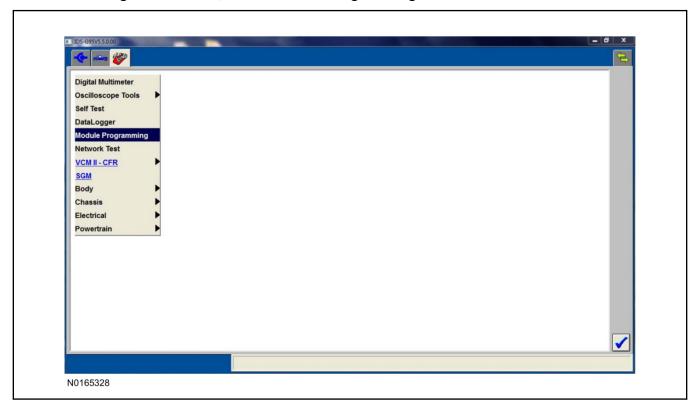

For vehicles equipped with MANUAL HVAC controls it will be necessary to update the HVAC module software to the latest HVAC software version. Failure to update will result in climate controls being inoperative during remote start operation. If IDS indicates that the manual HVAC module is up to date, proceed to the next step.

NOTE:

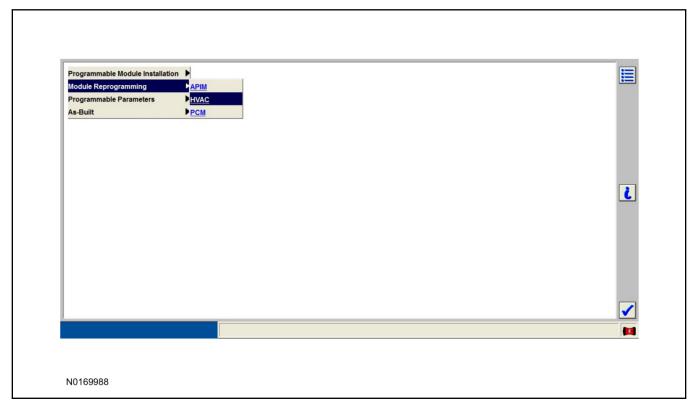

IDS version 100.05 or later must be used for programming.

- 67. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 68. Verify that the IDS is updated to the most current version.
- 69. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

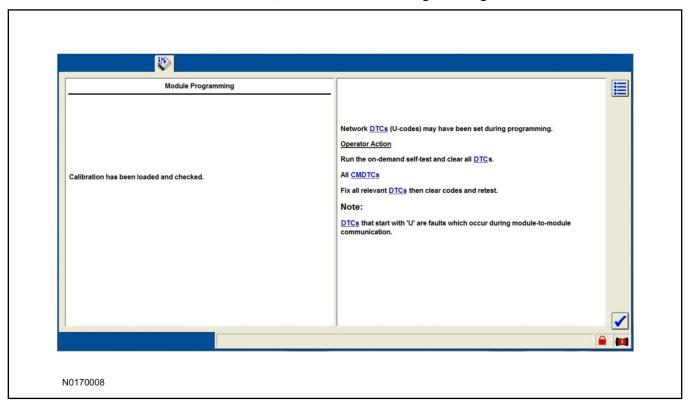

70. After starting a new session, select "Module Programming".

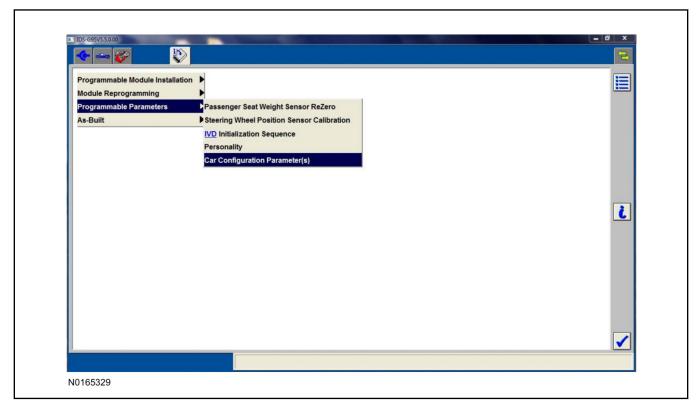

71. Select "Module Programming" and then select "HVAC". Click the tick mark to begin the HVAC system reprogramming.

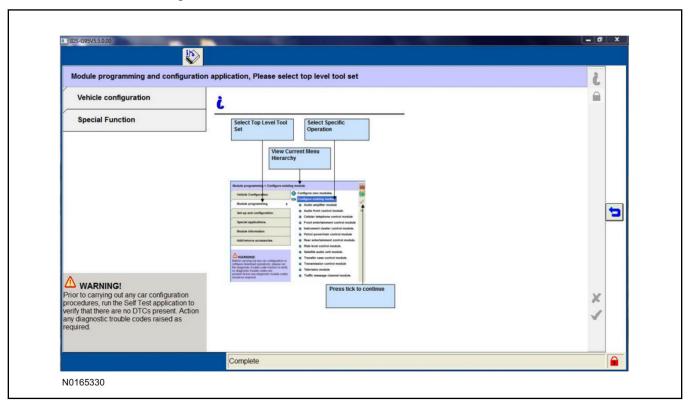

72. Once the calibration has been loaded, return to "Module Programming".

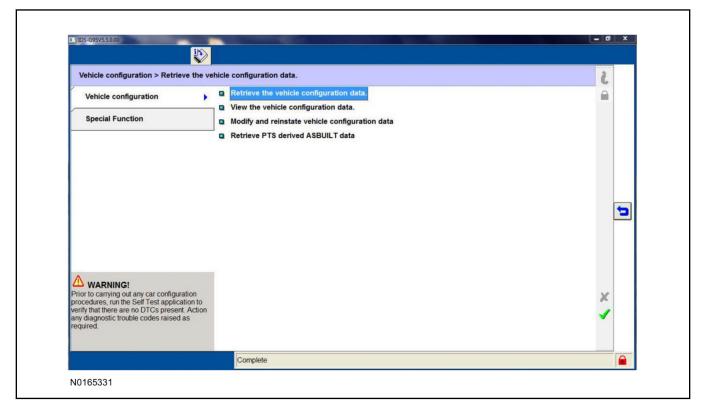

73. Select "Programmable Parameters" and then select "Car Configuration Parameter(s)".

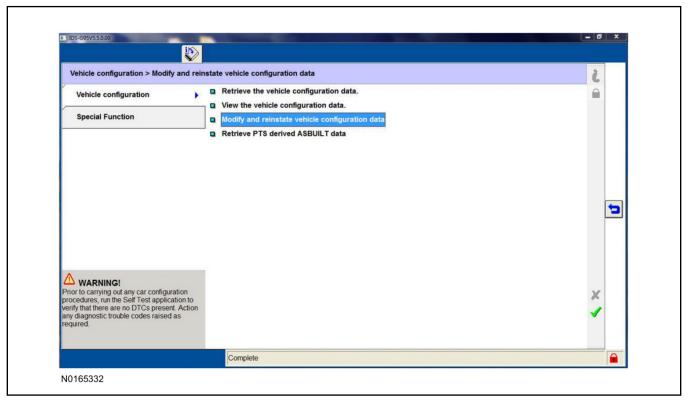

74. Select "Vehicle Configuration".

75. Select "Retrieve Vehicle Configuration data" and follow the prompts.

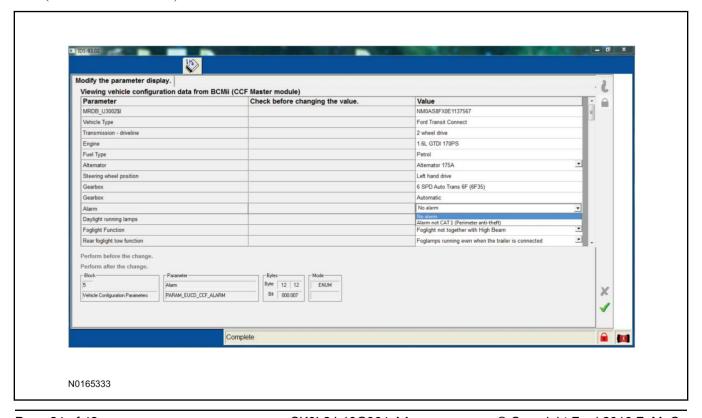

76. Select "Modify and reinstate vehicle configuration data".

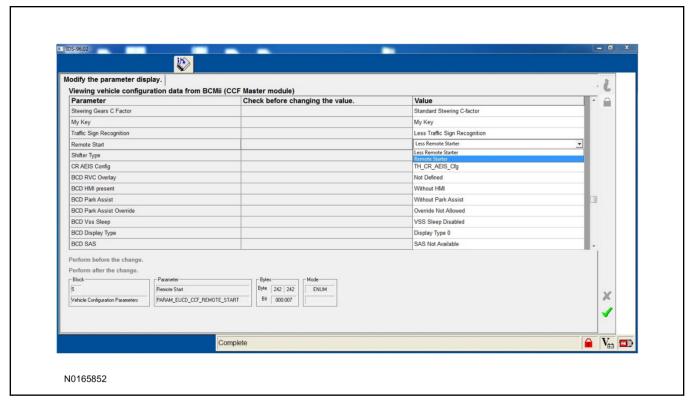

77. **NOTE:**

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

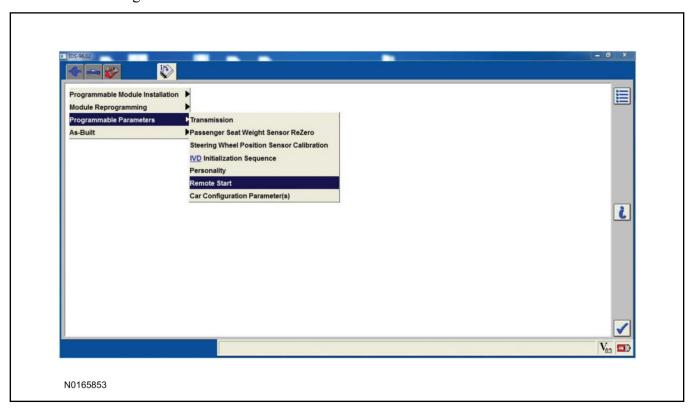

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

78. Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 79. Select the Tick mark and download the data back into the vehicle.
- 80. Return to "Programmable Parameters" and then select "Remote Start".

81. **NOTE:**

Enable all available equipment features during the remote start enable process.

NOTE:

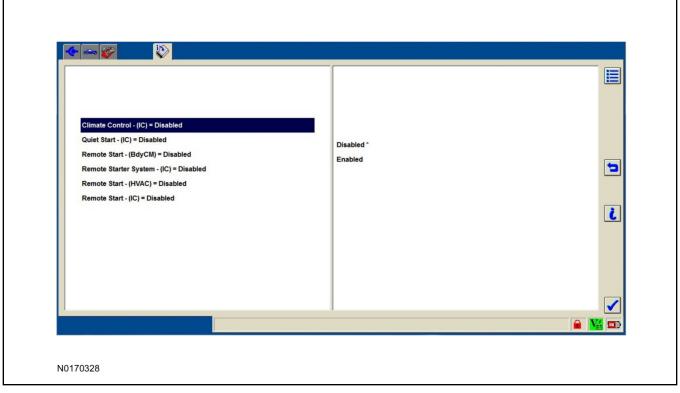

Once at the following screen you must select the feature and then select the "Enabled" text (to the right) for the items listed in the chart below.

NOTE:

For vehicles equipped with Manual Climate Controls "Quiet Start" needs to be disabled.

Once all appropriate items have been set to enable, select the Tick on the lower right of the screen to direct IDS to enable the remote start option on the vehicle.

	D/EATC	Manual
Climate Control - (IC)	ENABLE	ENABLE
Quiet Start - (IC)	ENABLE	DISABLE
Remote Start - (BdyCM)	ENABLE	ENABLE
Remote Start System - (IC)	ENABLE	ENABLE
Remote Start - (HVAC)	DISABLE	ENABLE
Remote Start - (IC)	ENABLE	ENABLE

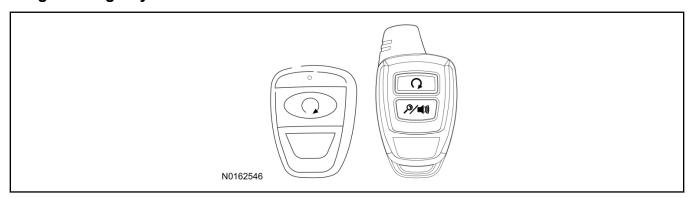

82. **NOTE:**

After programming has completed, the outside ambient air temperature will read 0°F (-17°C). Actual temperature reading will recalibrate when the vehicle is driven and reaches approximately 40 mph (65 km/h) for 1 minute.

After programming has completed, clear all Diagnostic Trouble Codes (DTCs).

83. For vehicles equipped with manual climate controls it is necessary to change the Climate Control setting from Automatic to Last user setting in the IPC MENU. Settings -> Vehicle -> Remote Start -> Climate Control -> Last User Setting

Programming Key Fobs

84. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

85. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times, ending in ignition on, engine off.
- 6 Release the brake pedal.
- 7 Press the vehicle start/stop button twice to turn ignition on.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 8 Press the start stop button on each fob you wish to program.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 86. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 87. Close the hood.
- 88. Close all of the vehicle doors.
- 89. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 90. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 91. Open the hood.

92. **NOTE:**

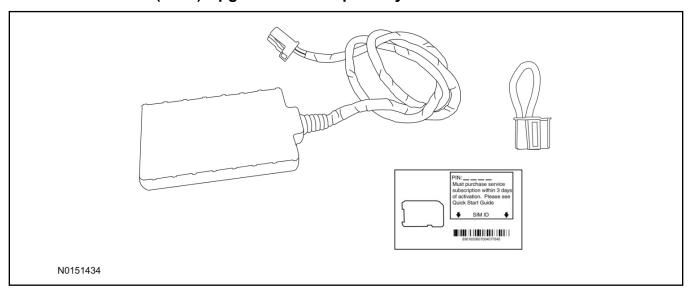

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

93. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

94. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

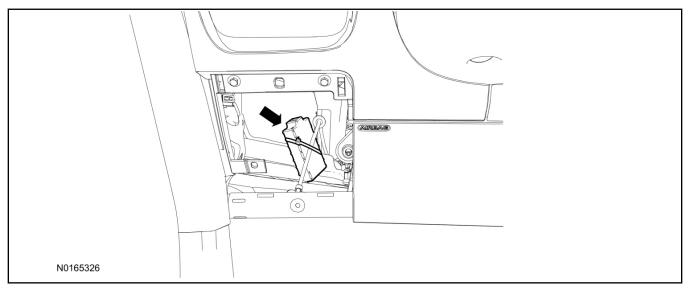

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

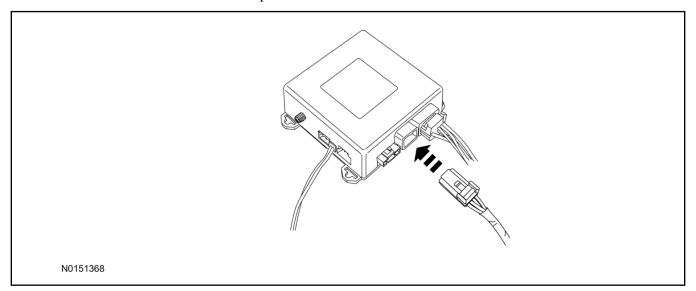

95. **NOTE:**

DLC access panel removed for clarity.

Using a tie-strap, secure the RMU to the hood latch release cable near the driver side of the vehicle bulkhead.

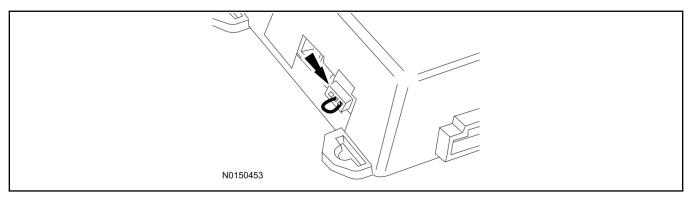

- 96. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 97. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST and Perimeter Alarm Activation - (Vehicles Without Factory Remote Start)

NOTE:

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

IDS must be connected to the internet during remote start and perimeter alarm activation.

NOTE:

For vehicles equipped with push button start, proceed to step 111 to enable remote start.

NOTE:

For vehicles equipped with MANUAL HVAC controls it will be necessary to update the HVAC module software to the latest HVAC software version. Failure to update will result in climate controls being inoperative during remote start operation. If IDS indicates that the manual HVAC module is up to date proceed to the next step.

NOTE:

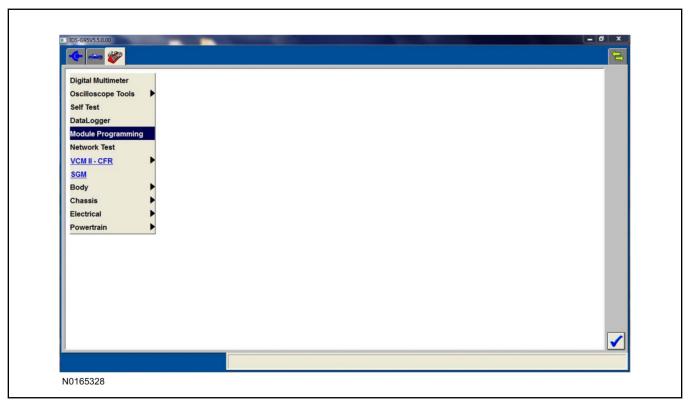

IDS version 100.05 or later must be used for programming.

- 98. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 99. Verify that the IDS is updated to the most current version.

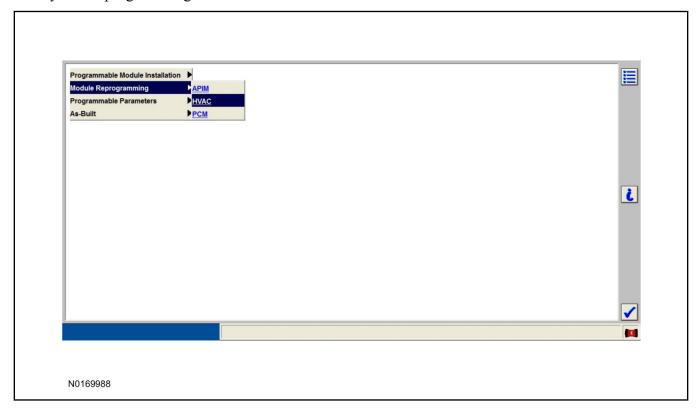

100.Connect IDS.

- Follow the prompts to select new vehicle session.
- Enter VIN.

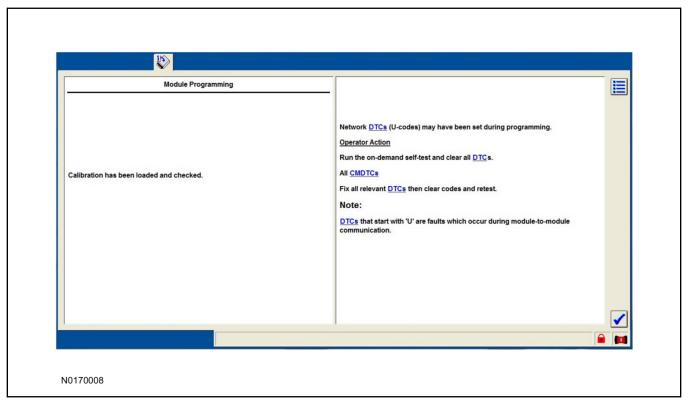

101. After starting a new session, select "Module Programming".

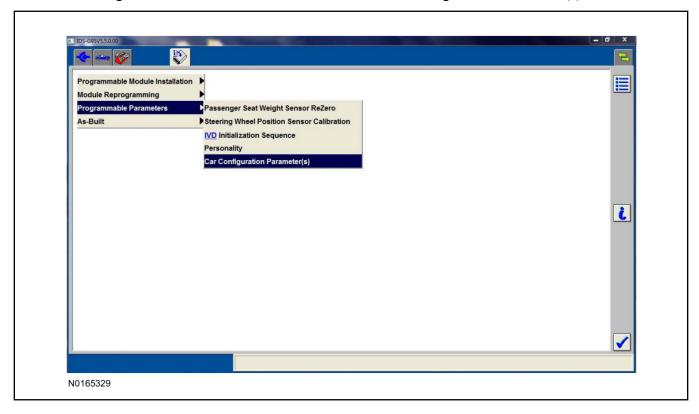

102.Select "Module Programming" and then select "HVAC". Click the tick mark to begin the HVAC system reprogramming.

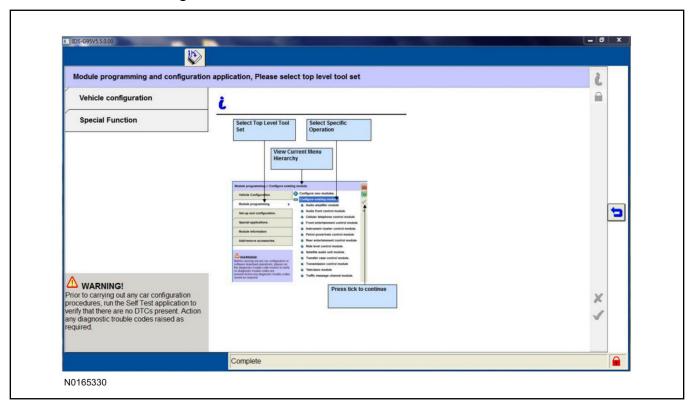

103. Once the calibration has been loaded, return to "Module Programming".

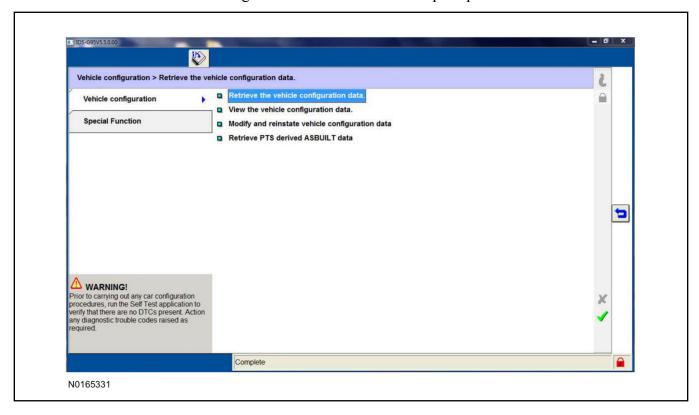

104. Select "Programmable Parameters" and then select "Car Configuration Parameter(s)".

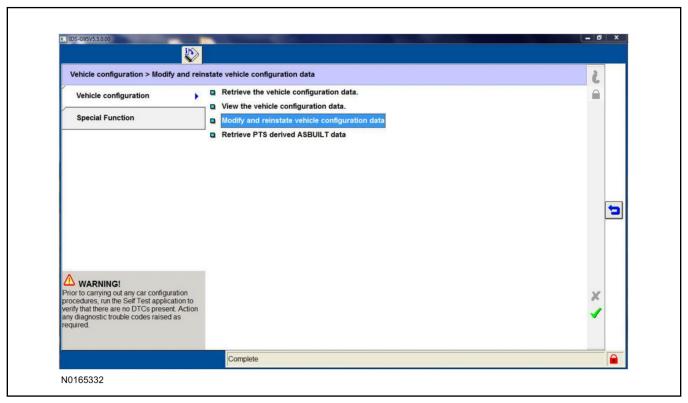

105. Select "Vehicle Configuration".

106. Select "Retrieve Vehicle Configuration data" and follow the prompts.

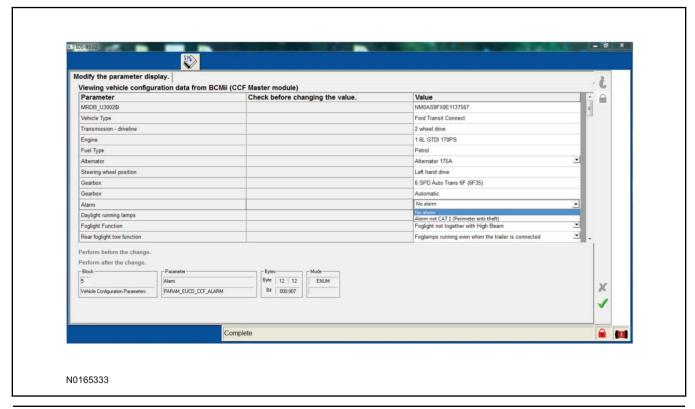

107. Select "Modify and reinstate vehicle configuration data".

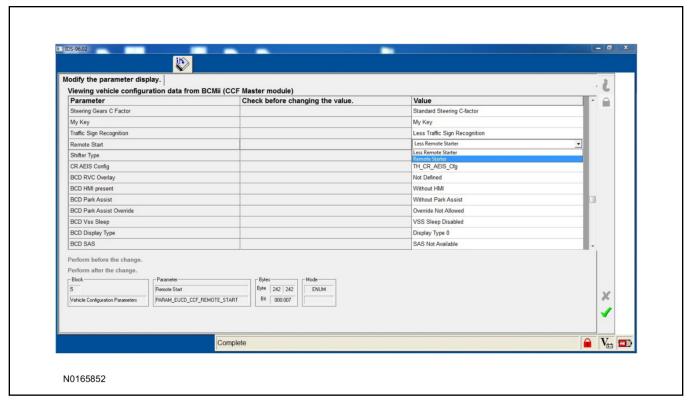

108.**NOTE**:

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

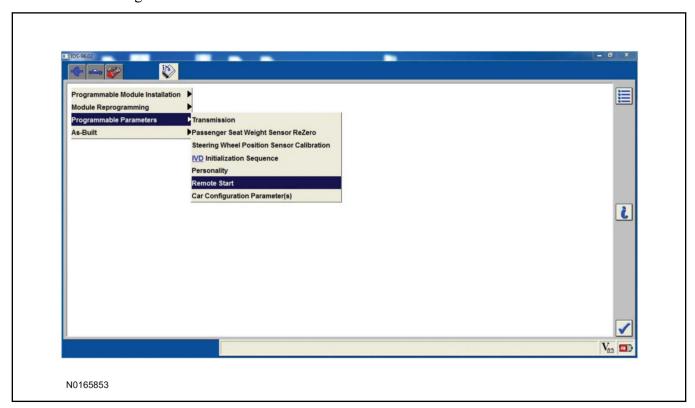

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

109.Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 110. Select the Tick mark and download the data back into the vehicle.
- 111. Return to "Programmable Parameters" and then select "Remote Start".

112.**NOTE**:

Enable all available equipment features during the remote start enable process.

NOTE:

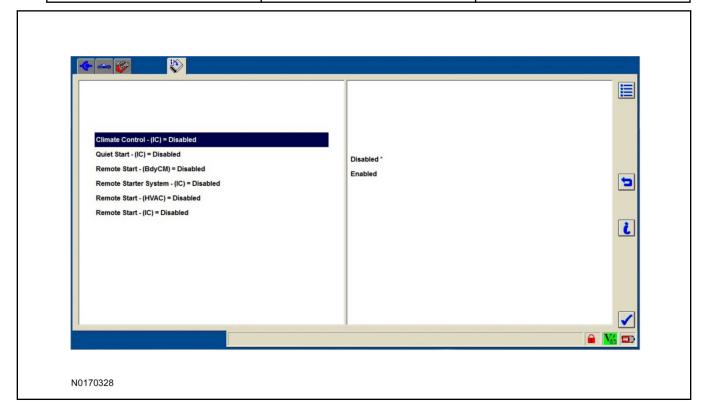

Once at the following screen you must select the feature and then select the "Enabled" text (to the right) for the items listed in the chart below.

NOTE:

For vehicles equipped with Manual Climate Controls "Quiet Start" needs to be disabled.

Once all appropriate items have been set to enable, select the Tick on the lower right of the screen to direct IDS to enable the remote start option on the vehicle.

	D/EATC	Manual
Climate Control - (IC)	ENABLE	ENABLE
Quiet Start - (IC)	ENABLE	DISABLE
Remote Start - (BdyCM)	ENABLE	ENABLE
Remote Start System - (IC)	ENABLE	ENABLE
Remote Start - (HVAC)	DISABLE	ENABLE
Remote Start - (IC)	ENABLE	ENABLE

113.**NOTE**:

After programming has completed, the outside ambient air temperature will read 0°F (-17°C). Actual temperature reading will recalibrate when the vehicle is driven and reaches approximately 40 mph (65 km/h) for 1 minute.

After programming has completed, clear all Diagnostic Trouble Codes (DTCs).

114. For vehicles equipped with manual climate controls it is necessary to change the Climate Control setting from Automatic to Last user setting in the IPC MENU. Settings -> Vehicle -> Remote Start -> Climate Control -> Last User Setting

RMU Activation

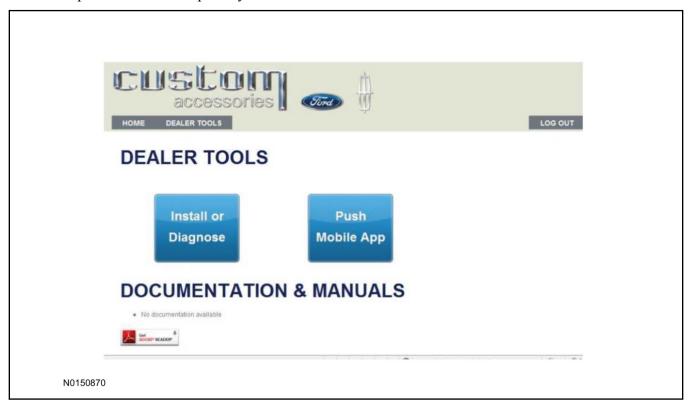

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

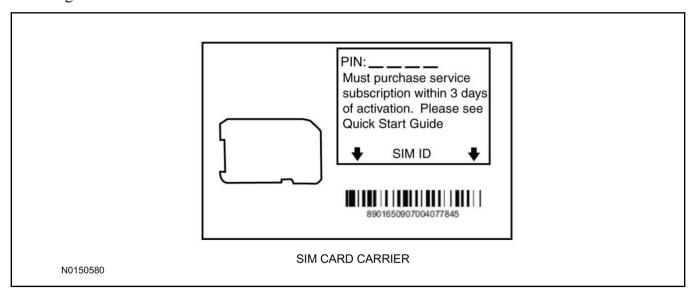

- 115. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 116.Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

117.Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

118.Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

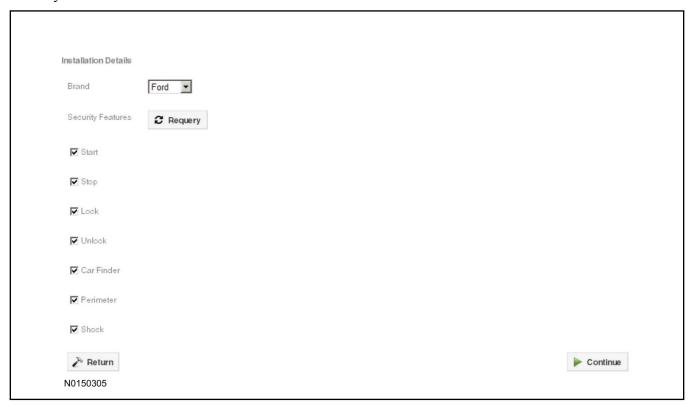

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

119.**NOTE**:

All tests below must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- Car finder
- Signal (for troubleshooting only)

NOTE:

In the event start or stop fail for key start vehicles, refer to the "Remote Start Activation" section in this manual

NOTE:

In the event lock/unlock or car find fail for key start vehicles, refer to the "Learn VSS to Vehicle" section in this manual

- 120.Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 121. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

4. Review the Hood Latch kit contents.

Hood Latch Kit "Sold Separately"

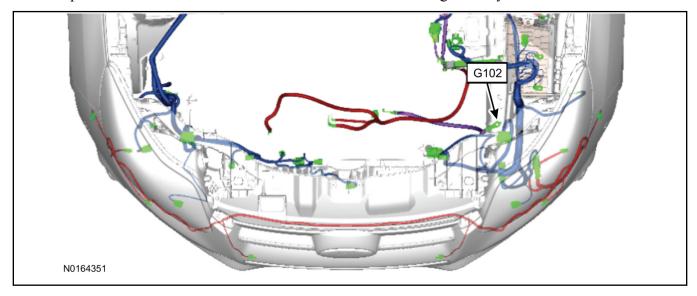

QUANTITY	DESCRIPTION
1	Hood Latch Assembly
Hood Latch Kit "Sold Separately"	
1	Body Control Module (BCM) Terminal Wire
1	Hood Latch Wire Harness
10	Tie Wraps (Not Pictured)

Hood Latch Kit - "Sold Separately"

NOTE:

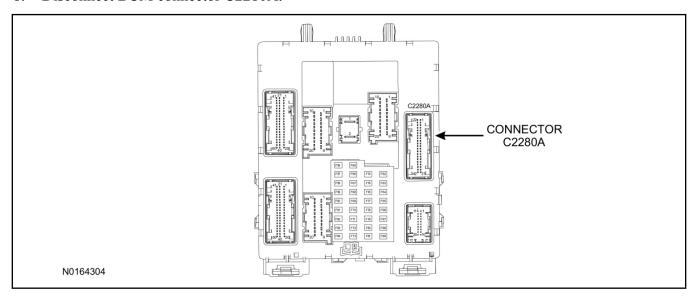

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

- 5. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 6. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

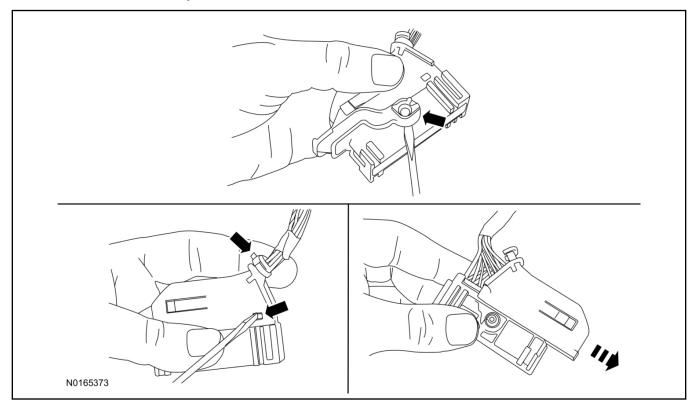

- 7. Route the hood latch wire harness into the vehicle through the bulkhead grommet on the passenger side.
 - Secure the hood latch wire harness with tie-straps.

8. Disconnect BCM connector C2280A.

- 9. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

- 10. If equipped, remove the pin plug from BCM connector C2280A Pin 15.
 - If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

11 NOTICE:

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 12. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 13. Connect BCM connector C2280A.
- 14. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

I. VSS System Installation

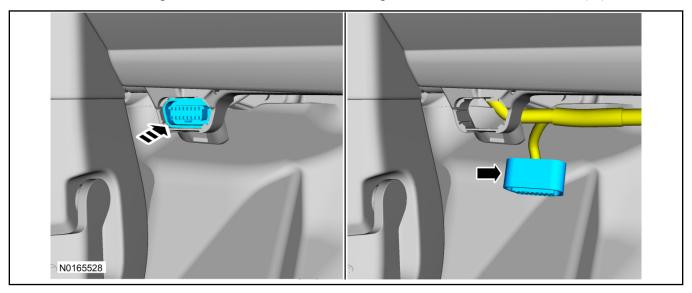

⚠ CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

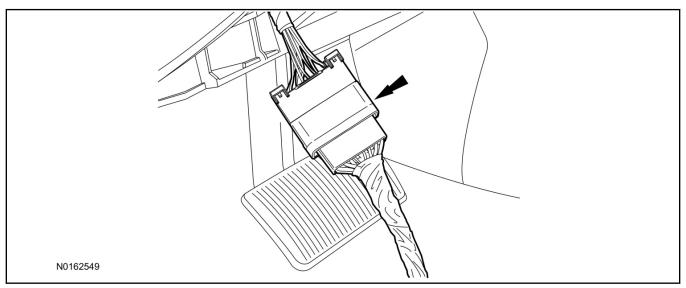

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

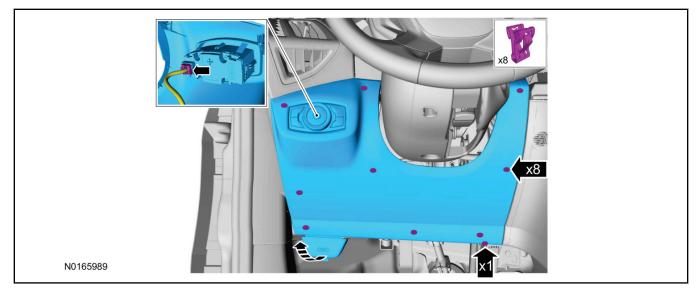

15. Release the rear clip and detach the vehicle's OBD II port from the Instrument Panel (IP) frame.

16. Connect the VSS T-harness to the OBD II port.

- 17. Attach the vehicle's OBD II port to he Instrument Panel (IP) frame.
- 18. Remove the steering column trim panel.
 - 1 Remove the screw.
 - 2 Release the clips, disconnect the electrical connector and remove the steering column trim panel.

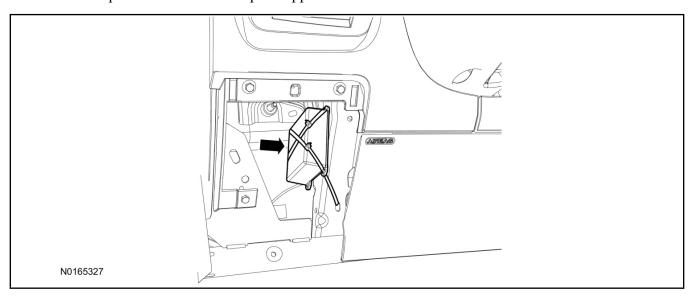

19. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.

20. **NOTE:**

Data Link Connector (DLC) access panel removed for clarity.

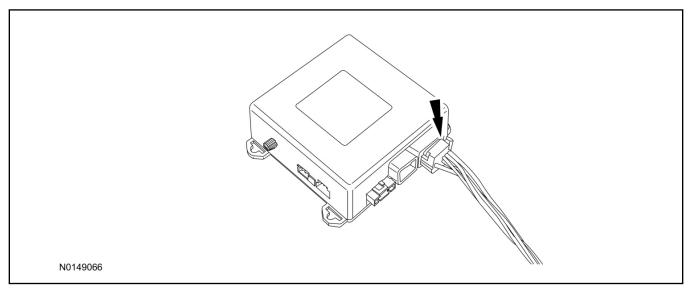

Using tie-straps, secure the VSS module to the IP frame.

- Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
- Tie-strap the VSS module loops at opposite corners.

21. Connect the VSS harness to the VSS module.

• Secure the VSS harness with tie-straps.

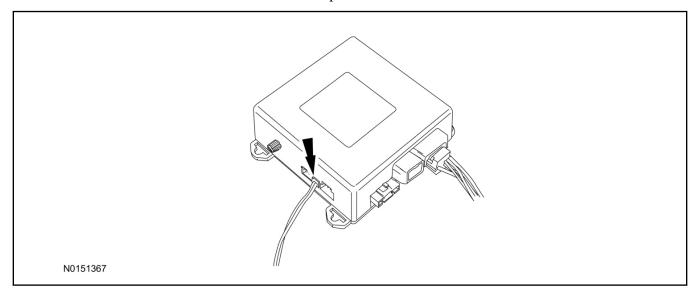

- 22. Install the steering column trim panel.
 - 1 Connect the electrical connector and install the steering column trim panel.
 - 2 Install the screw.
 - 3 Tighten screw to 22 lb.in (2.5 Nm).

Optional Security Indicator LED Mounting

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 23. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 24. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 25. Route the LED wire harness to the VSS module.
- 26. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

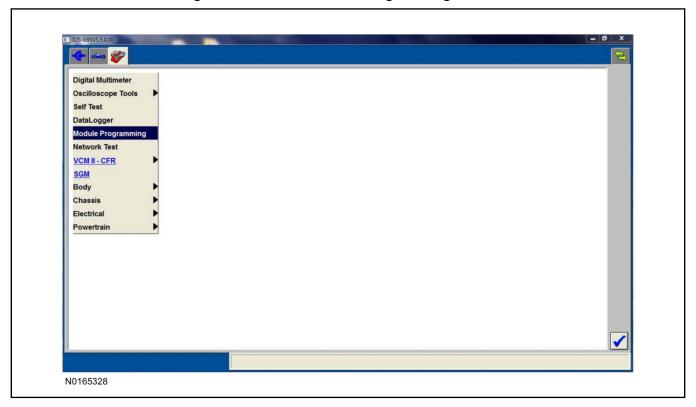

Perimeter Alarm Activation - Key Start Only

NOTE:

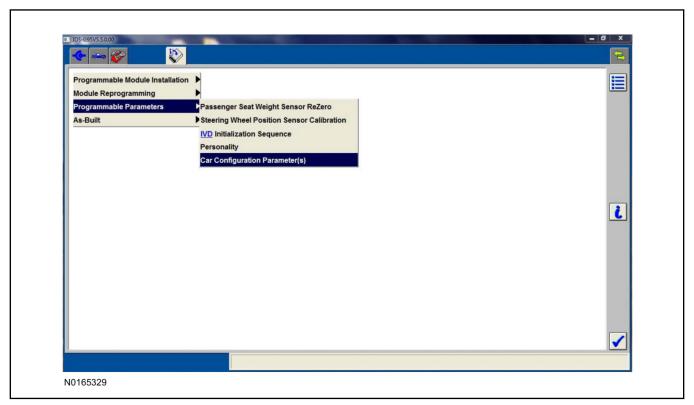

IDS must be connected to the internet during perimeter alarm activation.

- 27. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 28. Verify that the IDS is updated to the most current version.
- 29. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

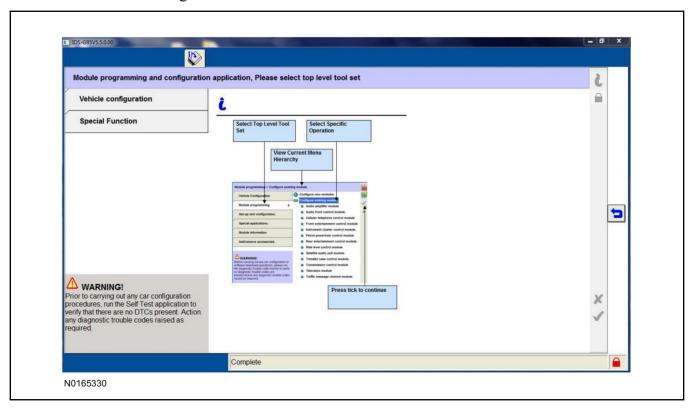

30. Start a new session using IDS and select "Module Programming".

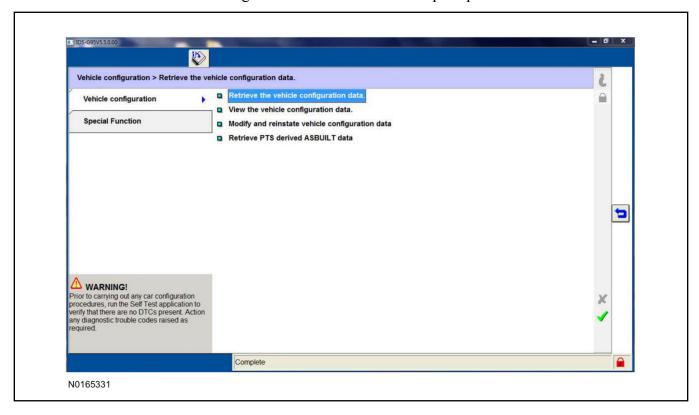

31. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

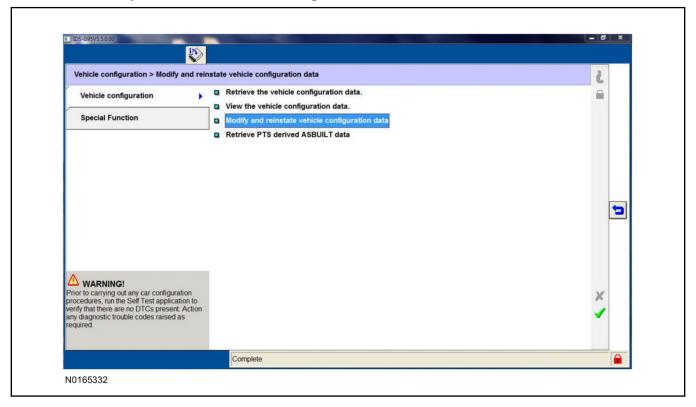

32. Select "Vehicle Configuration".

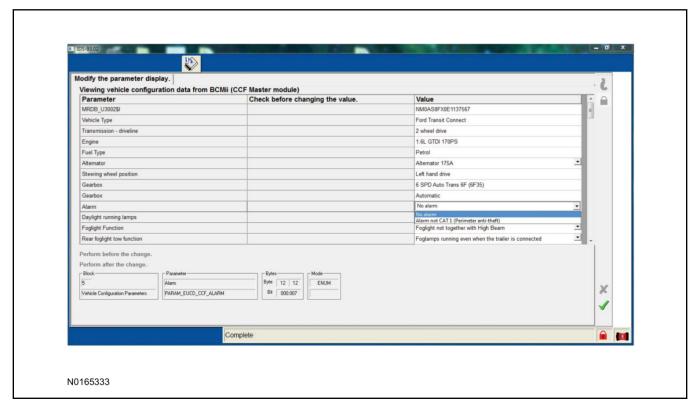

33. Select "Retrieve Vehicle Configuration data" and follow the prompts.

34. Select "Modify and reinstate vehicle configuration data".

35. Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

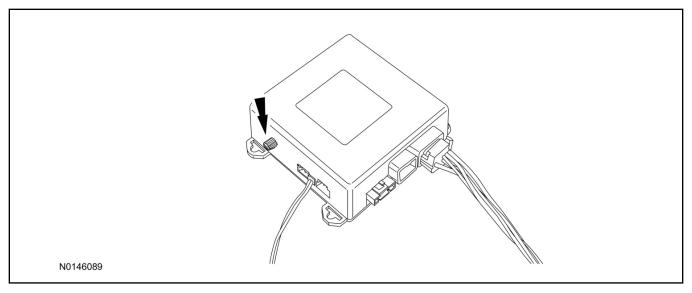

36. Select the Tick mark and download the data back into the vehicle.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 37. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 38. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 10-15 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 39. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 40. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 41. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.
- 42. Install the steering column shrouds. For additional information, refer to WSM Section 501-05.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

Cycle ignition OFF, ON, OFF before testing.

- 43. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 15 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 44. Reach inside the window and press the door unlock trim switch (door will not unlock). The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, the alarm will trigger instantly upon door opening.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 45. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 46. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 47. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

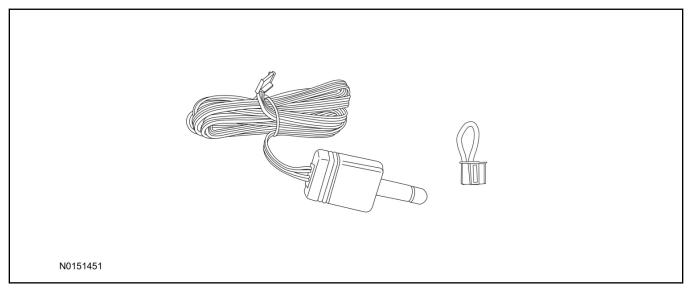

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

△ CAUTION:

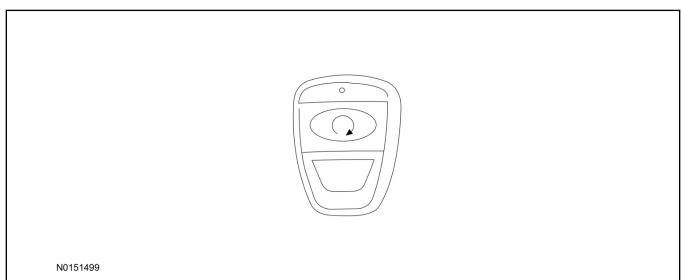

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

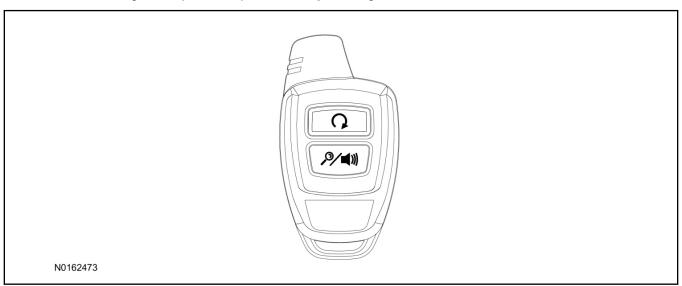

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Latch Kit - Sold Separately".

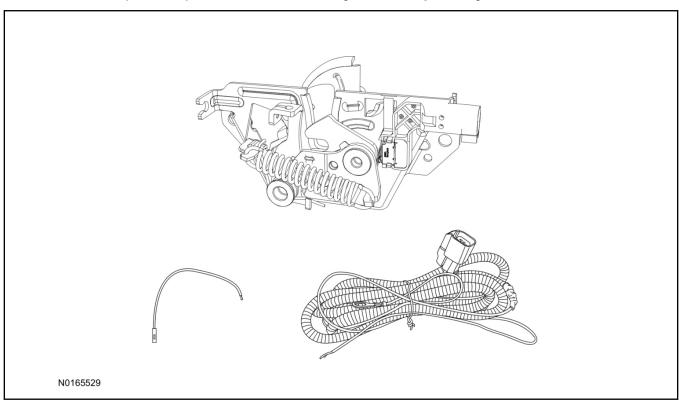

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Hood Latch Kit (19G366) - Base Vehicles Only "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

48. Review the RMST Upgrade components.

Hood Latch Kit "Sold Separately"

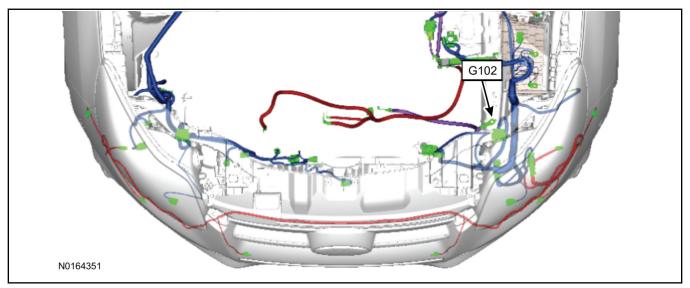

QUANTITY	DESCRIPTION
1	Hood Latch Assembly
Hood Latch Kit "Sold Separately"	
1	Body Control Module (BCM) Terminal Wire
1	Hood Latch Wire Harness
10	Tie Wraps (Not Pictured)

Hood Latch Kit - "Sold Separately"

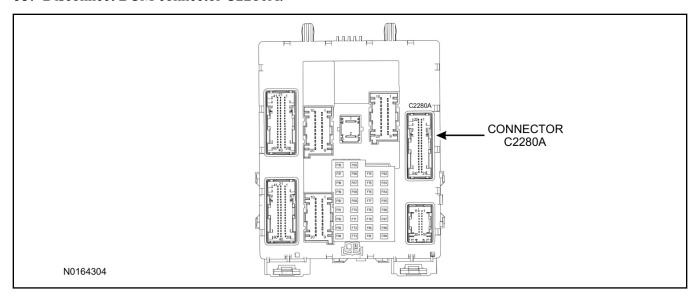

NOTE:

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

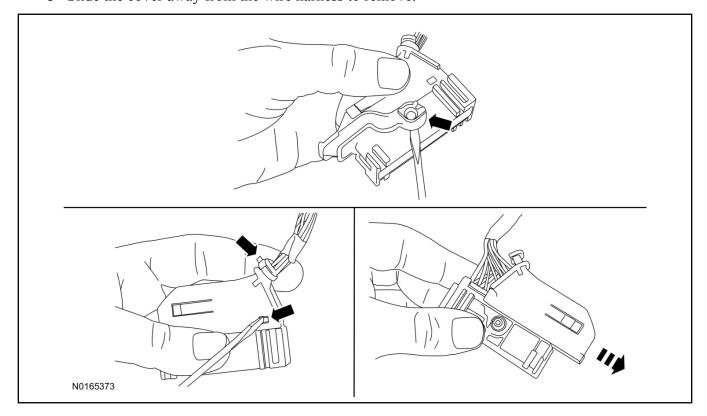

- 50. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 51. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

- 52. Route the hood latch wire harness into the vehicle through the bulkhead grommet.
 - Secure the hood latch wire harness with tie-straps.
- 53. Disconnect BCM connector C2280A.

- 54. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

- 55. If equipped, remove the pin plug from BCM connector C2280A Pin 15.
 - If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

56. *NOTICE*:

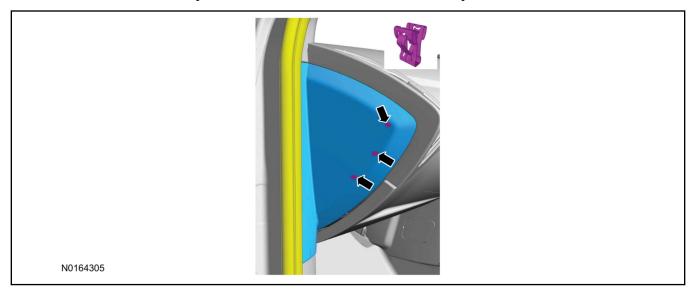

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 57. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 58. Connect BCM connector C2280A.
- 59. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

RMST Kit Antenna Installation

60. Position the weather strip aside and remove the LH IP side finish panel.

61. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

62. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

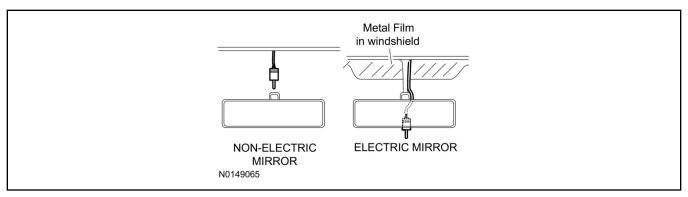

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

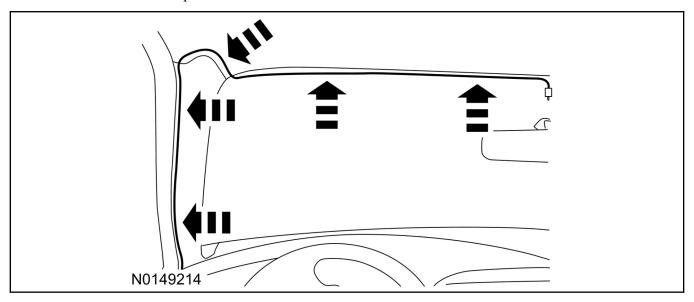

63. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

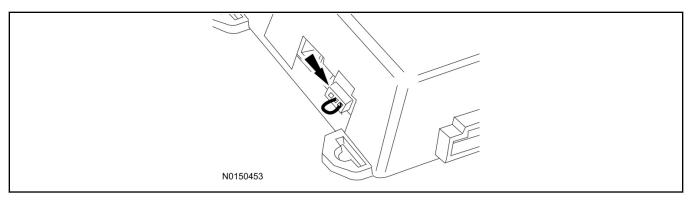

- 64. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

- 65. Connect the antenna connector to the VSS module.
- 66. Reposition the A-pillar trim panel back, if necessary.
- 67. Install the LH IP side finish panel and reposition the weatherstrip.

VSS Module - Optional Vehicle Security Features

- 68. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features enabled.

RMST and Perimeter Alarm Activation - Key Start Only

NOTE:

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

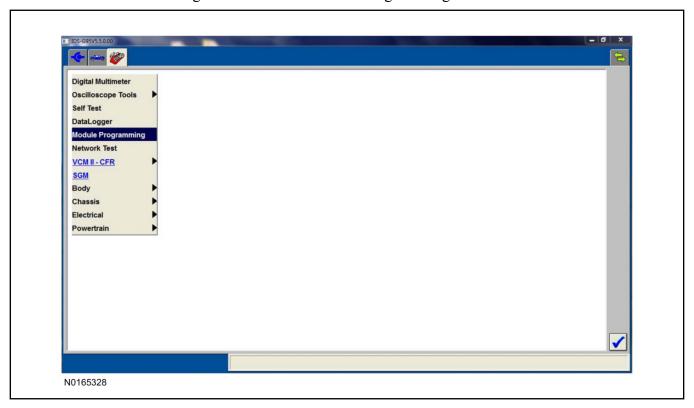

IDS must be connected to the internet during remote start and perimeter alarm activation.

NOTE:

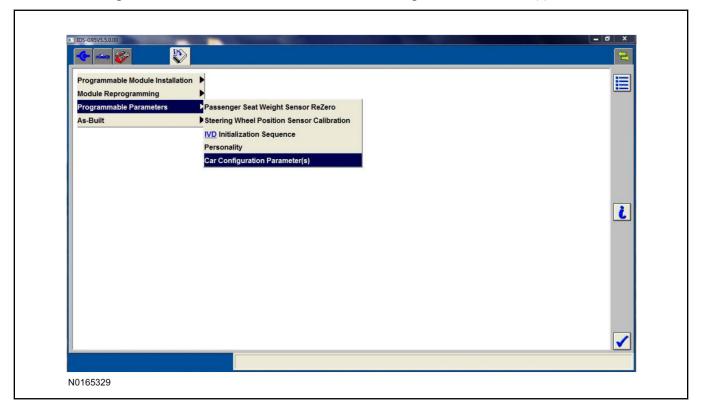

For vehicles equipped with push button start, proceed to "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

- 69. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 70. Verify that the IDS is updated to the most current version.
- 71. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN

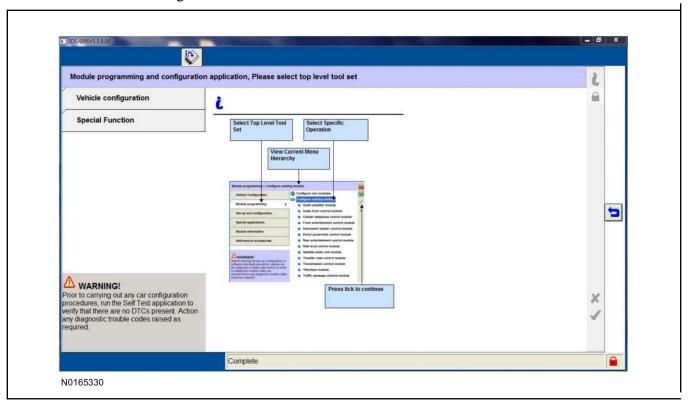

72. Start a new session using IDS and select "Module Programming".

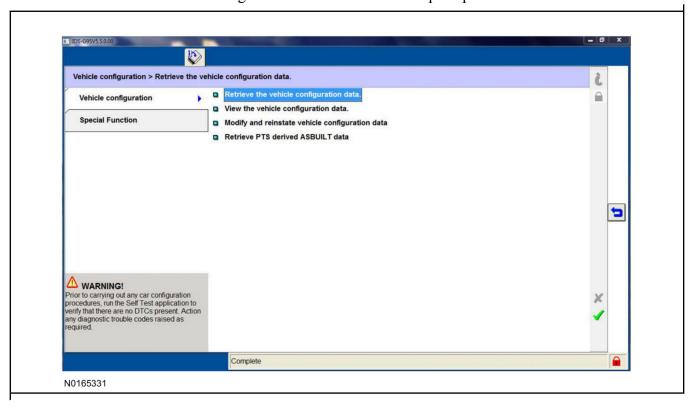

73. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

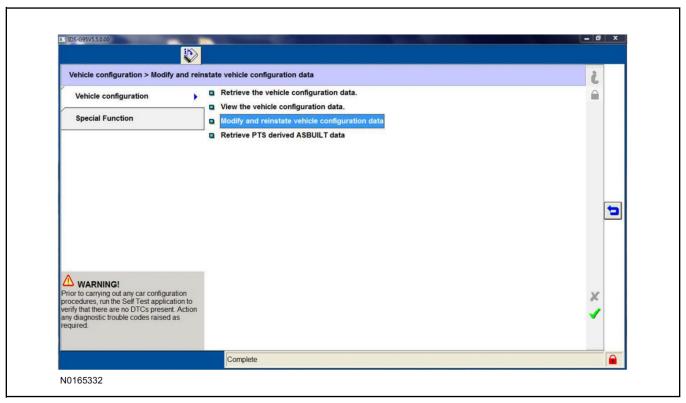

74. Select "Vehicle Configuration".

75. Select "Retrieve Vehicle Configuration data" and follow the prompts.

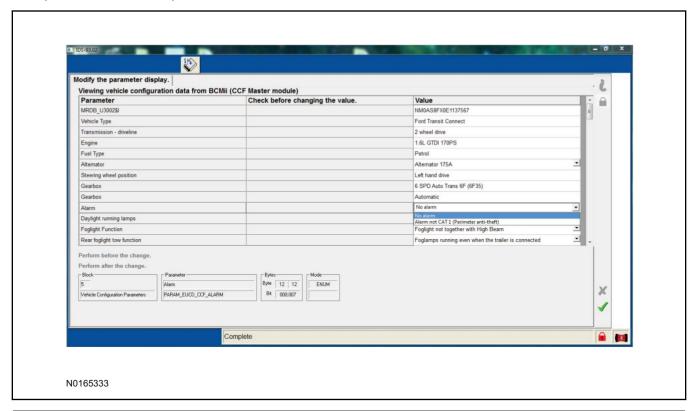

76. Select "Modify and reinstate vehicle configuration data".

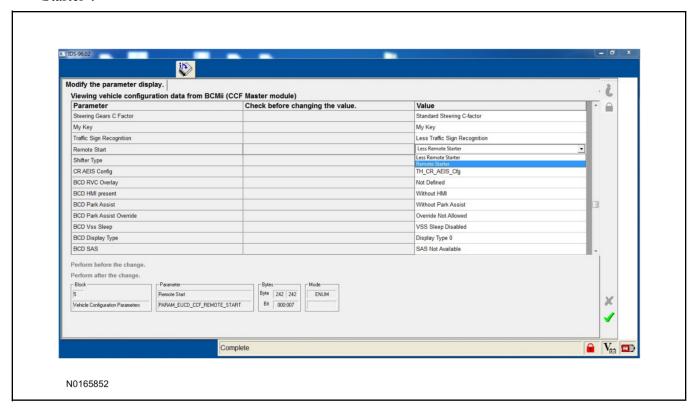

77. **NOTE:**

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

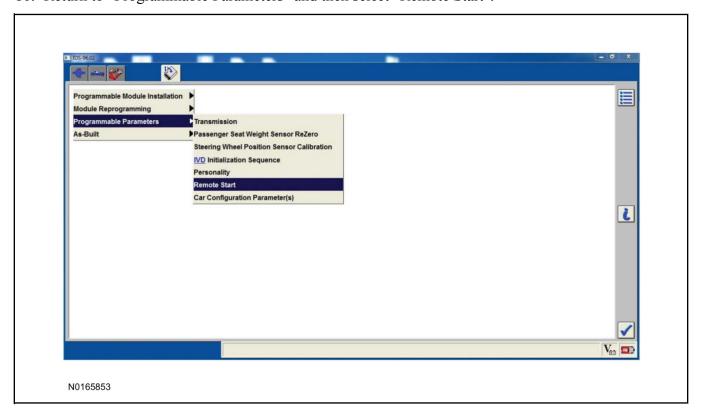

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

78. Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 79. Select the Tick mark and download the data back into the vehicle.
- 80. Return to "Programmable Parameters" and then select "Remote Start".

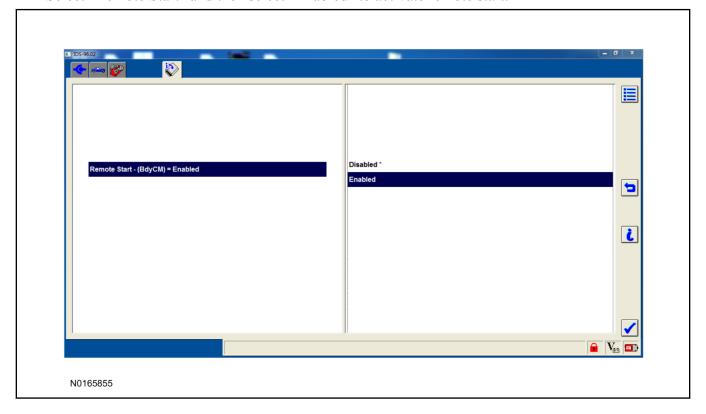

81. **NOTE:**

Enable all available equipment features during the remote start enable process.

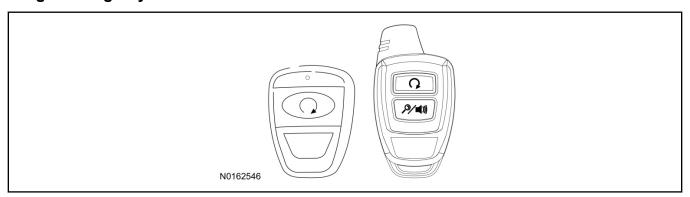

NOTE:

The remote start feature must be enabled in the body control module and the instrument cluster.

Select "Remote Start" and then select "Enabled" to activate remote start.

Programming Key Fobs

82. **NOTE:**

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 83. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 84. Close the hood.
- 85. Close all of the vehicle doors.
- 86. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 87. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 88. Open the hood.
- 89. **NOTE:**

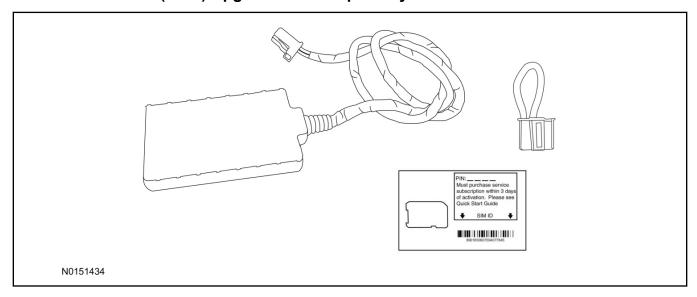

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

90. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test

III. Remote Access (RMU) Upgrade "Sold Separately"

91. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps

\triangle CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

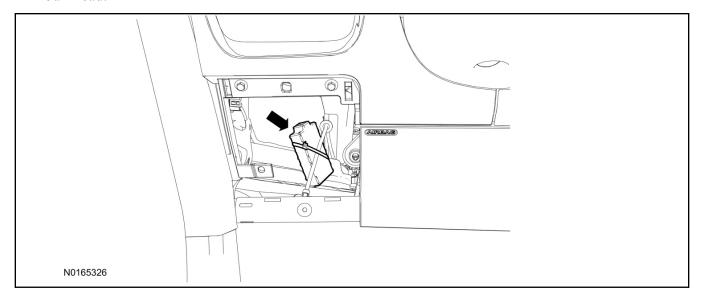

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

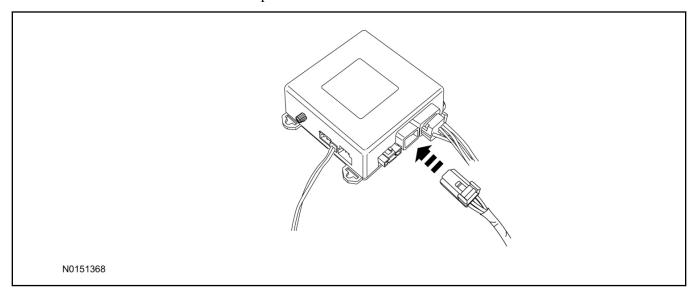

92. **NOTE:**

DLC access panel removed for clarity.

Using a tie-strap, secure the RMU to the hood latch release cable near the driver side of the vehicle bulkhead.

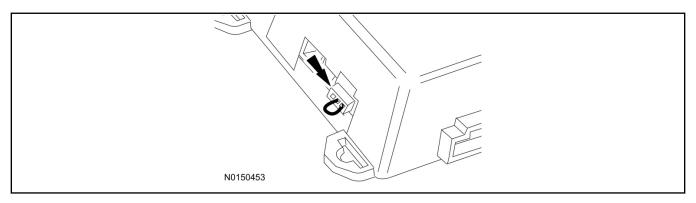

- 93. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 94. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST and Perimeter Alarm Activation - Key Start Vehicles (Without Factory Remote Start)

NOTE:

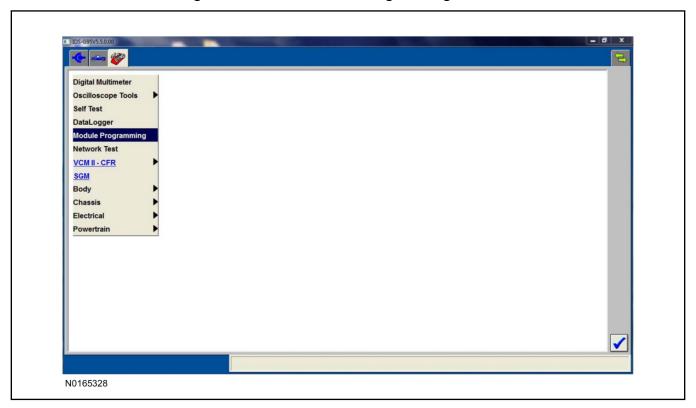

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

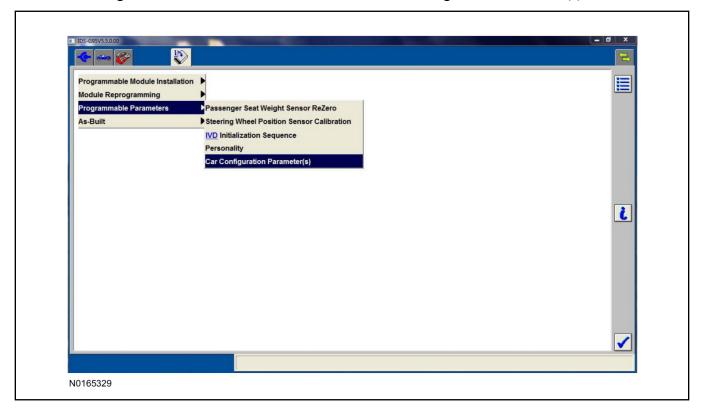

IDS must be connected to the internet during remote start and perimeter alarm activation.

- 95. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 96. Verify that the IDS is updated to the most current version.
- 97. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

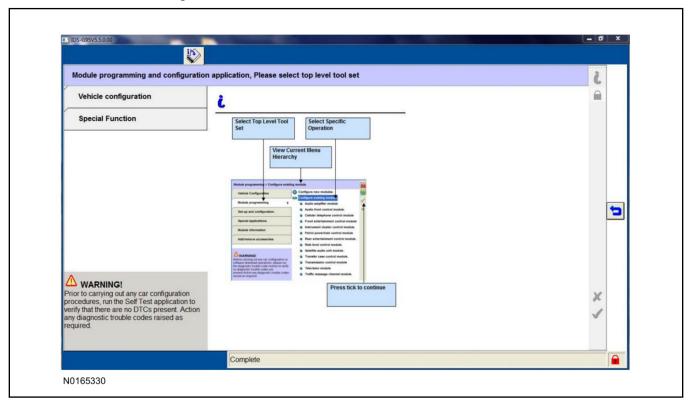

98. Start a new session using IDS and select "Module Programming".

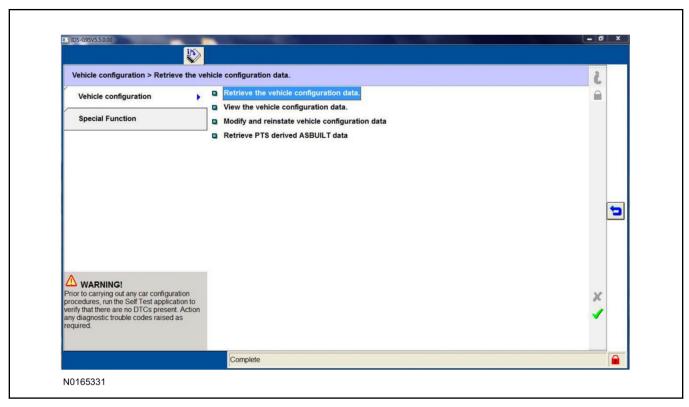

99. Select "Programmable Parameters" and then select "Car Configuration Parameter(s)".

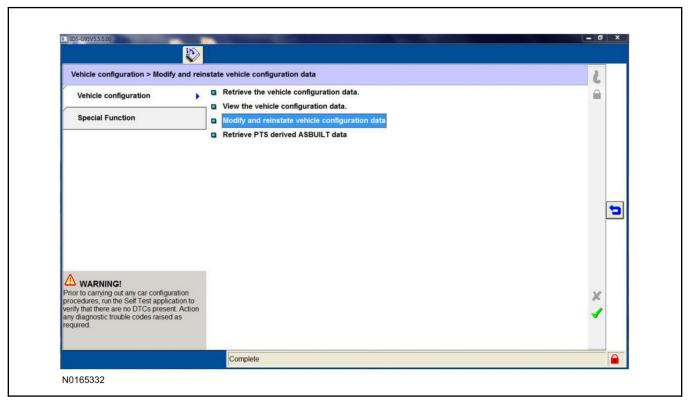

100. Select "Vehicle Configuration".

101. Select "Retrieve Vehicle Configuration data" and follow the prompts.

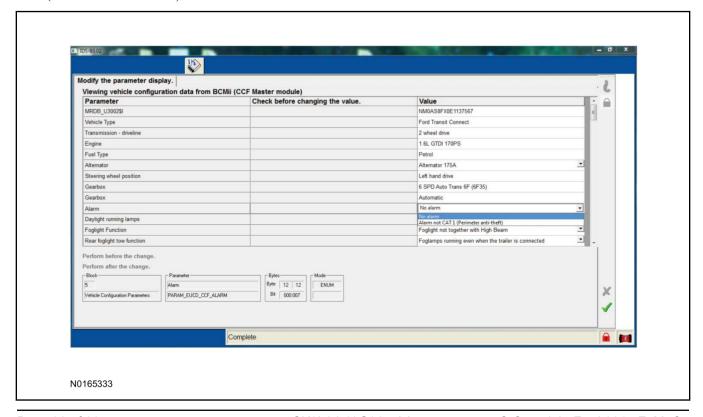

102. Select "Modify and reinstate vehicle configuration data".

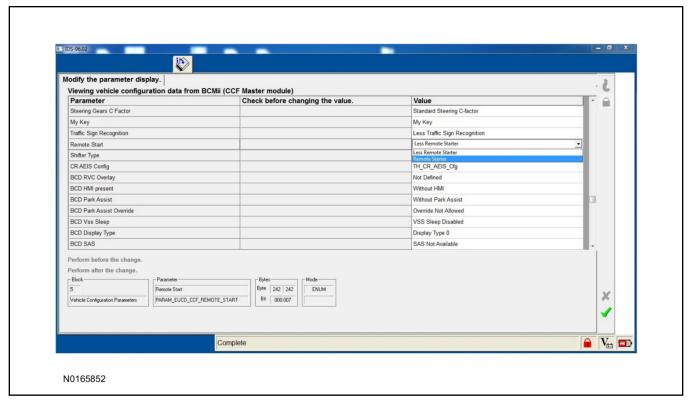

103.**NOTE**:

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

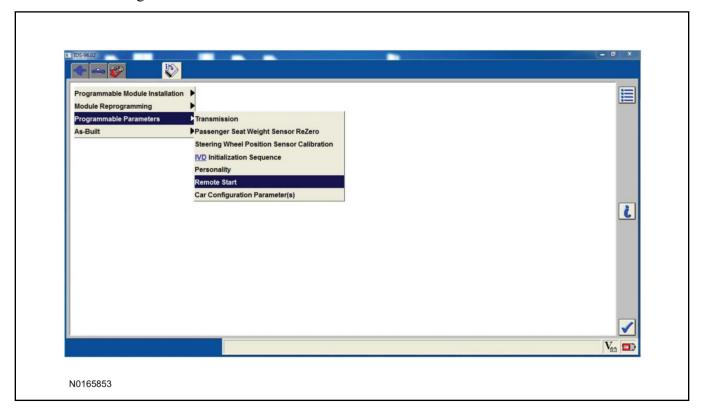

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

104.Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 105. Select the Tick mark and download the data back into the vehicle.
- 106.Return to "Programmable Parameters" and then select "Remote Start".

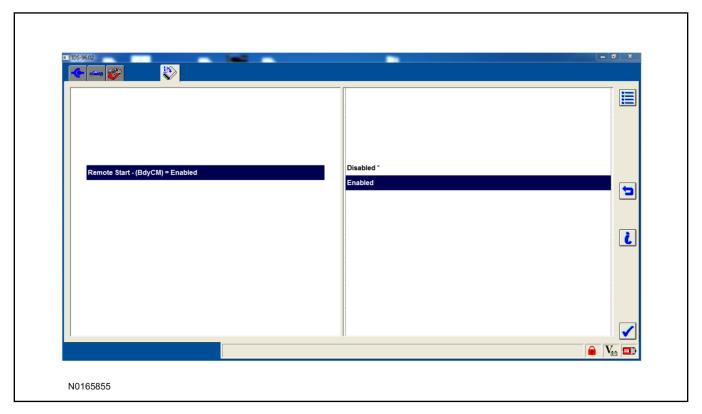

107.**NOTE**:

Enable all available equipment features during the remote start enable process.

NOTE:

The remote start feature must be enabled in the body control module and the instrument cluster.

Select "Remote Start" and then select "Enabled" to activate remote start.

RMU Activation

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

108. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:

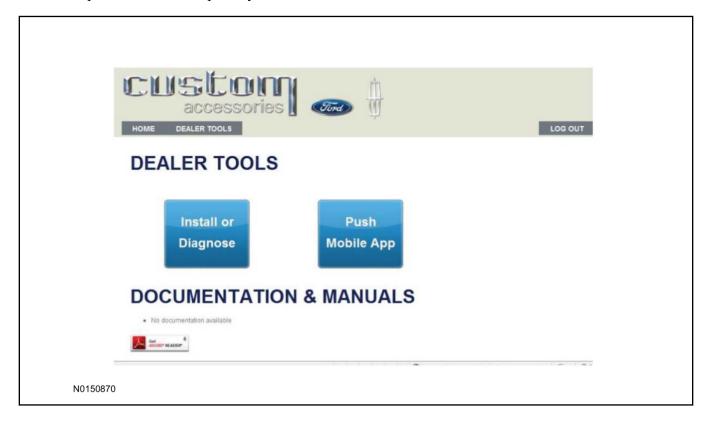

- 1 Email Address
- 2 Cell Phone Number
- 3 Cell Phone Carrier Company

109.Log on to your Professional Technician Society (PTS) account and enter the vehicle information.

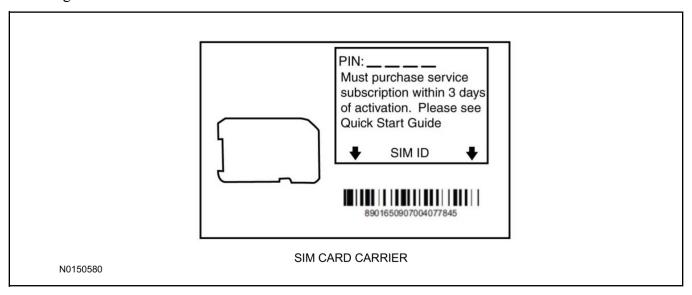

- 1 Select "Vehicle Id".
- 2 Select "By Year & Model"
- 3 Choose the year & model of the vehicle and then select "GO".
- 4 Hover over the "Workshop" tab.
- 5 Select the "Accessory Installation" menu item.
- 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
- 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

110.Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

111.Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

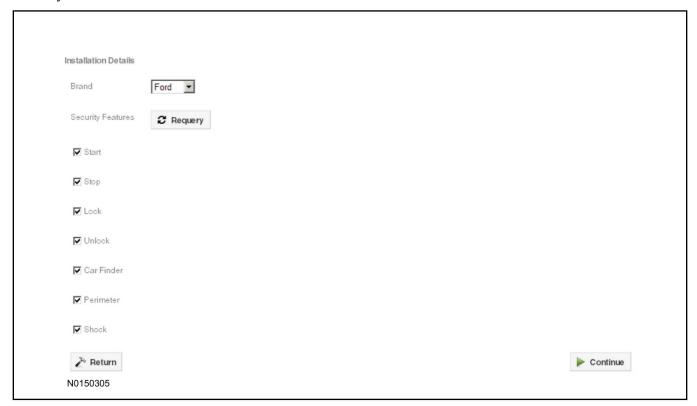

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 112.Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 113.Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 114.If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

Hood Latch Kit - "Sold Separately"

NOTE:

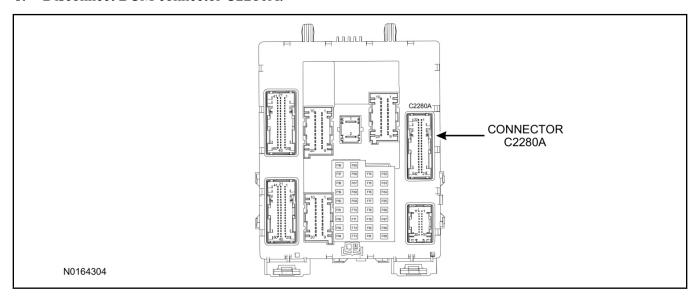

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

- 5. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 6. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

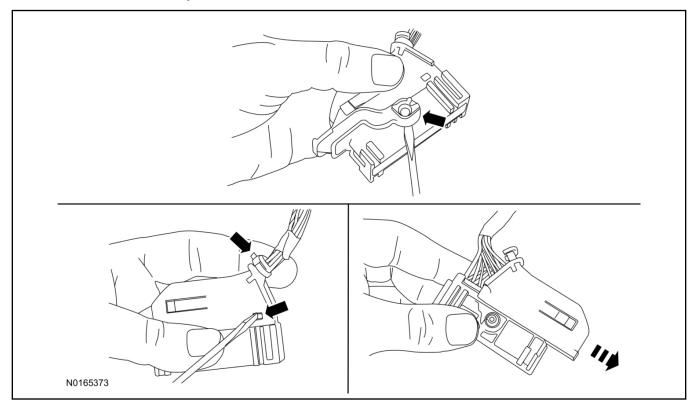

- 7. Route the hood latch wire harness into the vehicle through the bulkhead grommet on the passenger side.
 - Secure the hood latch wire harness with tie-straps.

8. Disconnect BCM connector C2280A.

- 9. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

- 10. If equipped, remove the pin plug from BCM connector C2280A Pin 15.
 - If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

11 NOTICE:

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 12. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 13. Connect BCM connector C2280A.
- 14. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

I. VSS System Installation

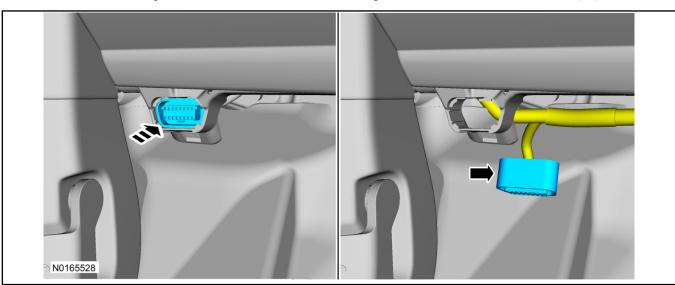

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

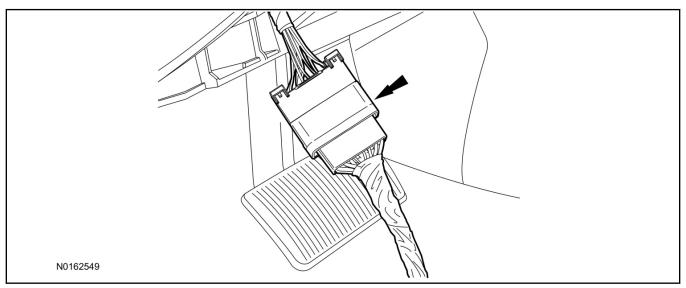

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

15. Release the rear clip and detach the vehicle's OBD II port from the Instrument Panel (IP) frame.

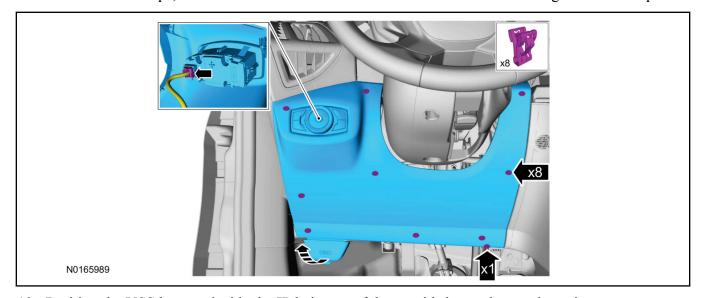

16. Connect the VSS T-harness to the OBD II port.

Vehicle Security/Remote Start/Remote Access

- 17. Attach the vehicle's OBD II port to he Instrument Panel (IP) frame.
- 18. Remove the steering column trim panel.
 - 1 Remove the screw.
 - 2 Release the clips, disconnect the electrical connector and remove the steering column trim panel.

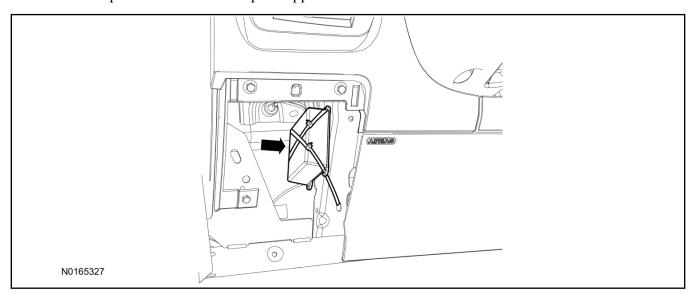

19. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.

20. **NOTE:**

Data Link Connector (DLC) access panel removed for clarity.

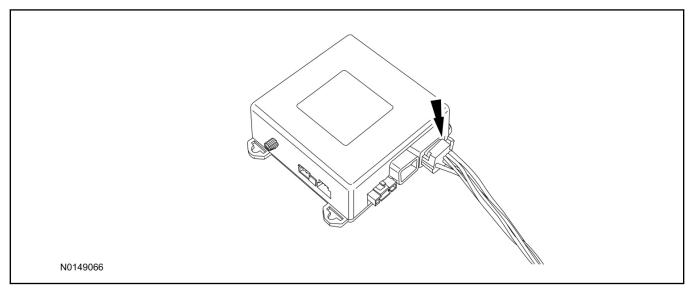

Using tie-straps, secure the VSS module to the IP frame.

- Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
- Tie-strap the VSS module loops at opposite corners.

21. Connect the VSS harness to the VSS module.

• Secure the VSS harness with tie-straps.

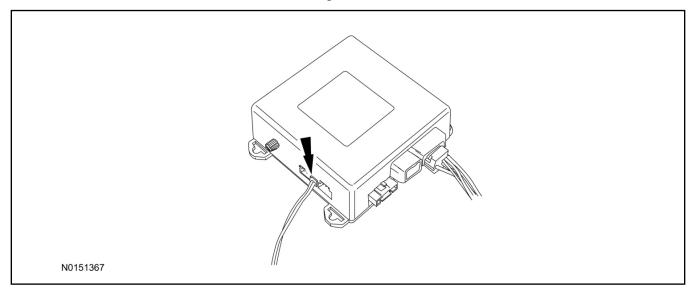

- 22. Install the steering column trim panel.
 - 1 Connect the electrical connector and install the steering column trim panel.
 - 2 Install the screw.
 - 3 Tighten screw to 22 lb.in (2.5 Nm).

Optional Security Indicator LED Mounting

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 23. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 24. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 25. Route the LED wire harness to the VSS module.
- 26. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

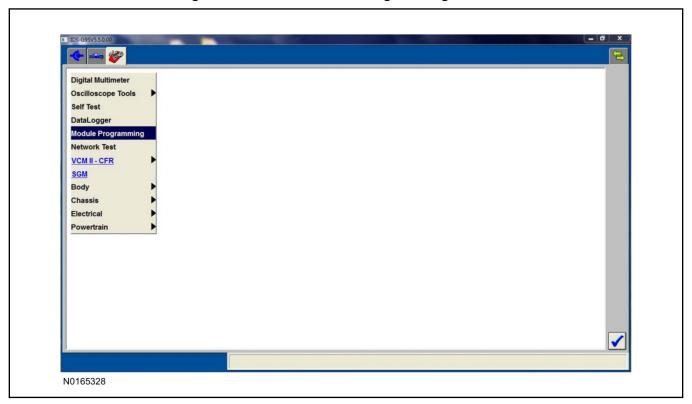

Perimeter Alarm Activation - Key Start Only

NOTE:

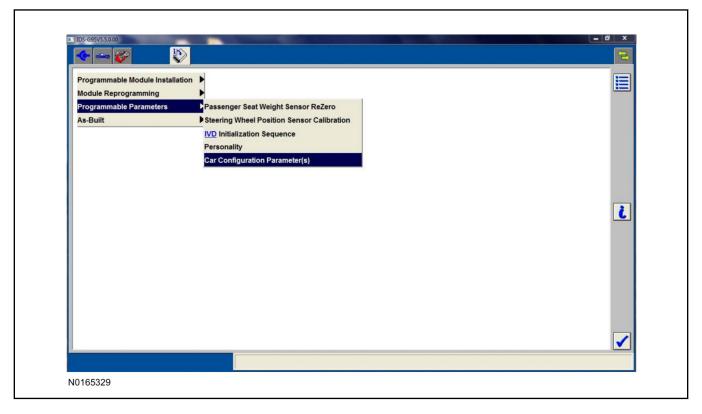

IDS must be connected to the internet during perimeter alarm activation.

- 27. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 28. Verify that the IDS is updated to the most current version.
- 29. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

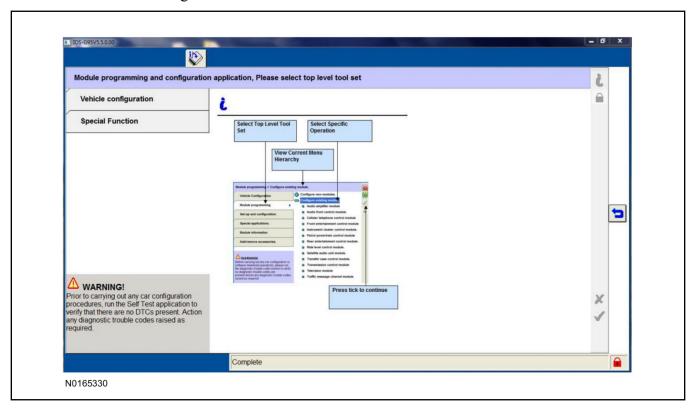

30. Start a new session using IDS and select "Module Programming".

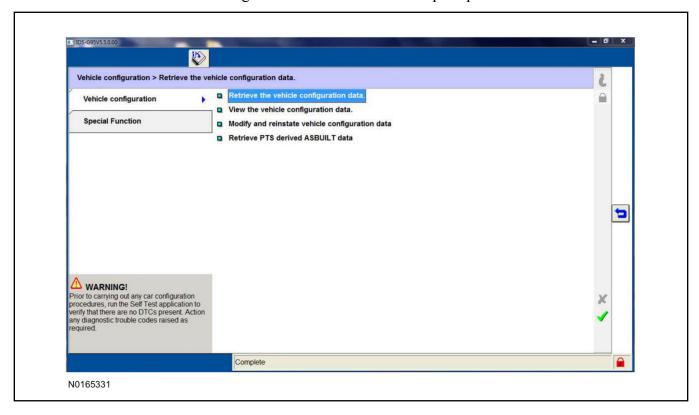

31. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

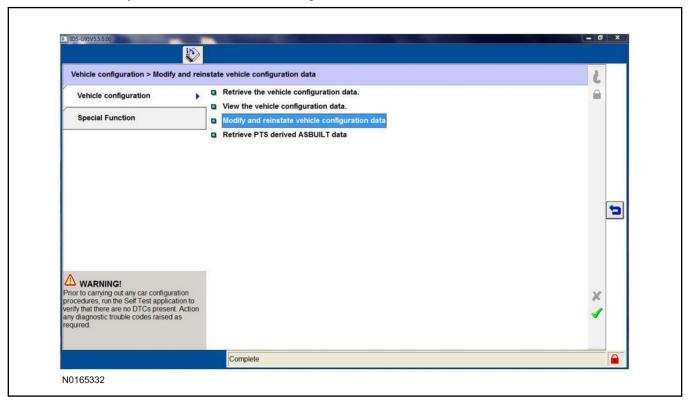

32. Select "Vehicle Configuration".

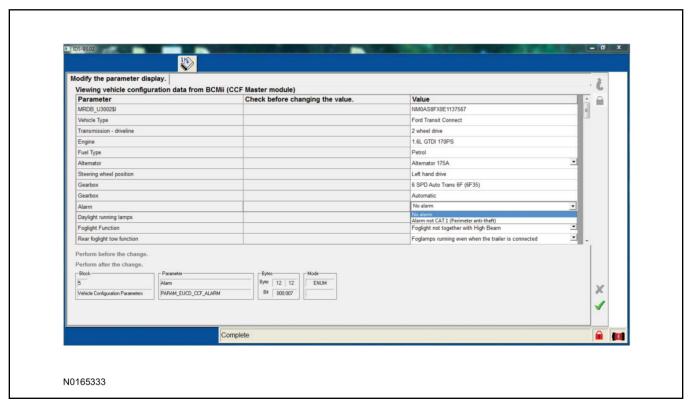

33. Select "Retrieve Vehicle Configuration data" and follow the prompts.

34. Select "Modify and reinstate vehicle configuration data".

35. Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

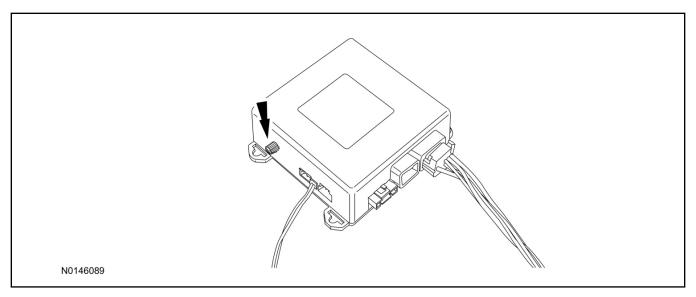

36. Select the Tick mark and download the data back into the vehicle.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 37. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 38. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 10-15 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 39. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 40. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 41. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.
- 42. Install the steering column shrouds. For additional information, refer to WSM Section 501-05.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

Cycle ignition OFF, ON, OFF before testing.

- 43. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 15 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 44. Reach inside the window and press the door unlock trim switch (door will not unlock). The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, the alarm will trigger instantly upon door opening.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 45. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 46. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 47. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

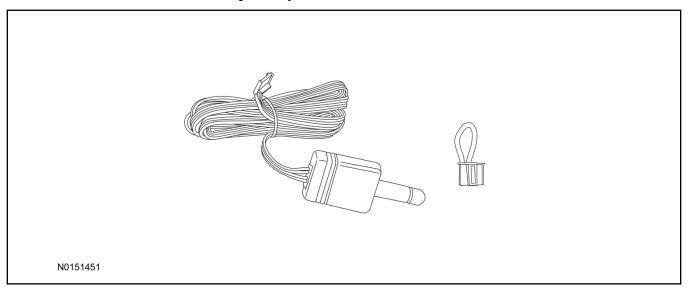

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

△ CAUTION:

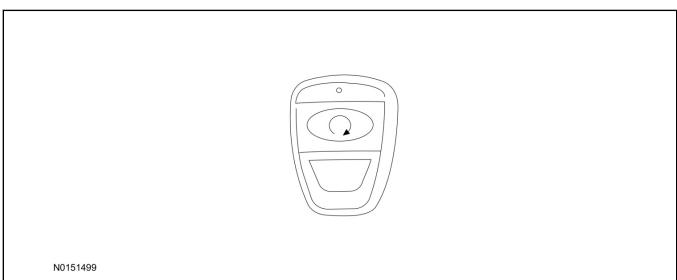

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Latch Kit - Sold Separately".

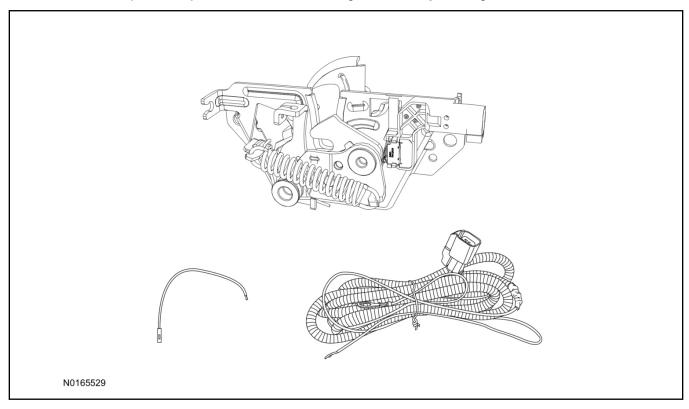

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Hood Latch Kit (19G366) - Base Vehicles Only "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

48. Review the RMST Upgrade components.

Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

Hood Latch Kit Contents (if required) "Sold Separately"

49. Review the Hood Latch kit contents.

Hood Latch Kit "Sold Separately"

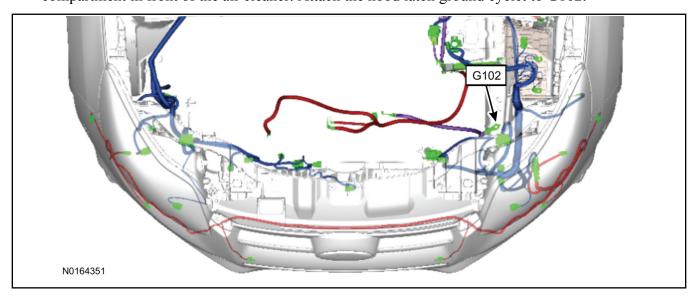

QUANTITY	DESCRIPTION
1	Hood Latch Assembly
Hood Latch Kit "Sold Separately"	
1	Body Control Module (BCM) Terminal Wire
1	Hood Latch Wire Harness
10	Tie Wraps (Not Pictured)

Hood Latch Kit - "Sold Separately"

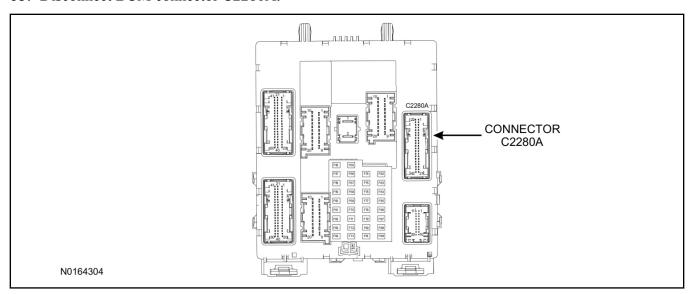

NOTE:

Hood latch installation is required if the vehicle is being upgraded to VSS/RMST/RMU and is not currently equipped with a hood switch.

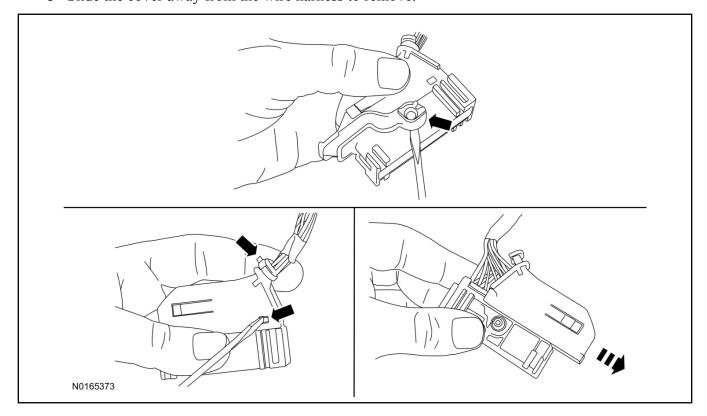

- 50. Install a new hood latch equipped with switch. For additional information, refer to WSM Section 501-14.
- 51. Route the hood latch wire harness to ground G102 located on the LH side of the engine compartment in front of the air cleaner. Attach the hood latch ground eyelet to G102.

- 52. Route the hood latch wire harness into the vehicle through the bulkhead grommet.
 - Secure the hood latch wire harness with tie-straps.
- 53. Disconnect BCM connector C2280A.

- 54. Separate the rear cover and lock from BCM connector C2280A.
 - 1 Gently pry up on both sides of the lock mechanism to remove the lock.
 - 2 Remove the tie wrap from the end of the cover and press the retaining tab on both sides to release the cover from the connector.
 - 3 Slide the cover away from the wire harness to remove.

- 55. If equipped, remove the pin plug from BCM connector C2280A Pin 15.
 - If the vehicle is not equipped with a hood switch from the factory, C2280A will not have a wire at the Pin 15 location.

56. *NOTICE*:

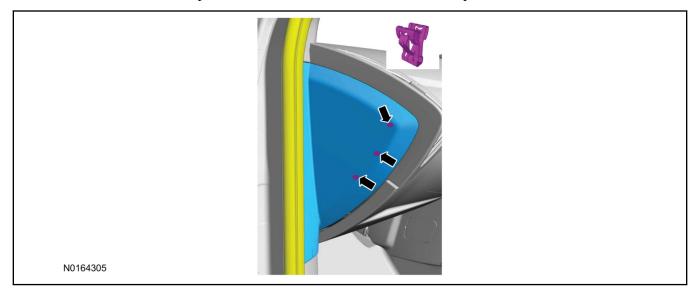

Check that all wire pins are attached firmly and properly positioned/secured within the connector shell, after performing this step.

Insert the white BCM terminal wire from the hood switch wire harness kit into BCM connector C2280A Pin 15.

- 57. Attach the rear cover and lock to BCM connector C2280A.
 - 1 Slide the cover onto the connector.
 - 2 Verify the cover retaining tabs are engaged on each side of the connector and install a new tie wrap on the end of the cover.
 - 3 Snap the lock onto the pivot mechanism on both sides of the connector.
- 58. Connect BCM connector C2280A.
- 59. Connect the hood latch wire harness wire to the BCM Terminal Wire.
 - Secure the wire harness assembly with tie-straps.

RMST Kit Antenna Installation

60. Position the weather strip aside and remove the LH IP side finish panel.

61. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

62. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

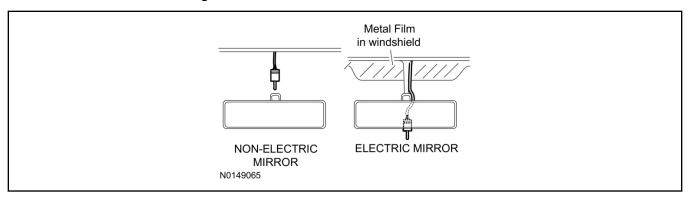

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

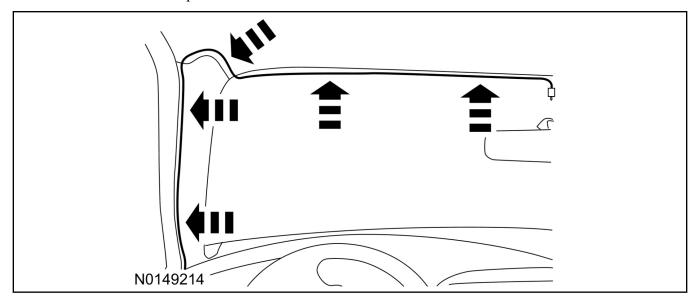

63. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

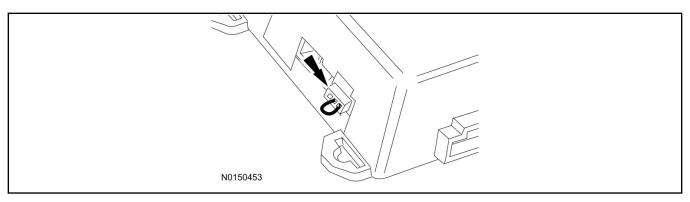

- 64. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

- 65. Connect the antenna connector to the VSS module.
- 66. Reposition the A-pillar trim panel back, if necessary.
- 67. Install the LH IP side finish panel and reposition the weatherstrip.

VSS Module - Optional Vehicle Security Features

- 68. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be disabled.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features enabled.

RMST and Perimeter Alarm Activation - Key Start Only

NOTE:

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

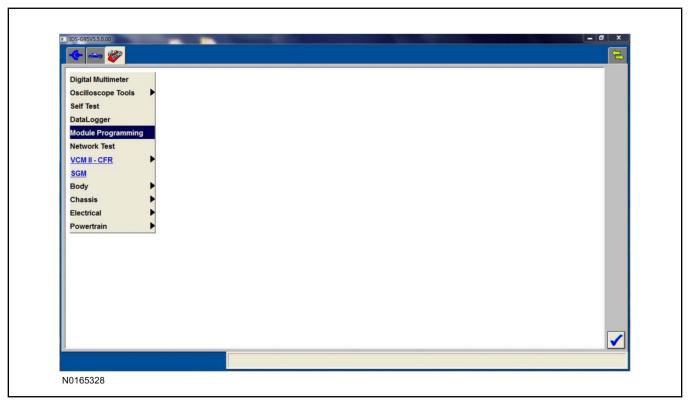

IDS must be connected to the internet during remote start and perimeter alarm activation.

NOTE:

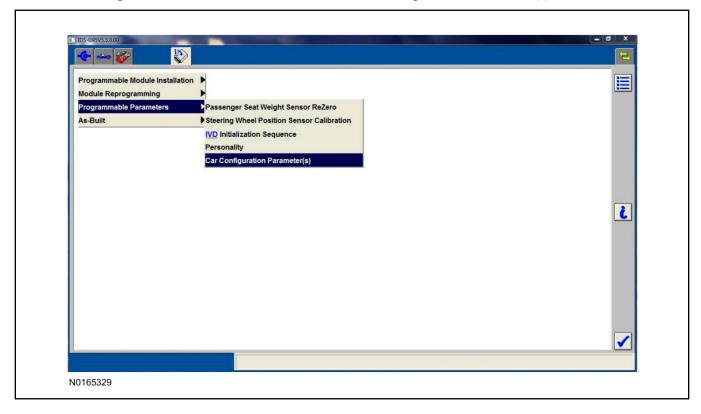

For vehicles equipped with push button start, proceed to "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

- 69. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 70. Verify that the IDS is updated to the most current version.
- 71. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN

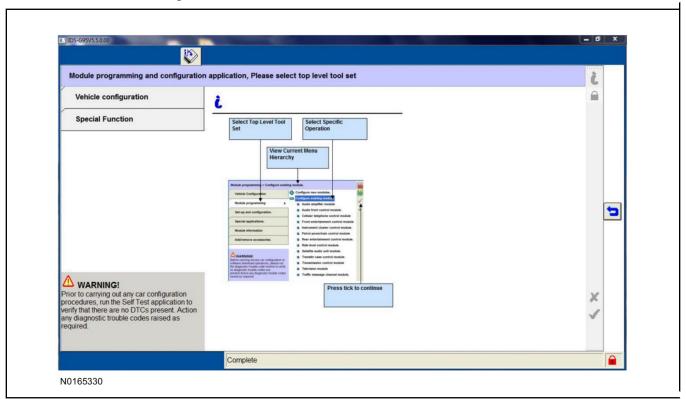

72. Start a new session using IDS and select "Module Programming".

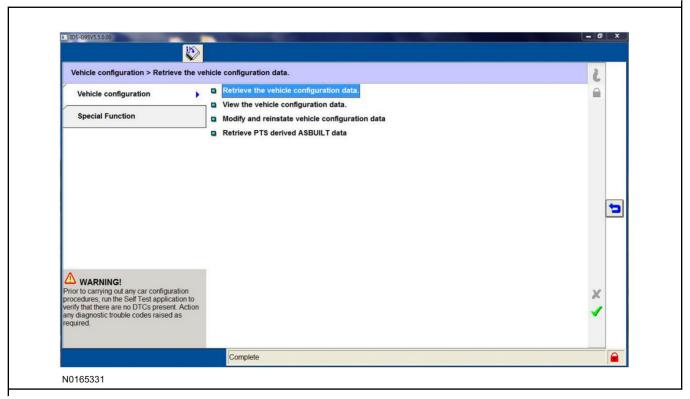

73. Select "Programmable Parameters" and select "Car Configuration Parameter(s)".

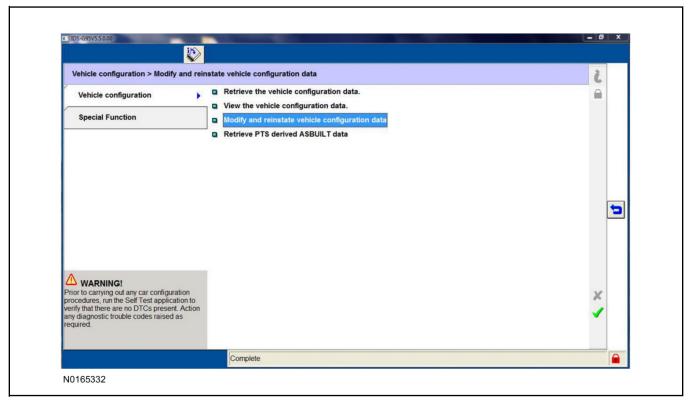

74. Select "Vehicle Configuration".

75. Select "Retrieve Vehicle Configuration data" and follow the prompts.

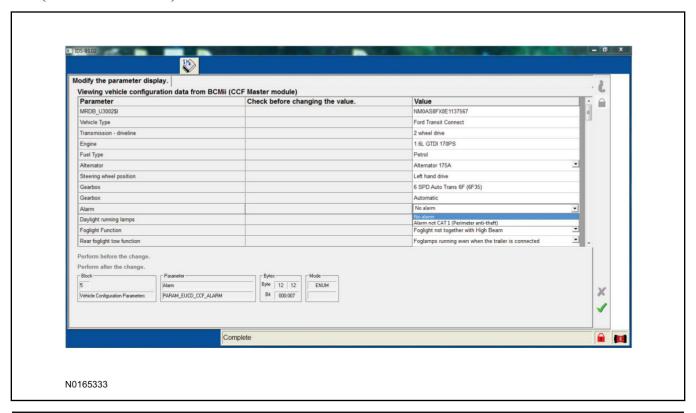

76. Select "Modify and reinstate vehicle configuration data".

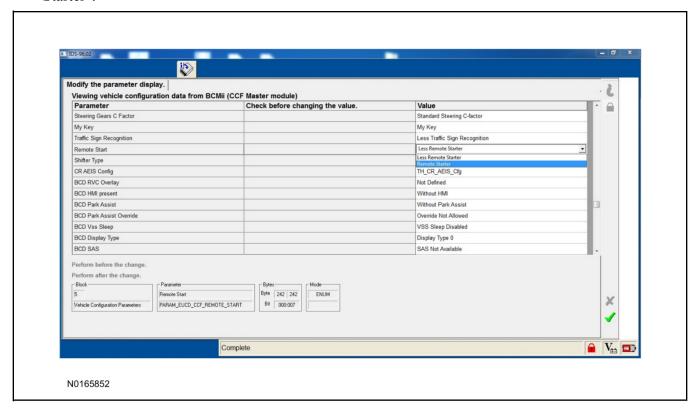

77. **NOTE:**

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

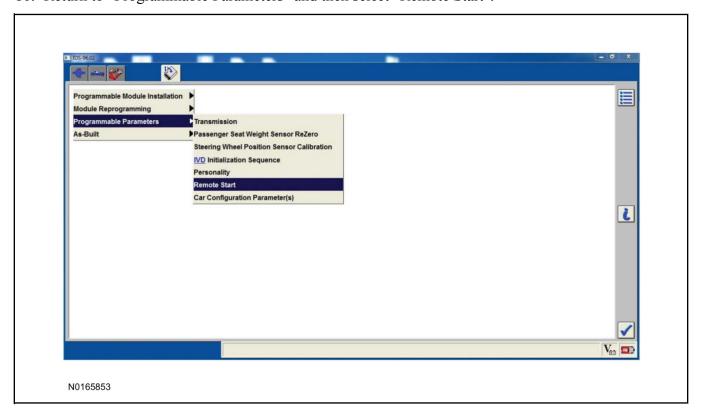

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

78. Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 79. Select the Tick mark and download the data back into the vehicle.
- 80. Return to "Programmable Parameters" and then select "Remote Start".

81. **NOTE:**

Enable all available equipment features during the remote start enable process.

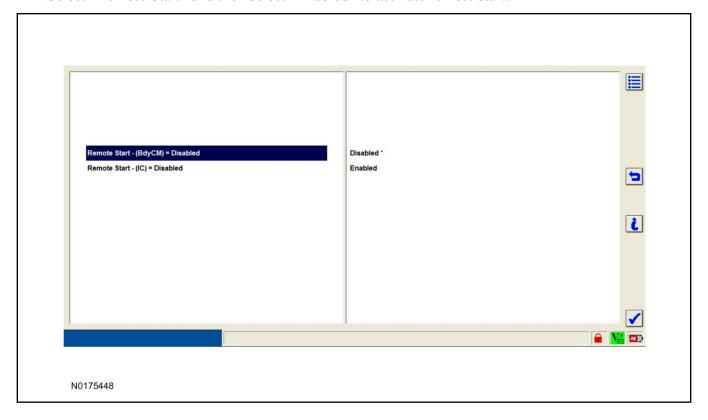

NOTE:

The remote start feature must be enabled in the body control module and the instrument cluster.

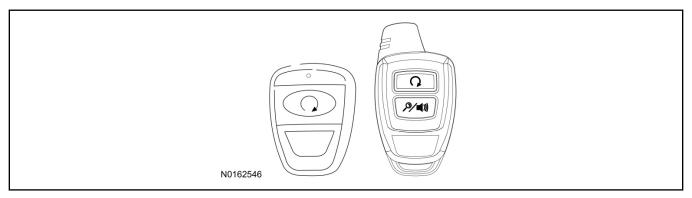

NOTE:

The Remote Start (IC) selection is available for 2017MY and newer vehicles.

Select "Remote Start" and then select "Enabled" to activate remote start.

Programming Key Fobs

82. **NOTE:**

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 83. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 84. Close the hood.
- 85. Close all of the vehicle doors.
- 86. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 87. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 88. Open the hood.
- 89. **NOTE:**

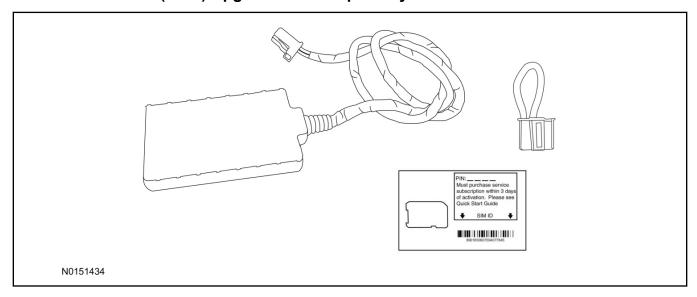

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

90. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

91. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps

\triangle CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

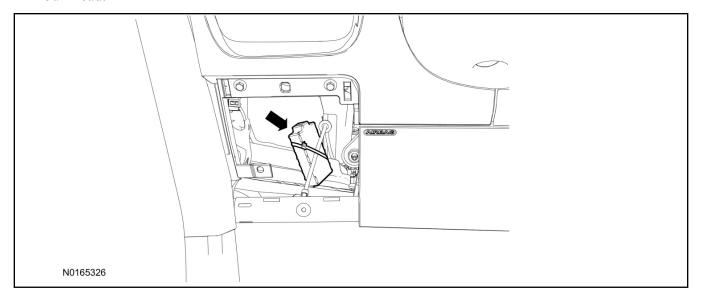

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

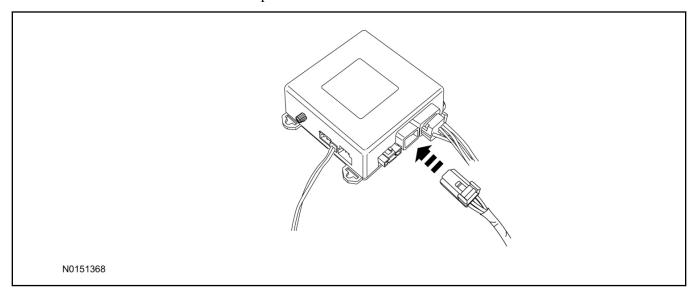

92. **NOTE:**

DLC access panel removed for clarity.

Using a tie-strap, secure the RMU to the hood latch release cable near the driver side of the vehicle bulkhead.

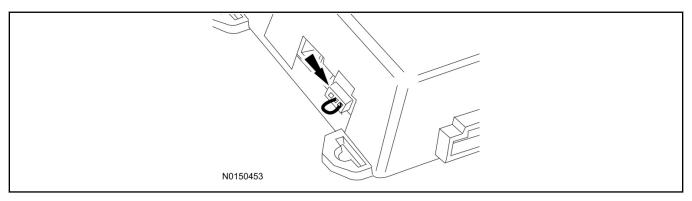

- 93. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 94. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST and Perimeter Alarm Activation - Key Start Vehicles (Without Factory Remote Start)

NOTE:

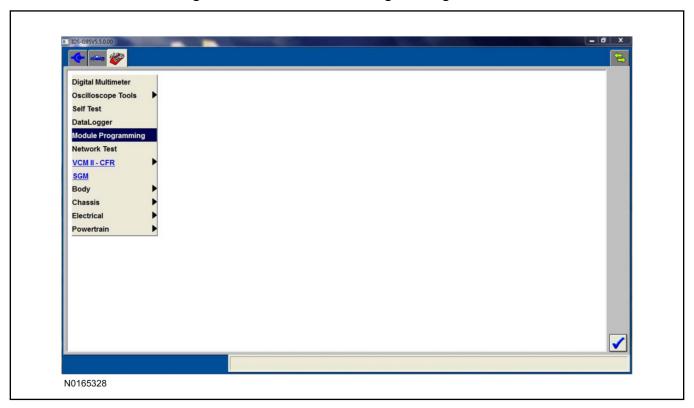

ALL STEPS WITHIN THIS ACTIVATION PROCEDURE MUST BE COMPLETED FOR PROPER SYSTEM OPERATION.

NOTE:

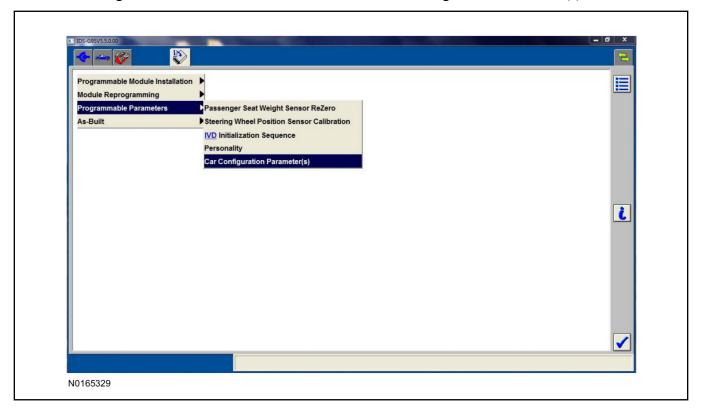

IDS must be connected to the internet during remote start and perimeter alarm activation.

- 95. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 96. Verify that the IDS is updated to the most current version.
- 97. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

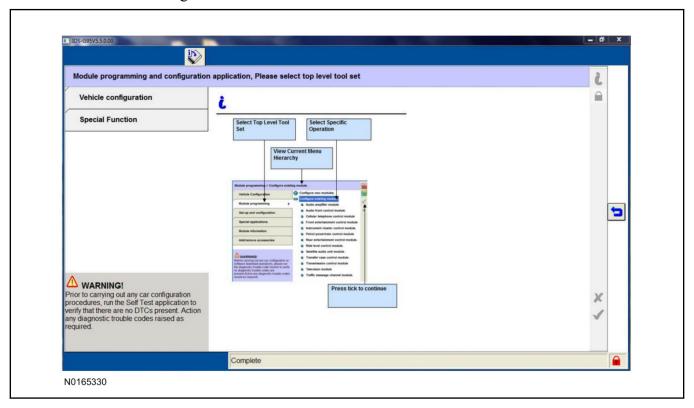

98. Start a new session using IDS and select "Module Programming".

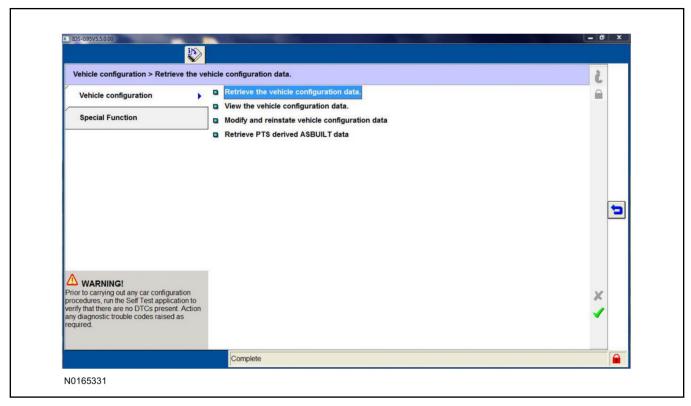

99. Select "Programmable Parameters" and then select "Car Configuration Parameter(s)".

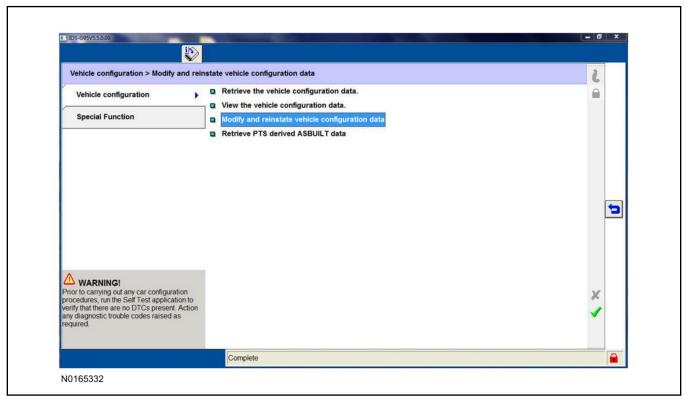

100. Select "Vehicle Configuration".

101. Select "Retrieve Vehicle Configuration data" and follow the prompts.

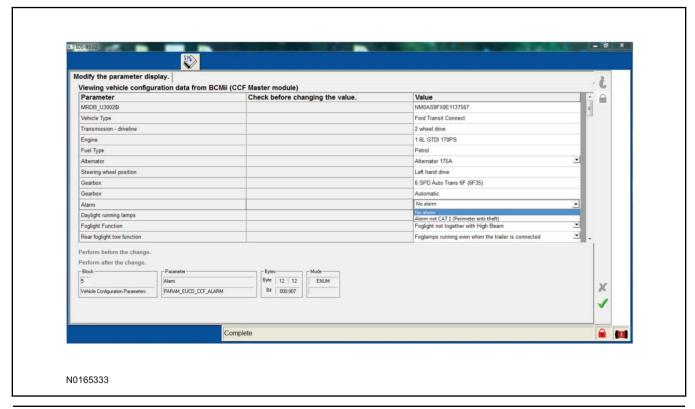

102. Select "Modify and reinstate vehicle configuration data".

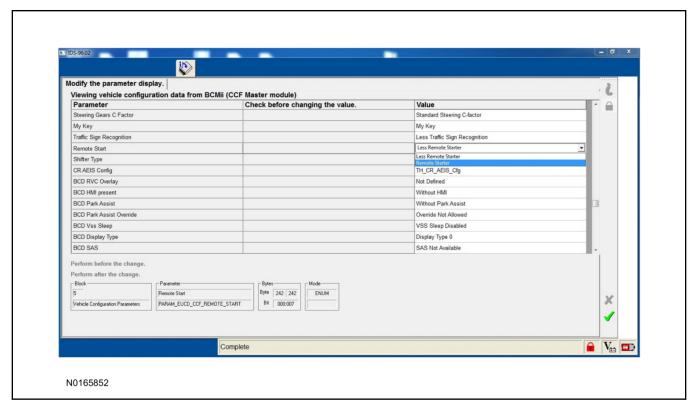

103.**NOTE**:

THIS FEATURE MUST BE ENABLED FOR PROPER REMOTE START OPERATION.

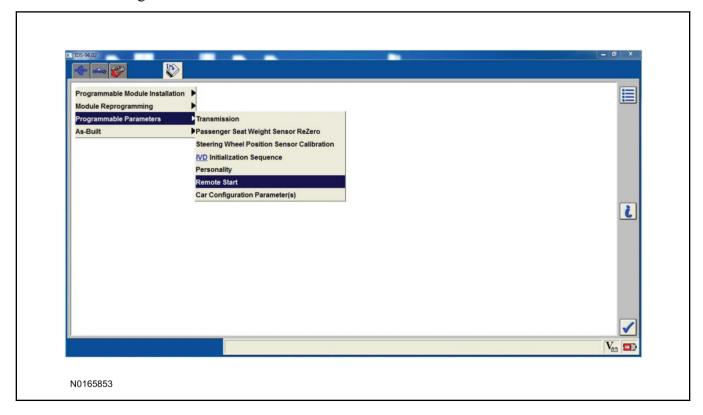

Identify the "Alarm" parameter and change the value from "No alarm" to "Alarm not CAT 1 (Perimeter anti-theft)".

104.Identify the "Remote Start" parameter and change the value from "Less Remote Starter" to "Remote Starter".

- 105. Select the Tick mark and download the data back into the vehicle.
- 106.Return to "Programmable Parameters" and then select "Remote Start".

107.**NOTE**:

Enable all available equipment features during the remote start enable process.

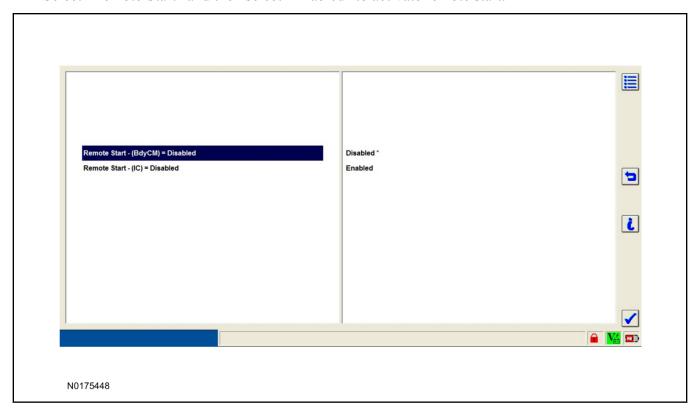

NOTE:

The remote start feature must be enabled in the body control module and the instrument cluster.

NOTE:

The Remote Start (IC) selection is available for 2017MY and newer vehicles.

Select "Remote Start" and then select "Enabled" to activate remote start.

RMU Activation

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

108. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:

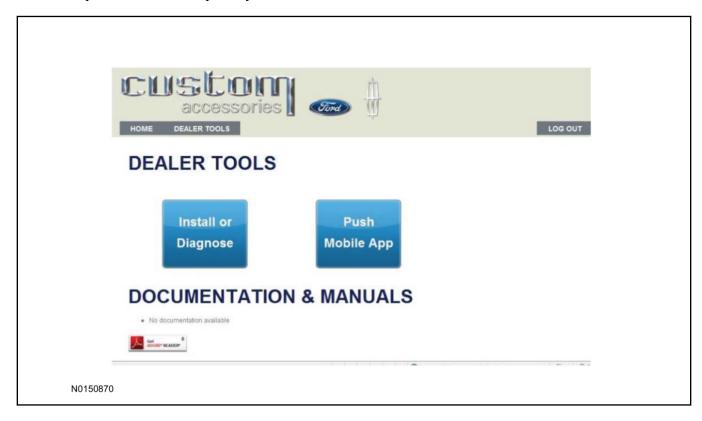

- 1 Email Address
- 2 Cell Phone Number
- 3 Cell Phone Carrier Company

109.Log on to your Professional Technician Society (PTS) account and enter the vehicle information.

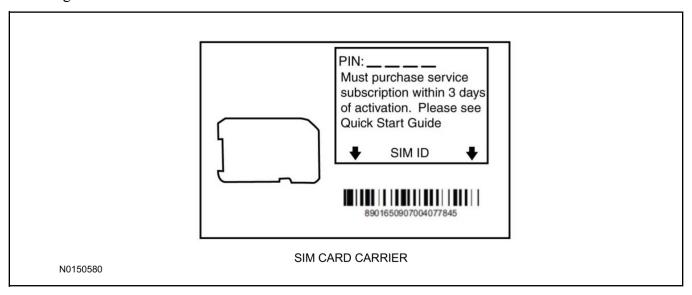

- 1 Select "Vehicle Id".
- 2 Select "By Year & Model"
- 3 Choose the year & model of the vehicle and then select "GO".
- 4 Hover over the "Workshop" tab.
- 5 Select the "Accessory Installation" menu item.
- 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
- 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

110.Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

111. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

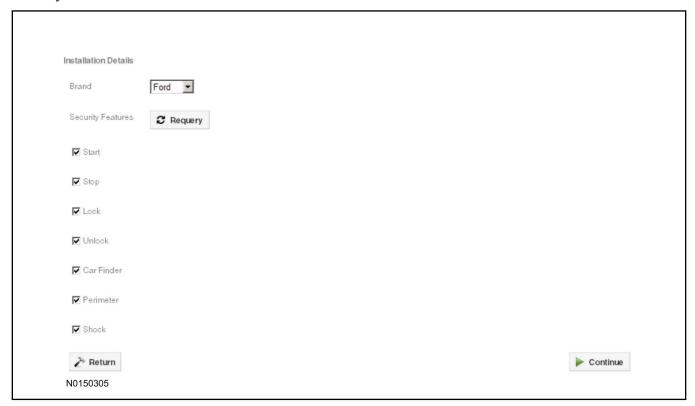

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 112.Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 113.Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 114.If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

QUANTITY	DESCRIPTION
1	Security Indicator LED

I. VSS System Installation

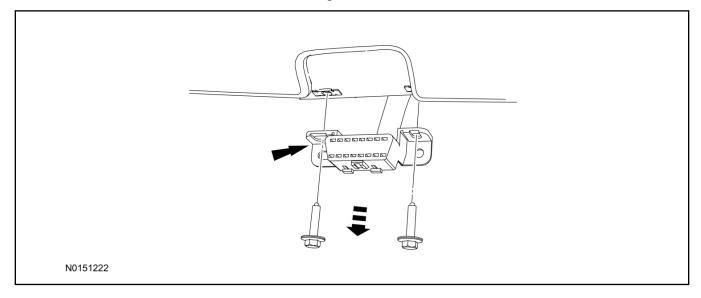

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

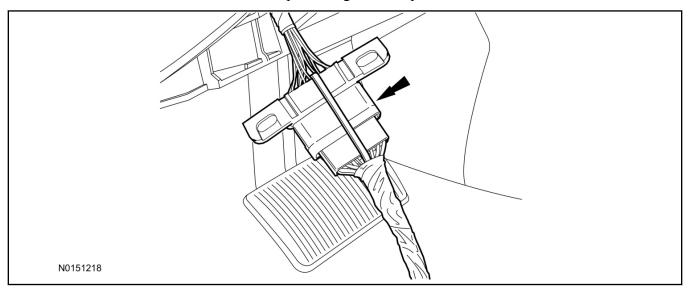

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

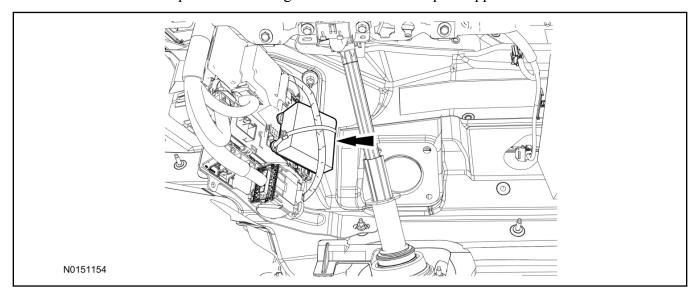

- 4. Remove the LH lower Instrument Panel (IP) insulator.
- 5. Remove the 2 bolts and remove the OBD II port from the IP frame.

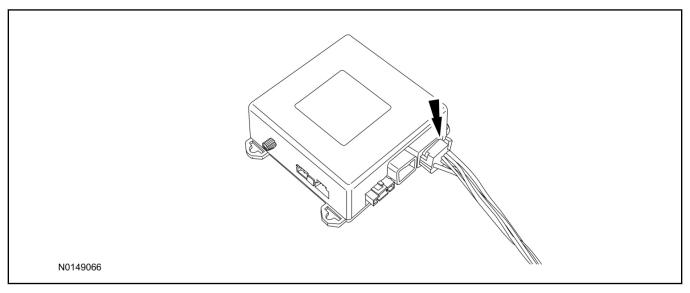

- 6. Connect the VSS T-harness to the OBD II port.
 - Secure the T-harness to the OBD II port using a tie-strap.

- 7. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.
- 8. Install the new VSS harness OBD II port to the IP frame and install the bolts.
 - Do not over tighten.
- 9. Position the VSS module on top of the Body Control Module (BCM) and secure to wire harness with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 10. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

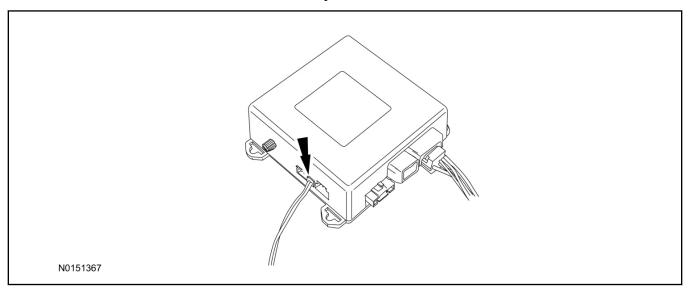

Optional Security Indicator LED Mounting

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 11. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 12. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 13. Route the LED wire harness to the VSS module.

- 14. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

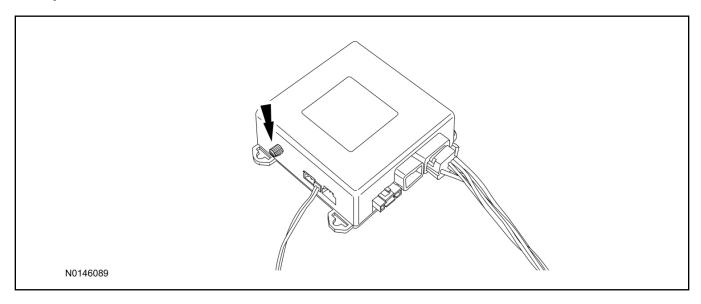

Learn VSS to Vehicle

15. Cycle door locks at trim switch four times to learn remote start keyless functions.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 16. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 17. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 18. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 19. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 20. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

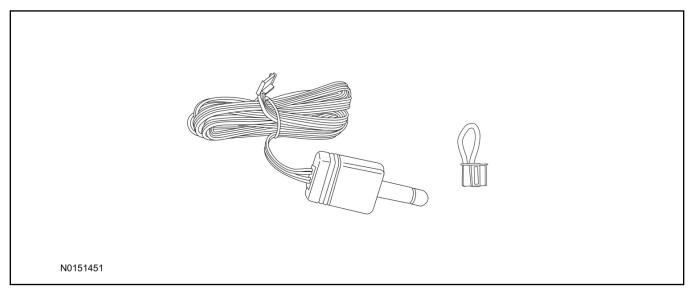

- 21. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 22. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 23. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 24. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 25. If the VSS kit will not be upgraded to RMST/RMU functions at this time, install the LH lower IP insulator.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

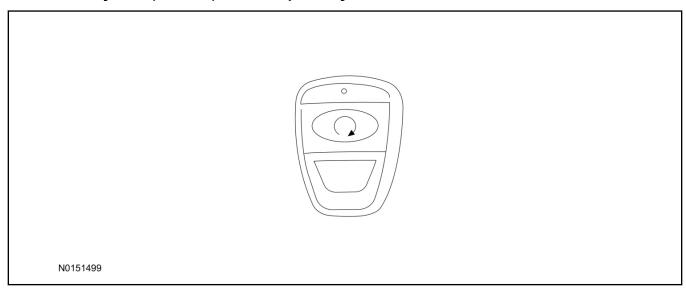

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

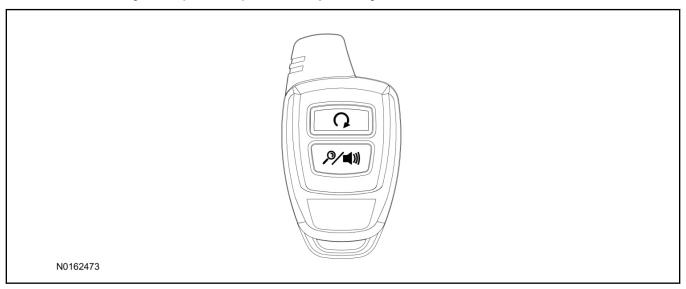

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

26. Review the RMST Upgrade components.

RMST Kit Antenna Installation

- 27. If previously installed, remove the LH lower IP insulator.
- 28. Position the weather strip aside and remove the LH IP side finish panel.

29. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

30. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

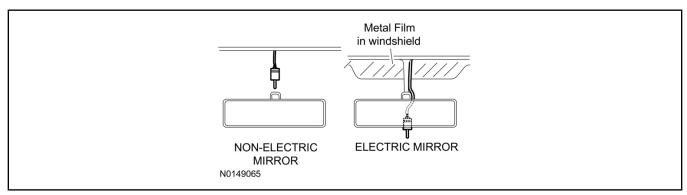

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

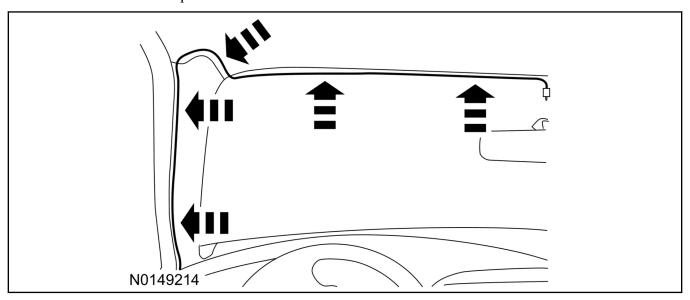

31. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

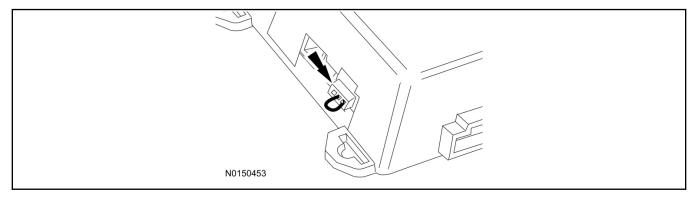

- 32. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

- 33. Connect the antenna connector to the VSS module.
- 34. Reposition the A-pillar trim panel back, if necessary.
- 35. Install the LH IP side finish panel and position the weatherstrip back.

VSS Module - Optional Vehicle Security Features

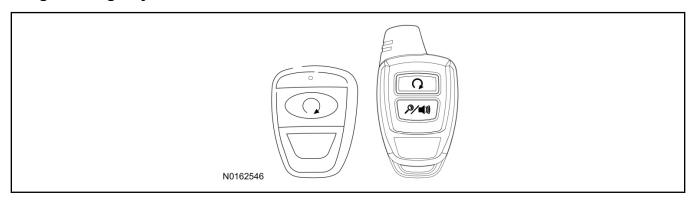

- 36. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

Learn VSS to Vehicle

37. Cycle door locks at trim switch four times to learn remote start keyless functions.

Programming Key Fobs

38. **NOTE:**

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times, ending in ignition off, engine off.
- 6 Release the brake pedal.
- 7 Press the vehicle start/stop button twice to turn ignition on.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 8 Press the start stop button on each fob you wish to program.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

39. If the RMST kit will not be upgraded to RMU functions at this time, install the LH lower IP insulator.

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 40. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 41. Close the hood.

- 42. Close all of the vehicle doors.
- 43. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 44. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 45. Open the hood.
- 46. **NOTE:**

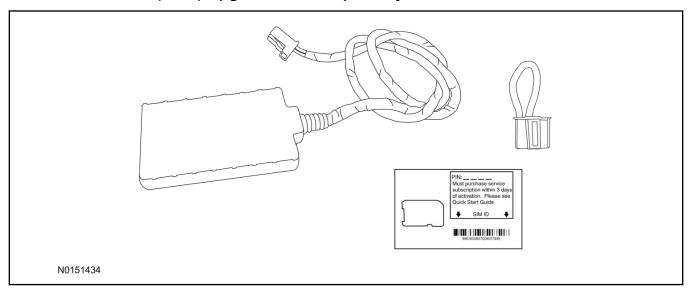

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

47. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

48. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper

49. If previously installed, remove the LH lower IP insulator.

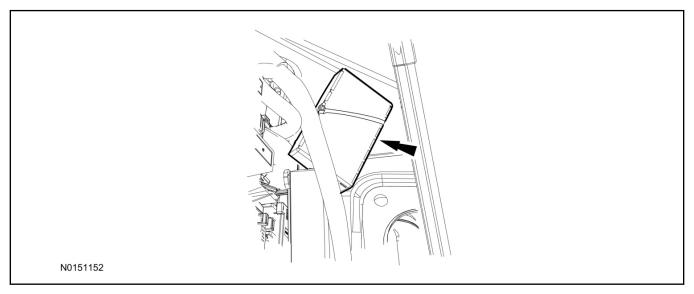

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

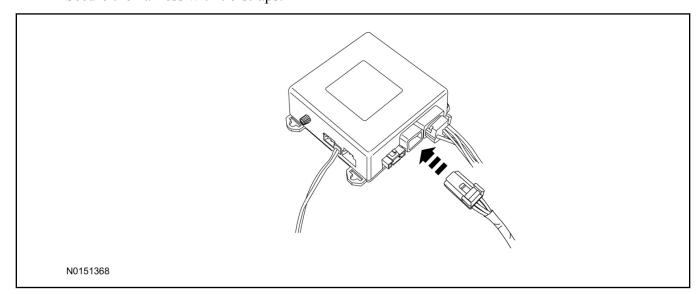

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

50. Using tie-straps secure the RMU to the IP harness above the previously installed VSS module.

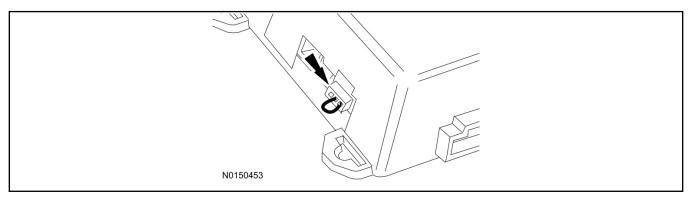

- 51. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 52. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features enabled.

53. Install the LH lower IP insulator.

Learn VSS to Vehicle

54. Cycle door locks at trim switch four times to learn remote start keyless functions.

RMU Activation

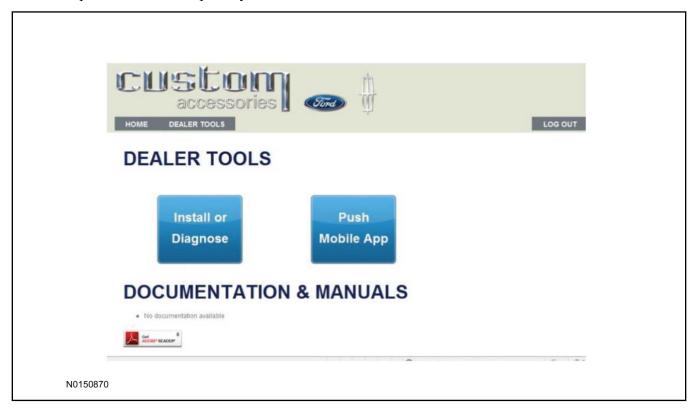

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

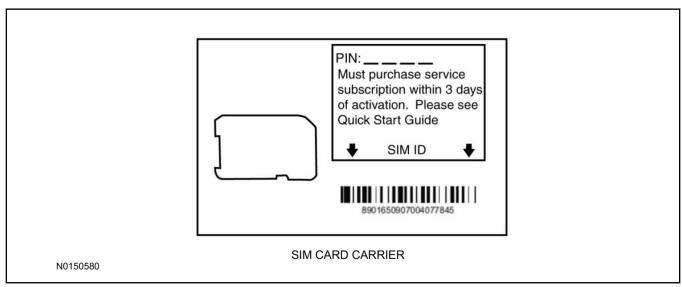

- 55. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 56. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

57. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

58. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

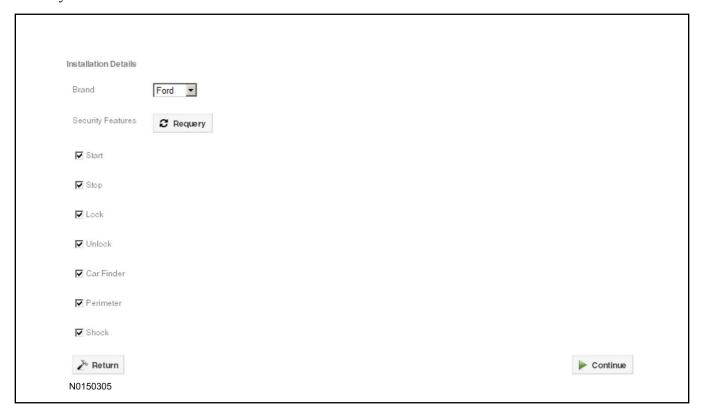

NOTE:

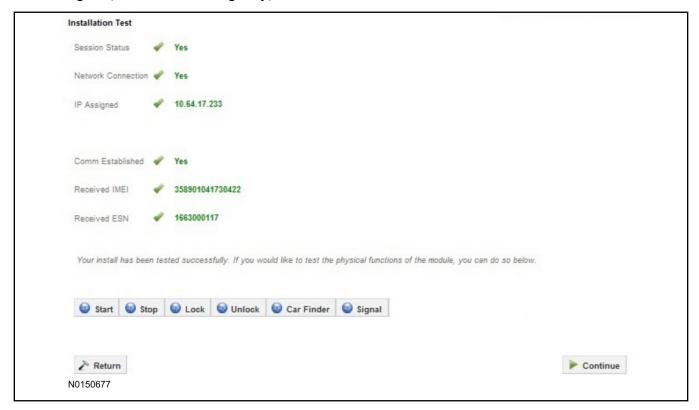

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 59. Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

- 60. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account
- 61. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

Security Indicator LED Kit

QUANTITY	DESCRIPTION
1	Security Indicator LED

I. VSS System Installation

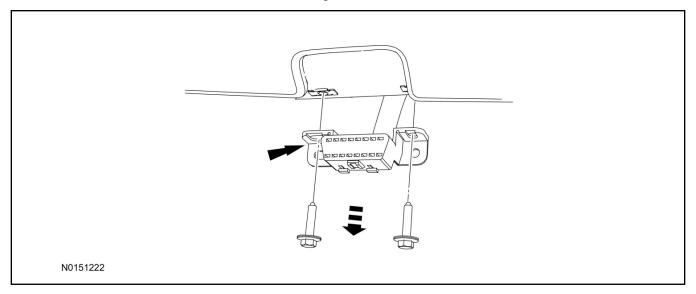

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

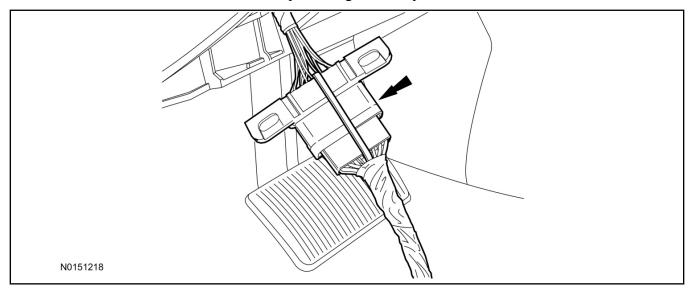

NOTE:

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

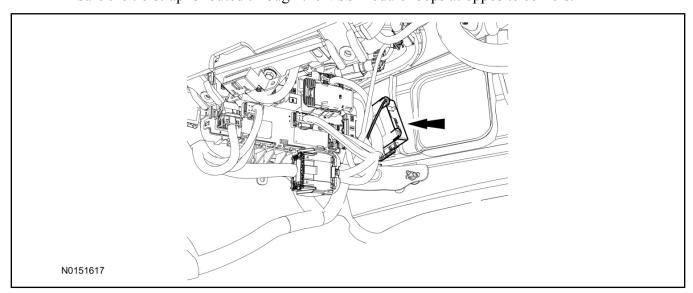

4. Remove the 2 bolts and remove the OBD II port from the IP frame.

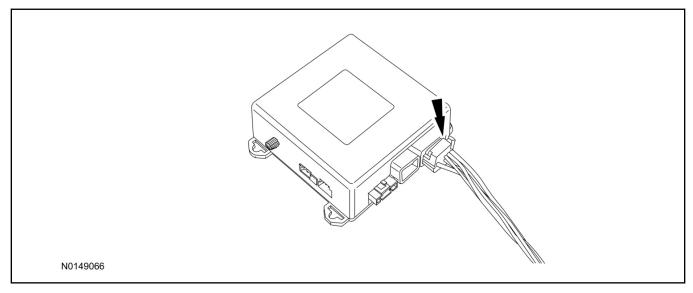

- 5. Connect the VSS T-harness to the OBD II port.
 - Secure the T-harness to the OBD II port using a tie-strap.

- 6. Position the VSS harness inside the IP being careful to avoid sharp edges and moving parts.
- 7. Install the new VSS harness OBD II port to the IP frame and install the bolts.
 - Do not over tighten.
- 8. Position the VSS module on top of the Body Control Module (BCM) and secure to wire harness with tie-straps.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 9. Connect the VSS harness to the VSS module.
 - Secure the VSS harness with tie-straps.

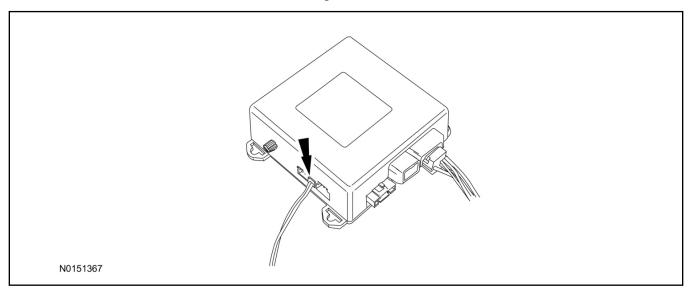

Optional Security Indicator LED Mounting

A CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 10. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 11. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 12. Route the LED wire harness to the VSS module.

- 13. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

Learn VSS to Vehicle (Push Button Start Vehicles Only)

14. Cycle door locks at trim switch four times to learn remote start keyless functions.

Learn VSS to Vehicle (Key Start Vehicles Only)

NOTE:

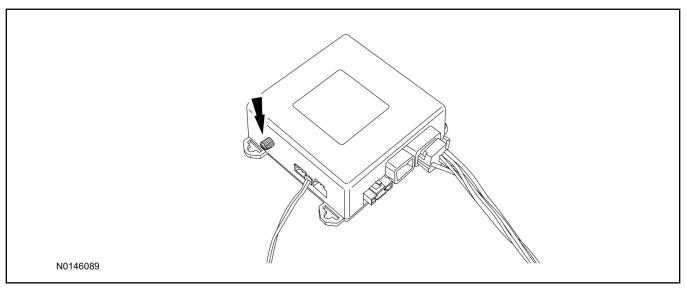

Make sure the brake pedal is not depressed during this sequence.

- 15. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 16. Put the key in the ignition.
- 17. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.
- 18. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.
- 19. If equipped with additional accessories (i.e. RF keypad), verify that they maintain all functionality post installation.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 20. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle
- 21. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 22. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 23. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 24. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

25. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.

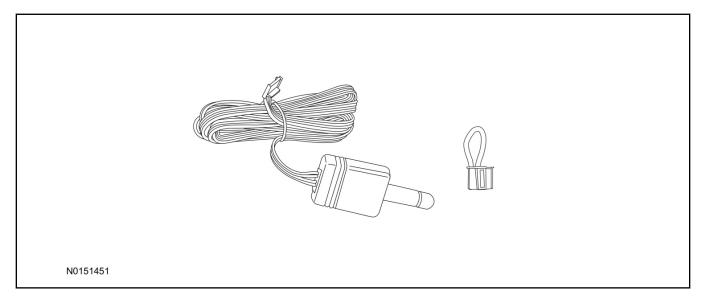

- 26. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 27. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 28. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 29. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

A CAUTION:

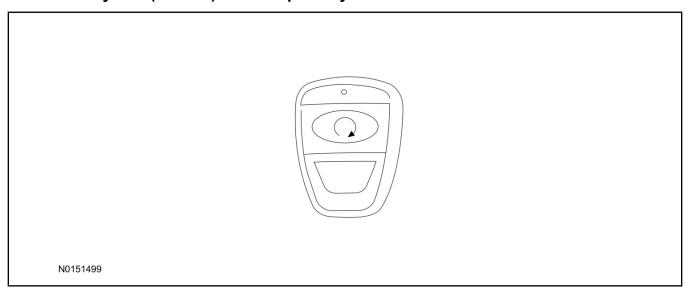

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

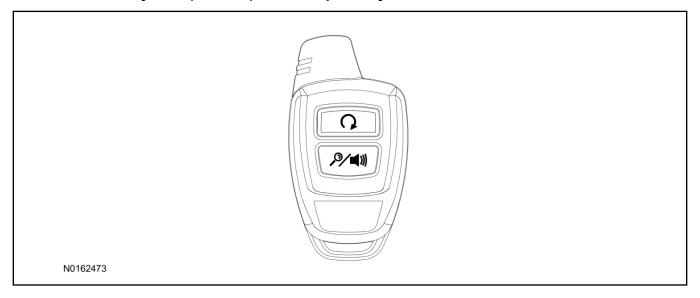

Verify that the vehicle has a hood switch Installed. If the vehicle is not equipped with a hood switch refer to "Hood Switch Kit - Sold Separately".

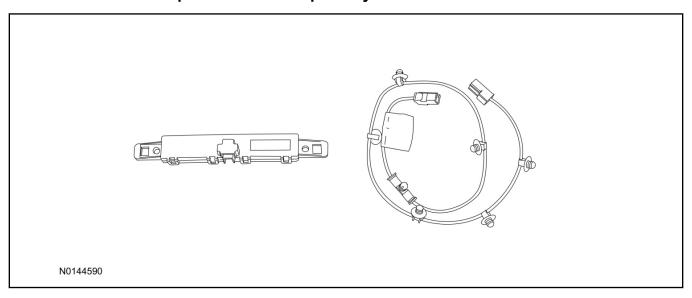

Standard Key Fob (15K601) "Sold Separately"

NOTE:

The TPM antenna Kit is only required if the vehicle is not equipped with Factory remote start.

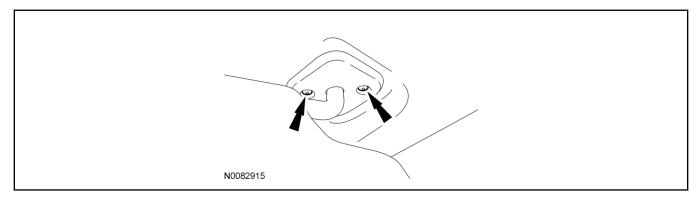

31. Review the TPM antenna kit contents.

TPM Antenna Kit

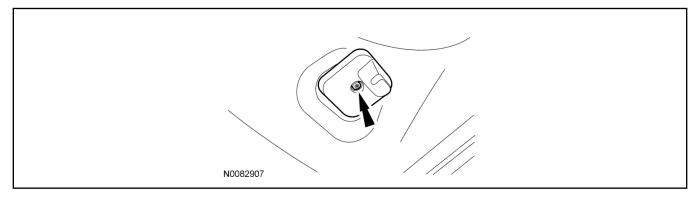

QUANTITY	DESCRIPTION
1	Antenna Module
1	Antenna Jumper Wire
1	2-sided Tape (not shown)

Trim Removal

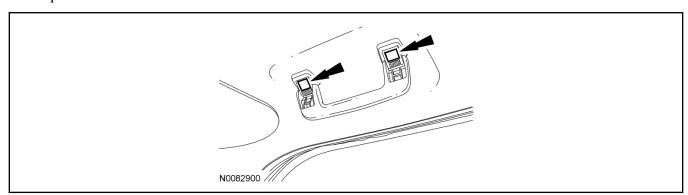

- 32. Remove the RH A-Pillar and RH B-pillar trim panels. For additional information, refer to Workshop Manual (WSM), Section 501-05.
- 33. If equipped, remove the DVD entertainment system. For additional information, refer to WSM, Section 415-00.
- 34. Remove the RH sun visor retainer screws and lower the RH sun visor.

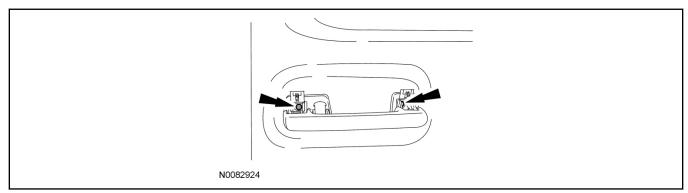

35. Remove the RH sun visor clip retainer screws and remove the sun visor clip.

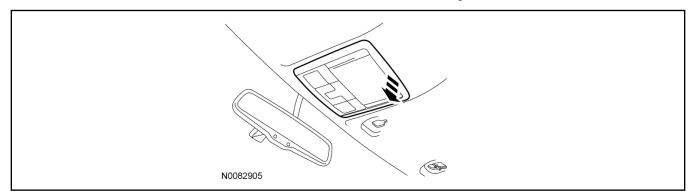

36. Open the RH front assist handle screw covers.

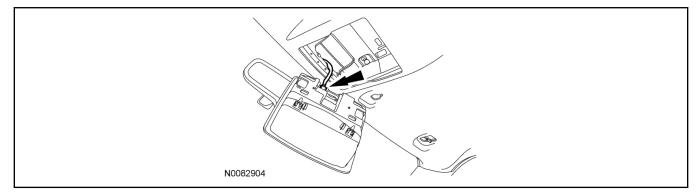

- 37. Remove the RH front assist handle screws and remove the front assist handle.
 - If equipped, disconnect the assist handle lamp electrical connector.

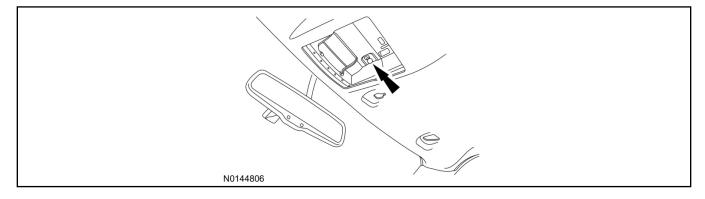

38. Pull downward on the overhead console to release the retainer clips.

39. Disconnect the overhead console electrical connector(s) and remove the overhead console.

40. Remove the headliner push pin retainer.

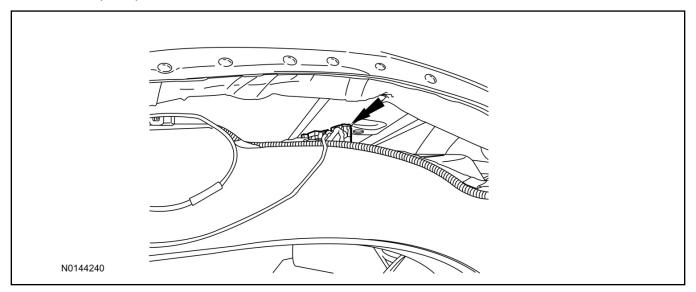

TPM Antenna Kit Installation

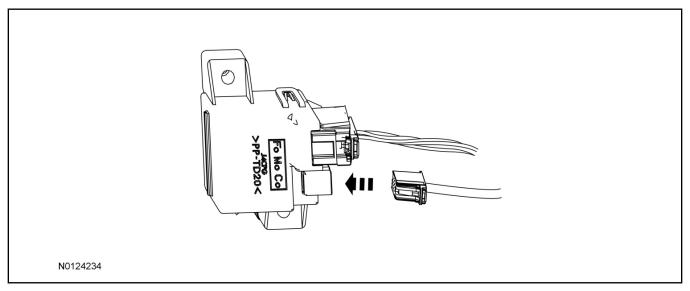

41. *NOTICE*:

Use caution not to over extend the headliner as creases and/or damage to the headliner may occur.

Position the RH front portion of the headliner downward slightly to access the Tire Pressure Monitor (TPM) module.

42. Connect the antenna jumper wire to the TPM module.

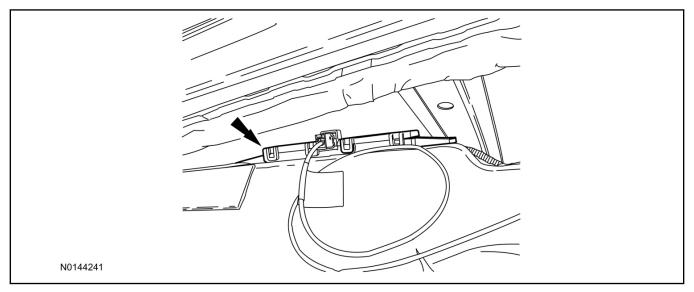

- 43. Connect the antenna jumper wire connector to the antenna module.
 - The push pins on the antenna jumper wire are not used for this application.

44. **NOTE:**

View is top of headliner.

Secure the antenna module to the headliner using a suitable adhesive.

• Alternatively 2-sided tape may be used to secure the antenna module to the headliner.

RMST Kit Antenna Installation

- 45. Remove the LH IP side trim panel.
- 46. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

47. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

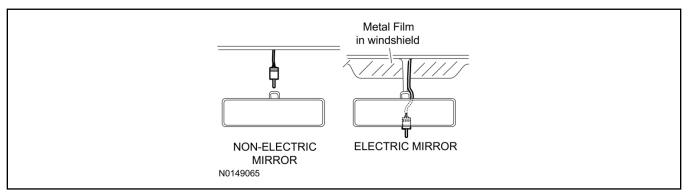

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

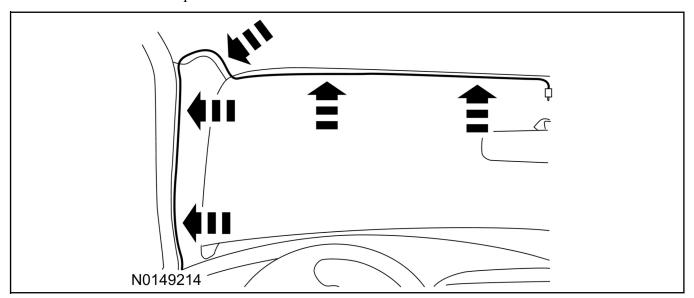

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

NOTE:

Do not route the antenna wire over the top of air bags.

- 48. Route the antenna cable along the headliner and down the LH A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

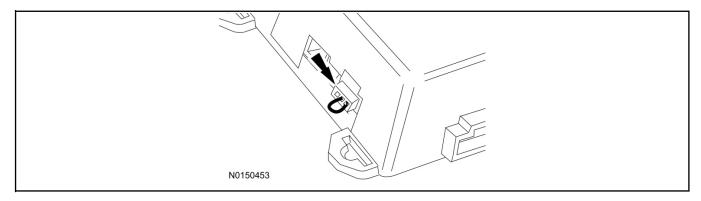

- 49. Connect the antenna connector to the VSS module.
- 50. If the RMST kit will not be upgraded to RMU functions at this time, install the LH IP side trim panel.

Trim Installation

- 51. Install the headliner push pin retainer.
- 52. Connect the overhead console electrical connector(s) and install the overhead console.
- 53. Install the RH front assist handle and screws.
 - If equipped, connect the assist handle lamp electrical connector.
- 54. Close the assist handle screw covers.
- 55. Install the sun visor clips and the sun visor clip retainer screws.
- 56. Position the RH sun visor and install the retainer screws.
- 57. Install the RH A-Pillar and RH B-pillar trim panels. For additional information, refer to WSM, Section 501-05.
- 58. If equipped, install the DVD entertainment system. For additional information, refer to WSM, Section 415-00.

VSS Module - Optional Vehicle Security Features

- 59. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

RMST Activation - Key Start Only

NOTE:

For vehicles equipped with push button start, proceed to Step 72 within the "Programming Key Fobs" section of this manual.

- 60. Verify that the IDS is updated to the most current version.
- 61. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 62. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - · Select Body.
 - Select Security.
 - Select Remote Start.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.
 - Select Yes. This will enable the remote start function on the vehicle.
- 63. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - · Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 64. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Learn Remote Start to Vehicle (Push Button Start Vehicles Only)

65. Cycle door locks at trim switch four times to learn remote start keyless functions.

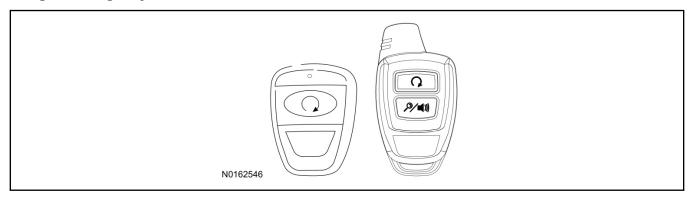

Learn Remote Start to Vehicle (Key Start Vehicles Only)

NOTE:

Make sure the brake pedal is not depressed during this sequence.

- 66. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 67. Put the key in the ignition.
- 68. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.
- 69. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.
- 70. If equipped with additional accessories (i.e. RF keypad), verify that they maintain all functionality post installation.

Programming Key Fobs

71. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.

- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

72. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times, ending in ignition on, engine off.
- 6 Release the brake pedal.
- 7 Press the vehicle start/stop button twice to turn ignition on.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 8 Press the start stop button on each fob you wish to program.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

73. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.

- 74. Close the hood.
- 75. Close all of the vehicle doors.
- 76. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 77. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 78. Open the hood.

79. **NOTE:**

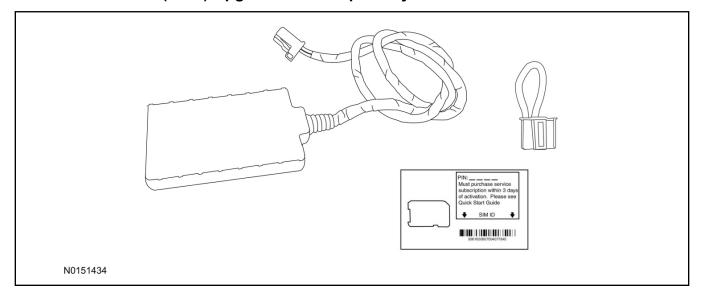

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

80. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

81. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper

ACAUTION:

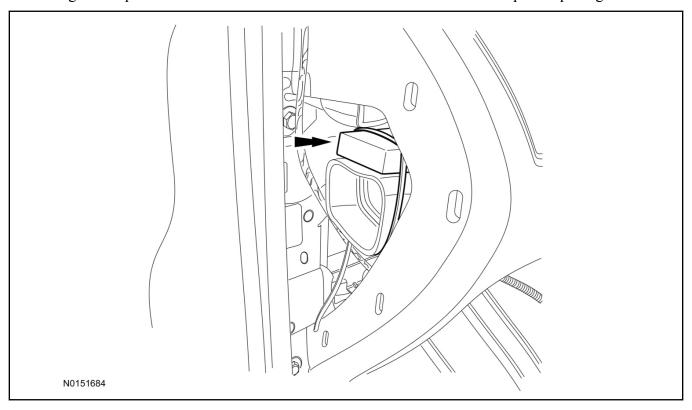

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

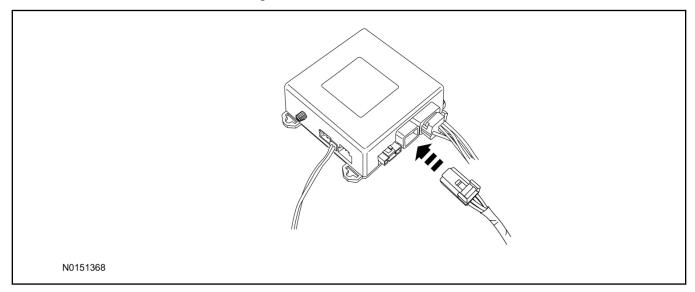

For proper range of operation, the RMU must be installed as shown in the diagram below.

82. If previously installed, remove the LH IP side trim panel.

83. Using tie-straps secure the RMU to the A/C duct near the LH IP side trim panel opening.

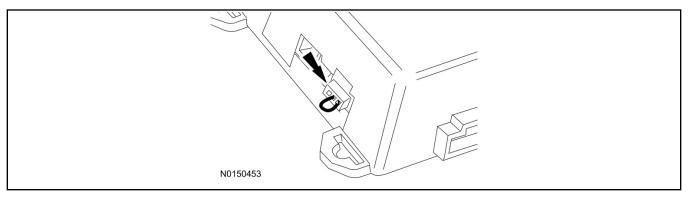

- 84. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

85. Install the LH IP side trim panel.

VSS Module - Optional Vehicle Security Features

- 86. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

Remote Start Activation - Key Start Vehicles (Without Factory Remote Start)

- 87. Verify that the IDS is updated to the most current version.
- 88. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 89. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - · Select Body.
 - · Select Security.
 - Select Remote Start.
 - Verify that the information on the IDS screen is correct and all procedures have been followed.
 - Select Yes. This will enable the remote start function on the vehicle.
- 90. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - · Select Remote Start.
 - · Select System.
 - Verify that the remote start system is checked.

- 91. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Learn Remote Start to Vehicle (Push Button Start Vehicles Only)

92. Cycle door locks at trim switch four times to learn remote start keyless functions.

Learn Remote Start to Vehicle (Key Start Vehicles Only)

NOTE:

Make sure the brake pedal is not depressed during this sequence.

- 93. Press the vehicle's unlock button located on the driver's door. Make sure all doors are unlocked.
- 94. Put the key in the ignition.
- 95. Cycle eight times rapidly (within 10 seconds) between the 1 (OFF/LOCK) position and 3 (ON) position.
 - The eighth turn must end in the 3 (ON) position. The doors will lock, then unlock, to confirm that the programming mode has been activated.
- 96. Wait for 10 seconds and the remote start module will program itself to the system.
 - After 20 seconds, you will automatically exit the programming mode. The doors will lock, then unlock, to confirm that the programming mode has been exited.
- 97. If equipped with additional accessories (i.e. RF keypad), verify that they maintain all functionality post installation.

RMU Activation

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

- 98. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company

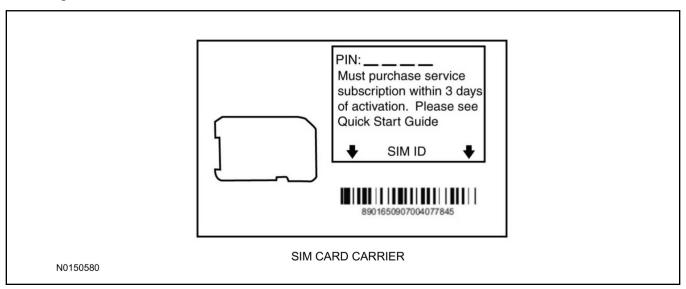

- 99. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

100.Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

101.Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

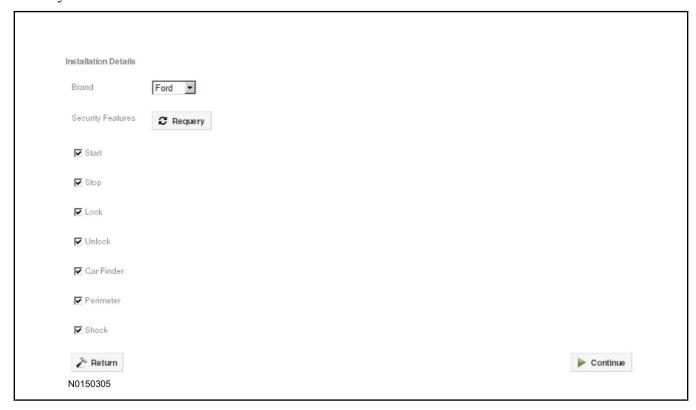

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 102.Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn Remote Start System to Vehicle" section in this manual.

All Vehicles

- 103.Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 104. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

I. VSS System Installation

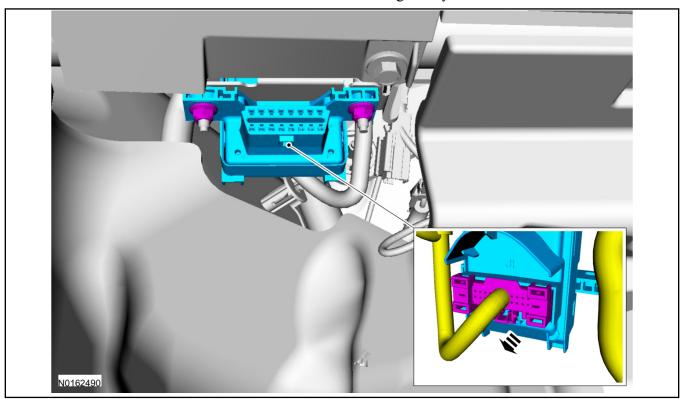

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

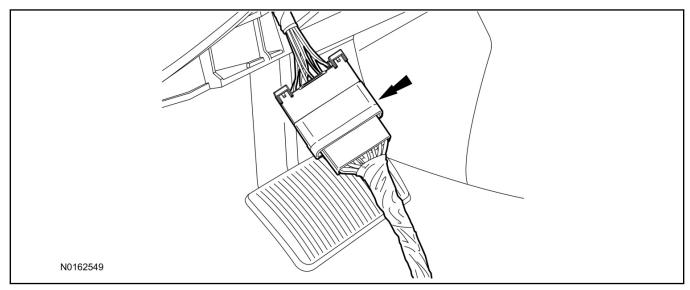

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

- 4. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 5. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.

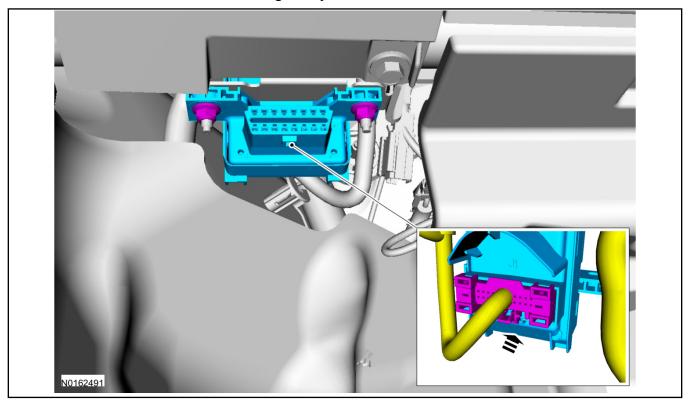

6. Disconnect the electrical connector from the back of the gateway module.

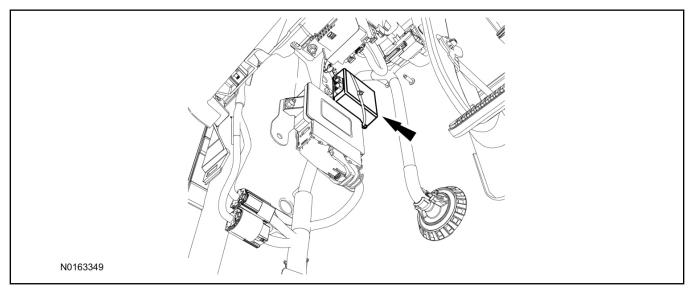

7. Connect the T-harness to the gateway module electrical connector.

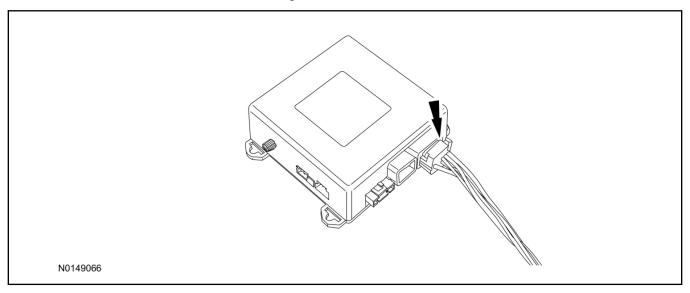

8. Connect T-harness to the back of the gateway module.

- 9. Position the T-harness inside the IP being careful to avoid sharp edges and moving parts.
 - Secure with zip-ties.
- 10. Using a tie-strap, secure the VSS module to the wire harness located above the electronic parking brake module in the upper left corner of the IP.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 11. Connect the T-harness to the VSS module.
 - Secure the VSS harness with tie-straps.

12. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

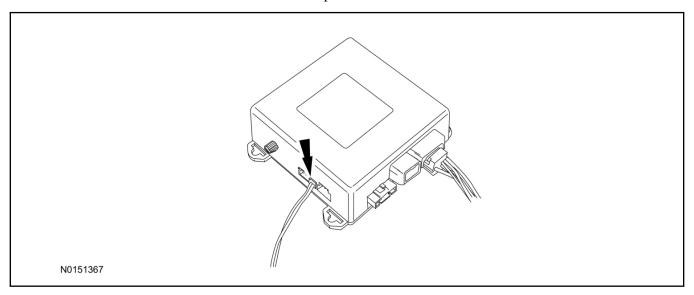

Optional Security Indicator LED Mounting

Carefully route and secure LED harness so that it does not interfere with moving parts or linkages.

- 13. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 14. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 15. Route the LED wire harness to the VSS module.

- 16. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

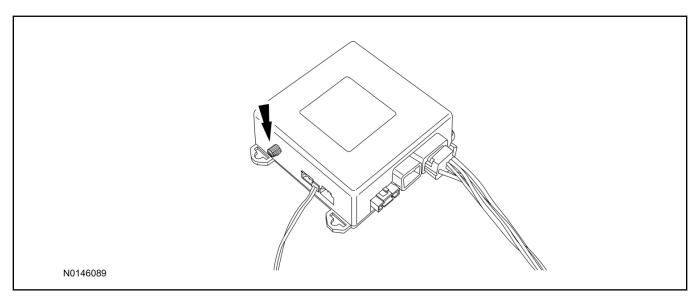

Learn VSS to Vehicle

- 17. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 18. Use IDS to clear continuous DTCs.
- 19. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 20. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 21. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 22. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 23. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 24. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

NOTE:

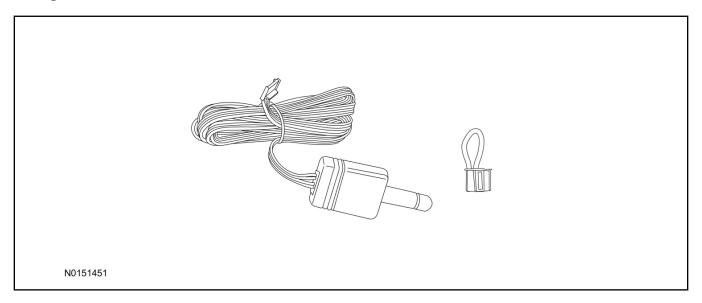

Cycle ignition OFF, ON, OFF before testing.

- 25. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 26. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.

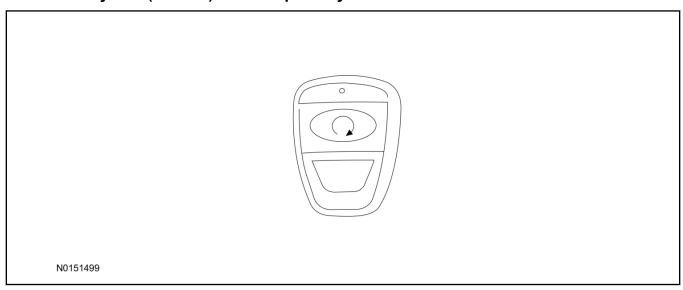

- For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 27. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 28. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 29. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

△ CAUTION:

Carefully route and secure antenna and harness so that they do not interfere with moving parts or linkages.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

30. Review the RMST Upgrade components.

Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

QUANTITY	DESCRIPTION

Bi-directional Key Fob (15K601) "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Key Fob (15K601)

RMST Kit Antenna Installation

- 31. Remove the LH IP side finish panel.
- 32. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

33. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

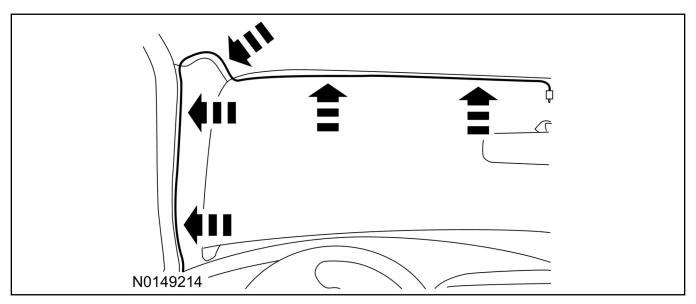

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

34. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

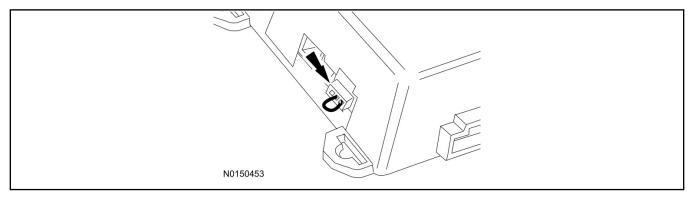

- 35. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

- 36. Connect the antenna connector to the VSS module.
- 37. Reposition the A-pillar trim panel back, if necessary.
- 38. Install the LH IP side finish panel.

VSS Module - Optional Vehicle Security Features

- 39. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

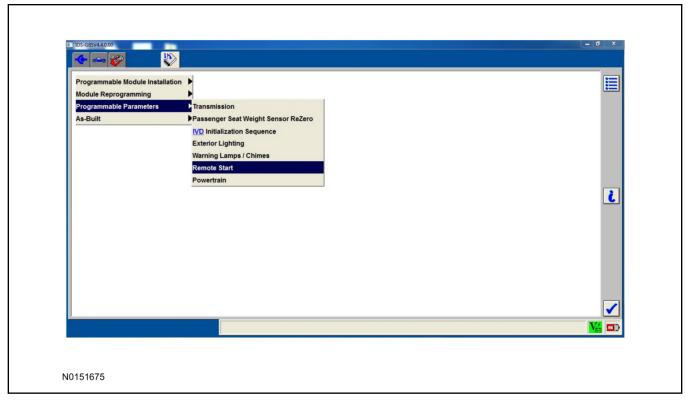

RMST Activation - Key Start Only

NOTE:

For vehicles equipped with push button start, proceed to "Push Button Start Vehicle" section within the "Programming Key Fobs" section of this manual.

- 40. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 41. Verify that the IDS is updated to the most current version.
- 42. Connect IDS.

- Follow the prompts to select new vehicle session.
- Enter VIN.
- 43. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

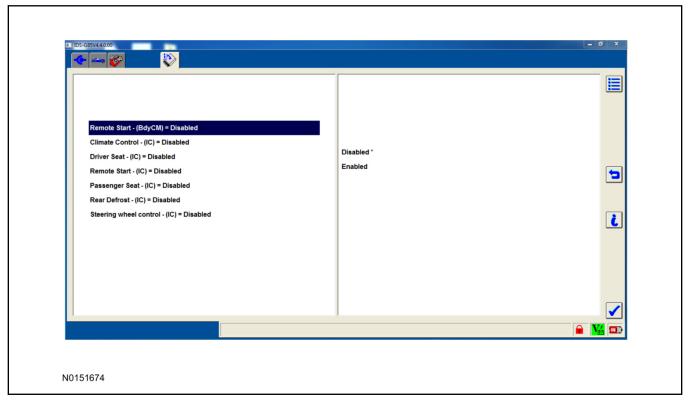

- 44. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM)
 - Climate Control (IC)
 - Remote Start (IC)
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC)
 - Passenger Seat (IC)
 - Rear Defrost (IC)

Steering Wheel Control - (IC)

NOTE:

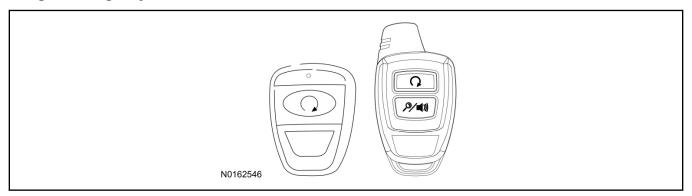

The Steering Wheel Control item refers to the heated steering wheel feature. The Driver Seat and Passenger Seat items refer to climate controlled seating.

• Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 45. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Advanced Settings.
 - · Select Vehicle.
 - Select Remote Start
 - Verify that the Remote Start system is checked.
- 46. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

Programming Key Fobs

47. Key Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

- 1 Start with doors unlocked
- 2 Driver's door open (remaining open throughout)
- 3 Verify that the gearshift lever is in the "PARK" position.
- 4 Depress and hold brake pedal.
- 5 Start with ignition key OFF.
- 6 Cycle ignition key to the ON then OFF position 5 times, then back to the ON position a 6th time.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the START button on each transmitter you wish to program. The horn will honk 1 time each time the START button is pressed to indicated the transmitter has been learned.
- 8 Cycle ignition key to the OFF position to exit transmitter learn mode.

9 NOTE:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

48. Push Button Start Vehicles:

NOTE:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Open door and press unlock.
- 2 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.

- 3 Depress and hold brake pedal.
- 4 Press the start/stop button.
- 5 After the vehicle starts, press the start/stop button to shut down.
- 6 Repeat steps 3 and 4 an additional five times, ending in ignition ON, engine ON.
- 7 Release the brake pedal, the horn should honk 3 times.
- 8 Press the start stop/button on each fob you wish to program. The horn should honk each time the button is pressed to indicate the transmitter has been programmed.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 49. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 50. Close the hood.
- 51. Close all of the vehicle doors.
- 52. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 53. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 54. Open the hood.
- 55. Confirm the engine shuts off.

56. **NOTE:**

Vehicle doors should be closed while performing this step.

Attempt to remote start with the hood open. Confirm that the vehicle will not start with the hood open.

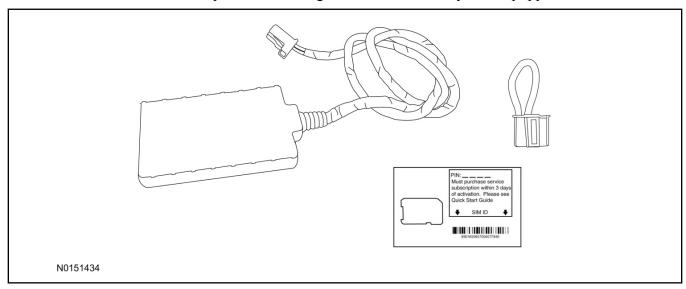

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

57. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

NOTE:

VSS must be learned to vehicle prior to installing remote access on key start equipped vehicles.

58. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper
5	Tie Wraps (not shown)

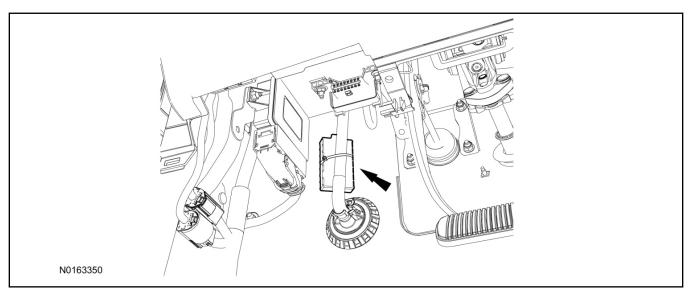

\triangle CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

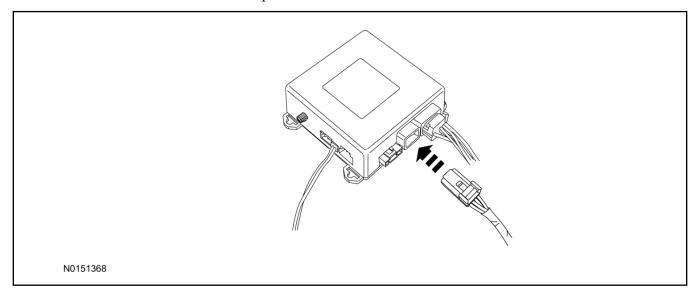

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

59. Using a tie-strap secure the RMU to the main bulkhead wire harness.

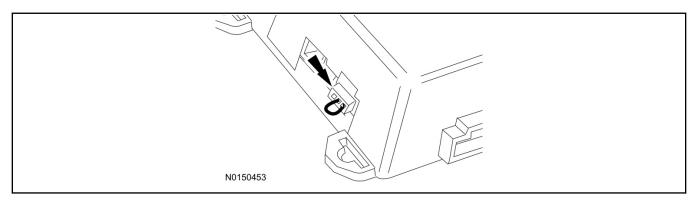

- 60. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

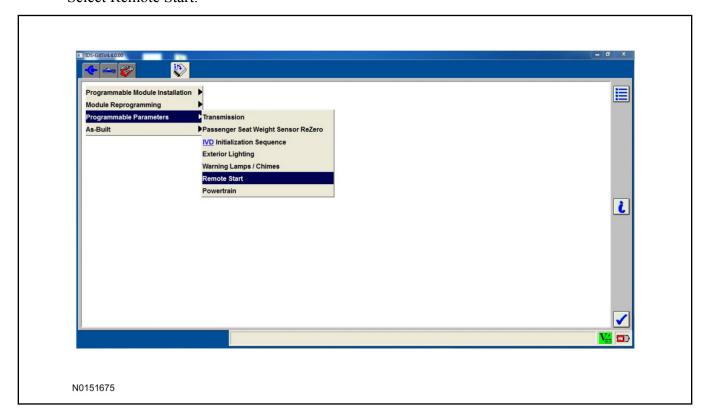

- 61. Enable/Disable Vehicle Security Features:

 Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

Remote Start Activation - Key Start Vehicles (Without Factory Remote Start)

- 62. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 63. Verify that the IDS is updated to the most current version.
- 64. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 65. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

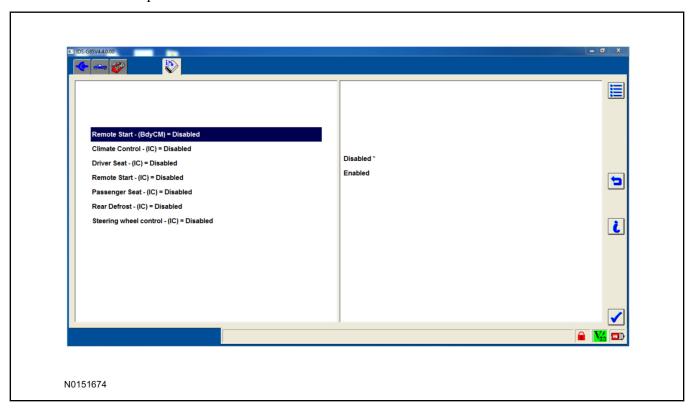

- 66. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM)
 - Climate Control (IC)
 - Remote Start (IC)
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC)
 - Passenger Seat (IC)
 - Rear Defrost (IC)
 - Steering Wheel Control (IC)

NOTE:

The Steering Wheel Control item refers to the heated steering wheel feature.

The Driver Seat and Passenger Seat items refer to climate controlled seating.

• Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

67. For vehicles equipped with standard message center, verify that the remote start option now appears.

- Using the Select and Arrow buttons on the steering wheel, select Settings.
- Select Advanced Settings.
- · Select Vehicle.
- Select Remote Start.
- Verify that the Remote Start system is checked.
- 68. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

RMU Activation

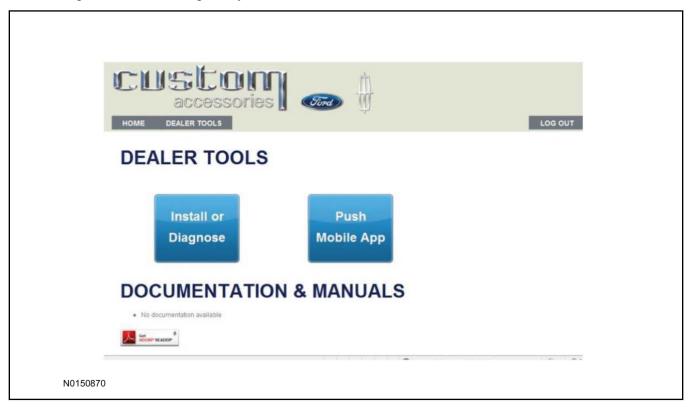

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

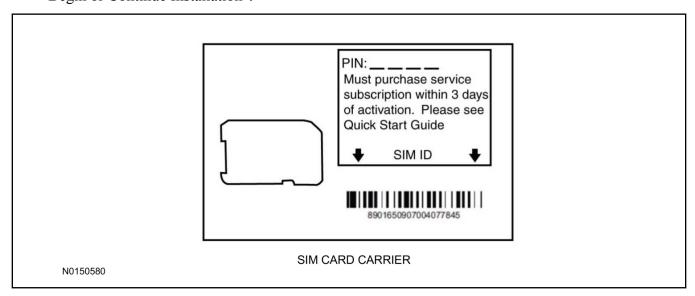

- 69. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 70. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

71. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

72. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

NOTE:

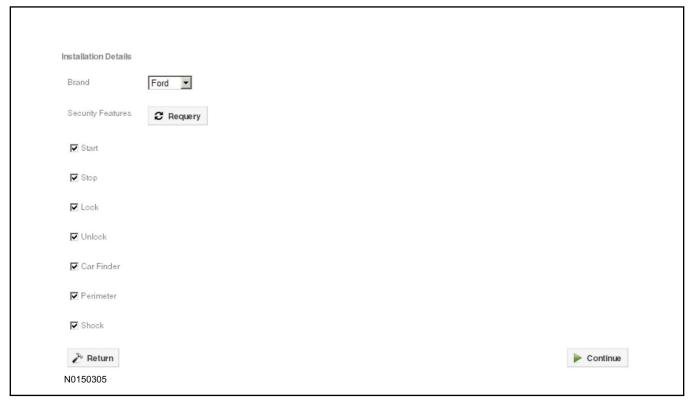

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

NOTE:

On screen Step 3 shown below.

73. **NOTE:**

On screen Step 4 shown below.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- · Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Key Start Vehicles Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

All Vehicles

- 74. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 75. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

I. VSS System Installation

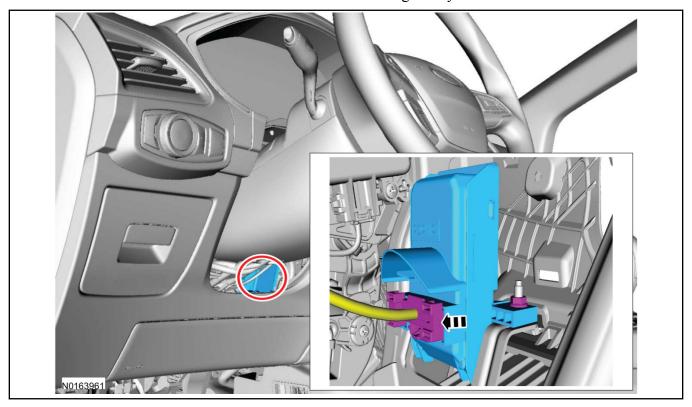

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

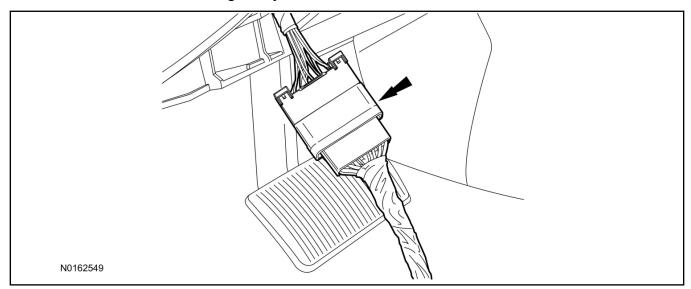

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

- 4. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 5. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
- 6. Disconnect the electrical connector from the back of the gateway module.

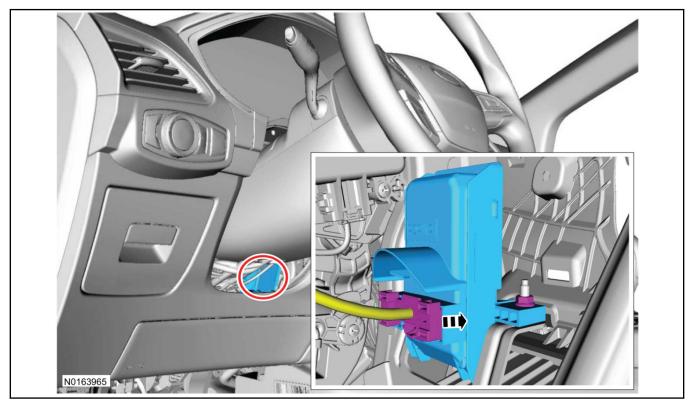

6. Disconnect the electrical connector from the back of the gateway module.

7. Connect the T-harness to the gateway module electrical connector.

8. Connect T-harness to the back of the gateway module.

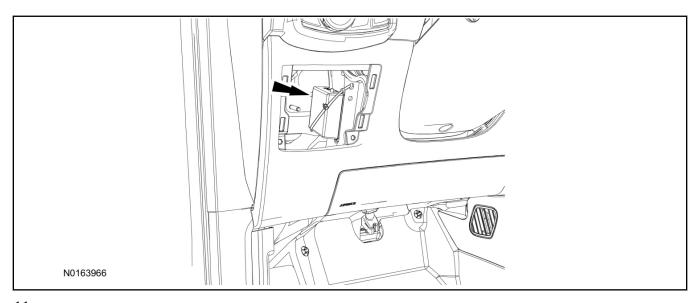

9. **≜**CAUTION:

When securing the T-harness, make sure it is not contacting any moving parts such as the accelerator pedal, brake pedal, or steering wheel intermediate shaft.

Position the T-harness inside the IP being careful to avoid sharp edges and moving parts.

- Secure with zip-ties.
- 10. Using tie-straps, secure the VSS module to the IP frame located to the left of the steering wheel intermediate shaft.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

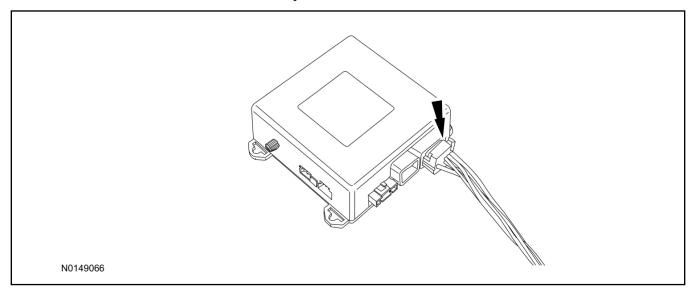

^{11.} **△ CAUTION:**

When routing the T-harness to the VSS module, make sure it is not contacting any moving parts such as the accelerator pedal, brake pedal, or steering wheel intermediate shaft.

Connect the T-harness to the VSS module.

• Secure the VSS harness with tie-straps.

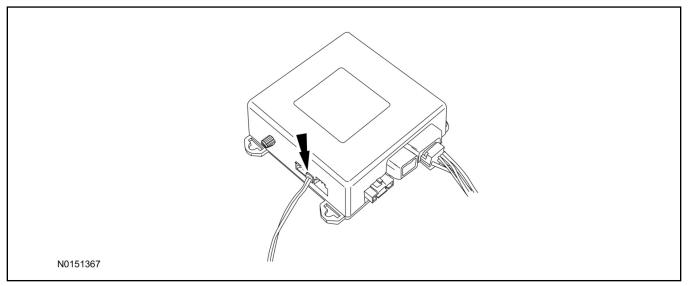

12. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

Optional Security Indicator LED Mounting

A CAUTION:

Carefully route and secure LED harness so that it does not interfere with moving parts or linkages.

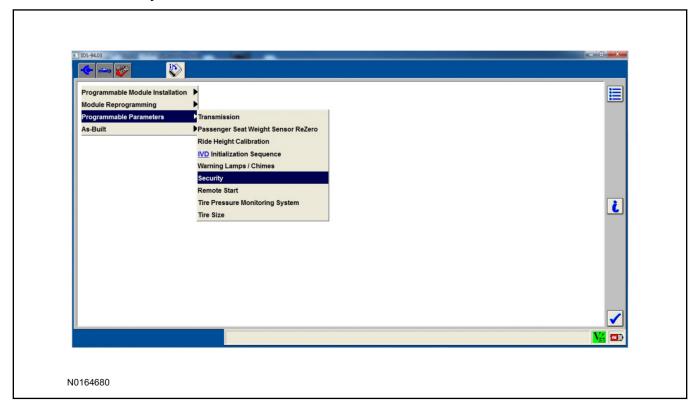

- 13. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 14. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 15. Route the LED wire harness to the VSS module.
- 16. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

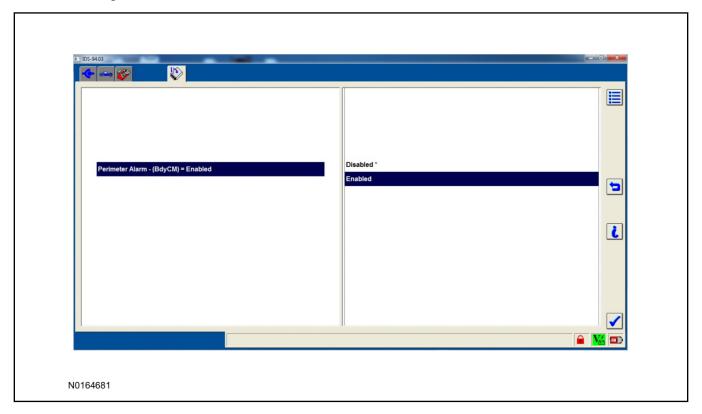

Perimeter Alarm Activation - Vehicles Without Factory Installed Perimeter Alarm

- 17. Verify that the IDS is updated to the most current version.
- 18. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

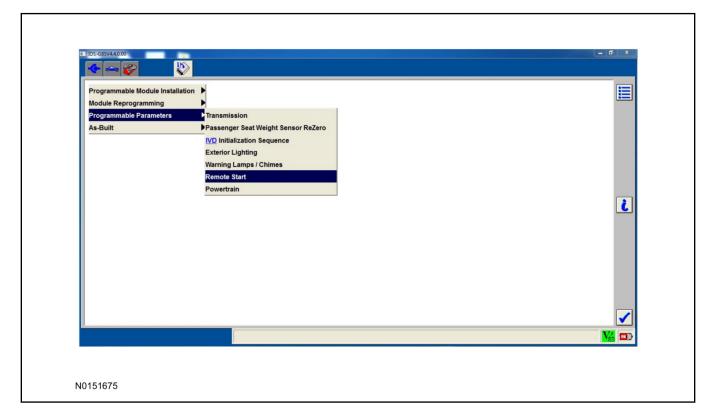

- 19. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Security.

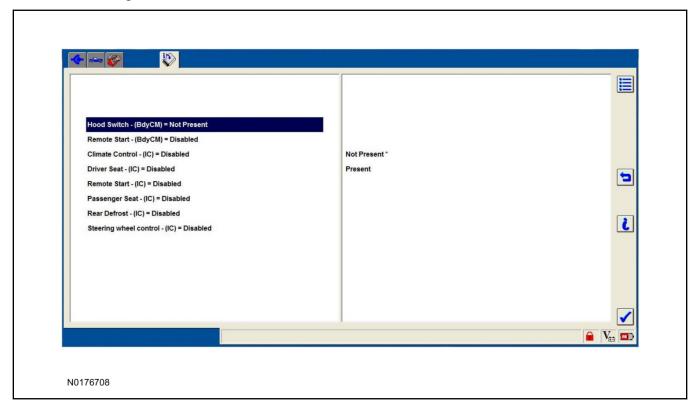

- 20. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Enabled" text to the right of "Perimeter Alarm (BdyCM)".
 - Once "Enabled" has been selected, select the Tick button to direct IDS to enable the perimeter alarm option on the vehicle.

- 21. Activate the hood switch monitor using IDS (NEW for 2017MY).
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

- 22. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Present" text to the right of "Hood Switch (BdyCM)".
 - Once "Present" has been selected, select the Tick button to direct IDS to enable hood switch monitoring on the vehicle.

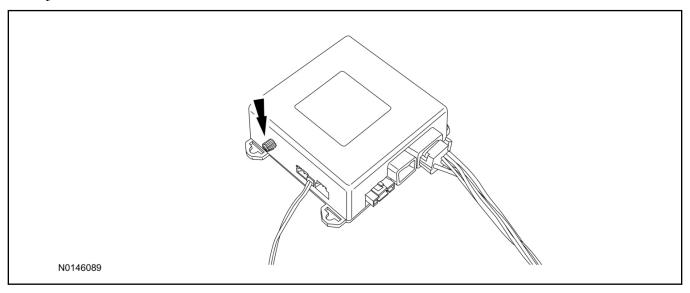

Learn VSS to Vehicle

- 23. Cycle ignition OFF, ON, OFF one time to learn VSS to the vehicle.
- 24. Use IDS to clear continuous DTCs.
- 25. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 26. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 27. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 28. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 29. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 30. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

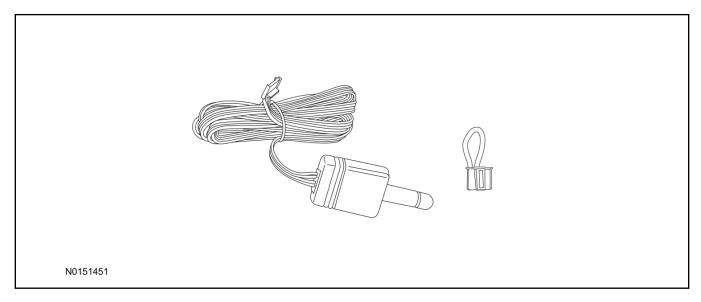

NOTE:

Cycle ignition OFF, ON, OFF before testing.

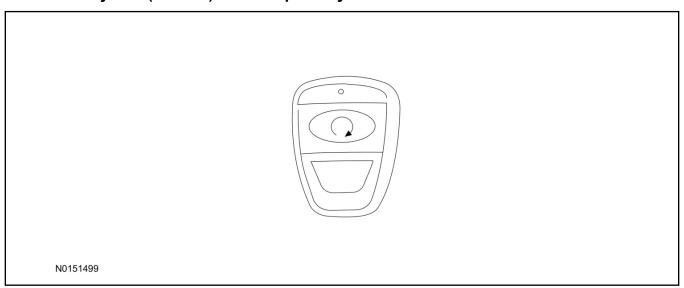

- 31. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 32. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 33. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 34. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 35. Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
- II. Remote Start (RMST) Upgrade Antenna Kit "Sold Separately"

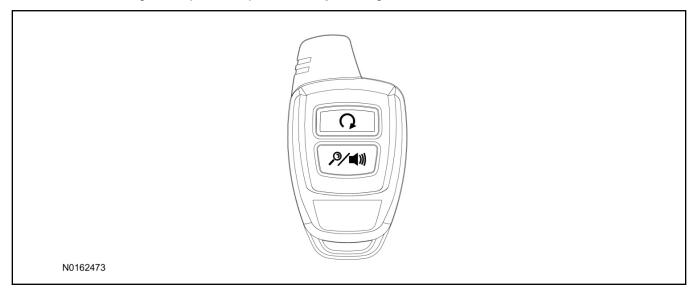

Carefully route and secure antenna and harness so that they do not interfere with moving parts or linkages.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

36. Review the RMST Upgrade components.

Bi-directional Key Fob (15K601) "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Key Fob (15K601)

RMST Kit Antenna Installation

- 37. Remove the LH IP side finish panel.
- 38. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

39. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

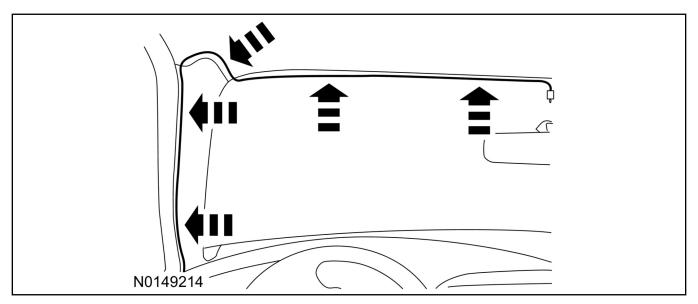

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

40. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

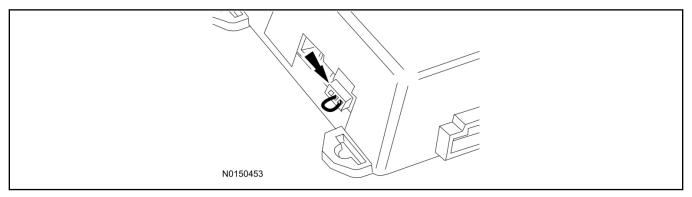

- 41. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

- 42. Connect the antenna connector to the VSS module.
- 43. Reposition the A-pillar trim panel back, if necessary.
- 44. Install the LH IP side finish panel.

VSS Module - Optional Vehicle Security Features

- 45. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

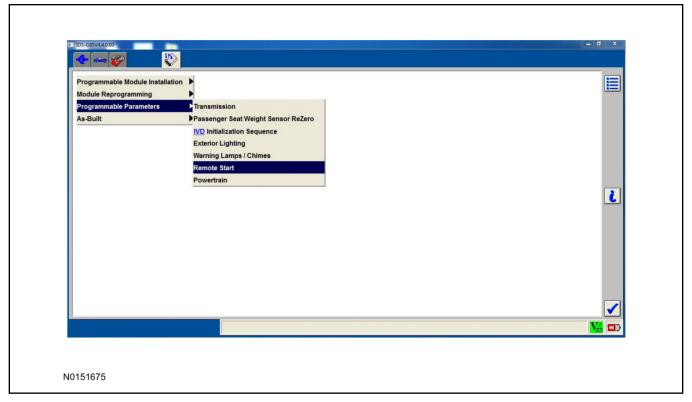

RMST Activation - Vehicles Without Factory Remote Start Only

NOTE:

For vehicles equipped with factory remote start, proceed to the "Programming Key Fobs" section of this manual.

- 46. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 47. Verify that the IDS is updated to the most current version.
- 48. Connect IDS.

- Follow the prompts to select new vehicle session.
- Enter VIN.
- 49. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - Select Remote Start.

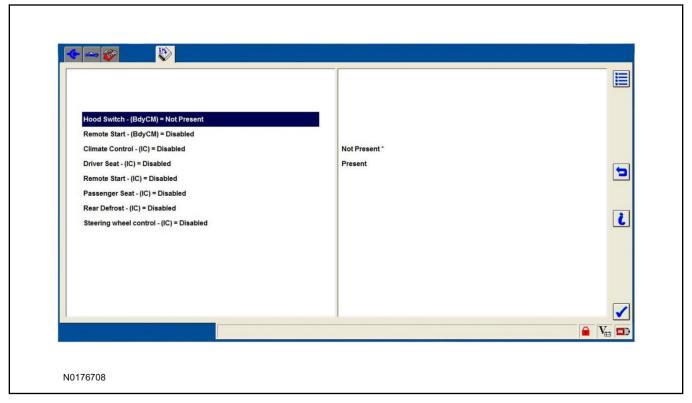

- 50. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM)
 - Climate Control (IC)
 - Remote Start -(IC)
 - Hood Switch (BdyCM) set to "PRESENT" (new for 2017MY)
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC)
 - Passenger Seat (IC)

- Rear Defrost (IC)
- Steering Wheel Control (IC)

NOTE:

The Steering Wheel Control item refers to the heated steering wheel feature. The Driver Seat and Passenger Seat items refer to climate controlled seating.

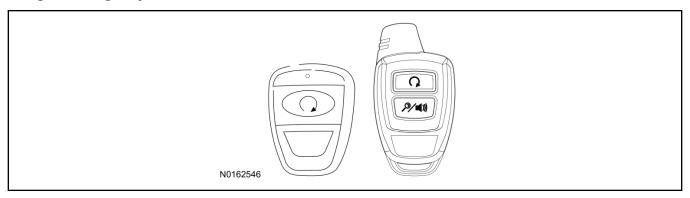

• Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 51. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience
 - Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 52. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.

• Verify that the remote start system is enabled.

Programming Key Fobs

53. **NOTE:**

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Open door and press unlock.
- 2 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 3 Depress and hold brake pedal.
- 4 Press the start/stop button.
- 5 After the vehicle starts, press the start/stop button to shut down.
- 6 Repeat steps 3 and 4 an additional five times, ending in ignition ON, engine ON.
- 7 Release the brake pedal, the horn should honk 3 times.
- 8 Press the start stop/button on each fob you wish to program. The horn should honk each time the button is pressed to indicate the transmitter has been programmed.
- 9 Cycle ignition to the OFF position to exit transmitter learn mode.

10 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 54. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 55. Close the hood.

- 56. Close all of the vehicle doors.
- 57. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 58. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 59. Open the hood.
- 60. Confirm the engine shuts off.
- 61. Check the instrument cluster after remote start has completed. If the "To Drive: Press Brake and Start Button" message continues to be displayed after an ignition cycle, check for Special Service Messages (SSM's) for the vehicle to resolve the issue.

62. **NOTE:**

Vehicle doors should be closed while performing this step.

Attempt to remote start with the hood open. Confirm that the vehicle will not start with the hood open.

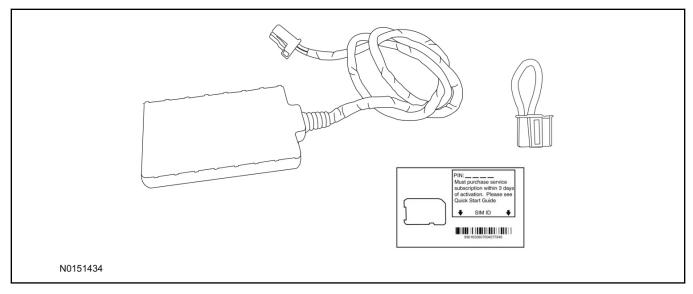

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

63. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

NOTE:

VSS must be learned to vehicle prior to installing remote access on key start equipped vehicles.

64. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier
1	Security Jumper

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"(Continued)

5 Tie Wraps (not shown)

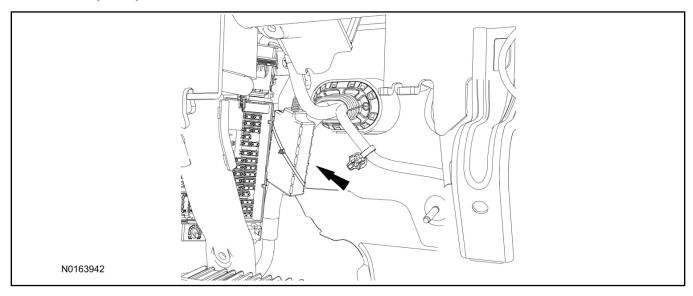

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

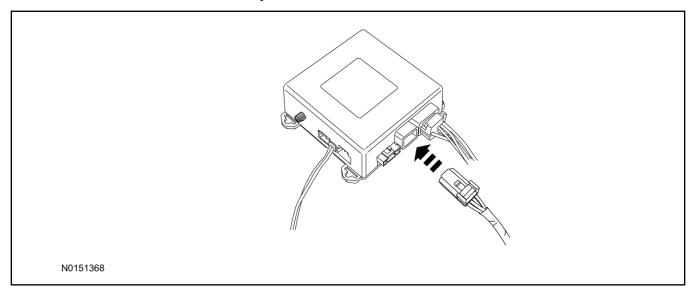

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

65. Using a tie-strap, secure the RMU to the bulkhead wire harness located behind the Body Control Module (BCM).

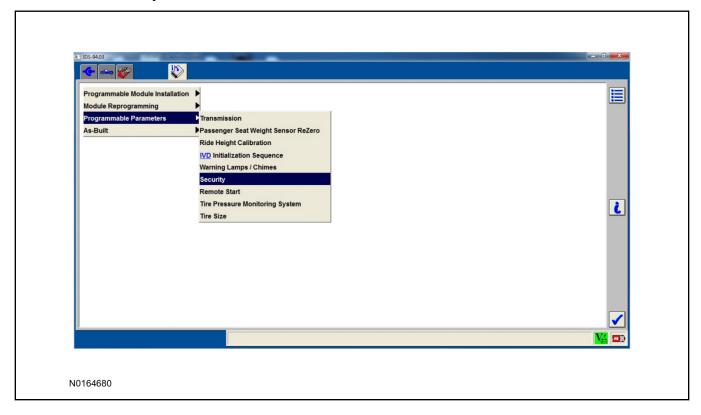

- 66. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

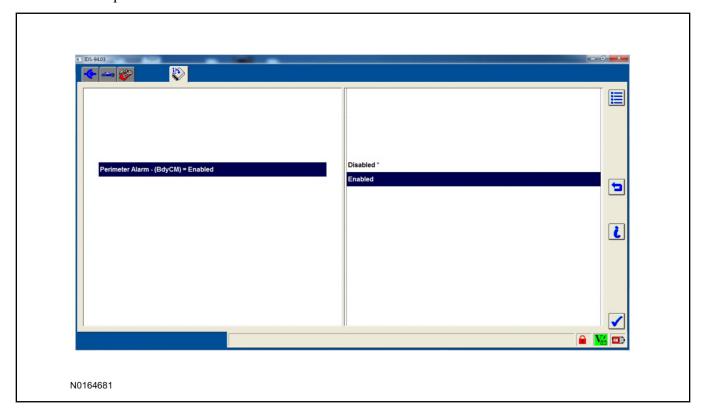

Perimeter Alarm Activation - Vehicles Without Factory Installed Perimeter Alarm

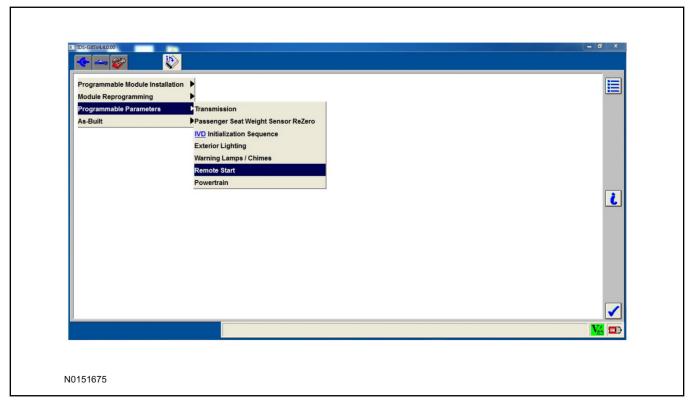

- 67. Verify that the IDS is updated to the most current version.
- 68. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.
- 69. Activate the perimeter alarm using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - · Select Security.

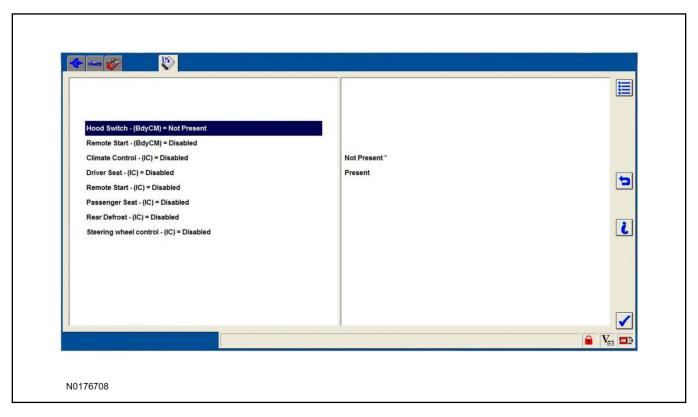

- 70. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Enabled" text to the right of "Perimeter Alarm (BdyCM)".
 - Once "Enabled" has been selected, select the Tick button to direct IDS to enable the perimeter alarm option on the vehicle.

- 71. Activate the hood switch monitor using IDS (NEW for 2017MY).
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - · Select Remote Start.

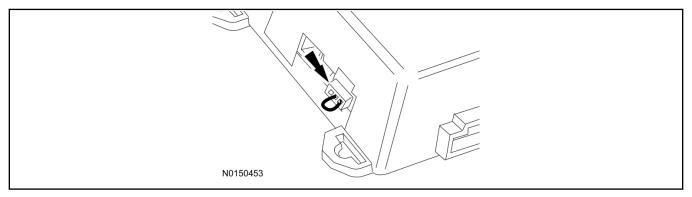

- 72. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, select the "Present" text to the right of "Hood Switch (BdyCM)".
 - Once "Present" has been selected, select the Tick button to direct IDS to enable hood switch monitoring on the vehicle.

VSS Module - Optional Vehicle Security Features

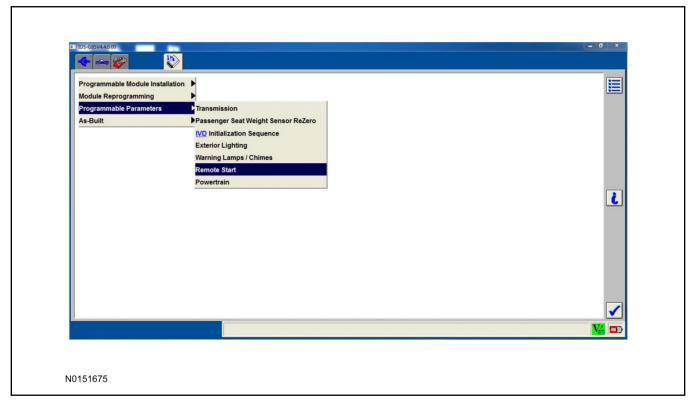

- 73. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

Remote Start Activation - Vehicles Without Factory Remote Start Only

- 74. Cycle ignition OFF, ON, OFF one time to learn RMST to the vehicle.
- 75. Verify that the IDS is updated to the most current version.
- 76. Connect IDS.
 - Follow the prompts to select new vehicle session.
 - Enter VIN.

- 77. Activate the remote start using the IDS.
 - Select the Tool Box icon.
 - Select Module Programming.
 - Select Programmable Parameters.
 - · Select Remote Start.

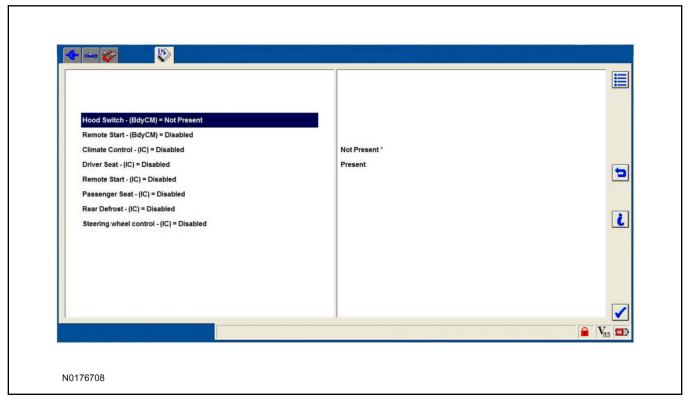

- 78. Verify that the instructions on the IDS screen have been completed and continue until you reach the screen below.
 - From this screen, you must select the feature and then select the "Enabled" text (to the right) for these items:
 - Remote Start (BdyCM)
 - Climate Control (IC)
 - Remote Start -(IC)
 - Hood Switch (BdyCM) set to "PRESENT" (new for 2017MY)
 - Select the feature and then select the "Enabled" text (to the right) for these items if the vehicle includes the optional feature:
 - Driver Seat (IC)
 - Passenger Seat (IC)
 - Rear Defrost (IC)

Steering Wheel Control - (IC)

NOTE:

The Steering Wheel Control item refers to the heated steering wheel feature. The Driver Seat and Passenger Seat items refer to climate controlled seating.

• Once all appropriate items have been enabled, select the Tick button to direct IDS to enable the remote start option on the vehicle.

- 79. For vehicles equipped with standard message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Convenience.
 - · Select Remote Start.
 - Select System.
 - Verify that the remote start system is checked.
- 80. For vehicles equipped with advanced message center, verify that the remote start option now appears.
 - Using the Select and Arrow buttons on the steering wheel, select Settings.
 - Select Vehicle Settings.
 - · Select Vehicle.
 - Select Remote Start System.
 - Verify that the remote start system is enabled.

RMU Activation

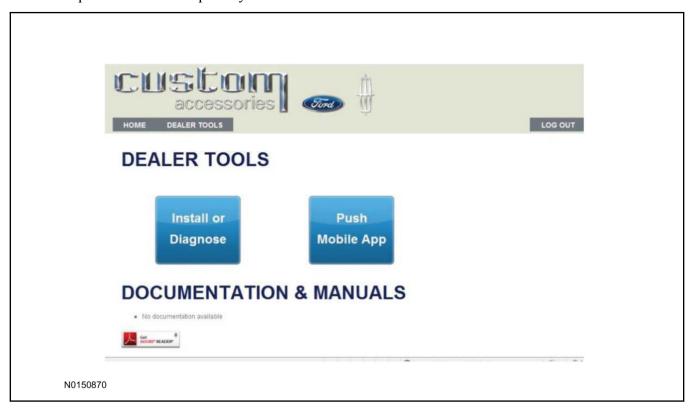

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

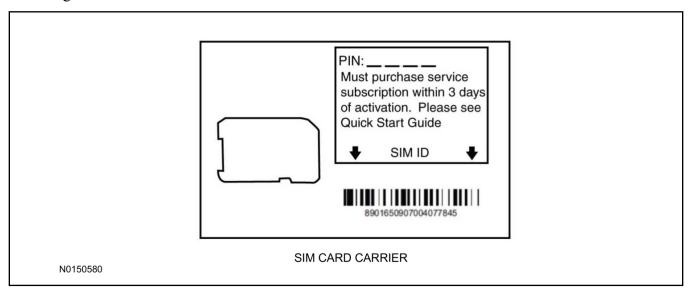

- 81. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 82. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

83. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

84. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

NOTE:

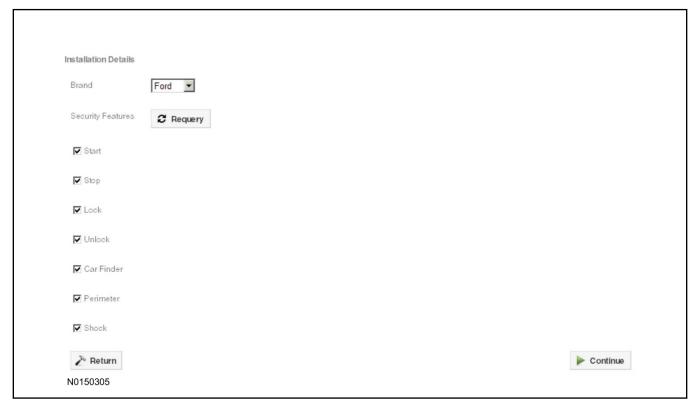

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

NOTE:

On screen Step 3 shown below.

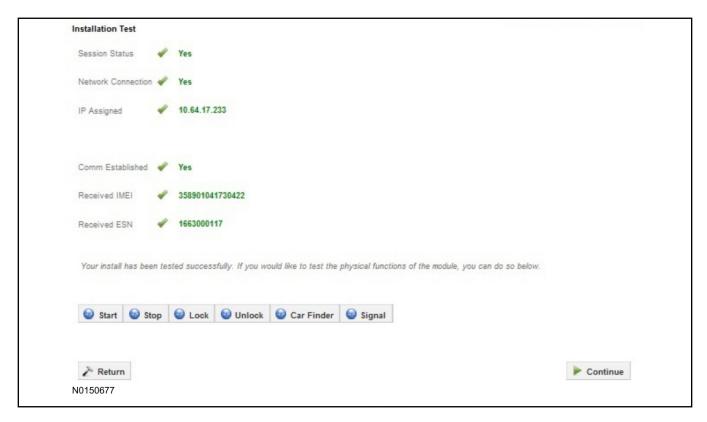

85. **NOTE:**

On screen Step 4 shown below.

Perform a functional check of the system by testing each of the available features.

- Start/Stop function
- Lock/Unlock function
- Car finder
- Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

Vehicles Without Factory Remote Start Only

NOTE:

In the event start or stop fail, refer to the "Remote Start Activation" section in this manual.

NOTE:

In the event lock/unlock or car find fail, refer to the "Learn VSS to Vehicle" section in this manual.

86. Check the instrument cluster after remote start has completed. If the "To Drive: Press Brake and Start Button" message continues to be displayed after an ignition cycle, check for Special Service Messages (SSM's) for the vehicle to resolve the issue.

All Vehicles

- 87. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account.
- 88. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

I. VSS System Installation

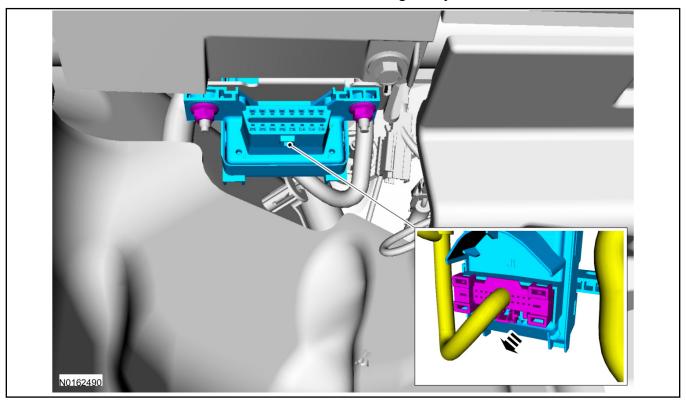

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

NOTE:

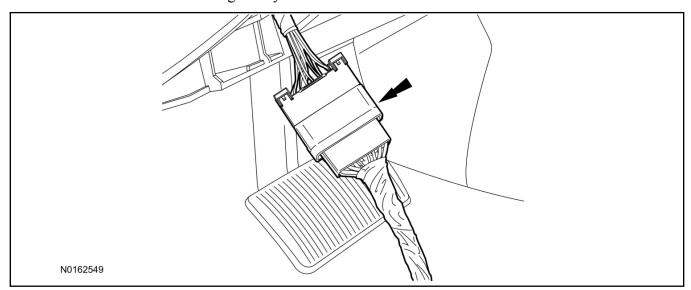

If the VSS kit was installed previously and the vehicle is being upgraded, proceed to the "RMST" or "RMU" upgrade section(s).

- 4. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, diagnose the concern.
- 5. Disconnect the vehicle battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
- 6. Remove the LH lower Instrument Panel (IP) insulator.

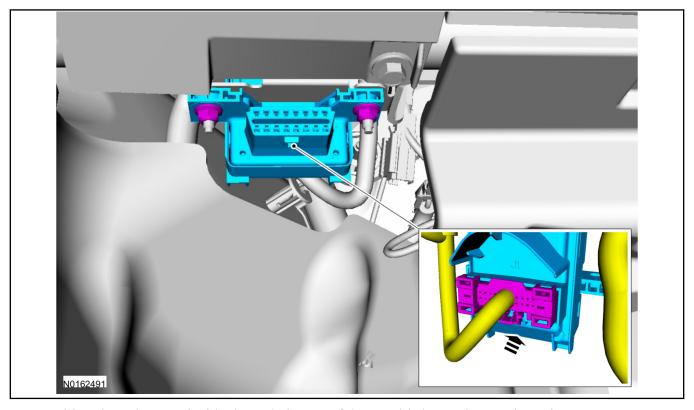

7. Disconnect the electrical connector from the back of the gateway module.

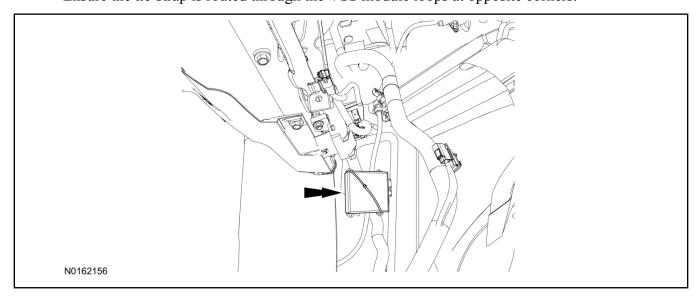

8. Connect the T-harness to the gateway module electrical connector.

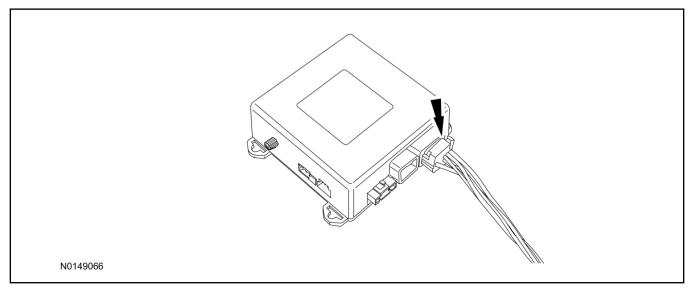

9. Connect T-harness to the back of the gateway module.

- 10. Position the T-harness inside the IP being careful to avoid sharp edges and moving parts.
 - Secure with zip-ties.
- 11. Position the VSS module on the driver side of the vehicle and secure it to the hood release cable and adjacent wire harness.
 - Ensure the VSS module is positioned so the shock sensor adjustment knob can be accessed for later use.
 - Ensure the tie-strap is routed through the VSS module loops at opposite corners.

- 12. Connect the T-harness to the VSS module.
 - Secure the VSS harness with tie-straps.

13. Connect the vehicle battery negative terminal. For additional information, refer to WSM Section 414-01.

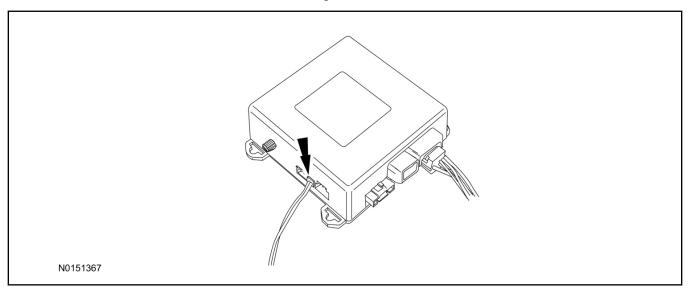

Optional Security Indicator LED Mounting

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

- 14. Keep the following points in mind when routing or positioning the LED for mounting:
 - Have at least 3/4" clearance behind trim panels for the wiring harness to be routed.
 - The LED should be clearly visible from the driver's side window when mounted.
 - Do not mount the LED on trim panels that cover air bags.
- 15. Mount the LED at an appropriate location on the upper steering column shroud, using the guidelines listed above.
 - Drill a 9/32" hole into the selected location, for the LED to mount in.
- 16. Route the LED wire harness to the VSS module.

- 17. Connect the LED wire harness to the VSS module 2-pin white connector.
 - Secure the LED wire harness with tie-straps.

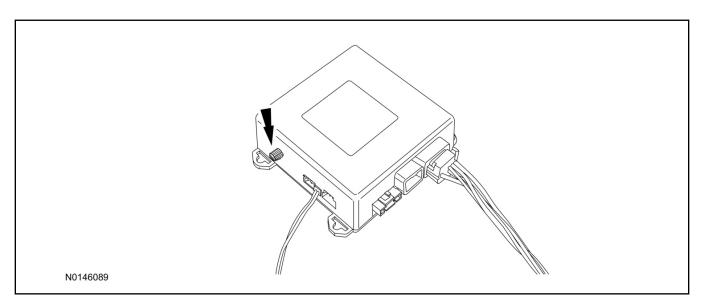

- 18. If the vehicle is equipped with factory remote start, test its operation by pressing the Lock button one time and the Remote Start button two times.
 - If the vehicle remote starts, stop the engine by pressing the Remote Start button one time.
 - If the vehicle does not remote start, disconnect the vehicle battery negative terminal, wait five minutes and then reconnect the battery negative terminal. For additional information, refer to Workshop Manual (WSM) Section 414-01.
 - Retest the factory remote start.
 - If the vehicle does not remote start, diagnose the concern.

Shock Sensor Sensitivity Adjustment

NOTE:

The VSS module is equipped with an internal dual zone Shock Sensor. The VSS system will activate a single horn honk/single light flash anytime a light to moderate impact is detected, and a "panic" type 30 second horn honk/light flash sequence when a heavy impact is detected while the VSS system is armed. Adjustment of both zones is accomplished through a single adjustment knob on the VSS module. Rotating the knob clockwise will increase sensitivity and rotating the knob counter-clockwise will decrease sensitivity. Sensitivity adjustment must be completed with the module securely mounted and the adjustment knob accessible.

- 19. Starting with the adjustment knob in approximately the halfway position, lower the driver's window and exit the vehicle.
- 20. Press the LOCK button on the vehicle's RKE fob to arm the VSS system. The LED will light solid for 20 seconds and then begin to flash a steady on/off sequence to indicate the system is armed.
- 21. Using a closed fist, impact the steering wheel with moderate force to simulate a light impact on the vehicle. If the impact is detected, the horn will honk and the lights will flash 1 time to indicate the warning impact was detected.
- 22. Using a closed fist, impact the steering wheel with heavy force to simulate a hard impact (i.e. glass breakage) on the vehicle. If the impact is detected, the horn will honk and the lights will flash a steady on off sequence to indicate the heavy or full shock trigger was detected.
- 23. Increase (rotate clockwise) or decrease (rotate counter-clockwise) the adjustment knob as necessary to achieve desired sensitivity, repeat the previous steps to test, and verify adjustment.

VSS Functional Test

NOTE:

If installed, observe the LED while performing these tests.

- 24. Lower the driver's door window, then close all doors, hood, and trunk/hatch and press lock on the keyfob. The LED should stay lit for 20 seconds while the VSS system pre-arms, after which it will flash every 3-4 seconds in fully armed mode.
- 25. Reach inside the window hit the door unlock trim switch. The LED should continue to flash, indicating that the vehicle is still armed. Use the inside driver's door handle to open the door. The alarm should sound, indicating perimeter breach. Turn the alarm off by turning the ignition to "On".
 - If equipped with OE perimeter security, there will be a 12 second interior chime prior to alarm sounding. For vehicles not equipped with OE perimeter security, there will be a 12 second delay with no interior chime prior to alarm sounding.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.

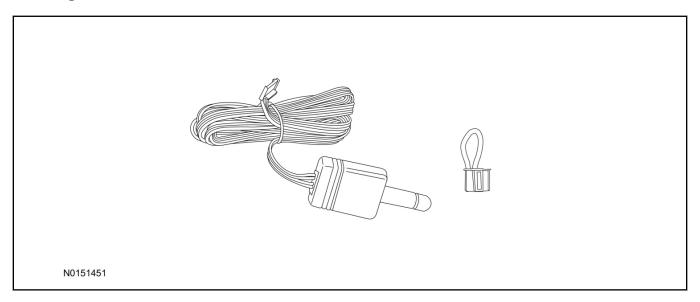

- 26. Exit the vehicle and arm it again, this time leaving the driver's door open. The vehicle should arm itself, ignoring the open door but monitoring the rest. Once the vehicle is armed, shut the driver's door and reopen it after a few seconds. The alarm should sound. Turn the alarm off by hitting unlock on the keyfob.
 - For push button start vehicles, the Intelligent Access (IA) key must be away from the vehicle, otherwise the security system may disarm immediately upon trigger.
- 27. Test all other vehicle doors, the hood and the trunk in the same manner, by setting off the alarm and disarming with the keyfob.
- 28. If the VSS kit will not be upgraded to RMST/RMU functions at this time, install the LH lower IP insulator.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

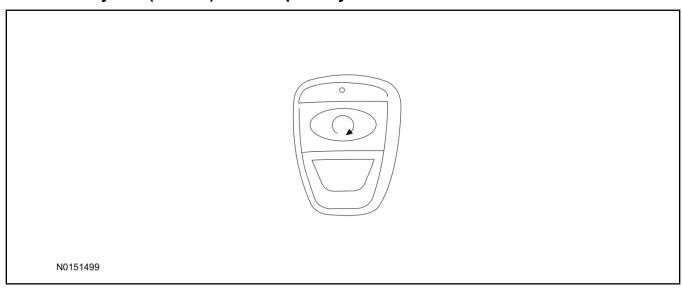

II. Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

Standard Key Fob (15K601) "Sold Separately"

Bi-directional Key Fob (15K601) "Sold Separately"

Optional RMST Upgrade Components "Sold Separately"

29. Review the RMST Upgrade components.

Remote Start (RMST) Upgrade - Antenna Kit "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Antenna (15603)
1	Security Jumper (15603)

Standard Key Fob (15K601) "Sold Separately"

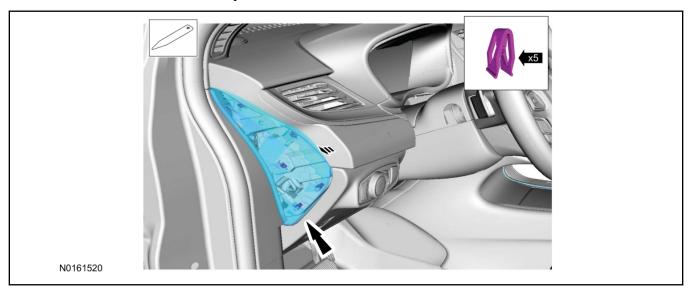

QUANTITY	DESCRIPTION
1	Standard Key Fob (15K601)

Bi-directional Key Fob (15K601) "Sold Separately"

QUANTITY	DESCRIPTION
1	Bi-directional Key Fob (15K601)

RMST Kit Antenna Installation

- 30. If previously installed, remove the LH lower IP insulator.
- 31. Position the top portion of the LH kick panel aside to allow for removal of the IP side finish panel.
- 32. Remove the LH IP side finish panel.

33. Clean the antenna mounting surface using an alcohol base solution and a clean cloth.

34. **NOTE:**

Do not touch the adhesive, reduced adhesion may result.

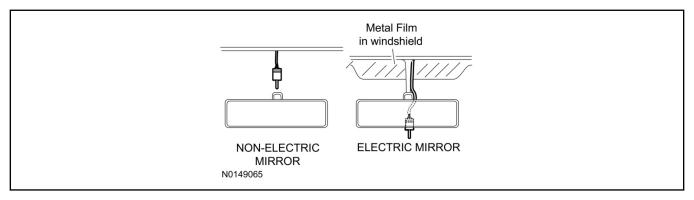

NOTE:

Make sure that the long wire on the antenna is pointing towards the top of the windshield since this wire will be routed along the headliner.

NOTE:

The wire will be attached to the control module later in this procedure.

Remove the protective backing from the adhesive on the antenna and firmly press the body of the antenna onto the mounting surface.

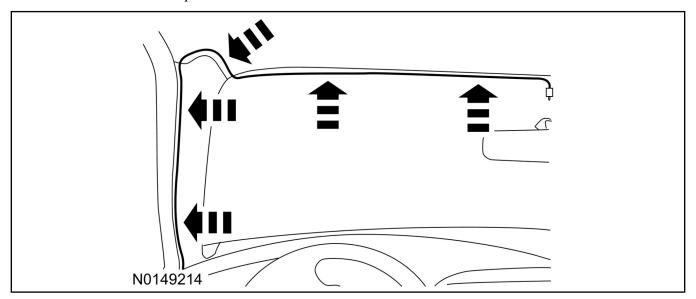

35. If necessary, position the A-pillar trim slightly outward to provide access to route the antenna wire.

NOTE:

Do not route the antenna wire over the top of air bags.

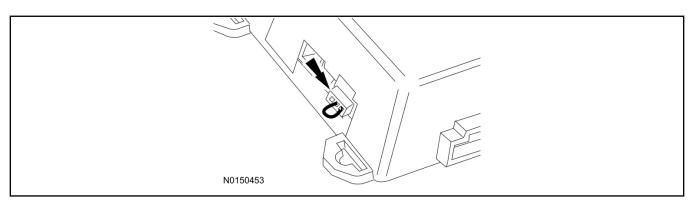

- 36. Route the antenna cable along the headliner and down the A-pillar towards the floor. Continue routing the wire into the IP towards the VSS module.
 - Secure with tie-straps.

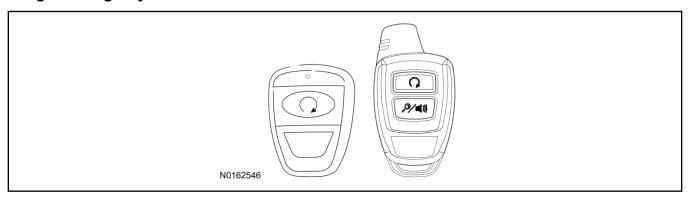

- 37. Connect the antenna connector to the VSS module.
- 38. Reposition the A-pillar trim panel back, if necessary.
- 39. Install the LH IP side finish panel. Position the weatherstrip and LH kick panel back.

VSS Module - Optional Vehicle Security Features

- 40. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

Programming Key Fobs

41. **NOTE**:

These steps must be performed with the VSS module security jumper removed if previously installed. For additional information refer to "VSS Module - Optional Vehicle Security Features".

NOTE:

The following steps must be performed with the driver door open.

- 1 Enter the vehicle with the vehicle key(s) and key fobs you wish to program.
- 2 Depress and hold brake pedal.
- 3 Press the start/stop button.
- 4 After the vehicle starts press the start/stop button to shut down.
- 5 Repeat steps 3 and 4 an additional four times, ending in ignition on, engine off.
- 6 Press the vehicle start/stop button twice to turn ignition on.
 - The horn will honk 3 times to indicate transmitter learn mode access.
- 7 Press the start stop button on each fob you wish to program.
- 8 Cycle ignition to the OFF position to exit transmitter learn mode.

9 **NOTE**:

If the security jumper is installed the vehicle security features are disabled.

If previously removed, reinstall the VSS module security jumper. For additional information, refer to "VSS Module - Optional Vehicle Security Features".

42. If the RMST kit will not be upgraded to RMU functions at this time, install the LH lower IP insulator.

RMST Functional Test

NOTE:

Do not put a key in the ignition for the following steps.

- 43. Make sure the shift lever is in PARK and the ignition is in the OFF position. Remove all keys from the vehicle.
- 44. Close the hood.
- 45. Close all of the vehicle doors.
- 46. Start the vehicle by pressing the remote start button twice on the remote start key fob.
- 47. Confirm the remote start works with the vehicle in park and with the hood and doors closed.
- 48. Open the hood.
- 49. **NOTE:**

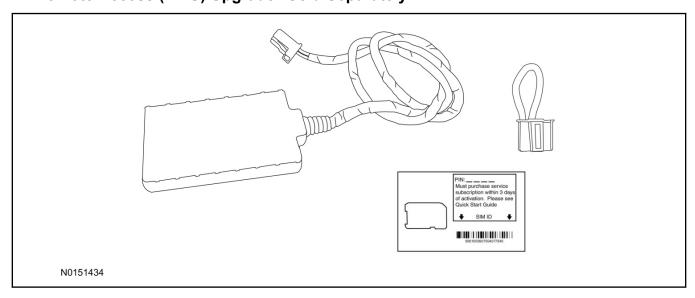

Vehicle doors should be closed while performing this step.

Confirm that the vehicle will not start with the hood open.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.

50. See the Scalable Remote Start System Diagnosis Guide to resolve issues identified by the functional test.

III. Remote Access (RMU) Upgrade "Sold Separately"

51. Review the RMU upgrade components.

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"

QUANTITY	DESCRIPTION
1	Remote Messaging Unit (RMU)
1	SIM Card Carrier

Optional Components — Remote Access (RMU) Upgrade "Sold Separately"(Continued)			
	1	Security Jumper	

52. If previously installed, remove the LH lower IP insulator.

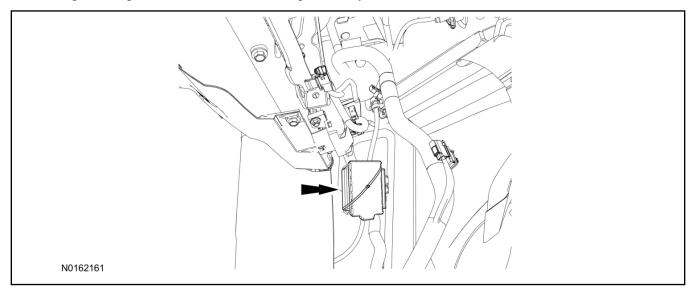

CAUTION:

Carefully route and secure module and harnesses so that they do not interfere with moving parts or linkages.

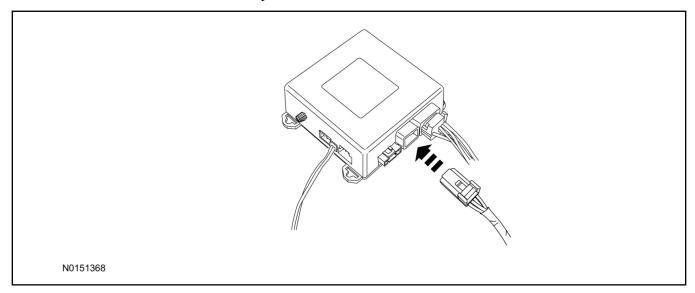

NOTE:

For proper range of operation, the RMU must be installed as shown in the diagram below.

53. Using tie-straps, secure the RMU to the previously installed VSS module.

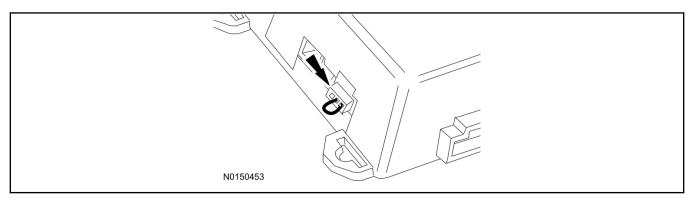

- 54. Connect the RMU electrical connector to the VSS module.
 - Secure the harness with tie-straps.

VSS Module - Optional Vehicle Security Features

- 55. Enable/Disable Vehicle Security Features: Locate the security jumper supplied in the kit.
 - Install the jumper to the VSS module if the vehicle security features are to be **disabled**.
 - Not installing and/or removing the jumper from the VSS module will keep the vehicle security features **enabled**.

56. Install the LH lower IP insulator.

RMU Activation

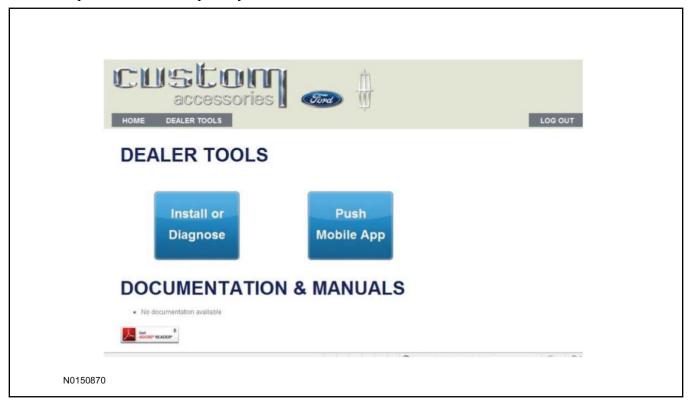

NOTE:

Please note that the Remote Access application that is used to start the vehicle for this RMST kit will only work with iPhone and Android phones.

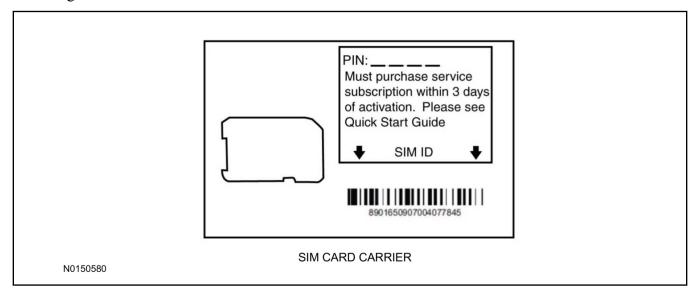

- 57. For RMU activation the following information from the customer is recommended to provide them with electronic notification for app retrieval:
 - 1 Email Address
 - 2 Cell Phone Number
 - 3 Cell Phone Carrier Company
- 58. Log on to your Professional Technician Society (PTS) account and enter the vehicle information.
 - 1 Select "Vehicle Id".
 - 2 Select "By Year & Model"
 - 3 Choose the year & model of the vehicle and then select "GO".
 - 4 Hover over the "Workshop" tab.
 - 5 Select the "Accessory Installation" menu item.
 - 6 Under the "Electrical" heading, select the "Remote Access Activation" link (first time users will need to agree to terms & conditions).
 - 7 Select the "Install or Diagnose" link.

NOTE:

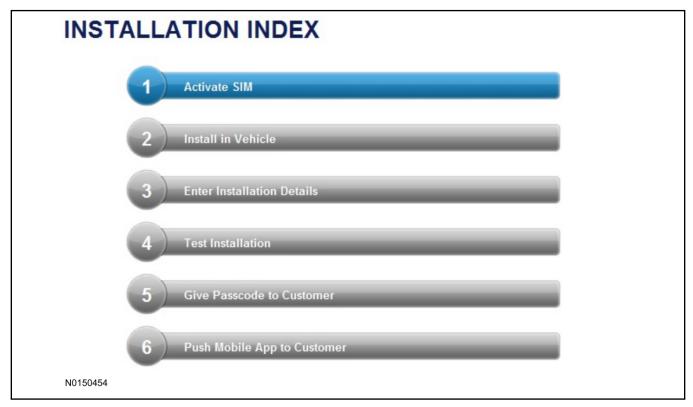

If you are not directed to the screen shown below (or user agreement screen for first time users), make sure your internet browser zone settings are set to medium. This setting can be found in your browsers "internet options" under the "privacy" tab.

59. Once on the "Install" page, enter the SIM ID code that was provided with the RMST kit. Select "Begin or Continue Installation".

60. Click on the "On screen steps 1-6", and follow the on screen instructions to complete the installation.

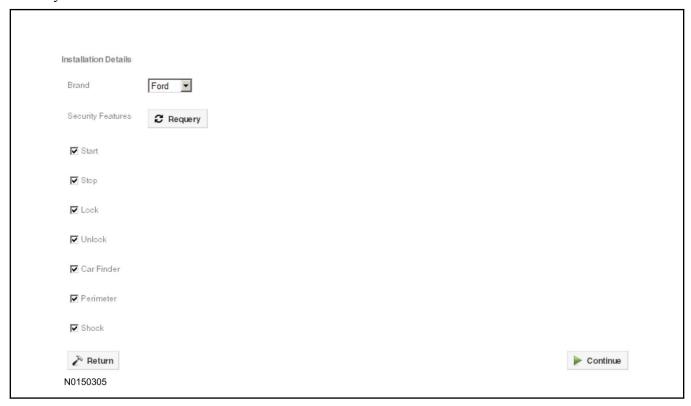

NOTE:

The following step will complete the activation process, when you are directed to a screen similar to the one below ensure the correct vehicle brand is selected and that all applicable features are enabled.

NOTE:

The "perimeter" and "shock" settings below are optional features and should only be selected when security features are enabled.

- 61. Perform a functional check of the system by testing each of the available features.
 - Start/Stop function
 - Lock/Unlock function
 - Car finder
 - Signal (for troubleshooting only)

NOTE:

All tests above must be completed in order to move to the next step. If any of the listed functions fail, move the vehicle to an outside location and retest.

- 62. Once the hardware installation and RMU activation process is complete, record the 4-digit PIN on the SIM card carrier. Provide the SIM card carrier to the customer so they can add this system to their Remote Access Account. Customer must have both the 4-digit PIN and SIM ID to activate/add their vehicle to their Remote Access Account
- 63. If the customer agrees, you may push the mobile application to the customer. You will need the customer's phone number and cellular carrier. If the customer opts to install the application themselves, they can locate it in their mobile app store.

Please contact 1-800-FORD-KEY with any issues regarding hardware or kit contents.
